REPORTING OF ERRORS

You can improve this manual by recommending improvements using DA Form 2028-2 located in the back of the manual. Simply turn out the self-addressed form, fill it out as shown on the sample, fold it where shown, and drop it in the mail.

If there are no blank DA Forms 2028-2 in the back of your manual, use the standard DA Form 2028 (Recommended Changes to Publications and Blank Forms) and forward to the Commander, US Army Communications and Electronics Materiel Readiness Command, ATTN DRSEL-ME-MQ Fort Monmouth NJ 07703.

In either case a reply will be furnished direct to you.

SECTION I

INTRODUCTION

1 Scope

This manual lists spares and repair parts special tools special test, measurement and diagnostic equipment (TMDE), and other special support equipment required for performance of direct support and general support maintenance of the AN/TSC-26. OA-3984A A/TSC-26 OA-3985A/TSC-26 OA-3986A/TSG-26 It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes

2 General

This Repair Parts and Special Tools List is divided into the following sections

a. *Section II Repair Parts List* A list of spares and repair parts authorized for use in the performance of maintenance The list also includes parts which be removed for replacement of the authorized Parts lists are composed of functional groups in numeric sequence with the parts in each group listed in figure and item number sequence

b. *Section III Special Tools List* Not applicable

c. *Section IV National Stock Number and Part Number Index* A list in National item identification number (NIIN) sequence of all National stock numbers (NSN) appearing in the listings followed by a list in alphabetic sequence, of all part numbers appearing in the listings National stock numbers and part numbers are cross referenced to each illustration figure and item number appearance

3. Explanation of Columns

a. *Illustration.* This column is divided as follows

(1) *Figure number* Indicates the figure number of the illustration on which the item is shown

(2) *Item number* The number used to identify item called out in the illustration

b. *Source Maintenance, and Recoverability (SMR) Codes*

(1) *Source code* Source codes indicate the manner of acquiring support items for maintenance repair or overhaul of end items Source codes are entered in the first and second positions of the Uniform SMR Code format as follows

Code

Definition

PA-Item procured end stocked for anticipated or known usage

XD-A support item that is not stocked When required item will be procured through normal supply channels

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA end aircraft support items as restricted by AR 700-42

(2) *Maintenance code* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove replace and use the support item The maintenance code entered in the fourth position will indicate one of the following levels of maintenance

Code Application/Explanation

C-Crew or operator maintenance performed within organizational maintenance

O-Support item is removed replaced, used at the organizational level

F-Support item is removed replaced used at the direct support level

H-Support item is removed replaced used at the general support level

D-Support items that are removed replaced used at depot mobile depot, specialized repair activity only

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions) This position will contain one of the following maintenance codes

Code Application/Explanation

O-The lowest maintenance level capable of complete repair of the support item is the organizational level

<i>Code</i>	<i>Application/Explanation</i>
F-	The lowest maintenance level capable of complete repair of the support item is the direct support level
H-	The lowest maintenance level capable of complete repair of the support item is the general support level
D-	The lowest maintenance level capable of complete repair of the support item is the depot level
L-	Repair restricted to designated specialized repair activity
Z-	Nonreparable No repair is authorized
B-	No repair is authorized The item may be reconditioned by adjusting lubricating etc at the user level No parts or special tools are procured for the maintenance of this item

(3) *Recoverability code* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows

<i>Recoverability codes</i>	<i>Definition</i>
Z-	Nonreparable item When unserviceable condemn and dispose at the level indicated in position 3
O-	Reparable item When uneconomically reparable condemn and dispose at organizational level
F-	Reparable level When uneconomically reparable condemn and dispose at the direct support level
H-	Reparable item When uneconomically reparable condemn and dispose at the general support level
D-	Reparable item When beyond lower level repair capability return to depot Condemnation and disposal not authorized below depot level
L-	Reparable item Repair condemnation and disposal not authorized below depot/specialized repair activity level
A-	Item requires special handling or condemnation procedures because of specific reasons (i.e. precious metal content high dollar value critical material or hazardous material) Refer to appropriate manuals/directives for specific instructions

c National Stock Number Indicates the National stock number assigned to the item and will be used for requisitioning purposes

d Part Number Indicates the primary number used by the manufacturer (individual company firm corporation or Government activity) which controls the design and characteristics of the item

by means of its engineering drawings, specifications standards and inspection requirements to identify an item or range of items

NOTE

When a stock numbered item is requisitioned the repair part received may have a different part number than the part being replaced

e *Federal Supply Code for Manufacturer (FSCM)* The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer distributor or Government agency etc

f *Description* Indicates the Federal item name and if required a minimum description to identify the item

g *Unit of Measure (U/M)* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function This measure is expressed by a two character alphabetical abbreviation (e.g., ea, in, pr, etc) When the unit of measure differs from the unit of issue the lowest unit of issue that will satisfy the required units of measure will be requisitioned

h *Quantity Incorporated in Unit* Indicates the quantity of the item used in the breakout shown on the illustration figure which as prepared for a functional group subfunctional group or a., assembly

5 How to Locate Repair Parts

a When National stock number or part number is unknown

(1) First Using the table of contents determine the functional group within which the item belongs This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups

(2) Second Find the illustration covering the functional group to which the item belongs

(3) Third. Identify the item on the illustration and note the illustration figure and item number of the item

(4) Fourth Using the Repair Parts Listing find the figure and item number noted on the illustration

6 When National stock number or part number is known

(1) First Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number This index is in NIIN sequence followed by a list of part numbers in alphameric sequence cross referenced to the illustration figure number and item number

(2) Second After finding the figure and item number, locate the figure and item number in the repair parts list

6 Abbreviations

Not applicable
