REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms) to: Commander, U.S. Army Soldier and Biological Chemical Command, ATTN: AMSSB-RIM-L (N), Kansas Street, Natick, MA 01760. You may also send in your recommended changes via electronic mail directly to <amssbriml@natick.army.mil>. A reply will be furnished to you.

DISTRIBUTION STATEMENT A – Approved for public release; distribution is unlimited.

HOW TO USE THIS MANUAL

In this manual, primary chapters appear in upper case/capital letters; work packages are presented in numeric sequence, e.g., 0001 00; paragraphs in a work package are not numbered and are presented in a titles format. For a first level paragraph, title all upper case/capital letters, e.g. FRONT MATTER subordinate paragraph title will have the first letter of the first word of each principle word all upper case/capital letters, e.g., Manual Organization and Page Numbering System. The location of additional material that must be referenced is clearly marked. Illustrations supporting maintenance procedures/text are located underneath, or as close as possible to, their referenced paragraph.

Chapter Organization

FRONT MATTER

Front Matter consists of front cover, warning summary, title block, table of contents, and “how to use this manual” page.

CHAPTER 1- RPSTL INTRODUCTION

Chapter 1 contains introductory information on the Force Provider RPSTL.

CHAPTER 2- LMS RPSTL

Chapter 2 contains the Repair Parts and Special Tools Information necessary to maintain the LMS.

REAR MATTER

Rear Matter includes the DA Form 2028, authentication page, and back cover.

THIS PAGE INTENTIONALLY LEFT BLANK

**CHAPTER 1
REPAIR PARTS AND SPECIAL TOOLS LIST INTRODUCTION
LMS**

THIS PAGE INTENTIONALLY LEFT BLANK

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

INTRODUCTION**SCOPE**

This RPSTL lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of unit and direct support maintenance of the Lightweight Multipurpose Shelter (LMS). It authorizes the requisitioning, issue, and disposition of spares, repair parts, and special tools as indicated by the source, maintenance, and recoverability (SMR) codes.

GENERAL

In addition to the Introduction work package, this RPSTL is divided into the following work packages.

1. Repair Parts List Work Packages. Work packages containing lists of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. These work packages also include parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Sending units, brackets, filters, and bolts are listed with the component they mount on. Bulk materials are listed by item name in FIG. BULK at the end of the work packages. Repair parts kits are listed separately in their own functional group and work package. Repair parts for reparable special tools are also listed in a separate work package. Items listed are shown on the associated illustrations.
2. Special Tools List Work Packages. Work packages containing lists of special tools, special TMDE, and special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in the DESCRIPTION AND USABLE ON CODE (UOC column)). Tools that are components of common tool sets and/or Class VII are not listed.
3. Cross-Reference Indexes Work Packages. There are two cross-reference indexes work packages in this RPSTL: the National Stock Number (NSN) Index work package and the Part Number (P/N) Index work package. The National Stock Number Index work package refers you to the figure and item number. The Part Number Index work package refers you to the figure and item number.

EXPLANATION OF COLUMNS IN THE REPAIR PARTS LIST AND SPECIAL TOOLS LIST WORK PACKAGES

ITEM NO. (Column (1)). Indicates the number used to identify items called out in the illustration.

SMR CODE. (Column (2)). The SMR code containing supply/requisitioning information, maintenance level authorization criteria, and disposition instruction, as shown in the following breakout:

Source Code	Maintenance Code	Recoverability Code	
XX	XX	X	
Ist two positions: How to get an item.	3rd position: Who can install, replace, or use the item.	4th position: Who can do complete repair* on the item.	5th position: Who determines disposition action on unserviceable items.

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

*Complete Repair: Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

Source Code. The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow:

SOURCE CODE	EXPLANATION
PA	Stock items; use the applicable NSN to requisition/
PB	request items with these source codes. They are
PC	authorized to the level indicated by the code entered
PD	in the 3 rd position of the SMR code.
PE	
PF	NOTE
PG	Items coded PC are subject to deterioration.
KD	Items with these codes are not to be requested/
KF	requisitioned individually. They are part of a kit which
KB	is authorized to the maintenance level indicated in the
	3 rd position of the SMR code. The complete kit must
	be requisitioned and applied.
MO – Made at unit/AVUM level	Items with these codes are not to be
MF – Made at DS/AVIM level	requisitioned/requested individually. They must be
MH – Made at GS level	made from bulk material that is identified by the P/N
ML – Made at SRA	in the DESCRIPTION and USABLE ON CODE (UOC)
MD – Made at Depot	column and listed in the bulk material group work
	package of the RPSTL. If the item is authorized to
	you by the 3 rd position code of the SMR code, but the
	source code indicates it is made at a higher level,
	order the item from the higher level of maintenance.
AO – Assembled by unit AVUM level	Items with these codes are not to be
AF – Assembled by DS/AVIM level	requested/requisitioned individually. The parts that
AH – Assembled by GS level	make up the assembled item must be requisitioned or
AL – Assembled by SRA	fabricated and assembled at the level of maintenance
AD – Assembled by Depot	indicated by the source code. If the 3 rd position code
	of the SMR code authorizes you to replace the item,
	but the source code indicates the item is assembled
	at a higher level, order the item from the higher level
	of maintenance.
XA -	Do not requisition an "XA"-coded item. Order the next
	higher assembly. (Refer to the NOTE below.)
XB -	If an item is not available from salvage, order it using
	the CAGEC and P/N.

SOURCE CODE – continued

EXPLANATION - continued

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

XC -	Installation drawings, diagrams, instruction sheets, field service drawings; identified by manufacturer's P/N.
XD -	Item is not stocked. Order an XD-coded item through normal supply channels using the CAGEC and P/N given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes except for those items source coded "XA" or those aircraft support items restricted by requirements of AR 750- 1.

Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

Third Position. The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to the following levels of maintenance:

Maintenance Code	Application/Explanation
-----------------------------	--------------------------------

- C --- Crew or operator maintenance done within unit/AVUM maintenance.
- O --- Unit level/AVUM maintenance can remove, replace, and use the item.
- F --- Direct support/AVIM maintenance can remove, replace, and use the item.
- H --- General support maintenance can remove, replace, and use the item.
- L --- Specialized repair activity can remove, replace, and use the item.
- D --- Depot can remove, replace, and use the item.

Fourth Position. The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (perform all authorized repair functions).

NOTE

Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.

Maintenance Code	Application/Explanation
-----------------------------	--------------------------------

- O --- Unit/AVUM is the lowest level that can do complete repair of the item.
- F --- Direct support/AVIM is the lowest level that can do complete repair of the item.
- H --- General support is the lowest level that can do complete repair of the item.
- L --- Specialized repair activity is the lowest level that can do complete repair of the item.

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

- D --- Depot is the lowest level that can do complete repair of the item.
- Z --- Nonreparable. No repair is authorized.
- B --- No repair is authorized. No parts or special tools are authorized for maintenance of "B" coded item. However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is shown in the fifth position of the SMR code as follows:

Recoverability Code	Application/Explanation
Z ---	Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of the SMR code.
O ---	Reparable item. When uneconomically reparable, condemn and dispose of the item at the unit level.
F ---	Reparable item. When uneconomically reparable, condemn and dispose of the item at the direct support level.
H ---	Reparable item. When uneconomically reparable, condemn and dispose of the item at the general support level.
D ---	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item are not authorized below depot level.
L ---	Reparable item. Condemnation and disposal not authorized below Specialized Repair Activity (SRA).
A ---	Item requires special handling or condemnation procedures because of specific reasons (such as precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

NSN (Column (3)). The NSN for the item is listed in this column.

CAGEC (Column (4)). The Commercial and Government Entity Code (CAGEC) is a five-digit code which is used to identify the manufacturer, distributor, or Government agency/activity that supplies the item.

PART NUMBER (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different P/N from the number listed.

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

DESCRIPTION AND USABLE ON CODE (UOC (Column (6)). This column includes the following information:

- I. The federal item name, and when required, a minimum description to identify the item.
2. P/Ns of bulk materials are referenced in this column in the line entry to be manufactured or fabricated.
3. Hardness Critical Item (HCI). A support item that provides the equipment with special protection from electromagnetic pulse (EMP) damage during a nuclear attack.
4. The statement END OF FIGURE appears just below the last item description in column (6) for a given figure in both the repair parts list and special tools list work packages.

QTY (Column (7)). The QTY (quantity per figure) column indicates the quantity of the item used in the breakout shown on the illustration/figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column instead of a quantity indicates that the quantity is variable and quantity may change from application to application.

EXPLANATION OF CROSS-REFERENCE INDEXES WORK PACKAGES FORMAT AND COLUMNS

- I. National Stock Number (NSN) Index Work Package.

STOCK NUMBER Column. This column lists the NSN in National Item Identification Number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN.

When using this column to locate an item, ignore the first four digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

FIG. Column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in the repair parts list and special tools list work packages.

ITEM Column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

2. Part Number (P/N) Index Work Package. P/Ns in this index are listed in ascending alphanumeric sequence (vertical arrangement of letter and number combinations which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

PART NUMBER Column. Indicates the P/N assigned to the item.

FIG. Column. This column lists the number of the figure where the item is identified/located in the repair parts list and special tools list work packages.

ITEM Column. The item number is the number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

**LIGHTWEIGHT MULTIPURPOSE SHELTER (LMS)
REPAIR PARTS AND SPECIAL TOOLS LIST (RPSTL) INTRODUCTION**

SPECIAL INFORMATION

“Fabrication Instructions. Bulk materials required to manufacture items are listed in the bulk material functional group of this RPSTL. Part numbers for bulk material are also referenced in the Description Column of the line item entry for the item to be manufactured/fabricated . Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in TM 10-4510-207-14.

Index Numbers. Items that have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross-reference between the NSN / P/N index work packages and the bulk material list in the repair parts list work package.”

“Associated Publications. The publication(s) listed below pertains to the Lightweight Multi-Purpose (LMS) Type 1 Shelter:

<u>Publication</u>	<u>Short Title</u>
TM 10-5411-235-13	Operator's, Unit, And Direct Support Maintenance Manual For Lightweight Multi-Purpose (LMS) Type 1 Shelter

HOW TO LOCATE REPAIR PARTS

1. When NSNs or P/Ns Are Not Known.

First. Using the table of contents, determine the assembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and lists are divided into the same groups.

Second. Find the figure covering the functional group or the subfunctional group to which the item belongs.

Third. Identify the item on the figure and note the number(s).

Fourth. Look in the repair parts list work packages for the figure and item numbers. The NSNs and part numbers are on the same line as the associated item numbers.

2. When NSN Is Known.

First. If you have the NSN, look in the STOCK NUMBER column of the NSN index work package. The NSN is arranged in NIIN sequence. Note the figure and item number next to the NSN.

Second. Turn to the figure and locate the item number. Verify that the item is the one you are looking for.

3. When P/N Is Known.

First. If you have the P/N and not the NSN, look in the PART NUMBER column of the P/N index work package. Identify the figure and item number.

Second. Look up the item on the figure in the applicable repair parts list work package.

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 10 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 feet

Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
inches	centimeters	2.540	ounce-inches	newton-meters	.007062
feet	meters	.305	centimeters	inches	.394
yards	meters	.914	meters	feet	3.280
miles	kilometers	1.609	meters	yards	1.094
square inches	square centimeters	6.451	kilometers	miles	.621
square feet	square meters	.093	square centimeters	square inches	.155
square yards	square meters	.836	square meters	square feet	10.764
square miles	square kilometers	2.590	square meters	square yards	1.196
acres	square hectometers	.405	square kilometers	square miles	.386
cubic feet	cubic meters	.028	square hectometers	acres	2.471
cubic yards	cubic meters	.765	cubic meters	cubic feet	35.315
fluid ounces	milliliters	29.573	cubic meters	cubic yards	1.308
pints	liters	.473	milliliters	fluid ounces	.034
quarts	liters	.946	liters	pints	2.113
gallons	liters	3.785	liters	quarts	1.057
ounces	grams	28.349	liters	gallons	.264
pounds	kilograms	.454	grams	ounces	.035
short tons	metric tons	.907	kilograms	pounds	2.205
