SECTION I

INTRODUCTION

1. Scope.

This manual lists repair parts required for the performance of direct support maintenance of Tester, Pitot and Static System, United Manufacturing Co., Electronics Division Model PST, Type 2, P/N 7365, FSN 4920-988-0206.

2. General.

This Repair Parts and Special Tools List is divided into the following sections:

a. Repair Parts-Section II. A list of repair parts authorized for the performance of maintenance at direct support level in figure and item number sequence within each functional group.

b. Special Tools, Test and Support Equipment-Section III. (Not applicable).

c. Index-Section IV. This section is divided into the following parts:

- (1) Federal Stock Number Index-Part 1. A list of Federal stock numbers in ascending numerical sequence appearing in all listings cross-referenced to figure and item number.
- (2) Reference Number Index-Part 2. A list of reference numbers in alphabetical sequence appearing in all listings cross-referenced to manufacturers code and figure and item number.

3. Explanation of Columns.

The following provides an explanation of columns in the tabular list in Section II.

a. Source, Maintenance and Recoverability Codes (SMR).

- (1) Source code indicates the selection status and source for the listed item. Source codes used are—

| <i>Code</i> | <i>Explanation</i> |
|-------------|---|
| P | Applies to repair parts which are stocked in or supplied from General Services Administration/Defense Supply Agency or Army Supply System and are authorized for use at indicated maintenance categories. |
| M | Applies to repair parts which are not procured or stocked, but are to be manufactured at indicated maintenance categories. |
| X2 | Applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal channels. |
| (2) | Maintenance code indicates the lowest category of maintenance authorized to install the listed item. Parts which require manufacturer or assembly will be indicated in the source code column the category which will make or assemble the item (i.e., AF, MF). The maintenance used is— |

| <i>Code</i> | <i>Explanation</i> |
|-------------|---|
| F | Direct support |
| (3) | Recoverability Code. Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. The recoverability code used is— |

| <i>Code</i> | <i>Explanation</i> |
|-------------|---|
| R | Applies to repair parts and assemblies which are economically repairable at DSU/GSU activities and normally are furnished by supply on an exchange basis. |

b. *Federal Stock Number*. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes. An item in one of the following categories will not be published with a Federal stock number. Item source coded A, M or XI.

c. *Description*. Indicates the Federal item name and any additional description of the item required. Further information to clarify item relationship, item replacement, multiple application and material required for fabrication is also identified. The make from (MAKEFR) items appear in group 06, listed in ascending numerical Federal stock number sequence.

- (1) Reference Number. A reference number and manufacturers code subcolumn indicates the manufacturers' reference number or identification number followed by the applicable five-digit Federal supply code for manufacturers in parentheses.
- (2) Models Usable On Code column is not applicable to this manual.

d. *Unit of Issue (U/I)*. A 2-character alphabetic abbreviation indicating the amount or quantity in which the item is used, e.g., FT, EA, PR, etc.

e. *Quantity Incorporated in Unit*. Indicates the quantity of the item used in the functional group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc). When attaching parts are shown as attaching two or more items, the quantities of the attaching parts are those necessary to attach only one of the items.

f. 30-Day DS Maintenance Allowance.

- (1) The allowance column is divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance column. Items authorized for use as required, but not for initial stockage are identified with an asterisk (*) in the allowance column.
- (2) The quantitative allowance for DS level of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.
- (3) Determination of the total quantity of parts required for the maintenance of more than 100 of these equipments

can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

g. 1-Year Allowance Per 100 Equipments/Contingency Planning Purposes. (Not applicable).

h. Illustration.

- (1) Figure Number. Indicates the figure number of the illustration in which the item is shown.
- (2) Item Number. Indicates the call-out number used to reference the item in the illustration.

4. Special Information.

Attaching parts are listed immediately after the part(s) they attach and in the same indent. They are separated from the part(s) by the words "attaching parts." When they attach an assembly which is broken down to show detail parts, the attaching parts are separated from the details of the assembly by the symbol "*(*)" Details of the assembly then are indented one space to the right of their next higher assembly, which appears above the attaching parts.

5. Abbreviations (Mnemonic Codes)

The following abbreviations and mnemonic codes are used:

| | |
|---------|------------------------|
| AC. | Alternating current |
| DC | Direct current |
| FT. | Foot (feet) |
| ID. | Inside diameter(s) |
| IN | Inches(es) |
| LG | Long (length) |
| MAKEFR. | Make from |
| MAX | Maximum |
| MTG | Mounting(s) |
| OD | Outside diameter(s) |
| PSI | Pounds per square inch |
| U/W. | Used with |

6. Federal Supply Code for Manufacturers.

| Code | Manufacture and Location |
|-------|--|
| 07707 | United Shoe Machinery Corp Fastener Division 510 River Rd Shelton CT 06485 |
| 81349 | Military Specifications Promulgated by Standardization Div Directorate of Logistic Services DSA |
| 86786 | Rice Carroll W Piedmont CA |
| 88044 | Aeronautical Standards Group Dept of Navy and Air Force |
| 96096 | Military Standards Promulgated by Standardization Div Directorate of Logistic Services DSA |
| 99664 | United Manufacturing Division of UMC Electronics co 460 Sackett Point Road North Haven CT 06473 |

7. Recommendations for Equipment Manual Improvements.

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to DA Publications) and forwarded direct to the Commanding General, U.S. Army Aviation Systems Command, ATTN: AMSAV-R-MLRA, P. O. Box 209, St. Louis, MO 63166.
