**PART II
ARMAMENT AND TURRET COMPONENTS**

CURRENT AS OF 18 JULY 1989

TM 9-2350-304-20P, 9 July 1981, is changed as follows:

1. Remove old pages and insert new pages indicated below.
2. New or changed material is indicated by a vertical bar in the margin of the page.
3. Revised illustrations are indicated by a miniature pointing hand.

Remove pages
(63 blank)/64 through 70
73 through 82
85 and 86
319 through 358
(361 blank)/362 through 362.2
437 through 444

Insert pages
(63 blank)/64 through 70
73 through 82
85 and 86
319 through 358
(361 blank)/362 through 362.2
437 through 444

4. File these change sheet in front of the publication for reference purposes.

By Order of the Secretary of the Army:

CARL E. VUONO
General, United States Army
Chief of Staff

Official:

WILLIAM J. MEEHAN II
Brigadier General, United States Army
The Adjutant General

DISTRIBUTION: To be distributed in accordance with DA Form 12-37E, (Block 1105), Unit Maintenance Requirements for TM 9-2350-304-20P.

CURRENT AS OF 24 OCTOBER 1986

TM9-2350-304-20P, 9 July 1981, is changed as follows:

1. Remove old pages and insert new pages as indicated below.

Remove pages

v thru viii
372.1 and 372.2
373 and 374
NONE
377 and 378
NONE
381 and 382
NONE
431 and 432
435 thru 446

Insert pages

v thru viii
372.1 and 372.2
373 and 374
376.1 thru 376.3/(376.4 blank)
377 and 378
380.1 thru 380.3/(380.4 blank)
381 and 382
430.1/(430.2 blank)
431 and 432
435 thru 446

2. New or changed material is indicated by a vertical bar in the margin.
3. Change 5 incorporates equipment modification known as Kit 6, authorized by ERR W3A2036, so that figures and repair parts lists reflect both old and new configurations.
4. Change 5 adds a functional group for components of end item (COEI), which includes M90 chronograph antenna mounting bracket (authorized by ERR W5A0066).

File this and all change sheets in back of manual for reference.

By Order of the Secretary of the Army:

CARL E. VUONO
General, United States Army
Chief of Staff

Official:

R. L. DILWORTH
Brigadier General, United States Army
The Adjutant General

DISTRIBUTION:

To be distributed in accordance with DA Form 12-37, Unit Maintenance requirements for Howitzer, Heavy, Self-Propelled, 8-Inch, M110A2.

None	36.1(36.2 Blank)		

2. Change 1 incorporates PIP Kit 5 and other product improvements.

3. PIP Kit 5 changes include the following new items: a suspension isolation system, a driver's exterior warning light, a hydraulic system filter indicator light, and a hydraulic pump relief valve. Other changes include the following product improvement: parking brake system, driver's hatch torsion bar, adjustable gunner's seat, projectile stowage racks, elevating and traversing clutches, lockout cylinders, and hydraulic motor drain lines. In addition to PIP Kit 5 changes listed above, the following product improvements have been incorporated in new production vehicles: auxiliary driver control rod and road wheel lubrication which has been changed from oil to grease. Vehicles not updated by PIP Kit 5 and product improvement changes are identified as "O" vehicles and those that have been updated by PIP Kit 5 and product improvement changes are identified as "N" vehicles.
4. A new engine has been introduced and may be used in either "O" or "N" vehicles. The new engine and related parts are identified by Engine Model Number 7083-7395 and the old engine and related parts by Engine Model Number 7083-7398.
5. Retain these sheets in front of manual for reference.

Section IV. NATIONAL STOCK NUMBER AND PART NUMBER INDEX (PART II).....	438	

Section I. INTRODUCTION

1. Scope.

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational, direct support, and general support maintenance of the 8-inch howitzer M 11 A2. It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

2. General.

This repair parts list, special tools list and NSN/ Part Number Index is divided into Parts I and II.

Part I is for: Hull and related components

Part II is for: Armament and turret components

a. *Section II. Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in NSN sequence

b. *Section III, Special Tools Lists.* A list of special tools, special TMDE, and other special support equipment authorized for the performance of maintenance at the organizational level.

c. *Section IV, National Stock Number and Part Number Index.* A list, in ascending National Item Identification Number (NIIN) (last nine numerals) sequence, of all national stock numbers appearing in the listings followed by a list, in alpha-numeric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns.

The following provides an explanation of columns found in the tabular listings:

a. *Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* The number used to identify each item called out in the illustration.

b. *Source, Maintenance, and Recoverability (SMR, Codes).*

(1) *Source code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	Definition
PA-Item procured and stocked for anticipated or known	

usage.

PB-Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply system.

PC-Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.

PD-Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional issue or outfittings. Not subject to automatic replenishment.

PE-Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.

PF-Support equipment which will not be stocked but which will be centrally procured on demand.

PG-Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.

KD-An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.

KF-An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.

KB-Item included in both a depot overhaul/repair kit and a maintenance kit.

MO-Item to be manufactured or fabricated at organizational level.

MF-Item to be manufactured or fabricated at the direct support maintenance level.

MH-Item to be manufactured or fabricated at the general support maintenance level.

MD-Item to be manufactured or fabricated at the depot maintenance level.

AO-Item to be assembled at organizational level.

AF-Item to be assembled at direct support maintenance level.

AH-Item to be assembled at general support maintenance level.

AD-Item to be assembled at depot maintenance level.

XA-Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.

XB-Item is not procured or stocked. If not available through salvage, requisition.

XC-Installation drawing, diagram, instruction sheet, field service drawing that is identified by manufacturer's part number.

XD-A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the fourth position will indicate one of the following levels of maintenance:

Code	Application/Explanation
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
D	Support items that are removed, replaced, used at depot mobile depot, specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item in the general support level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level, performed by depot, mobile depot or specialized repair activity.
L	Repair restricted to designated specialized repair activity.
Z	Nonreparable item. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Codes	Definition
Z	Nonreparable item. When unserviceable condemn and dispose at the level indicated in position 3.
O	Reparable item. When uneconomically reparable, condemn and dispose at organizational level.
F	Reparable item. When uneconomically reparable, condemned dispose at the direct support level.
L	Reparable item. Repair, condemnation and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures

because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

H-Reparable item. When uneconomically reparable, condemn and dispose at the general support level.

D-Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.

c. *National Stock Number.* Indicates the national stock number assigned to the item and will be used for requisitioning purposes.

d. *Part Number.* Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the item received may have a different part number than the part being replaced.

e. *Federal Supply Code for Manufacturer (, .* The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

f. *Description.* Indicates the federal item name and, if required, a minimum description to identify the item. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column. In the Special Tools List, the initial basis of issue (BOI) appears as the last line in the entry for each special tool, special TMI)E, and other special support equipment.

g. *Unit of Measure (U/M).* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g., shims, spacers, etc.).

4. Special Information

a. Usable on codes are shown in the description column. Vehicle items not updated by PIP Kit 5 and other product improvement changes are identified in the RPSTL as "O" items. Those that have been updated by PIP Kit 5 and other product improvement changes are identified as "N" items. Uncoded items are common to both improved and unimproved vehicles.

b. Usable on codes are shown in the description column. Vehicle items not updated by Modification Kits 11784130 and 11784074 and other product improvement changes are identified in the RPSTL as "O-N" items. Those that have been updated by the above modification kits and product improvement changes are identified as "N-A" items. Uncoded items are common to all vehicles.

c. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 9-2350-304-20 maintenance manual. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual.

d. Detailed assembly instructions for items source coded to be assembled are found in TM 9-2350-304-20 maintenance manual. Assembly components are listed immediately following the item to be assembled.

e. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for the figure in which its parts are listed as repair parts.

Note

"P" source coded items with missing National stock numbers are items which are not recorded in the Army master data file (AMDF) cannot be requisitioned from the supply system. When these stock numbers are broadcast in the AMDF, they will be provided by a change to the manual. If justified, these items may be requisitioned on an exception basis using the Army part number or manufacturer's part number and code.

Field and Depot Maintenance Repair Parts Lists):
Generator, Engine Assembly (300-Amp)

g. The illustrations in this manual are identical to those published in the higher level of maintenance manuals, e.g. -34P and -35P. Only those parts assigned the third position SMR maintenance code "C" or "O" are listed in the tabular listing; therefore, there may be a break in the item number sequence. Only illustrations containing organizational authorized items appear in this manual.

5. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Unknown:

(1) *First.* Determine if repair part is a component of the Hull (Part I) or a component of Armament or Turret (Part II). Then, using the

table of contents, determine the functional subgroup within which the repair part belongs. This is necessary since illustrations are prepared for functional subgroups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the subgroup to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number Part is Known:

(1) *First.* Determine if part is a Hull component (Part I) or an Armament and Turret component (Part II). Using the Index of National Stock Numbers and Part Numbers, find the pertinent national stock number or part number. This index is in ascending NIIN (last nine numerals) sequence, followed by a list of part numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list. Hull components are in Part I and Armament and Turret components are in Part II.

6. Abbreviations.

The abbreviations used in this publication are common in trade practice and MIL-STD-12, Military standard abbreviations for use on drawings, specifications, standards and in technical documents.

Abbreviation/Explanation

ADPTR	Adapter	NF	National Fine
ARR	Arrangement	NO	Number
