MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

**(INCLUDING DEPOT MAINTENANCE REPAIR PARTS
AND SPECIAL TOOLS):**

TEST SET, TURRET FAULT ISOLATION

(4933-432-7269)

This manual is current as of 1 November 1972

	Page	Illust fig.
SECTION I. INTRODUCTION	1-1	---
II. REPAIR PARTS LIST		
Case assembly and related parts	2-1	1
Test set panel and related part	2-4	1
Electron tube, delay element, armature relay, bracket, and related	2-9	3
Relay mounting bracket and related parts	2-12	4
Mounting bracket and related parts	2-15	5
Circuit card assembly A1	2-17	6
Circuit card assembly A2	2-19	7
Circuit card assembly A3	2-21	8
Circuit card assembly A4	2-23	9
Terminals, splices, straps, sleeving and contacts	2-25	10
III. SPECIAL TOOLS, TEST, AND SUPPORT EQUIPMENT		
Wiring harnesses	3-1	11
IV. FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX	4-1	---

Section I. INTRODUCTION

1. Scope

This manual lists repair parts and special tools required for the performance of direct support, general support, and depot maintenance of the test set.

2. General

This repair parts and special tools list is divided into the following sections:

a. *Repair Parts List-Section II.* A list of repair parts authorized at the direct support, general support, and depot levels for the performance of maintenance. The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.

b. *Special Tools List-Section III.* A list of special tools, test, and support equipment authorized for the performance of maintenance at the direct support, general support, and depot levels.

c. *Federal Stock Number and Reference Number Index-Section IV.* A list, in numerical sequence, of all Federal stock numbers appearing in the listings followed by a list, in alphabetic sequence, of all reference numbers appearing in the listings. Federal stock number and reference numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings.

a. *Source, Maintenance, and Recoverability Codes (SMR).*

(1) *Source code.* Indicates the source for the listed item. Source codes, the first and second positions of the SMR code (col 1), are as follows:

<i>Code</i>	<i>Explanation</i>
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentially dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.

<i>Code</i>	<i>Explanation</i>
KD	An item of depot overhaul repair kit and not purchased separately.

KF	An item of a maintenance kit and not purchased separately.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational maintenance.
MF	Item to be manufactured or fabricated at direct support maintenance.
MH	Item to be manufactured or fabricated at general support maintenance.
MD	Item to be manufactured or fabricated at depot maintenance.
AO	Item to be assembled at organizational maintenance.
AF	Item to be assembled at direct support maintenance.
AH	Item to be assembled at general support maintenance.
AD	Item to be assembled at depot maintenance.
XA	Item is not procured or stocked. The requirement for the item will be filled by requisitioning the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage requisition from the end item manager with exception data for immediate use.
XC	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

(2) *Maintenance Code.*

(a) *Use code.* This code, the third position of the SMR code (col 1), indicates the lowest category of maintenance authorized to remove, replace, and/or use the item. Capabilities of higher maintenance categories are considered equal or better.

<i>Code</i>	<i>Explanation</i>
C	Item removed, replaced, and/or used by the crew /operator.
O	Item removed, replaced, and/or used at organizational maintenance.
F	Item removed, replaced, and/or used at direct support maintenance.
H	Item removed, replaced, and/or used at general support maintenance.
D	Items removed, replaced, and/or used at depot maintenance only.

(b) *Repair code.* This code, the fourth position of the SMR code (col 1), indicates whether the item is to be repaired and identifies the lowest maintenance category with the capability to perform

complete repair (i.e., all authorized maintenance functions). This does not preclude some repair which may be accomplished at a lower category of maintenance. The maintenance repair codes are:

Code Explanation

- O The lowest maintenance category capable of complete repair is organizational maintenance.
- F The lowest maintenance category capable of complete repair is direct support maintenance.
- H The lowest maintenance category capable of complete repair is general support maintenance.
- D The only maintenance category capable of complete repair is depot maintenance.
- L Repair restricted to designated specialized repair activity.
- Z Nonreparable. No repair is authorized.
- B No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc. at the user level. No parts or special tools are procured for the maintenance of this item.

(4) *Recoverability code.* Indicates whether unserviceable items should be returned for recovery or salvage. The recoverability codes, the fifth position of the SMR code, are as follows:

Code Explanation

- Z Nonreparable item. When unserviceable, condemn and dispose at the category indicated by maintenance use code (third position).
- O Reparable item. When uneconomically reparable, condemn and dispose at organizational maintenance.
- F Reparable item. When uneconomically reparable, condemn and dispose at direct support maintenance.
- H Reparable item. When uneconomically reparable, condemn and dispose at general support maintenance.
- D Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot maintenance.
- L Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity.
- A Item requires special handling or condemnation procedure because of specific reason (i.e., precious metal content, high dollar value, critical or hazardous material). Refer to appropriate manuals/directives for specific instructions

b. *Federal Stock Number.* Indicates the federal stock number assigned to the item and will be used for requisitioning purposes.

c. *Description.* Indicates the Federal item name and a minimum description required to identify the item.

The last line indicates the reference number followed by the applicable Federal supply code for manufacturer IFSCM) in parentheses. The FSCM is used as an element in item identification to designate manufacturer, distributor, or Government agency, etc., and is identified in SB .08-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity o)f each item in the kit/ set indicated in front of the item name.

d. *Unit of Measure (U/M).* Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation, e.g., ea. in. pr, etc., and is the basis used to indicate quantities. When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

e. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group or assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, e.g., shims, spacers, etc.

f. *Allowance Columns.*

(1) In section II, repair parts list, the allowance columns are left blank intentionally. The maintenance level code indicates that the item is authorized for use at that category. Organizational, direct support, and general support parts will be requisitioned on a "as required" basis until authorized stockage levels are established based on demand criteria.

(2) Special tools, test, and support equipment peculiar to this test set (sect III) are listed with quantities in the appropriate allowance columns.

g. *Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item on the illustration.

4. **Special Information**

a. This test set is used with the armored reconnaissance/airborne assault vehicle: Full-tracked, 152-mm, M551.

b. The basis of issue for authorized tools, test, and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations.

c. The following publications pertain to the turret fault isolation test set and its components:

TM 9-4933-216-12

Operator's and Organizational Maintenance Manual
Including Repair Parts and Special Tools List: Test
Set, Turret Electrical Fault Isolation: With
Accessories (4933-432-7269)

TM 9-4933-216-34

Direct Support and General Support Maintenance
Manual: Test Set, Turret Electrical Fault Isolation:
With Accessories (4933-432-7269)

5. How to Locate Repair Parts

a. When Federal stock number or reference
number is unknown:

(1) *First.* Using the table of contents
determine the functional group or assembly within which
the repair part belongs, i.e., circuit board, panel, test set
assembly. This is necessary since illustrations are
prepared for functional groups or assemblies and listings
are divided into the same groups.

(2) *Second.* Find the illustration covering the
functional group or assembly to which the repair part
belongs.

(3) *Third.* Identify the repair part on the
illustration and note the illustration figure and item
number of the repair part.

(4) *Fourth.* Using the repair parts listing, find
the functional group/assembly to which the repair part
belongs and locate the illustration figure and item
number noted on the illustration.

b. When Federal stock number or reference
number is known:

(1) *First.* Using the index of Federal stock
numbers and reference numbers find the pertinent
Federal stock number or reference number. This index
is in ascending FSN sequence followed by a list of
reference numbers in ascending alphabetic sequence,
cross-referenced to the illustration figure number and
item number.

(2) *Second.* Using the repair parts listing,
find the functional group/assembly of the repair part and
the illustration figure number and item number
referenced in the index of Federal stock numbers and
reference numbers.

6. Abbreviations

<i>Abbreviation</i>	<i>Explanation</i>
ac.....	alternating current
accomtd.....	accommodated
adj.....	adjacent
adj.....	adjustable
al	aluminum
aly.....	alloy
amp	ampere
anld.....	annealed
andzd.....	anodized
atch.....	attach
bay.....	bayonet
bdl	bundle
blk.....	black

<i>Abbreviation</i>	<i>Explanation</i>
brkt	bracket
brs.....	brass
brz.....	bronze
cd-pld.....	cadmium plated
cl	class
cmpnts.....	components
conn	connection
cool	coolant
cop	copper
cplg.....	coupling
cre	corrosion resistant
crm	chrome
crpd	crimped
cr	cross
crtg	cartridge
ctrg	centering
ctsk	countersunk
dc.....	direct current
dia.....	diameter
elec	electrical
extr	extractor
fer	ferrous
fl	flat
fltg	floating
fnsh	finish
gld.....	gold
gr.....	grade
grn.....	green
h	high
hgt	height
hlcl	helical
hsg.....	housing
id	inside diameter
insr	insert
insul.....	insulate (d)
intl	internal
k	kilo (ohm)
lg	long / length
lkg.....	locking
lt	light
max	maximum
met	metal
mintr	miniature
mtg	mounting
nat	natural
nkl.....	nickel
nom	nominal
NS	National special (thread)
nyl	nylon
oa	over-all
od	outside diameter
pcb.....	printed circuit board
phen.....	phenolic
phos	phosphorus
pld.....	plated
plstc.....	plastic
pnh	pan head
posn	position
prft	press fit
psvt	passivate (d)
pt	point
ptd	printed

<i>Abbreviation</i>	<i>Explanation</i>	<i>Abbreviation</i>	<i>Explanation</i>
rbr	rubber	UNC.....	unified coarse thread
rec	recess	UNF.....	unified fine thread
res	resistant	Univ.....	universal
rnd	round	u/o	used on
scr	screw	u/w	used with
semicond	semiconductor	vac	volt, alternating current
sgl	single	vdc	volt, direct current
sh	sheet	w	wide
sft	shaft	waf.....	width across flats
shk	shank	wd	width
shld	shield	wht.....	white
shldr.....	shoulder	w/o	without
sld -.....	sealed		
stld	slotted		
slv.....	sleeve		
sol	solid		
sp	single pole		
sst	stainless steel		
stl	steel		
tgl	toggle		
thd	thread		
thk	thick		
tnd	tinned		

7. Recommendations for Maintenance Publications Improvements

You can improve this manual by calling attention to errors and by recommending improvements using DA Form 2028 (Recommended Changes to Publications), or by a letter, and mailing to the Commander, US Army Weapons Command. ATTN: AMSWE-MAS, Rock Island, Illinois 61201. A reply will be furnished directly to you.

By Order of the Secretary of the Army:

CREIGHTON W. ABRAMS
General, United States Army
Chief of Staff

Official:

VERNE L. BOWERS
Major General, United States Army
The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-37 (qty rqr block No. 171), Direct/General Support requirements for AR/AAV, M551.

★U.S. GOVERNMENT PRINTING OFFICE: 1973-754-148/89

RECOMMENDED CHANGES TO EQUIPMENT TECHNICAL PUBLICATIONS

SOMETHING WRONG WITH PUBLICATION

THEN...JOT DOWN THE
DOPE ABOUT IT ON THIS FORM.
CAREFULLY TEAR IT OUT, FOLD IT
AND DROP IT IN THE MAIL.

PREVIOUS EDITIONS
ARE OBSOLETE.

P.S.--IF YOUR OUTFIT WANTS TO KNOW ABOUT YOUR
RECOMMENDATION MAKE A CARBON COPY OF THIS
AND GIVE IT TO YOUR HEADQUARTERS.

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigram = .035 ounce
 1 decagram = 10 grams = .35 ounce
 1 hectogram = 10 decagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 10 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
