REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes, or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms) or DA Form 2028-2 located in back of this manual direct to: Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-LC-LEO-D-CS-CFO, Fort Monmouth, New Jersey 07703-5006. The fax number is 732-532-1413, DSN 992-1413. You may also e-mail your recommendations to AMSEL-LC-LEO-PUBS-CHG@cecom3.monmouth.army.mil

A reply will be furnished direct to you.

*This manual supersedes TM 11-5820-890-30P-1, dated 1 October 1997

TABLE OF CONTENTS

Section I. Introduction	1	
Section II. Repair Parts List	1	
Group 00 SINCGARS Family of Radios.....	1-1	1
57 Radio Set AN/PRC-119D (see Figure 1 sheet 1 for listing of parts)		
01 Radio Set AN/PRC-119A (see Figure 1 sheet 2 for listing of parts)		
02 Radio Set AN/PRC-119..... (see Figure 1 sheet 3 for listing of parts)		
58 Radio Set AN/VRC/87D (see Figure 1 sheet 4 for listing of parts)		
03 Radio Set AN/VRC/87A (see Figure 1 sheet 5 for listing of parts)		
05 Radio Set AN/VRC/87..... (see Figure 1 sheet 6 for listing of parts)		
59 Radio Set AN/VRC-88D (see Figure 1 sheet 7 for listing of parts)		
07 Radio Set AN/VRC-88A (see Figure 1 sheet 8 for listing of parts)		
09 Radio Set AN/VRC-88 (see Figure 1 sheet 9 for listing of parts)		
60 Radio Set AN/VRC/89D (see Figure 1 sheet 10 for listing of parts)		
11 Radio Set AN/VRC/89A (see Figure 1 sheet 11 for listing of parts)		
12 Radio Set AN/VRC/89..... (see Figure 1 sheet 12 for listing of parts)		
61 Radio Set AN/VRC-90D (see Figure 1 sheet 13 for listing of parts)		
13 Radio Set AN/VRC-90A (see Figure 1 sheet 14 for listing of parts)		
14 Radio Set AN/VRC-90 (see Figure 1 sheet 15 for listing of parts)		
62 Radio Set AN/VRC-91D (see Figure 1 sheet 16 for listing of parts)		
15 Radio Set AN/VRC-91A (see Figure 1 sheet 17 for listing of parts)		
16 Radio Set AN/VRC-91 (see Figure 1 sheet 18 for listing of parts)		
63 Radio Set AN/VRC-92D (see Figure 1 sheet 19 for listing of parts)		
17 Radio Set AN/VRC-92A (see Figure 1 sheet 20 for listing of parts)		
18 Radio Set AN/VRC-92 (see Figure 1 sheet 21 for listing of parts)		
Ancillary Items (see Figure 1 sheets 22 – 23 for listing of parts)		
Manpack Antenna AS-3683/PRC	2-1	2
Handheld Remote Control Radio Device C-12493/U	2A-1	2A
Electrical Special Purpose Cable Assembly CX-13293/VRC.....	3-1	3
19 Control-Monitor C-11291/VRC	4-1	4

	Part Number Index	I-41	

SECTION I INTRODUCTION

1. Scope

This RPSTL lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of unit and direct support maintenance of AN/PRC-119/A/D, AN/VRC-87/A/D, AN/VRC-88/A/D, AN/VRC-89/A/D, AN/VRC-90/A/D, AN/VRC-91/A/D, and AN/VRC-92/A/D. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the source, maintenance and recoverability (SMR) codes.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II, Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numeric sequence, with the parts in each group listed in ascending item number sequence. Figure numbers are listed directly beneath the group header. Repair part kits are listed separately in their own functional group within section II. Repair parts for reparable special tools are also listed in this section. Items are shown on the associated illustration.

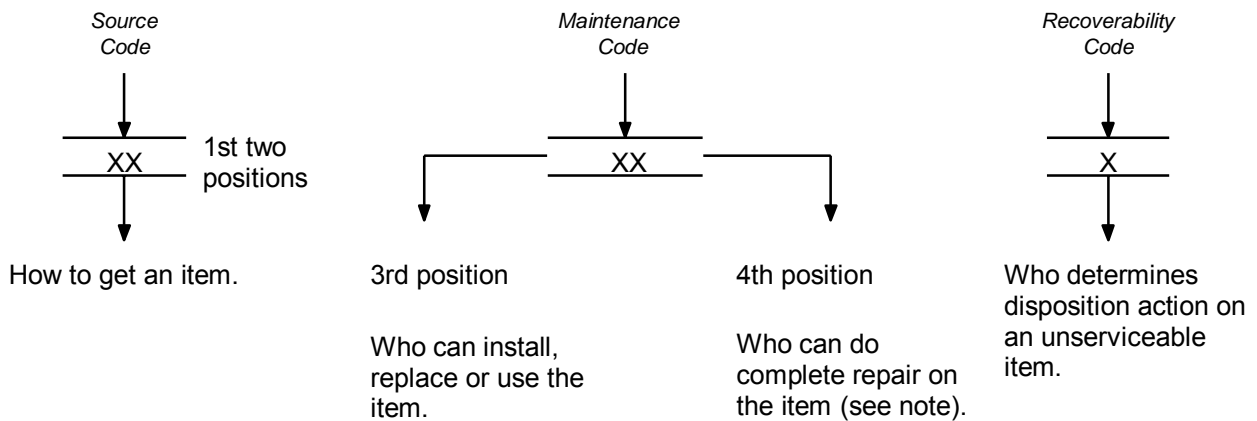

b. Section III, Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE (UOC) column (5) for the performance of maintenance.

c. Section IV. Cross-Reference Indexes. There are two cross-reference indexes in this RPSTL: the National Stock Number Index and the Part Number Index. The National Stock Number Index refers you to the figure and item number. The Part Number Index refers you to the figure and item number.

3. Explanation of Columns (Sections II and III)

a. Item No. (Column (1)). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The source, maintenance, and recoverability (SMR) code is a five-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction as shown in the following breakout:

NOTE

Complete repair: Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) *Source Code*. The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follows:

Code

Explanation

PA
PB
PC
PD
PE
PF
PG

Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the source code entered in the third position of the SMR code.

NOTE

Items coded PC are subject to deterioration.

KD
KF
KB

Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the third position of the SMR code. The complete kit must be requisitioned and applied.

MO — Made at org/
AVUM category
MF — Made at DS/
AVIM category
MH — Made at GS
category
ML — Made at Spec-
ialized Repair
Activity (SRA)
MD — Made at Depot

Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the description and usable on code (UOC) column and listed in the Bulk Material group of the repair parts list. If the item is authorized to you by the third position code of the SMR code, but the source code indicates it is made at a higher category, order the item from the higher category of maintenance.

AO — Assembled by org/
AVUM category
AF — Assembled by DS/
AVIM category
AH — Assembled by GS
category
AL — Assembled by SRA
AD — Assembled by Depot

Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the category of maintenance indicated by the source code. If the disposition code of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher category, order the item from the higher category of maintenance.

- XA — Do not requisition an “XA” coded item. Order its next higher assembly.
- XB — If an “XB” item is not available from salvage, order it using the CAGEC and part number given.
- XC — Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturers part number.
- XD — Item is not stocked. Order an “XD” coded item through normal supply channels using the CAGEC and part number given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded “XA” or those aircraft support items restricted by requirements of AR 750-1.

(2) *Maintenance Code.* Maintenance codes tell you the category of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following categories of maintenance.

<i>Code</i>	<i>Application/Explanation</i>
C	— Crew or operator maintenance done within organizational or aviation maintenance.
O	— Organizational or aviation unit category can remove, replace, and use the item.
F	— Direct support or aviation intermediate category can remove, replace, and use the item.
H	— General support category can remove, replace, and use the item.
L	— Specialized repair activity can remove, replace, and use the item.
D	— Depot category can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following maintenance codes.

NOTE

Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.

<i>Code</i>	<i>Application/Explanation</i>
O	— Organizational or aviation unit is the lowest category that can do complete repair of the item.
F	— Direct support or aviation intermediate is the lowest category that can do complete repair of the item.
H	— General support is the lowest category that can do complete repair of the item.
L	— Specialized repair activity (designated the special repair activity) is the lowest category that can do complete repair of the item.
D	— Depot is the lowest category that can do complete repair of the item.
Z	— Nonreparable. No repair is authorized.
B	— No repair is authorized. (No parts or special tools are authorized for the maintenance of a “B” coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user category.

(3) *Recoverability Code.* Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

<i>Recoverability codes</i>	<i>Application/Explanation</i>
Z	— Nonreparable item. When unserviceable, condemn and dispose of the item at the category of maintenance shown in the third position of SMR code.
O	— Repairable item. When uneconomically repairable, condemn and dispose of the item at organizational or aviation unit category.
F	— Repairable item. When uneconomically repairable, condemn and dispose of the item at the direct support or aviation intermediate category.
H	— Repairable item. When uneconomically repairable, condemn and dispose of the item at general support category.
D	— Repairable item. When beyond lower category repair capability, return to depot. Condemnation and disposal of item not authorized below depot category.
L	— Repairable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
A	— Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. *NSN (Column (3))*. The national stock number for the item is listed in this column.

d. *CAGEC (Column (4))*. The Commercial and Government Entity Code (CAGEC) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

e. *Part Number (Column (5))*. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered.

f. *Description and Usable on Code (UOC) (Column (6))*. This column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) The statement "END OF FIGURE" appears just below the last item description in Column (5) for a given figure in both section II and section III.

g. *Qty (Column (7))*. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. Explanation of Columns (Section IV)

a. *National Stock Number (NSN) Index*.

(1) *Stock number column*. This column lists the NSN by National item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN.

NSN
(e.g., 5385-01-574-1476)

When using this column to locate an item, ignore the first four digits of the NSN. Use the complete NSN (13 digits) when requisitioning items by stock number.

(2) *Fig. column*. This column lists the number of the figure where the item is identified/located. The illustrations are in numerical sequence in sections II and III.

(3) *Item column*. The item number identifies the item associated with the figure listed in the adjacent Fig. column. This item is also identified by the NSN listed on the same line.

b. *Part Number Index*. Part numbers in this index are listed by part number in ascending alphanumeric sequence.

(1) *CAGEC column*. This column lists the Commercial and Government Entity Code (CAGEC).

(2) *Part number column*. This column indicates the part number assigned to the item.

(3) *Stock number column*. This column lists the National stock number for the associated part number and manufacturer identified in the part number and CAGEC columns to the left.

(4) *Fig. column*. This column lists the number of the figure where the item is identified/located in sections II and III.

(5) *Item column*. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

5. Special Information

a. Usable On Codes. The usable on code appears in the lower left corner of the description column heading. Usable on codes are shown as "UOC: " in the description column (justified left) on the first line applicable item description nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in this RPSTL are:

b. Associated Publications. The following publications pertain to SINCGARS Ground Radio Sets:

TM 11-5820-890-20-1 Unit Maintenance Manual for Radio Sets AN/PRC-119A, AN/PRC-119D, AN/PRC-119F, AN/VRC-87A, AN/VRC-87D, AN/VRC-87F, AN/VRC-88A, AN/VRC-88D, AN/VRC-88F, AN/VRC-89A, AN/VRC-89D, AN/VRC-89F, AN/VRC-90A, AN/VRC-90D, AN/VRC-90F, AN/VRC-91A, AN/VRC-91D, AN/VRC-91F, AN/VRC-92A, AN/VRC-92D and AN/VRC-92F.

TM 11-5820-890-20-2 Unit Maintenance Manual for Radio Sets AN/PRC-119A, AN/PRC-119D, AN/PRC-119F, AN/VRC-87A, AN/VRC-87D, AN/VRC-87F, AN/VRC-88A, AN/VRC-88D, AN/VRC-88F, AN/VRC-89A, AN/VRC-89D, AN/VRC-89F, AN/VRC-90A, AN/VRC-90D, AN/VRC-90F, AN/VRC-91A, AN/VRC-91D, AN/VRC-91F, AN/VRC-92A, AN/VRC-92D and AN/VRC-92F.

TM 11-5820-890-30P-2 Direct Support Maintenance Repair Parts and Special Tools List for SINCGARS GD Radio Sets.

TM 11-5820-890-30-6 (5 Volumes) Direct Support Maintenance Manual for SINCGARS Ground Radio Sets.

b. Illustrations-Listing. Only those parts coded "O", "F" in the third position of the SMR code are listed in the tabular listing. Only illustrations containing unit and direct support authorized items appear in this manual.

c. National Stock Numbers. National Stock Numbers (NSNs) that are missing from "P" source coded items have been applied for and will be added to this TM by future change/revision when they are entered in the Army Master Data File (AMDF). Until the NSNs are established and published, submit exception requisition to: US Army Communications-Electronics Command and Fort Monmouth, ATTN: AMSEL-LC-COM-R-SR, Fort Monmouth, NJ 07703-5023 for the part required to support your equipment.

d. Serial Number Effectivity. When part numbers of spare/repair items are not the same for all serial numbered equipment, of the same model, serial number effectivity will identify the correct parts to be ordered. The serial number effectivity that appears in the tabular list is the serial number effectivity for the next higher assembly. If a

figure has more than one model, both models will be shown, each with its own serial number effectivity. If a part in the tabular list does not have a serial number effectivity then that part can be used in any model. Whereas, if a part has a serial number effectivity, it is model unique and can only be used in the model marked with the same serial number effectivity.

6. How to Locate Repair Parts

a. When National Stock Number or Part Number is Not Known.

(1) *First* Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) *Second*. Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) *Third*. Identify the item on the figure and note the item number.

(4) *Fourth*. Refer to the Repair Parts List for the figure and item numbers. The NSNs and part numbers are on the same line as the associated item numbers.

b. When National Stock Number or Part Number is Known.

(1) *First*. If you have the national stock number, look in the STOCK NUMBER column of the National Stock Number Index. The NSN is arranged in national item identification number (NIIN) sequence (see paragraph 4a). Note the figure and item number next to the NSN.

(2) *Second*. Turn to the figure and locate the item number. Verify that the item is the one you are looking for.

NOTE

If you have the part number, look in the PART NUMBER column of the Part Number Index. Identify the figure and item number, look up the item on the figure in Section II.

---	--------------------------------------	---

BE EXACT PIN-POINT WHERE IT IS				IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:
PAGE NO	PARA GRAPH	FIGURE NO	TABLE NO	
2-25	2-28			<p>Recommend that the installation antenna alignment procedure be changed throughout to specify a 20 IFF antenna lag rather than 10.</p> <p>REASON: Experience has shown that with only a 10 lag, the antenna servo system is too sensitive to wind gusting in excess of 25 knots, and has a tendency to rapidly accelerate and decelerate as it hunts, causing strain to the drive train. Hunting is minimized by adjusting the lag to 20 without degradation of operation.</p>
3-10	3-3		3-1	<p>Item 5, Functional column. Change • 2 dB" to • 3 dB".</p> <p>REASON: The adjustment procedure for the TRANS POWER FAULT indicator calls for a 3 dB (500 watts) adjustment to light the TRANS POWER FAULT indicator.</p>
5-6	5-8			<p>Add new step f.1 to read, • Replace cover plate removed in step f.1, above."</p> <p>REASON: To replace the cover plate.</p>
		FO-3		<p>Zone C 3. On J1-2, change • +24 VDC" to • +5 VDC".</p> <p>REASON: This is the output line of the 5 VDC power supply. +24 VDC is the input voltage.</p>
