}

HEADQUARTERS  
DEPARTMENT OF THE ARMY  
WASHINGTON, D.C., 24 October 1986

Organizational, Direct and General Support,  
and Depot Maintenance Repair Parts  
and Special Tools List

PUMP, RECIPROCATING: DIAPHRAGM; GASOLINE DRIVEN  
WHEEL MOUNTED, RUBBER TIRES; 4 IN.; 100 GPM  
AT 10 FT SUCTION LIFT  
(RICE PUMP AND MACHINE CO. MODEL 4D-327)  
SERIAL NUMBER RANGE 1120 THROUGH 1245  
LESS MIL STD ENGINE  
FSN 4320-829-8434

TM 5-4320-222-25P, dated 19 September 1968, is changed as follows:  
Page 8, Figure 1, Item 7. Change SMR code from "PFR" to "PAFHH." Change FSN "2805-714-8553" to NSN "2805-01-169-1100". Change Reference No. from "2A016-2" to "2A016-4".

**By Order of the Secretary of the Army:**

Official:

JOHN A. WICKHAM, JR.  
*General, United States Army*  
*Chief of Staff*

R. L. DILWORTH  
*Brigadier General, United States Army*  
*The Adjutant General*

**DISTRIBUTION:**

To be distributed in accordance with DA FORM 12-25A, Organizational, Direct and General Support Maintenance requirements for Pump, Reciprocating, Diaphragm, Gas Driven, Wheel Mounted, 100 GPM, 10 FT Lift, 4 IN (4D-327) (TM 5-4320-222 Series)

1/(2 Blank)

## SECTION I INTRODUCTION

---

### **1. Scope**

This manual lists repair parts and special tools required for the performance of organizational, direct support, general support, and depot maintenance of the pump.

### **2. General**

a. The repair parts list is arranged as follows:

(1) Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups.

(2) Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

b. This Repair Parts and Special Tools List is divided into the following sections:

(1) *Prescribed Load Allowance (PLA)- Section II.*

A consolidated listing of repair parts quantitatively allocated for initial stockage at the organizational level. This is a mandatory minimum stockage allowance.

(2) *Special Tools, Test and Support Equipment-Section III.* A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level (Not applicable).

(3) Repair Parts-Section IV. A list of repair parts authorized for the performance of maintenance at the organizational level.

(4) Repair Parts-Section V. A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

(5) Special Tools, Test and Support Equipment-Section VI. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level.

port, general support, and depot level (Not applicable).

(6) *Federal Stock Number and Reference Number Index-Section VII* A list of Federal stock numbers followed by reference numbers, appearing in all the listings, in ascending alphanumeric sequence cross-referenced to index number.

### **3. Explanation of Columns**

The following provides an explanation of columns in the tabular lists in sections II through VI.

a. *Source, Maintenance, and Recoverability Codes (SMR).*

*Note.* Common hardware items known to be readily available in Army supply channels will be assigned Maintenance codes only Source codes, Recoverability codes, and Maintenance allowances will not be assigned to this category.

(1) *Source Code.* Indicates the selection status and source for the listed item. Source codes used are:

Code	Explanation
P	Applied to repair parts which are stocked in or supplied from DSA/GSA or Army supply system, and authorized for use at indicated categories.
M	Applied to repair parts which are not procured or stocked but are to be manufactured at Indicated maintenance categories.
A	Applied to assemblies which are not procured or stocked as such but made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories.

Code	Explanation
X	Applied to parts and assemblies which are not procured or stocked, the mortality of which is normally below that of the applicable end item, and the failure of which should result in retirement of the end item from the supply system
X1	Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of the next higher assembly or components
X2	Applied to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.
C	Applied to repair parts authorized for local procurements. If not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement
G	Applied to major assemblies that are procured with PEMA (Procurement Equipment Missile Army) funds for initial issue only to be used as exchange assemblies at I(SU and GSU maintenance level. These assemblies will not be stocked above DSU and GSU level or returned to depot supply level

Note. Source code is not shown on common hardware items known to be readily available in Army supply channels and through local procurement.

(2) *Maintenance Code.* Indicates the lowest category of maintenance authorized to install the listed item. The maintenance level codes are:

Code	Explanation
O	Organizational maintenance
F	Direct support maintenance
H	General support maintenance
D	Depot maintenance

(3) *Recoverability Code.* indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis

Code	Explanation
T	Applied to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U	Applied to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings
(4)	This column also lists, 'below the SMR code, an index number for each item, in ascending numerical sequence, which is used to locate items in the publication when the Federal stock number and/or reference number is known.
b.	<i>Federal Stock Number</i> Indicates the Federal stock number for the item.
c.	<i>Description</i> Indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parentheses.
d.	<i>Unit of Issue.</i> Indicates the unit used as a basis for issue, e.g., ea, pr, ft, yd, etc.
e.	<i>Quantity Incorporated in Unit Pack.</i> Indicates the actual quantity contained in the unit pack.
f.	<i>Quantity Incorporated in Unit.</i> Indicates the quantity of the item used in the functional group.
g.	<i>Fifteen-Day Organizational Maintenance allowances.</i>

(1) The allowance columns are divided into four subcolumns. Indicated in each sub-column is the quantity of items authorized for the number of equipment's supported. Items authorized for use as required but not initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipment's supported. Units and organizations - authorized additional prescribed loads will multiply the number of pre-scribed loads authorized by the quantity of repair parts reflected in the appropriate den-

sity column to obtain the total quantity of re-pair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipment's shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-10'0 allowance column. Example, authorized allowance for 51-100 equipment's is 12; for 140 equipment's multiply 12 by 1.40 or 16.80 rounded off to 17 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U. S. Army Mobility Equipment Command for exception or revision to the allowance list. Revisions to the range of items authorized will be made by this Command based upon engineering experience, demand data, or TAE(RS) information

#### *h. Thirty-Day DS/GS Maintenance Allowances.*

(1) The allowance columns are divided into three subcolumns. Indicated in each sub-column is the quantity of items authorized for the number of equipment's supported. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for DS/ GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipment's supported.

(3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipment's can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipment's is 40; for 150 equipment's multiply 40 by 1.50 or 60 parts required.

*i. One-Year Allowances Per 100 Equipment's/Contingency Planning Purposes.* Indicates the quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipment's for one year.

*j. Depot Maintenance Allowance Per 100 Equipment's.* Indicates the quantity authorized for depot maintenance of 100 equipment's. Items authorized for use but not for initial stockage are identified with an asterisk in the allowance column.

#### *k. Illustration.*

(1) *Figure Number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number.* Indicates the callout number used to reference the item in the illustration.

### **4. Special Information**

a. Repair parts mortality has been based on 1, 000 hours of operation per year.

b. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

c. The following publications pertain to the pump and its components: For repair parts and special tools , for the MIL STD Engine 2A016-II refer to TM 5-2805-206-24P

### **5. How to Locate Repair Parts**

a. When Federal stock number or reference number is unknown:

(1) First. Using the table of contents, determine the functional group within which the repair part belongs.

(2) Second. Find the illustration covering the functional group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration, and note the illustration figure and item number of the repair part.

(4) Fourth. Using the repair parts listing, find the functional group to which the repair part belongs and locate the illustration figure and item number noted on the illustration

b. Federal stock number or reference number is known:

(1) *First.* Using the index of Federal stock numbers and reference numbers, find the pertinent Federal stock number or reference number. This index is in ascending alpha- numeric sequence cross-referenced to an index number.

(2) *Second.* Using the repair part listing, find the index number referenced in the index of Federal stock numbers and reference numbers.

## 6. Abbreviations

ea -----	each
ft -----	foot (feet)
grp -----	group
id -----	inside diameter
in. -----	inch (es)
mtg -----	mounting
No -----	Number
thk -----	thick (ness)

## 7. Federal Supply Codes for Manufacturers

Code	Manufacturer
08645 ---	Briggs and Stratton Corp.
24161 ---	Gates Rubber Co.
60038 ---	Timken Roller Bearing Co.
76680 ---	National Seal Division of Federal-Mogul Corp.
80885 ---	Oil Rite Corp.
81336 ---	Chief of Engineers
81673 ---	Rice Pump and Machine Co.
87134 ---	Mercury Clutch Div. of Auto- matic Steel Products, Inc.

## 8. Report of Equipment Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to DA Publications) and forwarded direct to Commanding General, U. S. Army Mobility Equipment Command, ATTN: AMSME-MPP, 4300 Goodfellow Boulevard, St. Louis, Mo. 63120.
