**SECTION I  
INTRODUCTION**

**1. Scope**

This manual contains a list of repair parts and special tools required for the performance of direct support, general support, and depot maintenance for Landing Control Central AN/TSQ-71A.

**NOTE**

No special tools, test, and support equipment are required.

**2. General**

This repair parts and special tools list is divided into four principal sections.

a. *Repair Parts for Direct Support, General Support, and Depot Maintenance - Section II.* A list of repair parts authorized for performance of maintenance at direct support, general support, and depot categories.

b. *Federal Stock Number Cross-Reference to Index Number - Sections III.* An index of Federal stock numbers to index numbers.

c. *Figure and Item Number Cross-Reference to Index Number - Sections IV.* An index of illustrated items to line items by index numbers. The line item index numbers appear in the description column. The index number for an item will be the same for that item in all repair parts lists for this equipment.

d. *Reference Designation Cross-Reference to Index Number - Section V.* An index of reference designations to index numbers.

**3. Explanation of Columns**

The following is an explanation of the columns in section II.

a. *Source, Maintenance, and Recoverability Codes (SMR), Column I*

(1) *Source code, column 1A.* The selection status and source for the listed item is shown in the column. Source codes and their explanations are as follows:

<i>Code</i>	<i>Explanation</i>
P -	Applies to repair parts that are stocked in or supplied from GSA/DSA, or Army supply system, and authorized for use at indicated maintenance categories.
M -	Applies to repair parts which are not procured or stocked but are to be manufactured at indicated maintenance categories.
A -	Applies to assemblies that are not procured or stocked as such but are made up of two or more units, each of which carries an individual stock number and description and

<i>Code</i>	<i>Explanation</i>
	is procured and stocked and can be assembled by units at indicated maintenance categories.
AH -	Applies to parts which can be replaced at organizational category but which are assembled and repaired at the general support category.
AD -	Applies to parts which can be replaced at organizational category but which are assembled and re-paired at the depot maintenance category.
X1 -	Applies to parts which are not procured or stocked, the requirements for which will be supplied by use of next higher assembly or component.
X2 -	Applies to repair parts which are not stocked. The indicated maintenance category requiring such re-such parts through cannibalization. If not obtainable through cannibalization such repair parts will be requisitioned with supporting justification through normal supply channels.
	(2) <i>Maintenance code, column 1B.</i> The lowest category of maintenance authorized to install the listed item is noted here.

<i>Code</i>	<i>Explanation</i>
0.....	Organizational maintenance
F.....	Direct support maintenance
H.....	General support maintenance
D.....	Depot maintenance

(3) *Recoverability code, column 1C.* The information in this column indicates whether unserviceable items should be returned for recovery or salvage. Recoverability codes and their explanations are as follows:

**NOTE**

When no code is indicated in the recoverability column, the part will be considered expendable.

<i>Code</i>	<i>Explanation</i>
R -	Applies to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.

b. *Federal Stock Number, Column 2.* The Federal stock number for the item is indicated in this column.

c. *Description, Column 3.* The index number, Federal item name, a five-digit manufacturer's code, an indenture code, and a part number are included in the column. For subsequent appearances of the same item, the manufacturer's code and part number are omitted. The words "same as" followed by the sequence number assigned to the item when it first appeared in the list will follow the item name; e.g. "RESISTOR, FIXED, COMPOSITION: SAME AS A132". The indenture codes indicate the end item, the assemblies, and the component parts. Identical codes are parts of the preceding higher code. An asterisk

(\*) indicates attaching parts. Model column is not

d. *Unit of Issue, Column 4.* The unit used as a basis of issue (e.g., ea, pr, ft, yd, etc) is noted in this column.

e. *Quantity Incorporated in unit Pack, column 5.* Not used.

f. *Quantity Incorporate in Unit, Column 6.* The quantity of repair parts in an assembly is indicated in this column. Subsequent appearances of the same item in the same assembly are indicated by the letters "REF".

g. *Maintenance Allowances, Column 7.*

(1) The allowance columns are divided into sub-columns. Indicated in each sub-column opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have no entry in the allowance columns but will have a reference, in the description column, to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk (\*) in the allowance column.

(2) The quantitative allowances for DS/GS categories of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

h. *1 - Year Allowances Per- 100 Equipments/Contingency Planning Purposes, Column 8.* The total quantity required for distribution and contingency planning purposes is indicated in this column. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for 1 year.

i. *Depot Maintenance Allowance Per 100 Equipments, column 9.* This column indicates the total quantity of each item authorized depot maintenance for 100 equipments.

j. *Illustrations, Column 10.*

(1) *Figure number, Column 10a.* The number of the illustration in which the item is shown, and the maintenance-level suffix number of the technical manual in which the illustration appears is indicated in this column. *For example,* if the illustration in which the item is shown in figure 1-13 of the operator's manual (-

10), the manual suffix -10 appears on the first line and the illustration number 1-1.1 on the second line.

(2) *Item or symbol number, column, column 10b.* The callout number used to reference the item in the illustration is indicated in this column.

#### 4. Location of Repair Parts

a. This manual contains three cross-reference indexes (sec. III, IV, and V) to be used to locate a repair part when either the Federal stock number, reference number (manufacturer's part number), figure number, or reference designation is known. The first column in each cross-reference index is pre-pared, as applicable, in numerical or alphanumeric sequence. The last column of each cross-reference index lists the index number assigned to the part.

b. Refer to the appropriate cross-reference index para 2b, c, d) and note the index number in the last column; then refer to the repair parts list to locate the index number which is listed in ascending order in column I of the repair parts list.

#### 5. Reference Publications

The following publications pertain to AN/TSQ-71A and its components.

TM 11-5895-474-12 Operator and Organizational Maintenance Manual: Landing Control Central AN/TSQ-71A.

**7. Reporting of Equipment Publication Improvements**

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commanding General, U.S. Army Electronics Command, ATNT: AMSEL-ME-NMP-EM, Fort Monmouth, N.J., 07703.
