**REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS**

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter or DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual directly to: Commander, US Army Aviation and Troop Command, ATTN: AMSAT-I-MP, 4300 Goodfellow Blvd., St. Louis, MO 63120-1798. A reply will be furnished directly to you.

For Air Force, submit AFTO Form 22 (Technical Order System Publication Improvement Report and Reply) in accordance with paragraph 6-5, Section VI, T.O. 00-5-1. Forward to Commander, San Antonio Air Logistics Center, ATTN: SA-ALC-MMDDA, Kelly Air Force Base, Texas 78241-5000.

**UNIT, DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE  
REPAIR PARTS AND SPECIAL TOOLS LIST**

**Section 1. INTRODUCTION**

1. *Scope.* This joint Army, Navy, Air Force and Marine Corps manual lists repair parts and special tools required for the performance of organizational, intermediate (field), direct and general support maintenance of the expandable tactical shelter. The following paragraphs are keyed to applicable users. All users should read paragraph 4, Special Information, prior to using this manual.

NOTE: (Army) Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

NOTE: (Army) Organizational Maintenance personnel are to extract the maintenance coded -O- items they require from Section II, Column (2), Third and or Fourth Position of the Direct and General Support Repair Parts and Special Tools List.

2. *General.* This Repair Parts and Special Tools List is divided into the following sections:

a. (ALL) Repair Parts -- Section II. A list of repair parts authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support in figure and item number sequence.

b. (ALL) Special Tools. Test and Support Equipment -- Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational, intermediate (field), (direct support and general support).

c. National Stock Number and Reference Number Index -- Section IV. A list of National stock numbers in numerical sequence, followed by a list of reference numbers appearing in all the listings in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

3. *Explanation of columns.* The following provides an explanation of columns in the tabular lists in Sections II and III.

a. (ALL) Illustrations. (Column 1.) This column is divided as follows:

(1) Figure Number. Indicates the figure number of the illustration on which the item is shown.

(2) Item Number. Indicates the number used to identify the item on the illustration.

b. (ALL) Source, Maintenance, and Recoverability Codes (SMR) (Column 2.)

(1) Uniform Source Codes applicable to all Military Services.

GENERAL: Source Codes are assigned to support items to indicate the manner of accounting support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

CODE

DEFINITION

PA

Item procured and stocked for anticipated or known usage.

**TM10-5411-201-24P**  
**TO35E4-178-4**

<u>CODE</u>	<u>DEFINITION</u>	<u>CODE</u>	<u>DEFINITION</u>
PB	Item procured and stocked for insurance purposes because essentially dictates that a minimum quantity be available in the supply system.	KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.	MO	Item to be manufactured or <b>fabricated at organizational level.</b>
PD	Support item, excluding support equipment, procured for initial issue or out fitting and stocked only for subsequent or additional initial issues or outfitting. Not subject to automatic replenishment.	MF	Item to be manufactured or fabricated at intermediate maintenance levels.  Air Force - Intermediate (*) Army - General Support (*) Marine Corps - 4th Echelon Navy - Ashore
PE	Support equipment procured and stocked or initial issue or outfitting to specified maintenance repair activities.	MG	Item to be manufactured or fabricated at both afloat and ashore intermediate maintenance levels - Navy use only.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.	MD	Item to be manufactured or fabricated at depot maintenance level.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shut down of production facilities would prove uneconomical to reproduce at a later time.	AO	Item to be assembled at organizational level.
		AF	Item to be assembled at intermediate maintenance levels.  Air Force - Intermediate (*) Army - Direct Support (*) Marine Corps - 3rd Echelon Navy - Afloat
KD	An item of depot overhaul/repair kit and not purchased separately. A depot kit that provides items required at the time of depot overhaul or repair.	AH	Item to be assembled at intermediate maintenance levels.  Air Force - Intermediate (*) Army - General support (*) Marine Corps - 4th Echelon Navy - Ashore
KF	An item of a maintenance kit and not purchased separately. A maintenance kit that provides an item can be replaced at organizational or intermediate levels of maintenance.	AG	Item to be assembled at both afloat and ashore intermediate maintenance level - <b>Navy use only.</b>

CODE	DEFINITION	Code	Application/Explanation
AD	Item to be assembled at depot maintenance levels.	0	Support item is removed, replaced, used at the organizational level of maintenance.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.	F	Support item is removed, replaced, used at the following intermediate levels:  USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - Third Echelon
XB	Item is not procured or stocked. If not available through salvage, requisition.		
x c	Installation drawing, diagram, instruction sheet, field service drawing that is identified by manufacturers' part number.	G	Support item is removed, replaced, used at both afloat and ashore intermediate levels: Navy only.
XD	A support item that is not stocked. When required item will be procured through normal supply channels.	H	Support item is removed, replaced, used at the following intermediate levels:  USAF - Intermediate (*) USA - General Support (*) USN - Ashore (only) USMC - Fourth Echelon
	(*) NOTE: For USAF and the USA Safeguard Program only Code "F" will be used to denote intermediate maintenance. On joint programs use of either code F or H by the joining service will denote intermediate maintenance to USAF and USA Safeguard Program.	D	Support items that are removed, replaced, used at Depot only:  USAF - Depot, Mobile Depot and Specialized Repair Activity USA - Depot, Mobile Depot and Specialized Repair Activity USN - Aviation Rework, Avionics and Ordnance Facilities and Shipyard. USMC - Depot

(2) Uniform Maintenance Codes applicable to all Military Services: GENERAL: Maintenance Codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The Maintenance Codes are in the third and fourth position of the Uniform SMR Code Format.

(a) USE (THIRD POSITION): The Maintenance Code entered in the third position indicates the lowest level maintenance level authorized to remove, replace, and use the support item. The Maintenance Code entered in the third position indicates one of the following levels of maintenance.

(b) REPAIR (FOURTH POSITION): The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e. all authorized maintenance functions)

Code	Application/Explanation	Code	Application/Explanation										
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.	I	Repair restricted to designated Specialized Repair Activity.										
F	The lowest maintenance level capable of complete repair of the support item is the following intermediate level:  USAF - Intermediate (*) USA - General Support (*) USN - Ashore (only) USMC - Fourth Echelon	Z	Nonrepairable. No repair is authorized.										
H	The lowest maintenance level capable of complete repair of the support item is the following intermediate level:  USAF - Intermediate (*) USA - General Support (*) USN - Ashore (only) USMC - Fourth Echelon	B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.										
<p>(*) NOTE: For USAF programs and the USA Safeguard Program. Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate maintenance to USAF and the USA Safeguard Program.</p>		<p>(3) Uniform Recoverability Codes applicable to all Military Services: GENERAL: Recoverability Codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the uniform SMR Code Format as follows:</p> <table border="0"> <thead> <tr> <th>Recoverability Codes</th> <th>Definition</th> </tr> </thead> <tbody> <tr> <td>z</td> <td>Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in column 3.</td> </tr> <tr> <td>0</td> <td>Reparable item. When uneconomically repairable, condemn and dispose at organizational level.</td> </tr> <tr> <td>F</td> <td>Reparable item. When uneconomically repairable, condemn and dispose at the following <b>inter-mediate levels</b>:  USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - Third Echelon</td> </tr> <tr> <td>H</td> <td>Reparable item. When uneconomically repairable, condemn and dispose at the following levels:</td> </tr> </tbody> </table>		Recoverability Codes	Definition	z	Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in column 3.	0	Reparable item. When uneconomically repairable, condemn and dispose at organizational level.	F	Reparable item. When uneconomically repairable, condemn and dispose at the following <b>inter-mediate levels</b> :  USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - Third Echelon	H	Reparable item. When uneconomically repairable, condemn and dispose at the following levels:
Recoverability Codes	Definition												
z	Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in column 3.												
0	Reparable item. When uneconomically repairable, condemn and dispose at organizational level.												
F	Reparable item. When uneconomically repairable, condemn and dispose at the following <b>inter-mediate levels</b> :  USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - Third Echelon												
H	Reparable item. When uneconomically repairable, condemn and dispose at the following levels:												
G	Both afloat and ashore intermediate levels are capable of complete repair of support item. Navy only.												
D	The lowest maintenance level capable of complete repair of the support item is the depot level:  USAF - Depot, Mobile Depot, and Specialized Repair Activity USA - Depot, Mobile Depot, and Specialized Repair Activity USN - Aviation Rework, Avionics and Ordnance Facilities Shipyard USMC - Depot												

USAF - Intermediate (\*)  
USA - General Support (\*)  
USN - Ashore  
USMC - Fourth Echelon

(\*) NOTE: For USAF programs and the USA Safeguard Program. Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate level of USAF and the USA Safeguard Program.

- D      Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L      Reparable item. Repair, condemnation and disposal not authorized below depot, Specialized Repair Activity level.
- A      Item requires special handling or condemnation procedure because of specific reasons (i.e., precious metal content, high-dollar value, critical material or hazardous material). Refer to appropriate manuals directives for specific instructions.

c. (USMC) Special Stock age Indicator Code and Replacement Factor (Column 3).

(1) Special Stockage Indicator Code. This column reflects the condition under which certain maintenance arts (parts assigned NSN'S and ended in the "P" series source code of the SMR code), are stocked. The codes are explained as follows:

No Code Indicates that the part may or may not be authorized in initial allowances to using or supporting organizations. The manner of determining initial allowances is explained in paragraph (2) below.

- I      Applied to maintenance parts for which predicted consumption would not warrant inclusion in Mount- Out but, for which a quantity of one (1) is authorized as insurance for Mount-Out using a 360 day This criteria is based on the total density of equipments employed by the DIV/WING TEAM. Mount-Out allowances, so authorized, will be stocked by the FSR or the MWSG in the case of Marine Wing peculiar equipment, as applicable.
- D      Applied to maintenance parts that are not considered critical or essential to be on hand and are, therefore, not authorized in initial allowances; however, these items are stocked within the Supply System and may be requisitioned based upon usage.
- T      Indicates that the part is authorized in garrison operating allowances in order to comply with state and local laws; however, the part is not authorized in Mount-Out since it is not combat essential.

(2) Replacement Factor. This column reflects the replacement factor assigned to each nationally stock numbered maintenance repair part. This factor is assigned to the repair part on its first appearance in the publication. The replacement factor, expressed as a decimal, indicates the average rate at which the type of item so coded has been used by Marine Corps field units or the rate at which design engineers anticipate the item will fail, wear out, or otherwise require replacement. All computations are based on a replacement period of one year. Therefore, a replacement factor of 0.08, applied to an item in this stock list, indicates that eight out of every one hundred of such items used in the end item of equipment to which this

publication pertains, is predicted to need replacement in one year. Likewise, 0.004 reflects that four out of every thousand in use are predicted to require replacement in one year, while 2.0 shows that everyone in use is predicted to be replaced twice during each year.

(a) Initial authorized stockage levels of consumable and salvageable items for an organization are to be computed for predicted consumption based on the number of items employed and or supported by an organization within the number of days for which stockage is authorized. In computing Garrison Operating Stock or Mount-Out, authorized levels can be determined by the requiring Marine Corps unit by multiplying the replacement factor times the quantity used per equipment times the number of end items employed by the using organization or supported by the service organization times the authorized day level expressed in and divided by 12. Specific formulas and examples are provided in Marine Corps Order, MCO P4400.79.

The replacement factors used in initial stockage computations should be revised, if warranted, after significant usage is experienced in accordance with the guidelines of MCO 4400.32A. The following formula replacement factor, "X" represents actual usage experience (1 year), "A" represents the application per equipment, and "B" represents the number of equipments supported.

$$W = \frac{X}{A \times B}$$

(b) Initial allowances for maintenance float items (recoverability codes "R" and "D") for the FMF and appropriate post and stations are as furnished by Initial Issue Actions.

Changes to maintenance replacement rates resulting from actual usage may require recomputation of maintenance float allowances by holding units. Any required recomputation of maintenance float allowances will be made in accordance with MCO 4000.6.

(c) The replacement factor for same as (S A) items is indicated upon the first appearance of the item in the major combination, component or assembly.

d. (ALL) National Stock Number (Column 4) indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

e. (ALL) Description. Indicates the Federal item name and any additional descriptions of the item required. The abbreviation "we" when used as part of the nomenclature, indicates that the National Stock Number includes all armament, equipment, accessories and repair parts issued with the item. A part number or other reference number is followed by the applicable five digit Federal Supply Code for manufacturer in parentheses. If two reference numbers and Federal Supply Codes for manufacturer are listed, the first listing refers to the Department of Defense Drawing Number, the second listing refers to the actual part manufacturer. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column.

f. (ALL) Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea. in. pr. etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy required units of measure will be requisitioned.

g. (ALL) Quantity Incorporated in Unit. Indicates the quantity of the item used in the assembly group. appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g. shims, spacers, etc.).

h. (MC) Quantity Per Equipment. Indicates the consolidated quantity of a

maintenance part used on an end item upon the parts first appearance in this is publication.

4. *Special Information.*

a. **USABLE ON CODE.** The usable on code appears to the right of the Description column heading. Usable on codes are shown as "Uoc:...". Uncoded items are applicable to all models. Identification of the usable on codes used in this RPSTL are:

Code	
DNT	60 Amp Shelter
ERJ	100 Amp Shelter

b. (Army) Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column, the higher level.

c. **Stockage Information.**

(1) Air Force stockage information is contained in Initial Supply Support Lists issued separately from this is publication by Sacramento Air Logistics Center in accordance with AFM 67-1, part 1, chapter 12.

(2) Navy stockage objectives are contained in Consolidated Shipboard Allowance List as furnished separately from this publication by the Ship Parts Control Center.

(3) Marine Corps stockage information is contained in Marine Corps Change "A" type listings issued separate from this publication.

5. *How to Locate Repair Parts.*

a. (ALL) When National Stock Number or reference number is unknown:

(1) Using the table of contents, determine the functional group: i.e., batteries and related parts, exhaust and breather pipes, within which the repair part belongs. This is necessary since illustrations are prepared for functional groups, and listings are divided into the same groups.

(2) Find the illustration covering the functional group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. (ALL) When national stock number or reference number is known:

(1) Using the Index of National Stock Numbers and Reference Numbers, find the pertinent national stock number or reference number. This index is in ascending NSN sequence followed by a list of reference numbers in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

(2) After finding the figure and item number, locate the figure and item number in the repair parts list.

125	line 20		

IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:

In line 6 of paragraph 2-1a the manual states the engine has 6 Cylinders. The engine on my set only has 4 Cylinders. Change the manual to show 4 Cylinders.

Callout 16 on figure 4-3 is pointing at a bolt. In key to figure 4-3, item 16 is called a shim - Please correct one or the other.

I ordered a gasket, item 19 on figure B-16 by NSN 2 910-05-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN

# The Metric System and Equivalents

## Linear Measure

1 centimeter = 10 millimeters = .39 inch  
 1 decimeter = 10 centimeters = 3.94 inches  
 1 meter = 10 decimeters = 39.37 inches  
 1 dekameter = 10 meters = 32.8 feet  
 1 hectometer = 10 dekameters = 328.08 feet  
 1 kilometer = 10 hectometers = 3,280.8 feet

## Weights

1 centigram = 10 milligrams = .15 grain  
 1 decigram = 10 centigrams = 1.54 grains  
 1 gram = 10 decigrams = .035 ounce  
 1 dekagram = 10 grams = .35 ounce  
 1 hectogram = 10 dekagrams = 3.52 ounces  
 1 kilogram = 10 hectograms = 2.2 pounds  
 1 quintal = 100 kilograms = 220.46 pounds  
 1 metric ton = 10 quintals = 1.1 short tons

## Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce  
 1 deciliter = 10 centiliters = 3.38 fl. ounces  
 1 liter = 10 deciliters = 33.81 fl. ounces  
 1 dekaliter = 10 liters = 2.64 gallons  
 1 hectoliter = 10 dekaliters = 26.42 gallons  
 1 kiloliter = 10 hectoliters = 264.18 gallons

## Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch  
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches  
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet  
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet  
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres  
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile -

## Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch  
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches  
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

## Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
inches	centimeters	2.540	ounce-inches	newton-meters	.007062
feet	meters	.305	centimeters	inches	.394
yards	meters	.914	meters	feet	3.280
miles	kilometers	1.609	meters	yards	1.094
square inches	square centimeters	6.451	kilometers	miles	.621
square feet	square meters	.093	square centimeters	square inches	.155
square yards	square meters	.836	square meters	square feet	10.764
square miles	square kilometers	2.590	square meters	square yards	1.196
acres	square hectometers	.405	square kilometers	square miles	.386
cubic feet	cubic meters	.028	square hectometers	acres	2.471
cubic yards	cubic meters	.765	cubic meters	cubic feet	35.315
fluid ounces	milliliters	29.573	cubic meters	cubic yards	1.308
pints	liters	.473	milliliters	fluid ounces	.034
quarts	liters	.946	liters	pints	2.113
gallons	liters	3.785	liters	quarts	1.057
ounces	grams	28.349	liters	gallons	.264
