AN/PSN-11(V)1
NSN 5825-01-395-3513

REVISED
15 SEPTEMBER 1995

BASIC OPERATION

1. Turn unit on: ON/BRT key
 2. Adjust screen backlighting: ON/BRT key plus up/down key for rapid change. Level display - use MENU key, STATUS.
 3. Left/right arrow key moves cursor between fields and identifies changeable fields.
 4. Up/down arrow key makes selections and changes contents of fields.
 5. NUM LOCK key toggles the mode of the keypad: control or numeric. Numeric mode when N in lower right corner of page.
 6. CLR key to re-enter numbers during numeric mode data entry.
 7. On-line help: MENU key, HELP option, or left-arrow key and right-arrow key at the same time.
 8. Keypad map: ON/BRT key and MENU key at the same time.
 9. ZEROIZE: MARK key and NUM LOCK key at the same time.
 10. Turn unit off: OFF key.
-

PRE-MISSION

Press MENU key, select SETUP option to:

1. Operating mode: CONT. FIX, AVG, TIME, STBY 2dTNG, 3dTNG, RHRSL
2. Type of satellites to use: mixed, all-Y (default when keyed)
3. Coordinate system: MGRS-New, MGRS-Old, UTM/UPS, L/L-dm.. L/L-dms, BNG, ITMG
4. Distance units:
 - Metric (meters, km, km per hour)
 - English (feet, miles, miles per hour)
 - Naut (yards, nautical miles, knots)
5. Elevation units: meters, feet
6. Elevation reference: MSL, DTM
7. Angle units: Deg, Mil- μ
8. North reference: Mag, Grid, True
9. *Magnetic variation: Cal, Entr, Wp
10. Navigation display mode: SLO 2D FAST, 3D FAST, CUSTOM
11. Elevation hold mode enable: automatic, manual
12. Time reference: Zulu or Loc = Z \pm 0000
13. Error display format: Figure of Merit (FOM) or distance
14. Datum: WGS-84 plus 51 other choices (reference horizontal data from map)

*AN/PSN-11 internal Magnetic Variation values are for 1995.

PRE-MISSION (CONT)

15. Automatic off timer: 5 min 15 sec, 20 min, off
 16. Serial port configuration: Standard, Instrum, Custom
 17. HAVEQUICK: Off, On
 18. IPPS: Off. UTC, T-Mark
 19. Automark: Mode (off, rpt, once), starting waypoint, start time and interval for storing automatic position marks.
 20. Bullseye: OFF ON
 21. Operator ID: WP000, enter ID
 22. Approach: 08000 ft (range 1000-15,000 ft)
Press WP key to:
 23. Enter, edit, copy, calculate, clear, or route waypoints
 - Press MENU key, select INIT option to:
 24. Initialize position, time, date, direction, speed, user datum and crypto.
-

CRYPTO KEY ENTRY VIA AN/CYZ-10 (SPECIAL ANCD)

1. Turn on the ANCD, read 'Radio/SOI/SUPERVISOR.'
 2. Enter RADIO, read 'SEND/RECEIVE/DATABASE/SETUP/COM-SEC/TIME.'
 3. Enter COMSEC. read 'VG/LD/RV/AK/MK/VU.'
 4. Enter LD, read 'Select TEK/KEK.'
 5. Enter TEK.
 6. Select the desired GPS key, then press ENTER.
 7. Enter QUIT; read 'Connect ANCD TO RT ↓' - (DO NOT comply).
 8. Press ↓, read 'Press LOAD on RT' - (DO NOT comply)
 9. Turn the AN/PSN- 11 on, wait for self-test to complete.
 10. Connect ANCD to the J1 port on the AN/PSN-11 - GPS key transfers automatically.
 11. The ANCD reports: "1 Keys Transferred." The AN/PSN-111 reports: "Key Loaded."
 12. Disconnect ANCD from the J1 port on the AN/PSN- 11.
-

OBTAINING A FIRST POSITION FIX

ACTION	COMMENTS	REFERENCE
Turn the AN/ PSN-I I ON	Ensure the Power-On Self-Test completes with no faults.	3.2 Turning ON/ OFI:

ACTION	COMMENTS	REFERENCE
Load crypto key if not already loaded	Check MENU (Second page). If CRYPTO is not displayed, load crypto key.	3.6 Crypto Variable Operations 3.7.8 Crypto Key Initialization
Check all SETUP pages	SETUP pages should conform with operational mission.	3.5 Setup and Mode Control
Initialize position, date, and time	The AN/PSN-I I will acquire and track satellites automatically; however, initializing will speed up the Time to First Fix.	3.7 Initialization
Allow the AN/PSN-11 to track satellite signals	Allow the AN/PSN-I 1 to collect current almanac (Check Satellite Summary Page, POS key) and current key (Select CRYPTO on second page of MENU, then check Crypto Status Page), if they are not present	4.2.4 Satellite Summary Page 3.6.2 Crypto Status Display
Check FOM or Position Error	A FOM of 1 is most desirable. You may have to select CONT mode to obtain a FOM of 1. FIX mode will also provide a valid position fix, but may not allow the FOM to decrease to 1 before switching to STBY. Always ensure the antenna has a clear view of the sky.	Table 3-6 or Quick Reference Guide

MISSION

- Display operation status: MENU key, STATUS option
- Display current coordinates or change track mode: POS key
- Mark current position as a waypoint: MARK key

- Navigate to another position or access current NAV WP or RTE leg:
NAV key

MISSION OPERATIONS CHECKS

INDICATION	ACTION	REFERENCE
High FOM/ Position Error	<p>Ensure you are tracking 4 satellites. Check Satellite Summary Page (POS key) or Satellite Tracking Status Page (MENU).</p> <p>Ensure the antenna is not masked. Move to position where antenna has clear view of the sky. If you cannot move and the antenna is masked by foliage, select the Dense Foliage function.</p> <p>Ensure you are keyed and you have current key. Select CRYPTO on second page of MENU, then check Crypto Status Page.</p>	<p>4.2.4 Satellite Summary Page</p> <p>3.8.5 Satellite Tracking Status Page</p> <p>4.4.9 Low Signal (Dense Foliage) Use</p> <p>3.6.2 Crypto Status Display</p>
Unexpected power off	<p>Check Automatic-Off Timer (MENU SETUP)</p> <p>Check for dead battery. If AN/PSN-11 will not power on at all, the battery is dead. Replace it.</p>	<p>3.5.7 and 3.5.7.2 Automatic-Off Timer</p> <p>8.1.1.1 Power Battery Replacement</p>
ON display sequence does not complete. AN/PSN-11 shuts off when new battery is installed.	<p>Press ON key repeatedly until AN/PSN-11 stays on. If AN/PSN-11 still does not turn ON, replace battery.</p>	<p>8.1.1.1 Power Battery Replacement</p>

INDICATION	ACTION	REFERENE
Obtaining a position fix takes too Long.	<p>Initialize position date and time.</p> <p>Ensure the antenna is not masked. Move to position where antenna has clear view of the sky.</p>	3.7 Initialization
AN,PSN-11 not tracking satellites	<p>Ensure you are not in STBY, 2dTNG, 3dTNG, or RHRSL (MENU, SETUP)</p> <p>Ensure the antenna is not masked. Move to position where antenna has clear view of the sky.</p> <p>If the AN/PSN- II has been in the CONT mode while masked, recycle power or select STBY and then FIX or CONT</p>	3.5.3 Selecting Operating Mode and Satellite Type
Position does not agree with map or other navigation sources.	Check for proper datum and spheroid (ellipsoid).	Table 3-9) or Quick Reference Guide
Navigation information does not agree with map or other navigation sources (Cont)	<p>Ensure waypoint datum matches SETUP datum</p> <p>Check coordinates system if using MGRS and second letter of 100,000 meter square designation is different.</p>	<p>3.5.7 and 3.5 7.1 Datum Selection</p> <p>3.5.4.1 Coordinate System</p>

INDICATION	ACTION	REFERENCE
	Check for proper distance and velocity units (metric, English, or nautical) In SETUP.	3.5.6.3.2 Selecting the Distance Units
Azimuth does not agree with other navigation sources.	Ensure MVAR type, direction, and value in SETUP matches your map or other navigation source. Check for proper north reference (magnetic, grid, or true)	3.5.5.1 Magnetic Variation Source 3.5.4.6 Selecting the North Reference
Elevation does not agree with map or other navigation sources	Check for proper elevation reference. MSL is normally used Check to see if you are in elevation hold on POS display. Ensure you are tracking at least four satellites so that elevation can be calculated accurately. Select AUTOMATIC elevation hold in SETUP.	3.5.4.4 Selecting the Elevation Reference 3.5.6.1 Elevation Hold Mode Enable
AN/PSN-11 will not compute ground speed, track, steering, time to go, minimum miss distance, or glide path deviation.	You may not be moving fast enough. You must move at least 0.5 m/s (approx. 1.8 K/hr or 1.1 mph). Ensure you are not in STBY. In STBY, the AN/PSN-11 does not track satellites or compute navigation information.	4.3 Navigation 3.5.3 Selecting Operating Mode and Satellite Type

INDICATION	ACTION	REFERENCE
Averaging counter will not increment	Ensure that the AN/PSN- 1 has a good position fix. The counter will not begin incrementing until 13 seconds after a position fix is obtained.	4.4.1 Surveying
Multiple Symptoms	Clear temporary receiver information faults (Receiver Version, Serial Port Xmit, Antenna and Power will not clear).	3.8.8 Self-test Message Pages

9	>5000 meters, (16400 ft, 5466 yd)	>10 milliseconds

POST MISSION

- Download mission data. - Use MENU, I)AA-XFR (MUST be in Standard or Custom serial mode).
 - Clear waypoint data - Use WP, CLEAR.
 - Zeroizing crypto key - Use MENU, CRYPTO, CLEAR.
 - Clear all data - Use MARK and NUM LOCK keys together
-

EMERGENCY

- ZEROIZE - Use MARK and NUM LOCK keys together.

ADVERSE WEATHER

- Warm up to prevent cold soaking.
- Warm battery for improved life when cold.
- Cool battery for improved life when hot.

TROUBLESHOOTING

- Perform self-test - Use MENU. TEST. Status and results under MENU, STATUS
- Check signal strength, antenna and power source under MENU, STATUS.
- Clear temporary Receiver Information faults - Use MENU, STATUS.

MAINTENANCE

CAUTION

To ensure proper AN/PSN-11 operation when installing or replacing both the power and memory batteries, ensure the power battery is installed or replaced prior to the memory battery.

Operator maintenance:

- Replace power battery.
- Reset battery used time for accurate remaining time indication.

NOTE: The AN/PSN-11 is NOT to be opened in the field, except to change batteries. Opening the receiver will void the warranty.

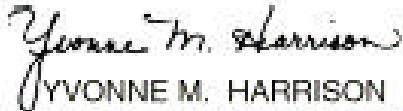

Organizational maintenance:

- Replace memory battery annually.
