APPENDIX	A.	PUBLICATIONS	32

*This technical bulletin supersedes TB 55-1935-204-12, 2 July 1985.

SECTION I. INTRODUCTION

1. General.

a. This bulletin for Crane, Barge, Diesel Electric, 100 short ton capacity, Design 264B, is intended as an aid in identification, procurement, requisitioning, assembly, storage, and issue of operating equipment, operating supplies, onboard repair parts, and accessory items aboard the vessel..

b. The Boat Set will be issued initially complete by ATCOM.

c.. Requisitions for replacement of component items will be submitted to the managing activity having issue responsibility.

d. .When watercraft is transferred or returned to inactive status, the Boat Set will be complete and turned in with the vessel.

2. Format of Technical Bulletin. This technical bulletin is divided into the following sections:

a. **Section II - Operating Equipment.** This section lists equipment necessary for the operation of the vessel exclusive of accessory equipment.

b. **Section III - Operating Supplies.** This section lists operating supplies which are consumed in use, exclusive of repair parts. They are required for the operation, maintenance, health and welfare of the crew.

c. **Section IV - On Board Repair Parts.** This section lists repair parts issued and required on board the vessel at all times when on active status. Due to configuration differences, it will be necessary to reflect hull numbers where differences exist.

d. **Section V - Accessory Items.** This section lists accessory equipment on board which are installed by the manufacturer or by the Issuing agency and are considered as a part of the basic configuration of the vessel.

3. Excess Items. This bulletin does not constitute authorization for excessing or disposing of any operating equipment, supplies, or on board spare parts which are currently on board or marked for this vessel. Excess items will be exhausted by normal attrition. .

4. Composition of Technical Bulletin. The component listing within each section is in alphabetical sequence by item name and contains the following data:

a. **National Stock Number (NSN).** A number listed in this publication for use in all supply operations.

b. **Description.** The item descriptions included are listed in alphabetical sequence by item name, with additional descriptive information required for identification:

(1) Manufacturer's Code, part numbers, and/or the applicable specification references.

(2) Pertinent information and notes applicable to the set follow the last component.

c. **Quantity Per Set (Qty).** This column lists the quantities of each component authorized.

d. **Expendability - Recoverability (Rec) Code.** This one digit code indicates the method or condition under which the repair parts can be recovered. Absence of a code indicates the item is expendable. Codes that appear are defined as follows:

Codes	Definition
Z	Non-repairable item. When unserviceable, condemn and dispose at the level indicated by source, maintenance, and recoverability code.
O	Reparable item. When uneconomically repairable, condemn and dispose at organizational level.

Codes	Definition
F	Reparable item. When uneconomically repairable, condemn and dispose of at the following intermediate levels: USAF - Intermediate USA - Direct Support USN - Afloat USMC - Third Echelon
H	Reparable item. When uneconomically repairable, condemn and dispose of at the following levels: USAF - Intermediate USA - General Support USN - Ashore USMC - Fourth Echelon
NOTE	
<p>For the Safeguard Program, Code F, will be used to denote intermediate level. On joined programs, use of either Code F or H by the joining service will denote intermediate level of USAF and the USA Safeguard Programs.</p>	
D	Reparable item. When beyond lower level repair capability, return to depot, Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material) . Refer to appropriate manuals/directives for specific instructions.

5. Abbreviations.

By Order of the Secretary of the Army:

Official:

GORDON R. SULLIVAN
General, United States Army
Chief of Staff

MILTON H. HAMILTON

Administrative Assistant to the
Secretary of the Army

07122

DISTRIBUTION:

No -12 series initial distribution. Resupply only.

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors
