REPORTING ERRORS AND RECOMMENDED IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in back of this manual direct to: Commander, US Army Communications and Electronics Materiel Readiness Command, ATTN: DRSEL-ME-MQ, Fort Monmouth, NJ 07703.

For Air Force, submit AFTO Form 22 (Technical Order System Publication Improvement Report and Reply) in accordance with paragraph 6-5, section VI, T.O. 00-5-1. Forward direct to prime ALC/MST.

For Navy, mail comments to the Commander, Naval Electronics Systems Command, Code 4505, Washington, DC 20360.

In any case, a reply will be furnished direct to you.

SECTION I INTRODUCTION

1-1. Scope

This manual lists repair parts and special tools required for the performance of direct support and depot maintenance of the AN/TSC-54.

1-2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Repair Parts-Section II. A list of repair parts authorized for the performance of maintenance at the direct support and depot level.

b. Special Tools, Test and Support Equipment-Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support and depot level.

NOTE

All indexes noted below are cross-referenced to index numbers. The index numbers appear in ascending sequence in column 1 of the repair parts list. The index number for the particular item will be the same for the item in all sections of this publication.

c. Index-National Stock Number Cross-Reference to Index Number-Section IV. A list of National stock numbers in ascending numerical sequence cross-referenced to index (sequence) numbers.

d. Index-Manufacturers Part No. Cross-Reference to Index Number-Section V. A list of manufacturers' part numbers in alphanumeric sequence, cross-referenced to index (sequence) numbers.

e. Index-Reference Designation Cross-Reference to Index Number-Section VI. A list of reference designations cross-referenced to index numbers.

1-3. Explanation of Columns

The following provides an explanation of columns in the tabular lists.

a. Index Number, Column 1. This column is for sequential line item control, commencing with the first line item on the first page of the list, and continuing alphabetically to the last item on the page of the list.

b. Source, Maintenance, and Recoverability Codes (SMR), Column 2.

(1) *Source code.* Source codes are

assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA--	Item procured and stocked for anticipated or known usage.
PB-	Item procured and stocked for insurance purpose because essentially dictates that a minimum quantity be available in the supply systems.
PD-	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
MD-	Item to be manufactured or fabricated at the depot maintenance level.
AF-	Item to be assembled at direct support maintenance level.
AH--	Item to be assembled at general support maintenance level.
AD-	Item to be assembled at depot maintenance level.
XA-	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB-	Item is not procured or stocked. If not available through salvage, requisition.
XD-A	support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA, XD, and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application/Explanation</i>	<i>appropriate manuals/directives for specific instructions.</i>
O--	Support item is removed, replaced, used at the organizational level.	
F--	Support item is removed, replaced, used at the direct support level.	
H--	Support item is removed, replaced, used at the general support level.	
D--	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.	

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

<i>Code</i>	<i>Application/Explanation</i>
O--	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F--	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H--	The lowest maintenance level capable of complete repair of the support item is the general support level.
Z--	Nonreparable. No repair is authorized.

(3) Recoverability code. Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

<i>Recoverability codes</i>	<i>Definition</i>
Z--	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
F--	Reparable item. When uneconomically repairable, condemn and dispose at the direct support level.
H--	Reparable item. When uneconomically repairable, condemn and dispose at the, general support, level.
D--	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L--	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A--	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to

c. *Indent Code, Column 3.* This column indicates the breakdown of each given part or assembly Components, assemblies, and subassemblies are listed in top-down order. That is, the assemblies which are part of a component are listed immediately below that component, and the subassemblies which are part of an assembly are listed immediately below that assembly.

d. *National Stock Number, Column 4.* This column indicates the National stock number assigned to the item and will be used for requisitioning purposes.

e. *Description, Column 5.* This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers. For subsequent appearances of the same item, the manufacturer's code and part number are omitted. The words "same as" followed by the index number assigned to the item when it first appeared in the list will follow the item name; e.g., "RESISTOR, FIXED, COMPOSITION: SAME AS ABCD." f. *Unit of Measure (U/M), Column 6.* A 2character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based; e.g. ft, ea, pr, etc.

g. *Quantity Incorporated in Unit, Column 7.* This column indicates the quantity of the item used in assembly group of the AN/TSC-54. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc). Subsequent appearances of the same item in the assembly are indicated by the letters "REF".

h. *Direct Support per Site, Column 8.* Opposite the first appearance of each item is the total quantity of items authorized per site. Subsequent appearances of the same item will have the letters "REF" in this column. Items authorized for use as required, but not for initial stockage, are identified with an asterisk.

i. *Depot Maintenance per 13 Sites, Column 9.* This column indicates opposite the first appearance of each item, the total quantity authorized for depot maintenance of 13 sites. Subsequent appearances of the same item will have the letters "REF" in this column. Items authorized for use as required, but not for all initial stockage, are identified with an asterisk.

j. *Illustrations, Column 10.*
 (1) Figure number, Column 10a. Indicates the figure number of the illustration in which the item is shown.

(a) As asterisk following the figure number indicates the illustration is in TM 11-5895-389-12

(b) Figure numbers that do not have asterisk following them are contained in TM 11-5895-389-34

(2) *Item number, Column 10b.* Not used

k. *Reference Designation, Column 11.* This column indicates the reference designation used to

identify the item in the illustration.

1-4. Special Information

a. The following publications pertain to the AN/TSC-54 and its components:

TM 5-4120-312-14	Operator, Organizational, DS and GS Maintenance Manual; Air Conditioner; Compact Vertical, 208V, 3 Phase, 18,000 Btuh Cooling; 12,000 Btuh Heating (American Air Filter Models) CH-420-1, 400 Hertz, FSN 4120-909-0388; CH-620-1, 50/60 Hertz, FSN 4120-909-0387.

TM 11-5805-243-35	Field and Depot Maintenance: Telephone Set TA-1/PT.
TM 11-5805-243-35P	DS and GS, and Depot Maintenance Repair Parts and Special Tools Lists: Telephone Set TA-1/PT.
TM 11-5805-356-12	Operator and Organizational Maintenance Manual Including Repair Parts and Special Tool Lists: Terminal, Telegraph-Telephone AN/TCC-29 (Including Terminal, Telegraph TH-22/TC and Converter, Telegraph-Telephone Signal CV-425/U).
TM 11-5805-356-34-1	Direct Support and General Support Maintenance Manual (Including Repair Parts and Special Tool Lists:) Terminal, Telegraph TH-22/TC and Filter Assembly, Electrical F-316/U.
TM 11-5805-356-34-2	Direct Support and General Support Maintenance Manual (Including Repair Parts and Special Tools List): Converter, Telegraph-Telephone Signal CV-425/U.
TM 11-5815-200-12	Organizational Maintenance Manual Including Repair Parts and Special Tools List: Teletypewriter Sets AN/FGC-20, AN/FGC-20X. AN/FGC-21, AN/FGC-64, AN/FGC-66, AN/FGC-67, AN/FGC-67X, AN/UGC-4. AN/UGC-29, AN/UGC-29X, and Teleprinter TT-259/FG.

TM 11-5815-200-35	DS, GS, and Depot Maintenance Manual: Teletypewriter Sets AN/FGC- 20X, AN/FGC-21, AN/FGC-64, AN/FGC-66, AN/FGC-67, AN/FGC-67X, AN/UGC-4, AN/UGC-29, AN/UGC-29X, and Teleprinter TT-259/FG.
TM 11-5815-200-35P/2	DS, GS, and Depot Maintenance Repair Parts and Special Tool Lists: Teletypewriter Sets AN/FGC-20X and AN/UGC-4.
TM 11-5965-224-15P	Operator's, Organizational, Direct Support, and General Support Maintenance Repair Parts and Special Tools Lists (Including Depot Maintenance Repair Parts and Special Tools): Handsets H-60/PT (FSN 5965-669-9145) and H-165/U (FSN 5965-543-1837).
TM 11-6625-475-10	Operator's Manual: Multimeters AN/PSM-6, AN/PSM-6A, and AN/PSM-6B.
TM 11-6625-472-25	Organizational, DS, GS, and Depot Maintenance Manual: Multimeters AN/PSM-6, AN/PSM-6A, and AN/PSM-6B.
TM 11-6625-475-25P	Organizational, DS, GS, and Depot Maintenance Repair Parts and Special Tools: Multimeters AN/PSM-6, AN/PSM-6A, and AN/PSM-6B.

b. Action change codes indicated in the left-hand margin of the listing page denote the following:

- N - Indicates an added item
- C - Indicates a change in data
- R- Indicates a change in NSN only

1-5. Location of Repair Parts

a. This manual contains three cross-reference indexes (sec. IV, V, and VI) to be used to locate a repair part when either the National stock number, reference number, manufacturer's part number, or reference designation is known. The first column in each cross-reference index is prepared, as applicable, in numerical or alphanumerical sequence. The last column of each cross-reference index lists the index number assigned to the part.

o. Refer to the appropriate cross-reference index (para 1-2c, d, e) and note the index number in the last column; then refer to the repair parts list to locate the index number which is listed in ascending order in column 1 of the repair parts list.

1-6. Federal Supply Code for Manufacturers

The last line in the description column indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

1-7. Abbreviations

Not applicable.
