**REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS**

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 20282 located in the back of this manual direct to: Commander, US Army Communications-Electronics Command and Fort Monmouth, ATTN: DRSELME-MP, Fort Monmouth, NJ 07703.

In either case, a reply will be furnished direct to you.

SECTION	III. Special Tools List (Not applicable)		
	IV. National Stock Number and Part Number Index .....	306	

**SECTION I  
INTRODUCTON**

**1. Scope**

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational, direct support, and general support maintenance of the AN/TSC86. It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

**2. General**

This Repair Parts and Special Tools List is divided into the following sections:

*a. Section II. Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence.

*b. Section III. Special Tools List.* Not applicable.

*c. Section IV. National Stock Number and Part Number Index.* A list, in National item identification number (NIIN) sequence, of all National stock numbers (NSN) appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

**3. Explanation of Columns**

a. Illustration. This column is divided as follows:

(1) *Figure -Number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* The number used to identify item called out in the illustration.

b. Source, Maintenance, and Recoverability (SMR) Codes.

(1) Source code. Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
PA	-Item procured and stocked for anticipated or known usage.

<i>Code</i>	<i>Definition</i>
PB	-Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply system.
PD	-Support item, excluding support equipment. procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
MD	-Item to be manufactured or fabricated at the depot maintenance level.
XA	-Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	-Item is not procured or stocked. If not available through salvage, requisition.
XD	-A support item that is not stocked. When required, item will be procured through normal supply channels.

**NOTE**

**Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA and aircraft support items as restricted by AR 700-42.**

(2) *Maintenance code* .Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application /Explanation</i>
0	-Support item is removed, replace, used at the organizational level.
F	Support item is removed, replaced, used at the direct support level.
H	-Support item is removed, replaced, used at the general support level.
D	Support items that are removed, replaced, used at depot, mobile depot. specialized repair activity only

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

- | Code | Application/Explanation  |
|------|--|
| F    | -The lowest maintenance level capable of complete repair of the support item is the direct support level.  |
| H    | -The lowest maintenance level capable of complete repair of the support item is the general support level. |
| D    | -The lowest maintenance level capable of complete repair of the support item is the depot level.           |
| Z    | Nonreparable No repair is authorized.  |
- (3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

- | codes. | Definition  |
|--------|---|
| Z      | -Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.   |
| F      | -Reparable item. When uneconomically repairable, condemn and dispose at the direct support level.   |
| H      | -Reparable item. When uneconomically repairable, condemn and dispose at the general support level.  |
| D      | -Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.  |
| L      | -Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.   |
| A      | -Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions. |

c. National Stock Number Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in SB 70841/42 which is used to identify, the manufacturer, distributor, or Government agency, etc.

e. Part Number. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and

inspection requirements to identify an item or range of items.

**NOTE**

**When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.**

f. *Description.* Indicates the Federal item name and (l, if required, a minimum description to identify the item.

g. *Unit of Measure (U/IM).* Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly.

**4. Special Information**

a. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 11-5895-846-14.

b. The following publication pertains to the AN/ TSC-86 and its components:

TM 5-4120-243-14, Air Conditioner, Horizontal Compact: 18,000 BTU (Trane Models) 208 V, : 3 Phase, 50/60 Hz (Model MAC6H 18-208-1201-02): 208 V, 3 Phase, 400 Hz (Model 4H18-108-120103); 208 V, 1 Phase, 50/60 Hz (Model MAC6H 18230-1201-01); (Harvey W. Hottel Models), 208 V. 3 phase, 50/60 Hz (Model CH20-6i-08); 2(08 V, 3 Phase 400 Hz (Model CH20-4-08) Phase, 50/60 Hz and (KECO Model F18-4) 20 V', : 3 Phase, 400 Hz.

TM 5-4120-243-24P, Air Conditioner, Horizontal Compact: 18,000 BTU (Trane Models) 208 V, : Phase, 50/60 Hz (Model MAC6H 18-208-1201-02): 208 V, 3 Phase, 400 Hz (Model 4H18-108-120103); 208 V, 1 Phase, 50/60 Hz (Model MAC6iH 18230-1201); (Harvey W. Hottel Models). 208 V, : ) Phase, 50/60 Hz (Model CH20-f(-08); 208 V, 3 Phase, 400 Hz (Model CH20-4-08) Phase, 50.: '60 Hz and (KECO Model F18-4) 208 V, 3 Phase, 400 Hz.

c. National stock numbers (NSN's) that are missing from P source coded items have been applied for and will be added to this TM by future change/revision when they are entered in the Army Master Data File (AMDF). Until the NSN's are established and published, submit exception requisitions to: Commander, US Army Communications - Electronics Command anti Fort Monmouth, ATTN:

DRSEL-MM, Fort Monmouth, New Jersey 07703 for the part required to support your equipment.

d. Items that are missing from repair parts list will be furnished in the next change/revision to this manual.

## 5. How to Locate Repair Parts

a. When National stock number or part number is unknown.

(1) *First.* Using the table of contents, determine the functional group within which the item belongs. This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional group to which the item belongs.

(3) *Third.* Identify the item on the illustration and note the illustration figure and item number of the item.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National stock number or part number is known.

(1) *First.* Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NIIN sequence followed by a list of part numbers in alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list.
