REPAIR PARTS AND SPECIAL TOOLS LIST)**

SECTION I. INTRODUCTION

1. Scope.

This RPSTL lists and authorizes spares and repair parts, special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of Direct Support and General Support Maintenance of the Tractor. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

2. General.

In addition to Section I. Introduction, this Repair Parts and Special Tools List is divided into the following sections:

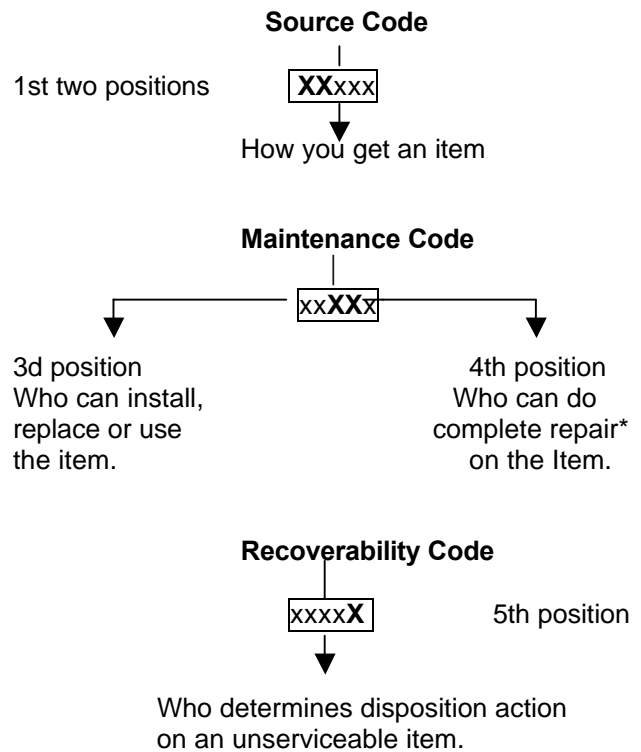

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair kits are listed separately in their own functional group within Section II. Repair parts for repairable special tools are also listed in the section. Items listed are shown on the associated illustration(s)/figure(s).

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as Indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE column) for the performance of maintenance.

c. Cross-reference Indexes. A list, in National Item Identification Number (NIIN) sequence, of all National stock numbered items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration, figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, CAGE and part numbers.

3. Explanation of Columns (Sections II and III).

- a. *ITEM NO.* (Column (1)). Indicates the number used to identify items called out in the illustration.
- b. *SMR CODE* (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria and disposition instructions, as shown in the following breakout:

*Complete Repair. Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code The source code tells you how to get an item needed for maintenance, repair or overhaul of an end item/equipment. Explanations of source codes follows:

Code	Application/Explanation
PA	Stocked Items; use the applicable NSN to request requisition Items with these source codes. They are authorized to the category Indicated by the code entered In 3d position of the SMR code
PB	
PC**	
PD	
PE	
PF	
PG	**Items coded PC are subject to deterioration.
KD	Items with these codes are not to be requested/requisitioned Individually. They are part of a kit which is authorized to the maintenance category indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied.
KF	
KB	
MO-(Made at UM AVUM Level)	Items with these codes are not to be requested requisitioned Individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) column and listed In the Bulk Material group of the repair parts list in this RPSTL If the item is authorized to you by the 3d position code of the SMR code, but if the source code indicates it is made at a higher level, order the Item from the higher level of maintenance.
MF- (Made at DS/ AVUM Level)	
ML-(Made at Specialized Repair Act (SRA))	
MD-(Made at Depot)	
AO-(Assembled by UM/AVUM)	Items with these codes are not to be requested/requisitioned individually.
AF-(Assembled by DS/AVIM Level)	The parts that make up the assembled item must be Requisitioned or fabricated and assembled at the level of maintenance indicated by the source Code. If the 3d position code of the SMR code authorizes you to replace the item, but the source code
AH-(Assembled by GS Category)	
AL-(Assembled by SRA)	

AD-(Assembled by Depot)	indicates the item is assembled at a higher level, order the item from the higher level of maintenance.
XA -	Do not requisition an "XA"-coded Item. Order it's next higher assembly. (Also, refer to the NOTE below).
XB-	If an "XB" Item is not available from salvage order it using the CAGE and part number given.
XC-	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by the manufacturer's part number.
XD-	Item is not stocked. Order an "XD"- Coded item through normal supply Channels using the CAGE and part Number given, if no NSN is available.

NOTE: Cannibalization or controlled exchange, when authorized, may be used as source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 700-42.

(2) *Maintenance Code.* Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

<u>Code</u>	<u>Application/Explanation</u>
C -	Crew or operator maintenance done within unit or aviation unit maintenance.
O -	Unit maintenance or aviation unit category can remove, replace, and use the item.
F -	Direct support or aviation intermediate level can remove, replace, and use the item.
H -	General support level can remove , Replace and us the item.

- L - Specialized repair activity can remove, replace and use the item.
- D - Depot level can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions) (NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes.

Code Application/Explanation

- O - Unit maintenance or Aviation unit is the lowest level that can do complete repair of the item.
- F - Direct support or aviation intermediate is the lowest level that can do complete repair of the item.
- H - General support is the lowest level that can do complete repair of the item.
- L - Specialized repair activity is the lowest level that can do complete repair of the item.
- D - Depot is the lowest level that can do complete repair of the item.
- Z - Nonreparable No repair is authorized
- B - No repair is authorized (No parts or Special tools are authorized for the maintenance of a "B" coded item). However, the item may be reconditioned by adjusting, lubrication, etc., at the user level.

(3) *Recoverability Code*. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Code Application/Explanation

- Z - Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3d position of the SMR code.
- O - Reparable item. When Uneconomically repairable, condemn and dispose of the Item at unit maintenance or aviation unit level.

- F - Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support or aviation intermediate level.
- H - Reparable item. When uneconomically repairable, condemn and dispose of the item at the general support level.
- D - Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item Not authorized below depot level.
- L - Reparable item. Condemnation and disposal of item not authorized below specialized repair activity (SRA).
- A - Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals, directives for specific instructions.

c. *NSN* (Column (3)). Lists the National Stock Number (NSN) assigned to the item. use the NSN to request/requisition.

d. *CAGEC* (Column (4)). The Commercial And Government Entity (CAGE) Code (C) is a 5-digit alphanumeric code which is used to identify the manufacturer, distributor or Government agency, etc., that supplies the item.

e. *PART NUMBER* (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards and inspection requirements to identify an Item or range of Items.

f. *DESCRIPTION AND USABLE ON CODE (UOC)* Column (6)) This column includes the following information:

(1) The Federal Item name and, when required, a minimum description to Identify the Item.

(2) Physical security classification. Not applicable.

(3) Items that are included in kits and sets are listed below the name of the kit or set on Figure KIT.

(9) The statement 'END OF FIGURE' appears just below the last item description in Column 6 for a given figure in both Section II and Section III.

f. QTY (Column (7)). The QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. Explanation of Columns (Section IV).

a. NATIONAL STOCK NUMBER (NSN) INDEX

(1) STOCK NUMBER column. This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN (i e, 5305-01-674-1467) When

NIIN

using this column to locate an item, ignore the first 4 digits of the NSN however, the complete NSN should be used when ordering items by stock number.

(2) FIG. Column. This column lists the number of the figure where the item is identified, located. The figures are in numerical order in Section II and Section III.

(3) ITEM column The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also Identified by the NSN listed on the same line.

b. PART NUMBER INDEX Part numbers in this index are listed by part number in ascending alphanumeric sequence (i e, vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z,

followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) **CAGEC** column The Commercial And Government Entity (CAGE) Code (C) Is a 5 digit alphanumeric code used to Identify the manufacturer, distributor or Government agency, etc., that supplies the item.

(2) **PART NUMBER** column Indicates the primary number used by the manufacturer (individual, firm, corporation or Government activity), which controls the design and characteristics of the Item by means of Its engineering drawings, specifications standards, and Inspection requirements to Identify an item or range of Items.

(3) **STOCK NUMBER** column This column lists the NSN for the associated part number and manufacturer Identified In the PART NUMBER and CAGEC columns to the left.

(4) **FIG.** column. This column lists the number of the figure where the item is identified located in Section II and III.

6. How to Locate Repair Parts.

a. *When National Stock Number or Part Number is Not Known.*

(1) *First.* Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) *Second.* Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) *Third.* Identify the item on the figure and use the Figure and Item Number Index to find the NSN.

b. *When National Stock Number or Part Number is known.*

(1) *First.* Using the National Stock Number or the Part Number Index, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence (see 4.a(1)). The part numbers in the Part Number index are listed in ascending alphanumeric sequence (see 4.b). Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

(2) *Second.* Turn to the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.
