TECHNICAL MANUAL)
 No. 55-1520-228-23P)

HEADQUARTERS
 DEPARTMENT OF THE ARMY
 WASHINGTON, D. C., 8 SEPTEMBER 1988

AVIATION UNIT AND INTERMEDIATE MAINTENANCE
 REPAIR PARTS AND SPECIAL TOOLS LIST
 (INCLUDING DEPOT MAINTENANCE REPAIR PARTS
 AND SPECIAL TOOLS)
 FOR
 HELICOPTER, OBSERVATION, OH-58A, OH-58C
 NSN 1520-00-169-7137
 1520-01-020-4216
 (Current as of 8 February 1989)

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistake or if you know of a way to improve these procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms), located in the back of this manual, directly to: Commander, US Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NP, Redstone Arsenal, AL 35898-5000. A reply will be furnished to you. You may also provide DA Form 2028 information to AMCOM via e-mail, or fax, or the World Wide Web. Our fax number is: DSN 788-6546 or Commercial 256-842-6546. Our e-mail address is 2028@redstone.army.mil. Instructions for sending and electronic 2028 may be found at the back of this manual immediately preceding the hard copy 2028. For the World Wide Web use: <https://amcom2028.redstone.army.mil>.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited

	Numerical Stock Number Listing		
	Alphanumeric Part Number Listing		

Section I. INTRODUCTION

1. Scope. This manual lists repair parts; special tools; test, measurement, and diagnostic equipment (TMDE); and other support equipment required for operation and performance of Aviation Unit Maintenance (AVUM), Aviation Intermediate Maintenance (AVIM), and Depot Maintenance of the Helicopter, Observation, OH-58A and Helicopter Observation, OH-58C.

It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

2. General. This Repair Parts and Special Tools List is divided into the following sections:

a. Section II - Repair Parts Lists. A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. This section is arranged by functional group, usually in disassembly order, and listed in figure and item sequence. Items are indented when required to indicate the relationship to the next higher assembly. The illustrations in this section will appear immediately preceding each figure of text. Items which are not assigned SMR codes appear for informational purposes only and are not to be requisitioned.

b. Section III - Special Tools List. A list of special tools, TMDE, and support equipment authorized for the performance of maintenance. This section, which is arranged in figure and item number sequence contains Airframe Tools (figure numbers prefixed A), Flyaway Items (figure numbers prefixed F), and Ground Support Items (figure numbers prefixed G). The illustrations will appear immediately following the text portion of each group.

c. Section IV - National Stock Number and Part Number Index. A list, in ascending National Item Identification Number (NIIN) sequence, of all national stock numbers appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock number and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns. The following provides an explanation of columns found in the tabular listings:

a. Item Number. The number used to identify each item called out in the illustration.

b. Source, Maintenance, and Recoverability Codes (SMR).

(1) Source Code. The Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR code format as follows:

Code	Definition
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded-PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specific maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at Aviation Unit Maintenance (AVUM) or Aviation Intermediate Maintenance (AVIM) levels.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at Aviation Unit Maintenance (AVUM) level.
MF	Item to be manufactured or fabricated at Aviation Intermediate Maintenance (AVIM) level.
MD	Item to be manufactured or fabricated at the Depot Maintenance level.
AO	Item to be assembled at Aviation Unit Maintenance (AVUM) level.
AF	Item to be assembled at Aviation Intermediate (AVIM) level.

- AD Item to be assembled at Depot Maintenance level.
- XA Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
- XB Item is not procured or stocked. If not available through salvage, requestion.
- XC Installation drawing, diagram, instructin sheet, field source drawing, that is identified by manufacturer's part number.
- XD A support item that is not stoked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a **source of supply for any** items source coded above except those coded XA, XC, or XD, and airframe support items as restricted by AR 700-42.

(2) Maintenance Code. Maintenance codes are assigned to indicate the levels of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	Application/Explanation
0	Support item is removed, replaced, used at the Aviation Unit Maintenance (AVUM) level.
F	Support item is removed, replaced, used at the Aviation Intermediate Maintenance (AVIM) level.
D	Support items that are removed, replaced, used at Depot. mobile depot, specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions) . This position will contain one of the following maintenance codes:

Code	Application/Explanation
0	The lowest maintenance level capable of complete repair of the support item is the Aviation Unit Maintenance (AVUM) level.
F	The lowest maintenance level capable of complete repair of the support item is the Aviation Intermediate Maintenance J(AVIM) level.
D	The lowest maintenance level capable of complete repair of the support item is the Depot level, performed by depot, mobile depot, or specialized repair activity.
L	Repair restricted to designated specialized repair activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Recoverability Code. Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR code format as follows:

Code	Definition
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
0	Reparable item. When uneconomically repairable, condemn and dispose at Aviation Unit Maintenance (AVUM) level.
F	Reparable item. When uneconomically repairable, condemn and dispose at Aviation Intermediate Maintenance (AVIM) level.
D	Reparable item. When beyond lower level repair capability, return to Depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

d. Part Number. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity) , which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements, to identify an item or range of items.

e. Description Indicates the Federal item name and any additional description required to identify the item. This column will also contain the Basis of Issue (BOI) for Special Tools, Ground Support, and Flyaway Equipment.

f. Quantity. Indicates the quantity of the item required for one assembly only including instances when similar assemblies are broken down together. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (E.g., shims, spacers, etc.) . When parts are shown as attaching two or more items, the quantity of these parts are those necessary to attach only one of the items.

4. Explanation of Columns (Section IV).

a. National Stock Number (NSN) Index.

(1) Stock Number Column. This column lists the NSN by National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine

NSN

digits of the NSN (i.e., 5305-01-674-1467). When using this column to

NIIN

locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) Figure Column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) Item Column. The item number identifies the item associated with the figure listed in the adjacent figure column. This item is also identified by the NSN listed on the same line.

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, following by the numbers 0 through 9 and each following letter or digit in like order) .

(1). FSCM Column. The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc. , that supplies the item.

(2). Part Number Column. Indicates the primary number used by the manufacturer (individual) , firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

Stock Number Column. This column lists the NSN for the associated part number and manufacturer identified in the part number and FSCM columns to the left.

(4) Figure Column. This column lists the number of the figure where the item is identified/located in Section II and Section III.

(5) Item Column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. Special Information.

a. Usable On Code. The usable on code appears in the left-hand corner of the Description column heading. Usable on codes are shown as "UOC: . . ." in the Description Column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models.

b. Fabrication Instructions. Bulk materials required to manufacture items are listed in the Bulk Material Functional Group of this RPSTL. Part numbers for bulk materials are also referenced in the description column of the line item entry for the item to be manufactured/ fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in TM 55-1520-228-23-2.

c. Assembly Instructions. Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM 55-1520-228-23-2. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

d. Kits. Line item entries for repair parts kits appear in a group in Section II (see table of contents) .

e. Index Numbers. Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the National Stock Number/Part Number Index and the bulk material list in Section II.

f. Associated Publications. The publications listed below pertain to OH-58A, OH-58C and their components.

Publication and Short Title

TM 11-1520-228-20 - Organizational Maintenance Manual: Electronic Equipment Configuration Army Model OH-58A, OH-58C Helicopters.

TM 11-1520-228-20P - Organizational Maintenance Repair Parts and Special Tools List: Installation Items for Electronic Equipment on OH-58A, OH-58C Helicopters.

TM 11-1520-228-35 - DS, GS, and Depot Maintenance Manual: Electronic Configuration Army Model OH-58A, OH-58C Helicopters.

TM 11-1520-228-35P - DS, GS, and Depot Maintenance Repair Parts and Special Tools Lists: Installation Items for Electronic Equipment on OH-58A, OH-58C Helicopters.

TM 55-1520-228-10 - Operator's Manual: Army Model OH-58A, OH-58C, Helicopters.

TM 55-1520-228-23 - AVIM, AVIM Manual: Army Model OH-58A, OH-58C Helicopters.

TM 55-2840-231-23P - AVUM, AVIM Repair Parts and Special Tools List (Including Depot Maintenance Repair Parts and Special Tools): Engine, Aircraft, Turbine (Allison) T-63-A5A, T-63-A-700.

TM 55-2840-241-23P - AVUM, AVIM Repair Parts and Special Tools List (Including Depot Maintenance Repair Parts and Special Tools): Engine, Aircraft, Gas Turbine T63-A-720, NSN 2840-01-013-1339.

6. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Unknown:

(1) First. Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the assembly group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Fourth. Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number is Known:

(1) First. Using the National Stock Number and Part Number Index, find the pertinent National stock number or part number. This index is in ascending National Item Identification Number (NIIN) sequence followed by a list of part numbers in ascending alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) Second. After finding the figure and item number, locate the figure and item number in the repair parts list.

c. Supplementary Listing. In the event of a supplemental index, reference should be made first to supplement indices for the latest changes in part numbers, national stock numbers and changes in figure and item numbers before referencing the basic index.

7. Abbreviations (Mnemonic Codes).

Abbreviation	Explanation
AN	Air Force-Navy
ANPT	Aeronautical national taper pipe thread
APLTO	Applicable to
AWG	American wire gage
BE	Bale
BKDN	Breakdown
BRKDN	Breakdown into
BT	Bottle
BTU	British thermal unit (s)
BX	BoX
cc	Cubic centimeter (s)
CFM	Cubic feet per minute
CFS	Cubic feet per second
CI	Cubic inch
CN	Can
CNSWTH	Consolidated with
c/o	Consists of (component of)
CP	Candle power
CRES	Corrosion resistant steel
CW	Continuous wave(s)
DEG	Degree (s)
DR	Drum
FMC	Federal manufacturer's code
GL	Gallon
GPH	Gallons per hour

INTRCH	Interchangeable with
KC	Kilocycle(s)
KT	Kit
KW	Kilowatt(s)
LH	Left-hand
MIM	Minimum
MSUP	Maintenance supplies
MWO	Modification work order
NAS	National aircraft standard
NC	American national course thread
NEF	American national extra fine thread
NF	American national fine thread
NHA	Next higher assembly
NS	American national special thread
O/A	Over-all
OBS-AFT-CMPL-W	Obsolete after compliance with
OBS-BY	Obsolete by
OBSKTS	Obsoletes
OC	Piece
PG	Package
PK	Pack
PROM	Plus or minus
PT	Pint
RH	Right-hand
RMKS	Remarks
RO	Roll
RPL-BY	Replaced by
RPSL	Replaces
SE	Set
SF	Square foot
S1	Square inch
SL	spool
SPEC	Specification(s)
SX	Stick
TRNSTO	Transfer to
TU	Tube
u/o	Used on
USBL EFF	Usable effectivity
USE-AFT-COMP-W	Usable after compliance with
u/w	Used with
W	Watt(s)
W	Wide, width
W/	With
WHEN EXHTD RQTN	When exhausted requisition next higher assembly
NHA	
W/O	Without

By Order of the Secretary of the Army:

Official:

WILLIAM J. MEEHAN II
Brigadier General, United States Army
The Adjutant General

CARL E. VUONO
General, United States Army
Chief of Staff

DISTRIBUTION:

To be distributed in accordance with DA Form 12-31, AVUM and AVIM Maintenance requirements for OH-58A and OH-58C Helicopter, Observation.

These are the instructions for sending an electronic 2028

The following format must be used if submitting an electronic 2028. The subject line must be exactly the same and all fields must be included; however only the following fields are mandatory: 1, 3, 4, 5, 6, 7, 8, 9, 10, 13, 15, 16, 17, and 27.

From: "Whomever" <whomever@wherever.army.mil>

To: 2028@redstone.army.mil

Subject: DA Form 2028

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 decagram = 10 grams = .35 ounce
 1 hectogram = 10 decagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet
