FSN 3950-723-3295

This copy is a reprint which includes current pages from Change 1.

HEADQUARTERS, DEPARTMENT OF THE ARMY

FEBRUARY 1970

Change }
No. 1 }

HEADQUARTERS
DEPARTMENT OF THE ARMY
Washington, D.C., 5 October 1973

**Organizational Maintenance Repair Parts
and Special Tools Lists
CRANE, TRUCK, WAREHOUSE, SLEWING BOOM,
GASOLINE, FRONT WHEEL DRIVE, PNEUMATIC TIRES,
10, 000 LB. CAPACITY, PETTIBONE-MULLIKEN MODEL 10F,
ARMY MODEL MHE 195, FSN 3950-723-3295**

Current as of 2 August 1973

TM 10-3950-204-20P, 16 February 1970, is changed as follows:

NOTE

All changes, additions, or deletions of Federal stock numbers or manufacturers code and part numbers within this change should be appropriately reflected in the index.

Page vi. Paragraph 8 is superseded as follows:

8. Reporting of Equipment Publications Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander, US Army Troop Support Command, ATTN: AMSTS-MPP, St. Louis, MO 63120.

Page 12. In line 00188, change col 2 to read 4720-762-1295; and col 3's, part No. to A27313-1.

Page 30. In line 00487, change col 1 to read PO; col 2, add 6220-732-3765; change col 3's, part No. to 6-810; and col 7. add (a) *. (b) *, (c) *, (d)*.

Line 00488 is rescinded.

In line 00489 change col 3's part No. to 1157.

In line 00490, change col 3's part No. to 77-150R.

In line 00490A, add the following: col 1, X20; col 3, nomenclature, GASKET, LENS, part No. 88-01330, mfr code (72635); col 4, EA; and 6, 2.

Page 42. In line 00684, change col 1 to read PO; col 2, add 5520-770-6746; and col 7, add (a) *, (b) *, (c) *, (d) *.

Page 43. In line 00714, change col 2 to read 2990-374-6686.

Page 47. In line 00776, change col 3's "(6 ft. 5-3/4 in. required)" to read "(36 in. required)."

In line 00779, change col 3's "(22-3/4 in. required)" to read, "(20 in. required for each HOSE ASSEMBLY)."

Page 51. In line 00832, col 3's "21/2 in. x 60 in. lg." Is changed to read: "21/2 in. x 40 in. lg."

By Order of the Secretary of the Army:

CREIGHTON W. ABRAMS
General, United States Army
Official: Chief of Staff

VERNE L. BOWERS
Major General, United States Army
The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-25A (qty rqr block No. 894) Organizational Maintenance Requirements for Warehouse Equipment.

SECTION	V. FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX	

SECTION I.

INTRODUCTION

1. Scope

This manual lists repair parts required for the performance of organizational maintenance of the warehouse crane.

2. General

a. The Repair Parts List is arranged as follows:

(1) Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups.

(2) Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

b. This Repair Parts and Special Tools List is divided into the following sections:

(1) Prescribed Load Allowance (PLA) - Section II. A consolidated listing of repair parts quantitatively allocated for initial stockage at the organizational level. This is a mandatory stockage allowance.

(2) Special Tools, Test and Support Equipment-Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level. (Not Applicable).

(3) Repair Parts-Section IV. A list of repair parts authorized for the performance of maintenance at the organizational level.

(4) Federal Stock Number and Reference Index-Section V. A list of Federal stock numbers followed by reference numbers in ascending alphanumeric sequence, cross-referenced to index number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in Sections II, III, and IV:

a. Source, Maintenance and Recoverability Codes (SMR).

(1) Source code indicates the selection status and source for the listed item. Source codes are:

<i>Code</i>	<i>Explanation</i>
P	Applied to repair parts which are stocked in or supplied from DSA/GSA or Army supply system, and authorized for use at indicated maintenance categories.
M	Applied to repair parts which are not procured or stocked but are to be manufactured at indicated

maintenance categories.

A Applied to assemblies which are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories.

X Applied to parts and assemblies which are not procured or stocked, the mortality of which is normally below that of the applicable end item, and the failure of which should result in retirement of the end item from the supply system.

X1 Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of the next higher assembly or components.

X2 Applied to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.

G Applied to major assemblies that are procured with PEMA (Procurement Equipment Missile Army) funds for initial issue only to be used as exchange assemblies at DSU and GSU maintenance level. These assemblies will not be stocked above DSU and GSU or returned to depot supply level.

Note. Source code is not shown on common hardware items known to be readily available in Army supply channels and through local procurement.

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:

<i>Code</i>	<i>Explanation</i>
O -----	Organizational maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts (assemblies and components) which are considered economically repairable at direct and general support maintenance levels. When the maintenance capability to repair these items does not exist, they are normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
T	Applied to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U	Applied to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings.

(4) This column also lists, below the SMR code, an index number for each item in ascending numerical sequence, which is used to locate items in the publication when the Federal stock number and/or reference number is known.

b. Federal Stock Number. This column indicates the Federal stock number for the item.

c. Description. This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parenthesis. Material required for manufacture or fabrication is identified.

d. Unit of Issue. This column indicates the unit used as a basis for issue, e.g., ea, pr, ft, yd, etc.

e. Quantity Incorporated in Unit Pack. This column indicates the actual quantity contained in the unit pack (Not Applicable).

f. Quantity Incorporated in Unit. This column indicates the quantity of the item used in the functional group.

g. Fifteen-Day Organizational Maintenance Allowance, Column (4) of Section II and Column (7) of Section III and IV.

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn is the quantity of items authorized for the number of

equipments supported. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column applicable to the number of items supported to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U. S. Army Mobility Equipment Command for exception or revision to the allowance list. Revisions to the range of items authorized will be made by this Command based upon engineering experience, demand data, or TAERS information.

h. Illustration, Column (8). This column is divided as follows:

(1) *Figure number column (8)(a).* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number, column (8)(b).* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Repair parts mortality has been based on 3,000 hours of operation per year.

b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

c. The following publications pertain to the warehouse crane and its components:

TM 10-3950-204-10	Operator's manual.
TM 10-3950-204-20	Organizational maintenance manual.

TM 10-3950-204-35 DS, GS, and depot maintenance manual.
 TM 10-3950-204-35P DS, GS, and depot maintenance repair parts and special tool lists.
 LO 10-3950-204-20 Lubrication order.

5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the functional group within which the repair part belongs.

(2) *Second.* Find the illustration covering the functional group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration, and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the functional group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending alpha-numeric sequence cross-referenced to an index number.

(2) *Second.* Using the Repair Part Listing, find the index number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations

amps-----ampere (s)
 AWG - -----American Wire Gage
 comm-----commutator
 cp-----candle power
 ctd-----coated
 dia-----diameter
 ea-----each
 ft-----feet (foot)
 grp-----group
 id-----inside diameter
 in-----inch (es)
 lb-----pound (s)
 lg-----long (length)
 mm-----millimeter
 NC-----American National Coarse Thread
 NF-----American National Fine Thread
 No-----number (s)
 od-----outside diameter
 thd-----thread
 thk-----thick
 w/-----with
 zn-----zinc

7. Federal Supply Codes for Manufacturers

<i>Code</i>	<i>Manufacturer</i>
00624 -----	Aeroquip Corp Aircraft Div Jackson Plant
00736 -----	Air-Maze Div of Rockwell-Standard Corp.
01976 -----	American Chain and Cable Co., Inc.
