<sup>a</sup>This manual supersedes TM 11-5850-218-35P, 20 June 1967.

SECTION I  
INTRODUCTION

1. Scope

This manual lists repair parts and special tools required for the performance of direct support, general support, and depot maintenance of the AN/AAS-14A and AN/MS-14B.

2. General

This repair parts and special tools list is divided into the following sections:

a. *Repair Parts-Section II.* A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

b. *Special Tools, Test and Support equipment-Section III.* A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level.

**NOTE**

All individual noted below are cross-referenced to index numbers. The index numbers appear in ascending sequence in column 1 of the repair parts list. The index number for the particular item will be the same for the item in all sections of this publication.

c. *Federal Stock Number Cross-reference to Index Number-Section IV.* A list of Federal stock numbers in ascending numerical sequence cross-referenced to index (sequence) numbers.

d. *Figure and Item Number Cross-Reference to Index Numbers-Section V.* A list of illustration figure numbers in numerical sequence, cross-referenced to item number (reference designation) and index numbers.

e. *Reference Designation Cross-Reference to Index Number-Section VI.* A list of reference designations (or item numbers) to index numbers.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists:

a. *Source, Maintenance, and Recoverability Codes (SMR), Column 1.*

(1) Source codes indicate the selection status and source for the listed item. Source codes are—

Code	Explanation
P	Repair parts which are stocked in or supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance categories.
P2	Repair parts which are procured and stocked for insurance purposes because the

Code	Explanation
	combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
P9	Assigned to items which are NSA design controlled: unique repair parts, special tools, test, measuring and diagnostic equipment, which are stocked and supplied by the Army COMSEC logistic system, and which are not subject to the provisions of AR 380-41.
P10	Assigned to items which are NSA design controlled: special tools, test, measuring and diagnostic equipment for COMSEC support, which are accountable under the provisions of AR 380-41, and which are stocked and supplied by the Army COMSEC logistic system.
M	Repair parts which are not procured or stocked, but are to be manufactured in indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance categories.
X	Parts and assemblies which are not procured or stocked and the mortality of which normally is below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair parts which are not procured or stocked. The requirement for such items will be filled by use of the next higher assembly or component.
X2	Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain same through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisitioned, with accompanying justification, through normal supply channels.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.

(2) **Maintenance** codes indicate the lowest category of maintenance authorized to install the listed item. The maintenance level codes are-

Code	Explanation
C.....	Operator/crew
O.....	Organizational maintenance
F.....	Direct support maintenance
H.....	General support maintenance
D.....	Depot maintenance

(3) **Recoverability** codes indicate whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are-

Code	Explanation
R-	Repair parts and assemblies that are economically repairable at DSU and GSU activities and are normally furnished by supply on an exchange basis.
S-	Repair parts and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
T-	High-dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U-	Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, or high-dollar value reusable casings or castings.

*b. Federal Stock Number, Column 2.* This column indicates the Federal stock number assigned to the item and will be used for requisitioning Purposes.

*c. Description, Column 3.* This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parentheses.

*d. Unit of Measure (U/M), Column 4.* A 2-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.

*e. Quantity Incorporated in Unit, Column 5.* This column indicates the quantity of the item used in the AN/AAS-14A and AN/AAS-14B. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

*f. 30-Day DS/GS Maintenance Allowances, Columns 6 and 7.*

NOTE

Allowances in GS column are for GS maintenance only.

(1) The allowance columns are divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the applicable allowance columns. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

(3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipments can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. *Example*, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

*g. One-Year Allowances per 100 Equipments/Contingency Planning Purposes, Column 8.* This column indicates opposite the first appearance of each item the total quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for 1 year.

*h. Depot Maintenance Allowance Per 100 Equipments, Column 9.* This column indicates opposite the first appearance of each item, the total quantity authorized for depot maintenance of 100 equipments. Subsequent appearances of the same item will have the letters "REF" in the allowance column. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

*i. Illustration, Column 10.* This column is divided as follows:

(1) *Figure Number, Column 10a.* Indicates the figure number of the illustration in which the item is shown. Referenced figures are located in TM 11-5850-218-12 and TM 11-5850-218-35.

(2) *Item Number, Column 10b.* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Identifications of the usable on codes included in column 3 of this publication are-

- |        |            |
|--------|------------|
| Code   | Used on    |
| 1..... | AN/AAS-14A |
| 2..... | AN/AAS-14B |

**NOTE**

No entry in Usable on Code column indicates the item is common to both equipments.

b. Repair parts mortality is computed from failure rates derived from experience factors with the individual parts in a variety of equipments. Variations in the specific application and periods of use of electronics equipment, the fragility of electronic piece parts, plus intangible material and quality factors intrinsic to the manufacture of **electronic parts**, do not permit mortality to be based on hours of end item use. However, long periods of continuous use under adverse conditions are likely to increase repair parts mortality.

c. The following publications pertain to the AN/AAS-14A and AN/AAS-14B and its components :

(C) TM 11-6860-203-12..... Organizational Maintenance Manual: Detecting Set, Infrared AN/AAS-14; Transmitting Set, Radio AN/ART-41 (Airborne Components of Surveillance System, Infrared AN/UAS-4 and Cable Assembly Sets Test MX-4078/AAS-14 and MX-4079/ART-41.

(C) TM 11-5850-218-12..... Organizational Maintenance Manual: Detecting Set Infrared AN/AAS-14A and Transmitter, Radio AN/ART-41A (Airborne Components of Surveillance System, Infrared ANUAS-4A) and cable Assembly Sets, Electrical MX-7268/AAS-14A and MX-7270/UAS-4A (U).

TM 11-5850-218-20P..... Organizational Maintenance Repair Parts and Special Tool Lists: Detecting Sets, Infrared AN/AAS-14A and AN/AAS-14B.

(C) TM 11-5850-218-35.....DS, GS, and Depot Maintenance Manual: Detecting Set, Infrared AN/AAS-14A and Transmitter, Radio AN/ART-41A (Airborne Components of Surveillance System, Infrared AN/UAS-4A), and Cable Assembly Sets, Electrical MX-7268/AAS-14A and MX-7270/UAS-4A (U).

TM 11-5850-222-35P.....DS, GS, and Depot Maintenance Repair Parts and Special Tools Lists: Recorder Group Surveillance System AN/USA-23, Indicator, Calibration IP-807/U and Indi-

cator, Terrain Display IP-808/U.

TM 11-5850-224-35P.....DS, GS, and Depot Maintenance Repair Parts and Special Tool Lists : Receiver Group Infrared OA-7827/AA-14A, Preamplifiers AM-4464/AAS-14, AM-4467/AAS-14A, and AM-4468/AAS-14A; Refrigerator, Cryogenic HD-723/AAS-14A; and Optical Filter Kit MK-898/AAS-14A.

TM 11-5850-232-35P.....DS, GS, and Depot Maintenance Repair Parts and Special Tools List: Converters, Signal Data CV-2090/TAQ-1A And CV-2052/AAS-14A and Indicator Azimuth-Elevation ID-1355/TAQ-1A.

5. Location of Repair Parts

a. This manual contains three cross-reference indexes (secs. IV, V, and VI) to be used to locate a repair part when either the Federal stock number, reference number (manufacturer's part number), figure number, or reference designation is known. The first column in each cross-reference index is prepared, as applicable, in numerical or alphanumeric sequence. The last column of each cross-reference index lists the index number assigned to the part.

b. Refer to the appropriate cross-reference index (para 2c, d, and e) and note the index number in the last column ; then refer to the repair parts list to locate the index number which is listed in ascending order in column 1 of the repair parts list.

6. Federal Supply Code for Manufacturers

Code	Manufacturer's Name
00656.....	Aerovox Corp.
00779.....	Amp, Inc.

7. Recommendations for Maintenance  
Publication Improvements

Reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commanding General, U. S. Army Electronics Command, ATTN: AMSEL-ME-NMP-AD, Fort Monmouth, N. J. 07703.
