**SECTION I  
INTRODUCTION**

**1. Scope**

This manual contains a list of repair parts required for the performance of organizational maintenance for Landing Control Central AN/TSQ-71A.

**NOTE**

No special tools, test and support equipment are required.

**2. General**

The repair parts list is divided into the following sections:-

- a. *Prescribed Load Allowance (PLA), Section II.* The PLA is a consolidated listing of repair parts allocated for initial stockage at organizational maintenance category. This is a mandatory minimum stockage allowance.
- b. *Repair Parts for Organizational Maintenance*

nance, Section III. Repair parts authorized for organizational maintenance is included in this section.

**NOTE**

All indexes noted below are cross-referenced to index numbers. The Index numbers appear in ascending sequence in column 3 of the repair parts list. The index number for the particular item will be the same for the item in all sections of this publication.

- c. *Federal Stock Number Cross-Reference to Index Number, Section IV.* This is a cross-reference index of Federal stock numbers to index numbers.
- d. *Figure and Item Number Cross-Reference to Index Number, Section V.* This is a cross-reference index of figure number and item number (or reference designation) to index number. The figure numbers are listed in numerical sequence; item numbers and/or reference designations are listed for each figure.
- e. *Reference Designation Cross-Reference to Index Number, Section VI.* This is a cross-reference index of reference and/or item numbers to index numbers.

**3. Explanation of Columns**

An explanation of the columns is given below.

- a. *Source, Maintenance and Recoverability Codes, (SMR).*

(1) *Source code, column 1A.* The selection status and source for the listed item is noted here. Source codes and their explanations are as follows:

<i>Code</i>	<i>Explanation</i>
P ---	Applies to repair parts that are stocked in or supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.
AH --	Applies to parts which can be replaced at the organizational level, but which are assembled and repaired at the 4th level maintenance category.
AD --	Applies to parts which can be replaced at the organizational level, but which are assembled and repaired at the 5th level maintenance category.
X2 --	Applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization ; such repair parts will be requisitioned with supporting justification channels.
G --	Applies to major assemblies that are procured with PEMA funds for initial issue only to be used as exchange assemblies at DSU and GSU category or returned to depot supply category.

(2) *Maintenance code, column 1B.* The lowest category of maintenance authorized to install the listed item is noted here.

<i>Code</i>	<i>Explanation</i>
O	Organizational Maintenance

(3) *Recoverability code, column 1C.* The information in this column indicates whether unserviceable items should be returned for recovery or salvage. Recoverability codes and their explanations are as follows:

<i>Code</i>	<i>Explanation</i>
R --	Applies to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.
S --	Repair parts and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by GSU to be uneconomically repairable they will be evacuated to a depot for evaluation and analysis before final disposition.

**NOTE**

When no code is indicated in the recoverability column the part will be considered expendable.

- b. *Federal Stock Number Column.* The Federal stock number for the item is indicated in this column.

- c. *Description Column.* The sequence number, Federal item name, a five-digit manufacturer's code and a part number are included in this column. For subsequent appearances of the same item, the manufacturer's code and part number are omitted. The words "same as" followed by the group of component heading when it first appeared in the list will follow the item name.
- d. *Unit of Issue Column.* The unit used as a basis of issue, (e.g., ea, pr, ft, yd, etc.) is indicated in this column.
- e. *Quantity Incorporated in Unit Pack Column.* Not used.
- f. *Quantity Incorporated in Unit Column.* The quantity of repair parts in an assembly is given in this column.
- g. *Maintenance Allowances Column.*
  - (1) The allowance columns are divided into subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have no entry in the allowance columns but will have number appearances of the same item will have no entry in the allowance columns but will have a reference in the description column to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk (\*) in the allowance column.
  - (2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column to obtain the total quantity of repair parts authorized.
  - (3) Subsequent changes to organizational to the part allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendations should be forwarded to the recommendations should be forwarded to the Commanding General, U. S. Army Electronics Command, ATTN: AMSEL-ME-NMP-AN, Fort Monmouth, N. J., 07703, for exception or revision to the allowance list. Revisions to the range of items authorized will be made based upon engineering experience, demand data, or TAERS information.
- h. *Illustrations Column*
  - (1) *Figure number 8A.* The number of the illustration in which the item is shown, and the maintenance-level suffix number of the technical manual in which the illustration appears is indicated in this column. *For example,* if the illustration in which the item is shown is figure 1-13 of the operator's manual (-10), the manual suffix -10 appears on the first line and the illustration number 1-13 on the second line. Refer only to those illustrations contained in the narrative and parts list manuals on the same item of equipment as covered by this manual; that is, manuals with the same serial and FSC number.
  - (2) *Item or symbol number, Column 8B.* The callout number used to reference the item in the illustration appears in this column.

#### 4. Reference Publications

The following publication pertains to Landing Control Central AN/TSQ-71A and its components:

**TM 11-5895-474-12** Operator and Organizational Maintenance Manual: Landing Control Central AN/TSQ-71A.

#### 5. Location of Repair Parts

- a. This manual contains three cross-reference indexes (sec. IV, V, and VI), to be used to locate a repair part when either the Federal stock number, reference number (manufacturer's part number), figure number, or reference designation is known. The first column in each cross-reference index is prepared, as applicable, in numerical or alphanumeric sequence. The last column of each cross-reference index lists the index assigned to the part.
- b. Refer to the appropriate cross-reference (para 2c, d, e), and note the index number in the last column; then refer to the repair parts list to locate the index number which is listed in ascending order in column 1 of the repair parts list.

#### 6. Federal Supply Codes

This paragraph lists the Federal supply code and associated manufacturer's name.

<i>Code</i>	<i>Manufacturer's Name</i>
05828 .....	General Instrument Corp., Radio Receptor Div
24930 .....	ITT Gilfillan Inc
80058 .....	Joint Electronic Type Designation System
81349 .....	Military Specifications
96906 .....	Military Standards

**7. Reporting of Equipment Publication Improvements**

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commanding General, U.S.- Army Electronics Command, ATTN: AMSEL- ME-NMP-AD, Fort Monmouth, N. J., 07703.
