No. 1

HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, D.C., 3 December 1973

Direct Support, General Support and Depot

Maintenance Repair Parts and Special Tools lists

COMPRESSOR, ROTARY, DIESEL ENGINE

DRIVEN, AIR, TRAILER MOUNTED, 250 CFM, 100 PSI (JOY

MODEL RPV 250 DC20MSI)

FSN 4310-952-7142

TM 5-4310-247-35P, 4 December 1969, is changed as follows:

The title is changed to read as shown above.

Page v. Paragraph 8 is superseded as follows:

8. Reporting of Equipment Publication Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander, US Army Troop Support Command, ATTN: AMSTS-MP, 4300 Goodfellow Boulevard, St. Louis, MO 63120.

Page 1. Index No. 005; in column (2), "2815-225-4786" is changed to read "2815-071-2314;" the nomenclature in column (3) is changed to read "ENGINE ASSEMBLY, S H O R T BLOCK, JD403A5004S (02978) ."

Page 9. Index No. 121; in column (3), "X528A (14351) " is added.

Page 10. Index No. 133; in column (3), "X3569 (14351) " is added.

Page 10. Index No. 136; in column n (3), "JD382C4050" is changed to read "JD403C4080."

Page 11. Index No. 142; in column (3), "X3253" is changed to read "X5893."

Index Nb. 143; in column (3), "X3043A (14351)" is added.

Page 12. Index No. 157; in column (6), "4" is changed to read "1."

Page 13. Index No. 176; in column (2), "2815-735-1828" is changed to read "2815-055-5948;" in column (3), "JD382305" is changed to read "JD3821305."

Page 14. Index No. 190; in column (3), "X507 (14351) " is added.

Index No. 192; in column (3), "X1802G (14351)" is added.

Page 21. Index No. 297; in column (3), "X7502" is changed to read "X5634."

Page 23. Index No. 328; in column (3), "H206B3160" is changed to read "H260B3160."

Page 24. Index No. 342; in column (3), "41SL200" is changed to read "41AL200."

Page 26. Index No. 368; in column (3), "JS382L2240" is changed to read "JD382L2240."

Page 33. Index No. 461; in column (2), "2910-198-5822" is changed to read "2910-198-7272;" in column (3), "14783" is changed to read "16242."

Page 73. Index No. 1058; in column 2, "5320-045-5128" is added; in column 3, "908841-4 (83179)" is changed to read "52SB-1-8X1-4 (18873)."

Page 89. Index No. 1298; in column 2, "4730-257-2120" is added; in column 3, "901090-5 (83179)" is changed to read "WWP521 (81348)."

Index No. 1299; in column 2, "4730-496-7505" is added; in column 3, "1/4-18" is changed to read "1/8-27," and "906258-42 (81379)" is changed to read "71X4 (79470)."

Page 94. Index No. 1375; in column 2, "4730-496-7337" is added; in column 3, "906251-44 (83179)" is changed to read "68FLI-4X1-8 (30327)."

Page 95. Index No. 1388; in column 2, "4730-496-7505" is added; in column 3, "906258-42 (83179)" is changed to read "71X4 (79470)."

Page 99. Index No. 1440; in column 2, "4730-595-0665" is added; in column 3, "901287-5 (83179)" is changed to read "WWP521 (81348)."

Pages 170 through 185. All changes, additions, and deletions of Federal stock numbers and manufacturer's code and part numbers should be appropriately reflected in the index and parts listing of the manual.

By Order of the Secretary of the Army.

Official:

VERNE L. BOWERS

Major General, United States Army

The Adjutant General

CREIGHTON W. ABRAMS
General, United States Army
Chief of Staff

Distribution:

To be distributed in accordance with DA Form 12-25A (qty rqr block No. 39), Direct/General Support Requirements for Air Compressors.

| IV. | FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX | |

SECTION I INTRODUCTION

1. Scope

This manual lists repair parts required for the performance of direct support, general support, and depot maintenance of the air compressor.

2. General

a. The repair parts list is arranged as follows:

(1) Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups.

(2) Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

b. This repair parts and special tools list is divided into the following sections:

(1) *Repair Parts Section II.* A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

(2) *Special Tools, Test and Support Equipment Section III.* A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level. (Not applicable.)

(3) *Federal Stock Number and Reference Number Index Section IV.* A list of Federal stock numbers followed by reference numbers in ascending alphanumeric sequence cross-referenced to index, number.

3. Explanation of columns

The following provides an explanation of columns in the tabular lists in sections II and III:

a. *Source, Maintenance, and Recoverability Code (SMR), Column (1).*

(1) Source code indicates the selection status and source for the listed item. Source codes used are:

| Code | Explanation |
|------|---|
| P | Applied to repair parts which are stocked in or supplied from DSA/GSA or Army supply system, and authorized for use at indicated maintenance categories. |
| M | Applied to repair parts which are not procured or stocked but are to be manufactured at indicated maintenance categories. |
| A | Applied to assemblies which are not procured or stocked as such but made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories. |
| X | Applied to parts and assemblies which are not procured or stocked, the mortality of which is normally below that of the applicable end item, and the failure of which should result in retirement of the end item from the supply system. |

| | |
|----|---|
| X1 | Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of the next higher assembly or components. |
| X2 | Applied to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels. |
| G | Applied to major assemblies that are procured with PEMA (Procurement Equipment Missile Army) funds for initial issue only, to be used as exchange assemblies at DSU and GSU maintenance level. These assemblies will not be stocked above DSU and GSU level or returned to depot supply level |

Note. Source code is not shown on common hardware items known to be readily available in Army supply channels and through local procurement.

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level codes are:

| Code | Explanation |
|------|-----------------------------|
| 0 | Organizational maintenance |
| F | Direct support maintenance |
| H | General support maintenance |
| D | Depot maintenance |

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

| Code | Explanation |
|------|---|
| R | Applied to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis. |
| T | Applied to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities. |
| U | Applied to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings. |

(4) This column also lists, below the SMR code, an index number for each item in ascending numerical sequence, which is used to locate items in the publication when the Federal stock number and/or reference number is known.

b. *Federal Stock Number, Column (2).* This column indicates the Federal stock number for the item.

c. *Description, Column (3).* This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers, in

parentheses. Material required for manufacture or fabrication is identified.

d. *Unit of Issue, Column (4).* This column indicates the unit used as a basis for issue; e.g., ea, pr, ft, yd, etc.

e. *Quantity Incorporated in Unit Pack, Column (5).* This column indicates the actual quantity contained in the unit pack.

f. *Quantity Incorporated in Unit, Column (6).* This column indicates the quantity of the item used in the functional group.

g. *Thirty-Day DS/OS Maintenance Allowance, Columns (7) and (8).*

(1) The allowance columns are divided into three subcolumns. Indicated in each subcolumn is the quantity of items authorized for the number of equipments supported. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for, DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

(3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipments can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments, multiply 40 by 1.50 or 60 parts required.

h. *One-Year Allowances Per 100 Equipments/Contingency Planning purposes, Column 9.* This column indicates the quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year.

i. *Depot Maintenance Allowance Per 100 Equipments, Column (20)* This column indicates the quantity authorized for depot maintenance of 100 equipments. Items authorized for use but not for initial stockage are identified with an asterisk in the allowance column.

j. *Illustration, column (11).*

(1) *Figure number, column 11a.* Indicates the figure number of the illustration in which the item is known.

(2) *Item number, column 11b.* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Repair parts mortality has been based on 6,000 hours of operation per year.

b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

c. The following publications pertain to the air compressor and its components:

| | |
|-------------------|--|
| TM 5-4310-247-15 | Organizational, DS, GS, and Depot Maintenance Manual |
| TM 5-4310-247-20P | Organizational Maintenance Repair Parts and Special Tools Lists, |
| LO 5-4310-247-15 | Lubrication Order |

5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the functional group within which the repair part belongs.

(2) *Second.* Find the illustration covering the functional group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration, and note the illustration figure and item number of the repair part.

(4) *Fourth* Using the Repair Parts Listing, find the functional group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending alphanumeric sequence crossreferenced to an index number.

(2) *Second.* Using the Repair Parts Listing, find the index number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations

| | |
|-----------|------------------------------|
| cl | coil |
| deg..... | degree(s) |
| dia..... | diameter(s) |
