

DEPARTMENT OF THE ARMY TECHNICAL BULLETIN

MANDATORY BRAKE HOSE INSPECTION
AND REPLACEMENT-TACTICAL VEHICLES

Headquarters, Department of the Army, Washington, DC

21 July 1989

1. Purpose. This bulletin is to alert operators, organizational, direct and general support personnel to the safety hazards involving brake hose failures on Tank-Automotive Command tactical vehicles.

2. Procedures. The brake systems on all tactical vehicles will be closely inspected during scheduled semiannual services. Pay extremely close attention to all flexible hydraulic brake hoses installed on the vehicle. Where the brake hose is close to the frame, check for wear, pinching, or interference. If any of these are found, the hose must be carefully inspected for serviceability and replaced and repositioned to prevent failure. When inspection shows that hose is worn, chafed, cracked, crimped or abraded which has resulted in damage to hose through outer casing to the first ply of fabric, it is mandatory that hose assembly be replaced prior to use of the vehicle. If there is any evidence of hose leakage, the hose must be replaced prior to use of the vehicle. Also, if there is evidence of internal hose damage such as bulges, hose must be replaced prior to placing vehicle in service.

3. Preventive Maintenance Checks and Services (PMCS). PMCS tables of the affected TM's are being changed to include the above inspections.

4. Reporting of Equipment Publication Improvement. The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications and Blank Forms) and forwarded direct to U.S. Army Tank-Automotive Command, ATTN: AMSTA-MB, Warren, MI 48397-5000.
