SECTION IV. SPECIAL TOOLS, TEST AND SUPPORT EQUIPMENT FOR ORGANIZATIONAL MAINTENANCE (NOT APPLICABLE.)

|  |    |
|--|----|
| V. INDEX FEDERAL STOCK NUMBER AND REFERENCE NUMBER ----- | 83 |
|--|----|

SECTION I.

INTRODUCTION

**1. Scope**

This manual lists repair parts required for the performance of organizational maintenance of the pump.

**2. General**

This repair parts and Special Tools list is divided into the following sections:

*a. Prescribed Load Allowance (PLA)-Section II.* A composite listing of the repair parts, Special tools, Test and support equipment having quantitative allowances for initial stockage at the organizational level.

*b. Repair Parts-Section III.* A list of repair parts authorized for the performance of maintenance at the organizational level in figure and item number sequence.

*c. Special Tools, Test and Support Equipment-Section IV.* A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level (Not Applicable).

*d. Index-Federal Stock Number and Reference Number-Section V.* A list of Federal Stock Numbers in ascending numeric sequence followed by a list of reference numbers in ascending alpha-numerical sequence, cross-referenced to the illustration figure number and item number.

*Note.* Items not illustrated are cross-referenced to page number.

**3. Explanation of -Columns**

The following provides an explanation of columns in the tabular lists in Section II, III, and IV”:

*a. Source, Maintenance, and Recoverability Codes (SMR).*

*Note.* Common hardware items known to be readily available in Army supply channels are assigned Maintenance codes only. Source codes, Recoverability codes, and Maintenance Allowances are not assigned this category.

(1) Source code indicates the selection status and source for the listed item. Source codes are:

| <i>Code</i> | <i>Explanation</i>   |
|-------------|--|
| P           | Repair parts which are stocked in or supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.  |
| P2          | Repair parts which are procured and stocked for insurance purposes because the combat or military essentially of the end item dictates that a minimum quantity be available in the supply system.  |
| M           | Repair parts which are not procured or stocked, but are to be manufactured in indicated maintenance levels.  |
| A           | Assemblies which are not procured or stock as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled, to form the required assembly at indicated maintenance categories.                                     |
| X           | Parts and assemblies which are not procured or stocked and the mortality of which normally is below that of the end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.  |
| X1          | Repair parts which are not procured or stocked. The requirement for such items will be filled by use of the next higher assembly or component.   |
| X2          | Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain same through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisitioned, with accompanying justification, through normal supply channels. |
| G           | Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies of DSU and GSU level. These assemblies will not be stocked above DS and GS level or returned to depot supply level  |
| (3)         | Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:  |

| <i>Code</i> | <i>Explanation</i>  |
|-------------|---|
| O -----     | Organizational Maintenance  |
| (3)         | Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are: |

| Code | Explanation  |
|------|--|
| R    | Repair parts and assemblies which are economically reparable at DSU and GSU activities and are normally furnished by supply on an exchange basis.  |
| S    | Repair parts and assemblies which are economically reparable at DSU and GSU activities and which normally furnished by supply on an exchange basis. When items are determined by A GSU to be uneconomically reparable, they will be evacuated to a depot for evaluation and analysis before final disposition. |
| T    | High dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.   |
| U    | Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, or high dollar value reusable casings or castings.  |

*b. Federal Stock Number.* This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

*c. Description.* This column indicates the Federal item name and any additional description of the item required. Assembly components and subassemblies are indented under major assemblies. The abbreviation "w/e", when used as part of the nomenclature, indicates the Federal stock number includes all armament, equipment, accessories, and repair parts issued with the item. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parenthesis. Repair parts quantities included in kits and sets are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

*d. Unit of Measure (U/M).* A two-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.

*e. Quantity Incorporated in Unit.* This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

*f. Fifteen-Day Organizational Maintenance Allowance.*

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent ap

pearances of the same item will have the letters "REF" in the applicable allowance column. To locate the referenced item, locate the FSN or reference number in the index. The earliest figure and item number is the referenced item. Items authorized for use as required but riot for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowance for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units authorized additional prescribed loads, multiply the number 'of prescribed loads by the quantity in the appropriate density column to determine the number of repair parts authorized.

(3) To determine allowances when supporting more than 100 of these equipments: First, divide the number of equipments supported by 100 by moving the decimal two spaces left; second, multiply the result by the quantity in the 51-100 density column. Example, authorized allowance for 51-100 equipment'is 40; for 150 equipments, multiply 40 by 1.50 or 60 parts authorized.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U.S. Army Mobility Equipment Command for exception or. revision to the allowance list. Revisions to the range of items authorized will be made by the U. S. Army Mobility Equipment Command based upon engineering experience, demand data, or TAERS information.

*g. Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

#### 4. Special Information

a. Identifications of the usable on codes included in the description columns of this publication are:

| Code    | Used on                    |
|---------|----------------------------|
| A ----- | Pump, Carver Model 4 WHIS  |
| B ----- | Pump, Carver Model 4 WHISA |

Repair parts not symbolized are applicable to all end items covered in this manual.

b. Repair parts mortality has been based on 3,000 hours of operation per year.

c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

d. The following publication pertains to the pump and its components.

|                     |  |
|---------------------|--|
| TM 54320-<br>216-15 | Operator, organiza-<br>tional, field, and depot<br>maintenance manual. |
|---------------------|--|

e. The illustrations in this manual are identical to the applicable illustrations published in the -35P, Direct and General Support and Depot Maintenance Repair Parts and Special Tools List manual, and the figure numbers are the same as appear in that manual. The -35P illustrations are given for a better understanding of the parts relationship, however, only those parts assigned maintenance code "0" are listed in the tabular portion and only these parts are authorized for requisitioning from this manual.

### 5. How to Locate 'Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Part Listing, find the assembly to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in alphanumeric sequence, cross referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Part Listing, find the assembly group of the repair part and the illustration figure number and item number

referenced in the Index of Federal Stock Numbers and Reference Numbers.

c. When the Federal stock number or reference number is known and the repair part is not illustrated.

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number in the section titled "Items Not Illustrated" and note the page number. This section of the index is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to page number.

(2) *Second.* Using the Table of Contents, locate the assembly group number and page number.

(3) *Third.* Using the applicable group number and page number locate the pertinent stock number or reference number in the Repair Parts Listing. Items which are not illustrated are listed at the end of the assembly group to which they belong.

### 6. Abbreviations

amp -----ampere (s)  
dc -----direct current  
dia -----diameter  
ea -----each  
ft -----feet (foot)  
in -----.inch (es)  
lg -----long (length)  
h -----left hand  
mm -----millimeter  
mtg -----mounting  
No -----number (s)  
rh -----right hand  
thd -----thread  
uf -----microfared  
v -----volt (s)  
w -----wide  
w/ -----with

### 7. Federal Supply Codes for Manufacturers

| Code   | Manufacturer  |
|--------|---|
| 00000  | -----Ordnance Corps                                       |

**8. Recommendations for Maintenance Publication Improvements**

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commanding General, U. S. Army Mobility Equipment Command, ATTN: AMSME-MPP, 4300 Goodfellow Boulevard, St. Louis, Mo. 63120.
