 PARTS AND SPECIAL TOOLS LIST

TRANSPORTER, AIRMOBILE

FSN 1740-901-1870
 1740-902-3132

TM 55-1740-201-23P, 23 March 1971 is changed as follows:

Page vi, para 6, lines 8 and 9 are changed as follows: Systems Command, ATTN: AMSAV-MMD, 4300 Goodfellow Blvd, St. Louis, Missouri 63120-1798.

Page 5, Figure 3. Add callout numbers 35 and 36, as illustrated on the new Figure 3 in back of change.

Page 9, after 8th line item, FASTENER ASSEMBLY. Add the following:

X2-0--	B2740-103-10	(92867)	BRAKE	CABLE	ASSY	R	EA	1	3	35
X2-0--	B2740-103-11	(92867)	BRAKE	CABLE	ASSY L		EA	1	3	36

By Order of the Secretary of the Army:

CARL E. VUONO
General, United States Army
Chief of Staff

Official:

WILLIAM J. MEEHAN II
Brigadier General, United States Army
The Adjutant General

DISTRIBUTION:

To be distributed in accordance with DA Form 12-31, AVUM and AVIM Maintenance requirements for All Fixed and Rotary Wing Aircraft.

SECTION I INTRODUCTION

1. Scope

This manual lists the repair parts and special tools required for the performance of organizational and direct support maintenance of Transporter, Airmobile FSN 1740-901-1870 and 1740-902-3132.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Prescribed Load Allowance (PLA) Section II. Not applicable.

b. Repair Parts - Section III. A list of repair parts authorized for the performance of maintenance at the organizational and DS level.

c. Special Tools, Test and Support Equipment - Section IV. Not applicable.

d. Federal Stock Number and Reference Number Index - Section V. This section is divided as follows:

- (1) A list of federal stock numbers in ascending numerical sequence cross-referenced to the illustration figure and item number.
- (2) A list of reference numbers in ascending alphanumerical sequence cross-referenced to the manufacturers federal supply code, illustration figure and item number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular list in section III.

a. Source, Maintenance, and Recoverability Codes (SMR).

- (1) Source code, indicates the selection status and source for the listed item. Source codes used are:

<i>Code</i>	<i>Explanation</i>
P	Repair Parts, Special Tools and Test Equipment supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance categories.

<i>Code</i>	<i>Explanation</i>
P	Repair Parts, Special Tools and Test Equipment which are procured and stocked for insurance purposes because, the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
P9	Assigned to items which are NSA design controlled: unique repair parts, special tools, test, measuring and diagnostic equipment, which are stocked and supplied by the Army COMSEC Logistic System and which are not subject to the provisions of AR 380-41.
P10	Assigned to items which are NSA design controlled: special tools, test, measuring and diagnostic equipment for COMSEC support, which are accountable under the provisions of AR 380-41, and which are stocked and supplied by the Army COMSEC Logistic System.
M	Repair Parts, Special Tools and Test Equipment which are not procured or stocked, as such, in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stock as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance categories.
X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item of component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
X2	Repair Parts, Special Tools, and Test Equipment which are not stocked and have no foreseen mortality. The in-

total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance columns. Items authorized for use as required, but not for initial stockage are identified with an asterisk (*) in the allowance column.

- (2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads, will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column to obtain the total quantity of repair parts required.
- (3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of repair parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 12; for 140 equipments multiply 12 by 1.40 or 16.80 rounded off to 17 parts required.
- (4) Subsequent changes to allowances will be limited as follows. No changes in the range of items is authorized. If additional items are considered necessary, recommendations should be forwarded to the Commanding General, U. S. Army Aviation Systems Command (USAAVSCOM), P. O. Box 209, St. Louis, MO 63166, for exception or revision to the allowance list. Revisions to the range of items authorized will be made by USAAVSCOM based upon engineering experience, demand data, or The Army Equipment Records System (TAERS) infor-

mation.

g. Thirty-Day DS Maintenance Allowances.

- (1) The allowance column is divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the applicable allowance columns. Items authorized for use as required, but not for initial stockage are identified with an asterisk (*) in the allowance column.
- (2) The quantitative allowances for DS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported. The basis of issue for authorized special tools, test and support equipment is the number of end items of equipment supported.
- (3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipments can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

h. One-Year Allowances Per 100 Equipments/Contingency Planning Purposes.

When applicable, this column indicates opposite the first appearance of each item the total quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide adequate support of 100 equipments for 1-year.

i. Illustration. This column is divided as follows:

- (1) *Figure Number.* Indicates the figure number of the illustration

in which the item is shown.

- (2) **Item Number.** Indicates the call-out number to reference the item in the illustration.

4. How to Locate Repair Parts

a. When Federal Stock Number or Reference Number is Unknown:

- (1) **First.** Find the illustration of the assembly or subassembly to which the repair part belongs.
- (2) **Second.** Identify the repair part on the illustration and note the illustration figure and item number of repair part.
- (3) **Third.** Using the Repair Parts Listing, find the figure and item number listed in the illustration column.

b. When Federal Stock Number or Reference Number is Known:

- (1) **First.** Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent federal stock number or reference number. This index is in ascending federal stock number sequence followed by a list of reference numbers in alphanumeric sequence, cross-referenced to the illustration figure and item number.
- (2) **Second.** Using the Repair Parts Listing, find the figure and item number listed in the illustration column referenced in the Index of Federal Stock Numbers and Reference Numbers.

5. Federal Supply Codes for Manufacturers

<i>Code</i>	<i>Manufacturer</i>
