SECTION III. SPECIAL TOOLS LIST (NOT APPLICABLE)		
SECTION IV. NATIONAL STOCK NUMBER AND PART NUMBER	157	

v/(vi blank)

**ORGANIZATIONAL MAINTENANCE  
REPAIR PARTS AND SPECIAL TOOLS LISTS**

**SECTION I. INTRODUCTION**

**1. Scope.**

This manual lists and authorizes spares and rep parts, special tools; special Test, Measurement, a Diagnostic Equipment (TMDE); and other spec support equipment required for performance of organizational support maintenance of the Crane, Truck Warehouse. It authorizes the requisitioning, issue, a disposition of spares, repair parts and special tools indicated by the Source, Maintenance and Recoverability (SMR) codes.

**2. General.**

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of spar and repair parts authorized by this RPSTL for use the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed functional groups in ascending alphanumeric < sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in NSN sequence.

b. Section III. Special Tools List. A list special tools, special TMDE, and other special support equipment authorized by this RPSTL for the performance of maintenance.

c. Section IV. National Stock Number and Part Number Index. A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbers (NSN) appearing in the listings, followed by a in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and p numbers are cross-referenced to each illustration figure and item number appearance.

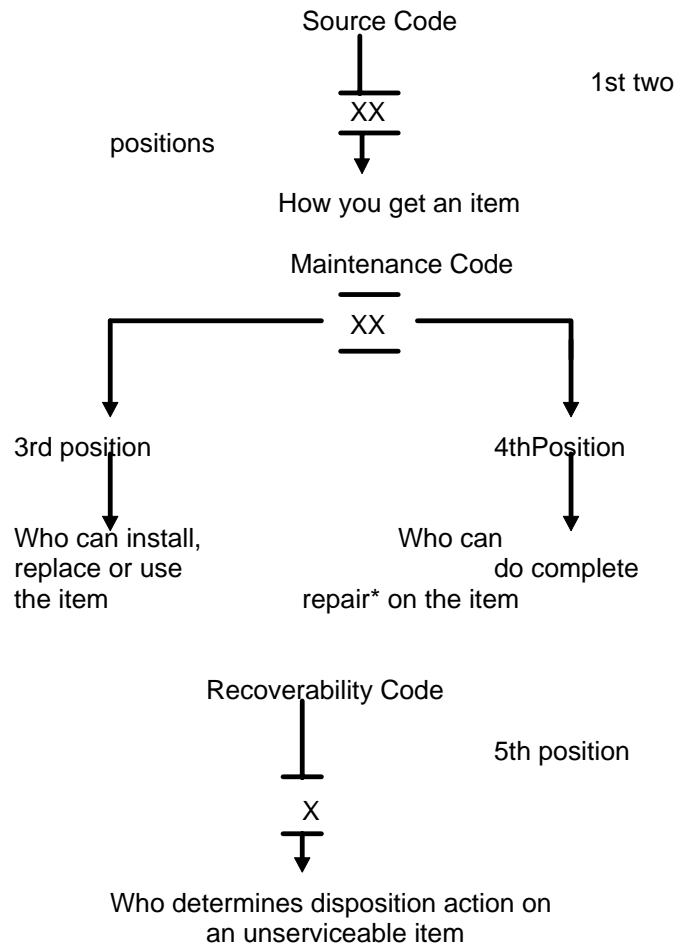

**3. Explanation of Columns.**

a. Illustration (Column (1)). This column divided as follows:

(1) ((a) FIG NO.) Figure Number. Indicates the figure number illustrating an exploded view of a functional group.

(2) ((b) ITEM NO.). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning, information, maintenance, category, authorization, criteria, and disposition instructions, as shown in the following breakout:

\*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how you get an item needed for maintenance, repair or overhaul of an end item/equipment. Source code are always the first two positions of the SMR code. Explanations of source codes follow:

Code	Explanation
PA PB PC PD PE PF PG )	Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to (the category indicated by the code entered in the 3d position of the SMR code
KD KF KB )	Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied.
MO-(Made at Org Category) MF-(Made at DS Category) MH-(Made at GS Category) MD-(Made at Depot)	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by NSN in the Description column and listed in the Bulk Material group in the repair parts list in this manual. If the item is authorized to you by the 3d position code of the SMR code but the source code indicates it is made at a higher category, order the item from the higher category of maintenance.
AO-(Assembled by Org Category) AF-(Assembled by DS Category)	Items with these codes are to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the

AH-(Assembled by GS Category)  
AD-(Assembled by Depot )

} category of maintenance indicated by the source code. If the 3d position code authorizes you to replace item but the source code indicates the item is assembled at a higher category, order the item from the higher category of maintenance.

- XA Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the NOTE below.)
- XB If an "XB" item is not available from salvage, order it using the FSCM and part number given.
- XC Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number. Not applicable.
- XD Item is not stocked. Order an "XD"-coded item through normal supply channels using the FSCM and part number given, if no NSN is available.

NOTE: Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA".

(2) Maintenance Code. Maintenance codes tell you the category(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following categories of maintenance.

Code	Application/Explanation	Recoverability Codes	Definition
C	-Crew or operator maintenance done within organizational maintenance.	Z	-Nonreparable item. When unserviceable, condemn and dispose of the item at the category of maintenance shown in 3d position of SMR code.
O	-Organizational category can remove, replace, and use the item.	O	-Reparable item. When uneconomically repairable, condemn and dispose of the item at organizational category.
	(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (i.e perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower category of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes.	F	-Reparable item. When uneconomically repairable, condemn and dispose of the item at the direct support category.
		H	-Reparable item When uneconomically repairable, condemn and dispose of the item at the general support category.

Code	Application/Explanation	Recoverability Codes	Definition
O	-Organizational is the lowest category that can do complete repair of the item	D	-Reparable item. When beyond lower category repair capability, return to depot. Condemnation and disposal of item not authorized below depot category.
F	-Direct support is the lowest category that can do complete repair of the item.	L-	Reparable item. Condemnation and disposal not authorized below specialized repair activity.
H	-General support is the lowest category that can do complete repair of the item	A	-Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.
L	-Specialized repair activity is the lowest category that can do complete repair of the item.		
D	-Depot is the lowest category that can do complete repair of the item.		
Z	-Nonreparable. No repair is authorized.		
B	-No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However the item may be reconditioned by adjusting, lubricating, etc., at the user level.		

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

- c. NATIONAL STOCK NUMBER (Column (3)). Lists the National Stock Number (NSN) assigned to the item. Use the NSN for requests/requisitions.
- d. FSCM (Column (4)). The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.
- e. PART NUMBER (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or

Government activity which controls the design and characteristic of item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

**NOTE:** When you use an NSN to requisition item, the item you receive may have a different number from the part ordered, but go ahead and use or furnish it as the replacement part.

f. DESCRIPTION (Column (6)). This column includes the following information:

(1) The Federal item name and, when required a minimum description to identify the item.

(2) The physical security classification, applicable.

(3) Items that are included in kits and set, listed below the name of the kit or set.

(4) Spare/repair parts that make up an assembled item are listed immediately following the assembled item line entry. If the first item of a figure indented, the assembly appears as the last item in previous figure.

(5) NSN's for bulk materials are referenced the description column in the line item entry for the item to be manufactured/fabricated.

(6) When the part to be used differs between serial numbers of the same model, the effective numbers are shown as the last line of the description.

(7) The USABLE ON CODE. Not applicable.

(8) In the Special Tools List section, the Basis Of Issue (BOI) appears as the last line(s) in the for each special tool, special TMDE, and other special support equipment. When density of equipment supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

g. U/M (Column (7)). The Unit of Measure (U/M) indicates the measure (e.g., foot, gallon, pound) or count (e.g., each, dozen, gross) of a listed item. A two-character alpha code (e.g., FT, GL, LB, EA, DZ, GR) appears in this column to indicate the measure or count. If the U/M code appearing in this column differs from the Unit of Issue (U/I) code listed in the Army Master Data File (AMDF), request the lowest U/I that will satisfy your needs.

h. QTY INC IN UNIT (Column (8)). The Quantity Incorporated in Unit (QTY INC IN UNIT) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (e.g., shims, spacers).

#### 4. SPECIAL INFORMATION.

a. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual. NSN's for bulk materials are also referenced in the description column of the line item entry for the item to be manufactured/fabricated. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM10-3950-206-12.

b. Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM10-3950-206-12. Items that make up the assembly are listed immediately following the assembled item entry.

c. Line item entries for repair parts kits and sets appear as the last entries in the repair parts listing for the figure in which their parts are listed as repair parts.

d. Items which have the word BULK in the figure number column will have an index number shown in the item number column. This index number is furnished for use as a cross-reference between the National Stock Number/Part Number Index and the Bulk Material List in Section II.

e. The following publications pertain to the Crane, Truck, Warehouse, and its components:

TM10-3950-206-12  
Crane, Truck, Warehouse, GED,  
Army Model MHE 216

TM10-3950-206-34  
Crane, Truck, Warehouse, GED,  
Army Model MHE 216

TM10-3950-206-34P  
Crane, Truck, Warehouse, GED,  
Army Model MHE 216

LO10-3950-206-12-1  
Crane, Truck, Warehouse, GED,  
Army Model MHE 216

LO1 0-3950-206-12-2  
Crane, Truck, Warehouse, GED,  
Army Model MHE 216

f. The illustrations in this manual are identical to those published in the TM10-3950-206-34P. Only those parts coded "C" or "O" in the third position the SMR code are listed in the tabular listing; therefore, there may be a break in the item number sequence. Only illustrations containing organizational unit authorized items appear in this manual.

**5. How to Locate Repair Parts.**

a. When National Stock Number or Part Number is Not Known:

(1) First. Using the table of contents determine the functional group to which the item belongs. This is necessary since figures are prepared for functional groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the functional group to which the item belongs.

(3) Third. Identify the item on the figure and note the item number of the item.

(4) Fourth. Refer to the Repair Parts List for the figure to find the line item entry for the item number noted on the figure.

b. When National Stock Number or Part Number is Known:

(1) First. Using the Index of National Stock Numbers and Part Numbers, find the pertinent national stock number or part number. The NSN Index is in National Item Identification Number (NIIN)\* sequence. The part numbers in the Part Number Index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

\*The NIIN consists of the last 9 digits of the NSN

(2) Second. After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

**6. Abbreviations.**

For standard abbreviations see MIL-STD-12D, Military Standard Abbreviations For Use On Drawing, Specifications, Standards And In Technical Documents.
