REPORTING OF ERRORS

You can improve this manual by recommending improvements using DA Form 2028-2 (Test) located in the back of the manual. Simply tear out the self-addressed form, fill it out as shown on the sample, fold it where shown, and drop it in the mail.

If there are no blank DA Form 2028-2 (Test) in the back of your manual, use the standard DA Form 2028 (Recommended Changes to Publications and Blank Forms) and forward to the Commander, US Army Electronics Command, ATTN: DRSEL-MAQ, Fort Monmouth, New Jersey 07703

In either case a reply will be furnished to you.

**Current as of June 1976

Section III.	Special tools list (Not applicable)	
IV.	Federal stock number and part number index.....	100

SECTION I

INTRODUCTION

1. Scope

This manual reflects repair parts required for the performance of direct support, general support, and depot maintenance of the AN/FCC-19 and AN/FCC-25.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

- a. *Repair Parts List Section II.* A list of repair parts authorized for the performance at the direct support, general support, and depot level in figure and item number sequence.
- b. *Special Tools List Section III.* Not applicable.
- c. *Federal Stock Number and Part Number Index Section IV.* A list of Federal stock numbers in ascending numerical sequence, followed by a list of reference numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure and item number.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings.

a. *Source, Maintenance, and Recoverability Codes (SMR)*

(1) *Source code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA-Item procured and stocked for anticipated or known usage.	
PB-Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.	
MD-Item to be manufactured or fabricated at the depot maintenance level.	
AH-Item to be assembled at general support maintenance level.	
XA-Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.	
XB-Item is not procured or stocked. If not available through salvage, requisition.	

NOTE

Cannibalization or salvage may be used as a source for any items source coded above except those codes XA, XD, and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application/Explanation</i>
O-Support item is removed, replaced, used at the organizational level of maintenance.	

NOTE

A code "O" may be used in this position to denote crew or operator maintenance performed within organizational maintenance.

- F-Support item is removed, replaced, used at direct support maintenance level.
- H-Support item is removed, replaced, used at the general support maintenance.
- D-Support items that are removed, replaced, used at depot only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

<i>Code</i>	<i>Application/Explanation</i>
H-The lowest maintenance level capable of complete repair of the support item is the general support level.	

<i>Code</i>	<i>Application/Explanation</i>
D-	The lowest maintenance level capable of complete repair of the support item is depot level.
Z-	Nonrepairable. No repair is authorized.

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
Z-	Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in the first digit of the maintenance code.
H-	Repairable item. When uneconomically repairable, condemn and dispose at the general support level.
D-	Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.

b. *Federal Stock Number.* Indicates the Federal stock number assigned to the item.

NOTE

For requisitioning purposes, the Federal stock number must be converted to the National stock number by adding "-00-" after the Federal Stock Classification (FSC) code (first four digits). For example, FSN 6625-553-0142 converted to NSN 6625-00-553-0142.

c. *Description.* Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number, followed by the applicable Federal Supply Code for Manufacturers (FSCM) in parentheses.

d. *Unit of Measure (U/M).* Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea., in, pr, etc.). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

e. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly.

f. *30-Day DS/GS Maintenance Allowances.* The repair parts indicated by asterisk entries in separate allowance columns for DS and GS represent those authorized for use at that category of maintenance to be requisitioned on an "as required" is.

g. *1-Year Allowances per 100 Equipments/Contingency Planning Purposes.* Column intentionally left blank.

h. *Depot Maintenance Allowance Per 100 Equipments.* This column indicates that the items identified with an asterisk are authorized to be requisitioned as required.

i. *Illustration.* This column is divided as follows:

- (1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.
- (2) *Item number.* Indicates the callout number used to reference the item on the illustration.

4. Special Information

a. Beneath the description data, effectively and configuration differences within and between the AN/FCC-19 and the AN/FCC-25 are indicated. Figures 11, 15, and 16 reflect usable on data.

b. Detailed assembly instructions for items source coded to be assembled are found in TM 11-5805-337-35, assembly comp.

c. Detailed manufacturing instructions for items source-coded to be manufactured are found in TM 11-5805-337-35.

d. The following publications pertain to the AN/FCC-19 and the AN/FCC-25 and their components:

TM 11-5805-337-20P Organizational Maintenance Repair Parts and Special Tools List: Terminals, Telegraph AN/FCC-19 and AN/FCC/25.

TM 11-5805-337-35 DS, GS, and Depot Maintenance Manual: Terminals, Telegraph AN/FCC-19 and AN/FCC-25.

5. How to Locate Repair Parts

a. When Federal stock number or part number is unknown:

(1) *First.* Using the table of contents, determine the functional groups within which the repair parts belong. This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the subgroups to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When Federal stock number or part number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Part Numbers, find the pertinent Federal stock

number or part number. This index is in ascending FSN sequence, followed by a list of part numbers in ascending alphanumeric sequence, cross referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item member in the repair parts list.

6. Abbreviations (Not applicable).

THE METRIC SYSTEM AND EQUIVALENTS

WEIGHT MEASURE

1 Centimeter = 10 Millimeters = 0.01 Meters = 0.3937 Inches
 1 Meter = 100 Centimeters = 1000 Millimeters = 39.37 Inches
 1 Kilometer = 1000 Meters = 0.621 Miles

WEIGHTS

1 Gram = 0.001 Kilograms = 1000 Milligrams = 0.035 Ounces
 1 Kilogram = 1000 Grams = 2.2 lb.
 1 Metric Ton = 1000 Kilograms = 1 Megagram = 1.1 Short Tons

LIQUID MEASURE

1 Milliliter = 0.001 Liters = 0.0338 Fluid Ounces
 1 Liter = 1000 Milliliters = 33.82 Fluid Ounces

SQUARE MEASURE

1 Sq. Centimeter = 100 Sq. Millimeters = 0.155 Sq. Inches
 1 Sq. Meter = 10,000 Sq. Centimeters = 10.76 Sq. Feet
 1 Sq. Kilometer = 1,000,000 Sq. Meters = 0.386 Sq. Miles

CUBIC MEASURE

1 Cu. Centimeter = 1000 Cu. Millimeters = 0.06 Cu. Inches
 1 Cu. Meter = 1,000,000 Cu. Centimeters = 35.31 Cu. Feet

TEMPERATURE

$5/9(^{\circ}\text{F} - 32) = ^{\circ}\text{C}$
 212° Fahrenheit is equivalent to 100° Celsius
 90° Fahrenheit is equivalent to 32.2° Celsius
 32° Fahrenheit is equivalent to 0° Celsius
 $9/5^{\circ}\text{C} + 32 = ^{\circ}\text{F}$
