ORGANIZATIONAL MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. Scope.

This manual lists the repair parts, special tools, and maintenance supplies required for the performance of organizational maintenance of the Engine, Aircraft, Reciprocating, 0-480-1, 0-480-1A, 0-480-1B, 0-480-3, and 0-480-3A (Lycoming).

2. General.

This Repair Parts and Special Tools List is divided into the following sections:

a. *Repair Parts Section II.* A list of repair parts authorized for the performance of maintenance at the organizational level in figure and item number sequence. This section is arranged by functional group, usually in disassembly order, and indented when required to indicate the relationship to the next higher assembly. Items appearing more than once in an assembly will be repeated to show relationship to the functional group illustration. The illustrations in this section will appear immediately preceding each figure of text. Installations which are not assigned source codes and maintenance levels appear for informational purposes only and are not to be requisitioned. The individual components required to support these installations are illustrated and listed with applicable source codes and maintenance levels.

b. *Special Tools Section III.* A list of special tools, authorized for the performance of maintenance at the organizational level in figure and item number sequence. The illustrations in this section will appear immediately following the text portion of each part.

c. *Federal Stock Number and Reference Number Index Section IV.* A list of federal stock numbers in ascending numerical sequence, followed by a list of reference numbers in ascending alphametical sequence, cross-referenced to the illustration figure and item number.

3. Explanation of Columns.

The following provides an explanation of columns in the tabular lists in sections II and III.

a. *Source, Maintenance, and Recoverability Codes (SMR), Column 1.*

(1) *Source Code.* Indicates the selection status and source for the listed item. Source codes are:

Code	Explanation
P	Repair parts, special tools and test equipment supplied from the GSA/DSA or Army supply system and authorized for use at indicated maintenance categories.
P2	Repair Parts, special tools and test equipment which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
P9	Assigned to items which are NSA design controlled: unique repair parts, special tools, test, measuring, and diagnostic equipment which are stocked and supplied by the Army COMSEC Logistic System and which are not subject to the provisions of AR 38041.
P10	Assigned to items which are NSA design controlled: special tools, test, measuring, and diagnostic equipment for COMSEC support which are accountable under the provisions of AR 380-41 and which are stocked and supplied by the Army COMSEC Logistic System.
M	Repair parts, special tools and test equipment which are not procured or stocked as such in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stocked as such but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance categories.

<i>Code</i>	<i>Explanation</i>	<i>Code</i>	<i>Explanation</i>
X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.		reparable, it is normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
X1	Repair parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.	S	Repair parts, special tools and test equipment, and assemblies which are economically repairable at DS and GS activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
X2	Repair parts, special tools and test equipment which are not stocked and have no foreseen mortality. The indicated maintenance category requiring such repair parts will attempt to obtain the parts through cannibalization or salvage. The item may be requisitioned, with exception data; from the end item manager for immediate use.	T	High dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be repaired or overhauled at depot maintenance activities only. No repair may be accomplished at lower levels.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DS and GS level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.	U	Repair parts, special tools and test equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value, or usable casings or castings.

NOTE: Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X or X1 and aircraft support items as restricted by AR 700-42.

(2) *Maintenance Code.* Indicates the lowest category of maintenance authorized to install the repair part and/or use the special tool or test equipment for each application. Capabilities of higher maintenance categories are considered equal or better. Maintenance codes are:

<i>Code</i>	<i>Explanation</i>
C	Crew/operator.
O	Organizational maintenance.

(3) *Recoverability Code.* Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are nonrecoverable. Recoverability codes are:

<i>Code</i>	<i>Explanation</i>
R	Repair parts (assemblies and components), special tools and test equipment which are considered economically repairable at direct and general support maintenance levels. When the item is no longer economically

b. *Federal Stock Number, Column 2.* Indicates the federal stock number assign to the item and will be used for requisitioning purposes.

c. *Description, Column 3.* Indicates the federal item name and any additional description of the item required. There are two subcolumns for column 3, which reflect the reference number and usable on code data:

(1) The part number or other reference number followed by the applicable five-digit federal supply code for manufacturer (FSCM), will appear in the subcolumn located to the extreme left of the description column. FSCM's are listed and defined in SB 708-42.

(2) The usable on code data applicable to this equipment will appear in the subcolumn to the extreme right of the description column (para 4b).

d. *Unit of Measure (U/M), Column 4.* A two-character alphabetical abbreviation indicating the amount or quantity of the item upon which the allowances are based (e.g., Ft, EA, PR).

e. *Quantity Incorporated in Unit, Column 5.* Indicates quantities required for one assembly only, including instances when similar assemblies are broken down together. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers). When parts are shown as attaching two or more items, the quantities of these parts are those necessary to attach only one of the items.

f. *Fifteen-Day Organizational Maintenance Allowances, Column 6 of Sections II and III.*

(1) The allowance column is divided into four subcolumns. Indicated in each subcolumn is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance columns. Items identified with an asterisk * in this column will be requisitioned on an "as required" basis until stockage is justified based on demand in accordance with AR 710-2.

(2) Major Army commanders are authorized to approve reductions in the range of support items authorized for use in units within their commands. Recommendations for increase in range of items authorized for use will be forwarded to Commanding General, U.S. Army Aviation Systems Command (AVSCOM), P.O. Box 209, St. Louis, MO 63166.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to the last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example: authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

g. *Illustration, Column 7.* This column is divided as follows:

(1) *Figure Number, Subcolumn 7a.* Indicates the figure number of the illustration on which the item is shown. An alpha designator in this column indicates a specific functional group as follows:

KITS Functional Group 50.
BULK Functional Group 60.

MSUP Functional Group 70.

(2) *Item Number, Subcolumn 7b.* Indicates the callout number used to reference the item on the illustration.

4. Special Information.

a. *Description, Column 3.*

(1) Oversize and undersize parts, such as studs, bushings, etc., are listed immediately after the standard size part and in the same indent. The degree of oversize or undersize is stated in the description. These parts are not index numbered, nor is a required quantity shown.

(2) When an item has been replaced, issue will continue to be made until existing stocks become exhausted except in the case when replacement is limited to one-way use. To insure complete exhaustion of stock on hand and if it is acceptable to use a replaced item, the replaced item should be requisitioned. To denote one or two-way replacement, mnemonic codes will be used in the description as follows: The replaced item(s) will always contain the mnemonic code RPL-BY. The replacing item, if it is a two-way replacement, will contain the mnemonic code RPLS. If it is a one-way replacement, no code will be used. Additional mnemonic codes (para 6), are used to reflect the status and relationship of items similar or related items used in the end article (e.g., OBS-BY, ASSYFR, OBS-AFT-CMPL-W).

(3) When details of an assembly are shown on another text page, the description of that assembly is followed by a notation stating where these details can be located. Example: "391624-20, Carburetor Assembly. See figure 24 for breakdown." The parts that make up the carburetor assembly will be found in the text listing for figure 24.

(4) The basis of issue for authorized special tools, test, and support equipment is the number of end items of equipment supported.

b. *Usable on Code, Column 3.* This column will contain the basic designator and provides for a maximum of seven series (models) applications. The subcolumns will contain the series (model) number opposite the first line of nomenclature of each item listed to indicate the usable application(s) of that item.

NOTE: A numerical system is used to reflect specific engine(s) application for each item in the engine repair parts and repair kits functional groups of section II, and special tools part of section III. Cross-reference of numerical system to specific engine application is as follows:

- 1-Denotes 0-480-1 engine, used on U-8D, RU-8D, U-8G.
- 2-Denotes 0-480-1A engine, used on U-8D, RU-8D, U-8G.
- 3-Denotes 0-480-1B engine, used on U-8D, RU-8D, U-8G.
- 4-Denotes 0-480-3 engine, used on U-8F.
- 5 -Denotes 0-480-3A engine, used on U-8F.

When an item has limited effectiveness within a model, the limitation will be indicated by an entry following the item description or footnote reference (e.g., Code A, Code B).

c. *Explanation of Terminology.* Matched Components, Do Not Stock Separately. Used to indicate the items constituting a matched set which must be issued and installed as a set and must not be broken down into components when issued or installed.

d. *Directional References.* Left and right directions are determined by standing at the rear of the aircraft and looking forward.

e. *The Illustrations in This Manual are Identical to Those Published in the -34P.* The -34P illustrations are given for a better understanding of the parts relationship; however, only those parts assigned maintenance codes "C" or "O" are listed in the tabular portion and only those parts are authorized for requisitioning from this manual. Illustrations which do not contain maintenance significant parts for organizational maintenance will not appear in this manual. Text page and illustration of the preceding figure will have the phrase ""Figure xx not applicable.

f. *Action Change Codes Indicated in the Left-Hand Margin of the Listing Page Denote the Following:*

- N - Indicates an added item.
- C - Indicates a change in data.
- F - Indicates a change in FSN only.

g. *Illustrations and Components for Items Source Coded "M" are located in TM 55-1510-201-20 Maintenance Manual.*

h. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category (e.g., "MF," "AF", "MH").

i. Repair parts and assemblies not assigned a recoverability code shall be considered nonrecoverable, however, repairs may be accomplished on such items to the extent that maintenance instructions and parts are available to the maintenance category authorized to remove, repair, and replace the item.

j. *The Following Publications Pertain to This Equipment and its Components:*

TB 55-1500-307-25	Aircraft Components Requiring Maintenance and Historical Data
TM 55-1500-204-25/1	General Aircraft Maintenance Manual
TM 55-1500-315-15	Army Aviation Maintenance Engineering Manual: Aircraft Engines
TM 55-1500-316-15	Maintenance of Department of the Army Aircraft: Aircraft Maintenance Tools
TM 55-1500-317-15	Maintenance of Department of the Army Aircraft Shop Practices
TM 55-1510-201-10	Operator's Manual: Army Models U-SD and U-SF
TM 55-1510-201-20	Organizational Maintenance Manual: Army Models U-8D and U-8F Aircraft (Beech)
TM 55-1510-201-20P	Organizational Maintenance Repair Parts and Special Tools List

TM 55-405-6	Army Aviation Maintenance Engineering Manual: Aircraft Maintenance Tools
TM 55-406-7	Army Aviation Maintenance Engineering Manual: Shop Practices

5. How to Locate Repair Parts.

a. *When Federal Stock Number or Reference Number is Unknown:*

(1) *First.* Using the table of contents, determine the assembly group; i.e., engine assembly, etc., within which the repair part belongs. This is necessary since illustrations are prepared for the assembly groups and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When Federal Stock Number or Reference Number is Known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent federal stock number or reference number. This index is in ascending federal stock number sequence followed by a list of reference numbers in ascending alphamerical sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Parts Listing, find the assembly group of the repair part and illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations (Mnemonic Codes).

The following abbreviations and mnemonic codes are used:

AN	Air Force-Navy
ANPT	Aeronautical national taper pipe thread
APPLTO	Applicable to
ASBES	Asbestos
ASSYFR	Assemble from
AV	Twenty-five
AWG	American wire gage
BE	Bale
BR	Bar
BRKDWN	Breakdown
BT	Bottle
BTU	British thermal unit(s)
BX	Box
CC	Cubic centimeter(s)
CFM	Cubic feet per minute
CFS	Cubic feet per second
CHNL	Channel
CI	Cubic inch
CN	Can
CNSWTH	Consolidated with
C/O	Consists of (component of)
COP	Copper
CP	Candle power
CRES	Corrosion resistant steel
CRK	Cork
CW	Continuous wave(s)
DR	Drum
EA	Each
FIG	Figure
FMC	Federal manufacturer's code
FT	Foot
GL	Gallon
GPH	Gallons per hour
HD	Hundred
IN	Inch
INSL	Insulation

INTRCH	Interchangeable with
KC	Kilocycle(s)
KQCA	Kits and quick change assemblies
KT	Kit
KW	Kilowatt(s)
LB	Pound
LL	Fifty
MAKEFR	Make from
MASTER	Master item
MIN	Minimum
MSUP	Maintenance supplies
MWO	Modification work order
NAS	National aircraft standard
NC	American national coarse thread
JEF	American national extra fine thread
NF	American national fine thread
NHA	Next higher assembly
NS	American national special thread
O/A	Over-all
OBS-AFT-	
CMPL-W	Obsolete after compliance with
OBS-BY	Obsoleted by
OBSLTS	Obsoletes
PC	Piece
PG	Package
PORM	Plus or minus
PRFITM	Preferred item
QUIL	Quilt
RBR	Rubber
REWKTO	Rework to
RMKS	Remarks
RPL-BY	Replaced by
RPLBLE	Replaceable item
RPLS	Replaces
SE	Set
SEC	Section
SF	Square foot
SH	Sheet
SI	Square inch
SL	Spool
SLD	Solid
SLV	Sleeve
SPEC	Specification(s)
STR	Strip
SUB-IS	Substitute is
SUBFOR	Substitute for
SX	Stick
TCTM	Time compliance technical manual
TERM	Terminal
TRNSTO	Transfer to
TU	Tube
TYPDSG	Type designation
U/O	Used on
USBL EFF	Usable effectivity
USE-AFT-	
CMPL-W	Use after compliance with
U/W	Used with
W	Wide, width
W/	With
WHEN-EXHTD-	
RQTN-NHA	When exhausted requisition next higher assembly
W/O	Without

7. Recommendations for Maintenance Publications Improvements.

You can improve this manual by calling attention to errors and by recommending improvements, using DA

Form 2028 (Recommended Changes to Publications) or by a letter, and mailing directly to Commanding General, U.S. Army Aviation Systems Command, ATTN: AMSAV-MLR, P.O. Box 209, St. Louis, MO 63166.

By Order of the Secretary of the Army:

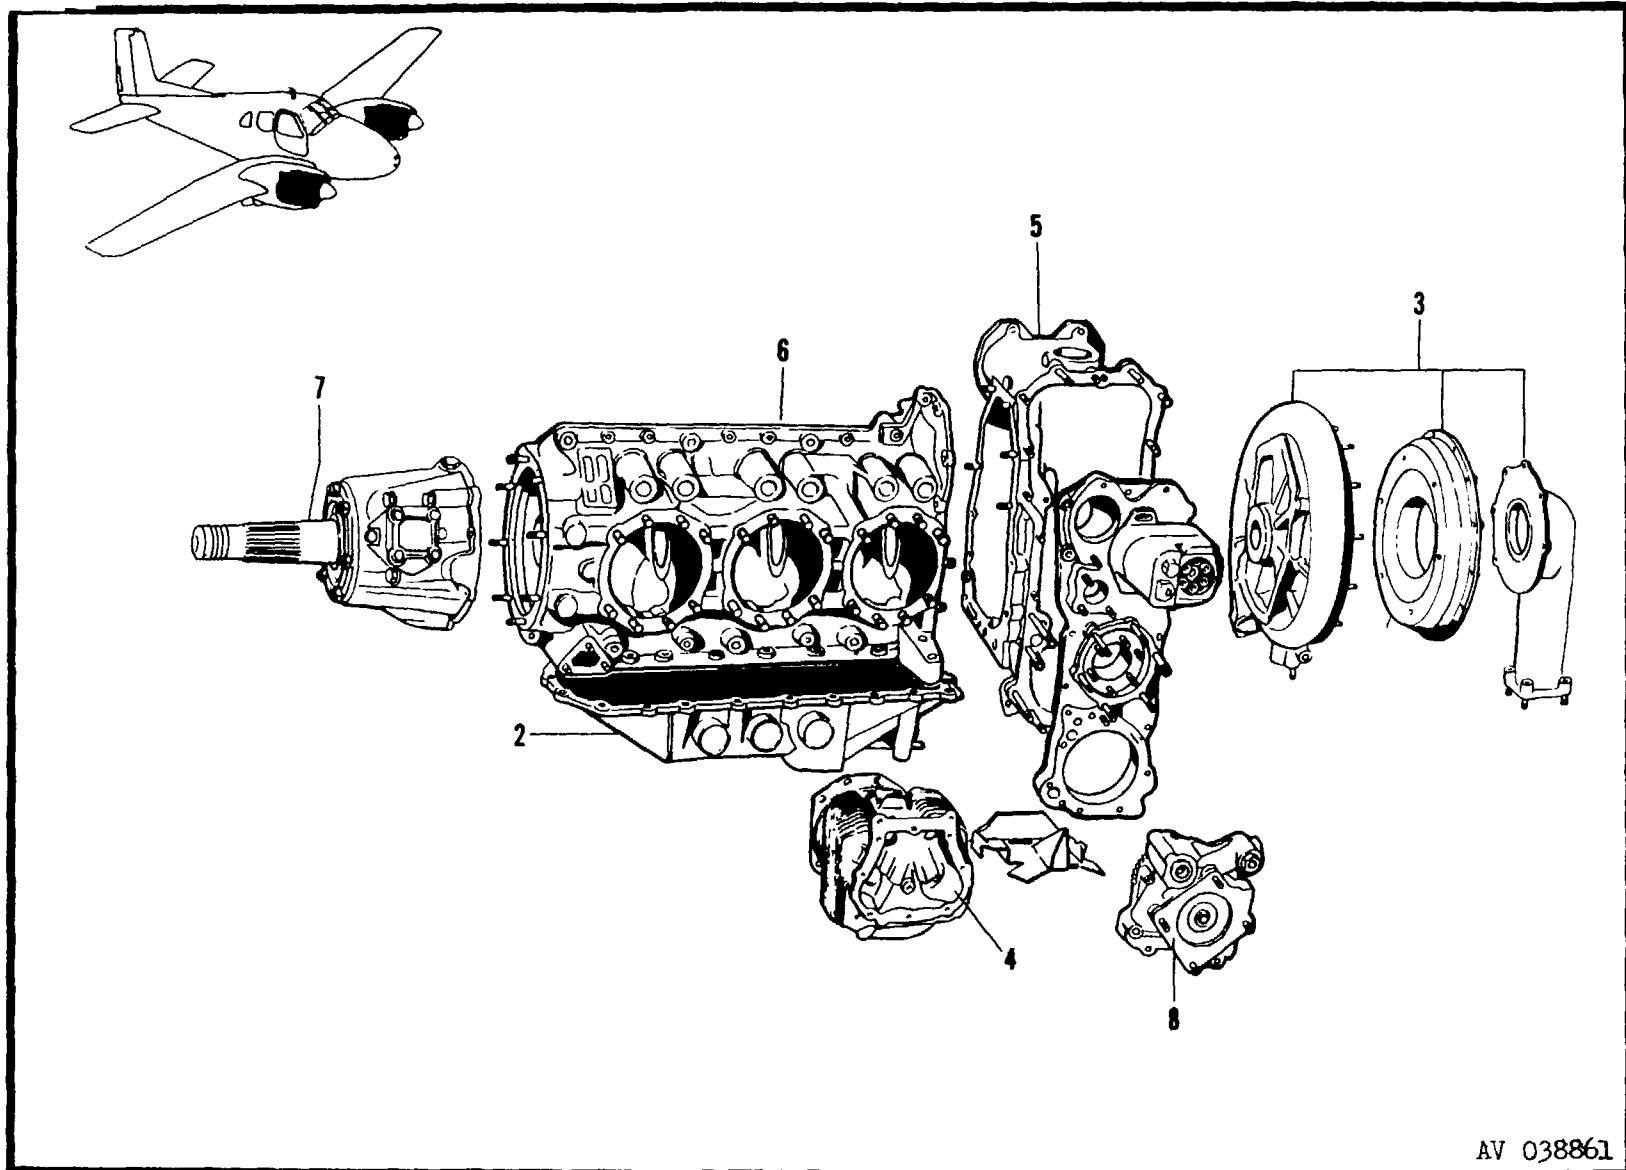

Official:

VERNE L. BOWERS
Major General, United States Army
The Adjutant General

BRUCE PALMER, JR.
General, United States Army
Acting Chief of Staff

DISTRIBUTION:

To be distributed in accordance with DA Form 12-31 (qty rqr block no. 22) Organizational Maintenance requirements for U-8 aircraft.

AV 038861

THE METRIC SYSTEM AND EQUIVALENTS

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3.2808.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. in.
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Square measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. in.
 1 sq. decimeter = 100 sq. centimeters = 15.5 inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 feet
 1 sq. dekameter (are) = 100 sq. meters = 1.076.4 sq. ft.
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 hectometers = .386 sq. miles

Liquid Measure

1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 metric ton = 10 quintals = 1.1 short tons
