WARNING

All specific cautions and warnings contained in this manual shall be strictly adhered to. Otherwise, severe injury, death and/or damage to the equipment may result.

HIGH VOLTAGE

is produced when this generator set is in operation.

DEATH

or severe burns may result if personnel fail to observe safety precautions. Do not operate this generator set until the ground terminal stud has been connected to a suitable ground. Disconnect the battery ground cable before removing and installing components on the engine or in the electrical control panel system.

Do not attempt to service or otherwise make any adjustments, connections or reconnections of wires or cables until generator set is shut-down and completely de-energized.

DANGEROUS GASES

Batteries generate explosive gas during charging; therefore, utilize extreme caution, do not smoke, or use open flame in vicinity when servicing batteries.

Exhaust discharge contains noxious and deadly fumes. Do not operate generator sets in inclosed areas unless exhaust discharge is properly vented to the outside.

When filling fuel tank, maintain metal to metal contact between filler nozzle and fuel tank. Do not smoke or use an open flame in the vicinity.

Use extreme care, should a selenium rectifier malfunction, to avoid inhalation of poisonous fumes.

LIQUIDS UNDER PRESSURE

are generated as a result of operation of the generator set. Do not expose any part of the body to a high pressure leak in the fuel or hydraulic system of the generator set. Relieve pressure from radiator before removing radiator cap.

NOISE

operating level of this generator can cause hearing damage. Ear protectors, as recommended by the medical or safety officer, must be worn when working near this set.

CAUTION

DAMAGE

to the equipment may result if personnel fail to observe the cautions contained in this manual.

If generator set is shut-down by the operation of a safety device, do not attempt to operate the unit until the cause has been determined and eliminated.

SECTION I. INTRODUCTION

1. SCOPE.

This joint Army, Navy, Air Force and Marine Corps manual lists repair parts and special tools, required for the performance of organizational, intermediate (field), direct and general support and depot maintenance of the generator set. The following paragraphs are keyed to applicable users. All users should read paragraph 4, Special Information, prior to using this manual.

NOTE

(Army) Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

NOTE

(Army) Organizational Maintenance personnel are to extract the maintenance coded "O" items they require from Section II, Column (2), Third and/or Fourth Position of the Direct and General Support Repair Parts and Special Tools List.

2. GENERAL

This Repair Parts and Special Tools List is divided into the following sections-

a. (All) Repair Parts Section II. A list of repair parts authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level in figure and item number sequence.

b. (All) Special Tools, Test and Support Equipment Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational, intermediate (field), direct support, general support and depot level.

c. National Stock Number and Reference Number Index Section IV. A list of National stock numbers in ascending numerical sequence, followed by a list of reference numbers appearing in all the listings, in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

d. Reference Designator Index Section V. The Reference Designator Column includes all assigned reference designators arranged first in alphabetical order, second in numeric order. Opposite each symbol is listed the figure and item number of the part in Section II and the reference number.

3. EXPLANATION OF COLUMNS.

The following provides an explanation of columns in the tabular lists in Sections II and III.

a. (All) Illustration. (Column 1) This column is divided as follows.

(1) Figure Number. Indicates the figure number of the illustration on which the item is shown.

(2) Item Number. Indicates the callout number used to reference the item on the illustration.

b. (All) Source, Maintenance, and Recoverability Codes (SMR). (Column 2).

(1) Uniform Source Codes applicable to all Military Services.

GENERAL: Source Codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair or overhaul of end items. Source Codes are entered in the first and second positions of the Uniform SMR Code format as follows:

CODE	DEFINITION
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which other- wise would be coded PA except that it is deteriorate in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfittings to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
KD	An item of depot overhaul/repair kit and not purchased separately. Depot kit de- fined as a kit that provides items required at the time of overhaul or repair.

**AIR FORCE T.O. 35C2-3-443-4/ARMY TM 5-6115-458-24P
NAVY NAVFAC P-8-629-24P/MARINE CORPS SL-4-07536A**

CODE	DEFINITION
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/ repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at intermediate maintenance levels. Air Force - Intermediate (*) Army - Direct Support (*) Marine Corps - 3rd Echelon Navy - Afloat
MH	Item to be manufactured or fabricated at intermediate maintenance levels. Air Force - Intermediate (*) Army - General Support (*) Marine Corps - 4th Echelon Navy - Ashore
MG	Item to be manufactured or fabricated at both afloat and ashore intermediate maintenance levels - Navy use only.
MD	Item to be manufactured or fabricated at depot maintenance level.
AO	Item to be assembled at organizational level.
AF	Item to be assembled at intermediate maintenance levels. Air Force - Intermediate (*) Army - Direct Support (*) Marine Corps - 3rd Echelon Navy - Afloat
AH	Item to be assembled at intermediate maintenance levels. Air Force - Intermediate (*) Army - General Support (*) Marine Corps - 4th Echelon Navy - Ashore
AG	Item to be assembled at both afloat and ashore intermediate maintenance level -Navy use only.
AD	Item to be assembled at depot maintenance levels.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.
XC	Installation drawings, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

(*) NOTE: For USAF and the USA Safeguard Program, only Code "F" will be used to denote intermediate maintenance. On joint programs, use of either code F or H by the joining service will denote intermediate maintenance to USAF and the USA Safeguard Program

(2) Uniform Maintenance Codes applicable to all Military Services:

GENERAL. Maintenance Codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The Maintenance Codes are in the third and fourth position of the Uniform SMR Code Format.

(a) USE (THIRD POSITION): The Maintenance Code entered in the third position indicates the lowest level maintenance level authorized to remove, replace, and use the support item. The Maintenance Code entered in the third position indicates one of the following levels of maintenance.

CODE APPLICATION/EXPLANATION

O	Support item is removed, replaced, used at the organizational level of maintenance.
F	Support item is removed, replaced, used at the following intermediate levels. USAF - Intermediate (*) USA - Direct Support (*) USN - Afloat USMC - Third Echelon
G	Support item is removed, replaced, used at both afloat and ashore intermediate levels: Navy only.
H	Support Item is removed, replaced, used at the following intermediate levels- USAF - Intermediate (*) USA - General Support (*) USN - Ashore (only) USMC - Fourth Echelon
D	Support items that are removed, replaced, used at Depot only: USAF - Depot, Mobile Depot and Specialized Repair Activity USA - Depot, Mobile Depot and Specialized Repair Activity USN - Aviation Rework, Avionics and Ordinance Facilities, and Shipyards USMC - Depot

AIR FORCE T.O. 35C2-3-443-4/ARMY TM 5-6115-458-24P
NAVY NAVFAC P-8-629-24P/MARINE CORPS SL-4-07536A

(b) REPAIR (FOURTH POSITION): The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i. e., all authorized maintenance functions).

CODE APPLICATION/EXPLANATION

- O The lowest maintenance level capable of complete repair of the support item is the organizational level.
- F The lowest maintenance level capable of complete repair of the support item is the following intermediate level:
USAF - Intermediate (*)
USA - General Support (*)
USN - Ashore (Only)
USMC - Fourth Echelon
- H The lowest maintenance level capable of complete repair of the support item is the following intermediate level:
USAF - Intermediate (*)
USA - General Support (*)
USN - Ashore (Only)
USMC - Fourth Echelon

(*) NOTE: For USAF programs and the USA Safeguard Program, Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate maintenance to USAF and the USA Safeguard Program.

- G Both afloat and ashore intermediate levels are capable of complete repair of support item: Navy only.
- D The lowest maintenance level capable of complete repair of the support item is the depot level.
USAF - Depot, Mobile Depot and Specialized Repair Activity
USA - Depot, Mobile Depot, Specialized Repair Activity
USN - Aviation Rework, Avionics and Ordnance Facilities, Shipyards
USMC - Depot
- L Repair restricted to designated Specialized Repair Activity.
- Z Nonrepairable. No repair is authorized.
- B No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) Uniform Recoverability Codes applicable to all Military Services:

GENERAL: Recoverability Codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the uniform SMR Code Format as follows:

RECOVERABILITY

CODES DEFINITION

- Z Nonrepairable item. When unserviceable, condemn and dispose at the level indicated in column 3.
- O Repairable item. When uneconomically repairable, condemn and dispose at organizational level.
- F Repairable item. When uneconomically repairable, condemn and dispose at the following intermediate levels:
USAF - Intermediate (*)
USA - Direct Support (S)
USN - Afloat
USMC - Third Echelon
- H Repairable Item. When uneconomically repairable, condemn and dispose at the following levels:
USAF - Intermediate (*)
USA - General Support (*)
USN - Ashore
USMC - Fourth Echelon

(*) NOTE: For USAF programs and the USA Safeguard Program, Code F will be used to denote intermediate maintenance. On joint programs, use of either Code F or H by the joining Service will denote intermediate level to USAF and the USA Safeguard Program.

- D Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L Repairable item. Repair, condemnation and disposal not authorized below depot/Specialized Repair Activity level.
- A Item requires special handling or condemnation procedures because of specific reasons (i. e., precious metal content, high-dollar value, critical material or hazardous material). Refer to appropriate manuals/ directives for specific instructions.

c. (USMC) Special Stockage Indicator Code and Replacement Factor (Column 3).

(1) Special Stockage Indicator Code: This column reflects the condition under which certain maintenance parts, (parts assigned NSN's and coded in the "P" series source code of the SMR code) are stocked. The codes are explained as follows:

RECOVERABILITY

CODES DEFINITION

No Code	Indicates that the part may or may not be authorized in initial allowances to using or supporting organizations. The manner of determining initial issue allowances is explained in paragraph (2) below.
I	Applied to maintenance parts for which predicted consumption would not warrant inclusion in Mount-Out but, for which a quantity of one (1) is authorized as insurance for Mount-Out using a 360-day criteria. This criteria is based on the total density of equipments employed by the DIV/WING TEAM. Mount-Out allowances, so authorized, will be stocked by the FSR or the MWSG in the case of Marine Wing peculiar equipment, as applicable.
D	Applied to maintenance parts that are not considered critical or essential to be on hand and are, therefore, not authorized in initial allowances, however, these items are stocked within the Supply System and may be requisitioned based upon usage.
T	Indicates that the part is authorized in garrison operating allowances in order to comply with state and local laws; however, the part is not authorized in Mount-Out since it is not combat essential.

(2) Replacement Factor. This column reflects the replacement factor assigned to each nationally stocked numbered maintenance repair part. This factor is assigned to the repair part on its first appearance in the publication. The replacement factor, expressed as a decimal, indicates the average rate at which the type of item so coded has been used by Marine Corps field units or the rate at which design engineers anticipate the item will fall, wear out, or otherwise require replacement. All computations are based on a replacement period of one year. Therefore, a replacement factor of 0.008, applied to an item in this stock list, indicates that eight out of every one thousand of such items used in the end item of equipment to which this publications pertains, is predicted to need replacement in one year. Likewise, 0.004 reflects that four out of every thousand in use are predicted to require replacement in one year, while 2.0 shows that every one in use is predicted to be replaced twice during each year.

(a) Initial authorized stockage levels of consumable and salvageable items for an organization are to be computed for predicted consumption based on the number of items employed and/or supported by an organization within the number of days for which stockage is authorized. In computing Garrison Operating Stock or Mount-Out, authorized levels can be determined by the requiring Marine Corps unit by multiplying the replacement factor times the quantity used per equipment times the number of end items employed by the using organization or supported by the service organization times the authorized day level expressed in months and divided by 12. Specific formulas and examples are provided in Marine Corps Order, MCO P4400.79.

The replacement factors used in initial stockage computations, should be revised, If warranted, after significant usage is experienced in accordance with the guidelines of MCO 4400.32A. The following formula replacement factor, "X" represents actual usage experience (1 year), "A" represents the application per equipment, and "B" represents the number of equipments supported.

$$W = \frac{X}{A \times B}$$

(b) Initial allowances for maintenance float items (recoverability codes "R" and "D" for the FMF and appropriate post and stations are as furnished by Initial Issue Actions.

Changes to maintenance replacement rates resulting from actual usage may require recomputation of maintenance float allowances by holding units. Any required recomputation of maintenance float allowances will be made in accordance with MCO 4000. 6.

(c) The replacement factor for same as (S/A) items is indicated upon the first appearance of the item in the major combination, component or assembly.

(d) (All) National Stock Number (Column 4) indicates the National Stock Number assigned to the item and will be used for requisitioning purposes.

(e) (All) Description (Column 5). Indicates the National item name and any additional description of the item required. The abbreviation "w/e" when used as part of the nomenclature, indicates the National Stock Number includes all armament, equipment, accessories, and repair parts issued with the item. A part number or other reference number is followed by the applicable five-digit Federal Supply Code for manufacturers in parentheses. Repair parts quantities, including kits, sets, and assemblies, are shown in front of the repair part name.

(f) (All) Unit of Measure (U/M) (Column 6). A two character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e. g., ft, ea, pr, etc.

(g) (All) Quantity Incorporated in Unit (Column T) Indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

(h) (MC) Quantity per equipment (Column 8). Indicates the consolidated quantity of a maintenance part used on an end item upon the parts first appearance in this publication.

4. SPECIAL INFORMATION. (Use the following paragraphs as applicable).

**AIR FORCE T.O. 35C2-3-443-4/ARMY TM 5-6115-458-24P
NAVY NAVFAC P-8-629-24P/MARINE CORPS SL-4-07536A**

a. (All) Identification of the usable on codes of this publication are:

CODE USED ON
A MEP009A
B MEP108A

b. (Army) Repair parts mortality has been based on 5000 hours operation per year.

c. (Army) The basis of issue for authorized tools, test and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations as follows. (such as, soldering iron per five MOS284. 1 supporting 1-15 Radio Set AN/ARC-51).

d. (Army) Parts which require manufacture of assembly at a category higher than that authorized for installation will indicate in the source column, the higher category.

e. Stockage Information.

(1) Air Force stockage information is contained in Initial Supply Support Lists issued separately from this publication by SMAMA in accordance with AFM 67-1, part 1, chapter 12.

(2) Navy stockage objectives are contained in Consolidated Shipboard Allowance List as furnished separately from this publication by the Ship Parts Control Center.

5. HOW TO LOCATE REPAIR PARTS.

a. (All) When National stock number or reference number is unknown:

(1) First. Using the table of contents, determine the assembly group, i. e. , batteries and related parts, exhaust and breather pipes, within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the assembly group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Fourth. Using the Repair Parts Listing, find the assembly group which the repair part belongs in and locate the illustration figure and item number noted on the illustration.

b. (All) When National stock number or reference number is known:

(1) First. Using the Index of National Stock Numbers and Reference Numbers, find the pertinent National stock number or reference number. This AIR FORCE T.O. 35C2-3-443-4/ARMY TM 54115458-24P NAVY NAVFAC P-8429-24P/MARINE CORPS SL-4-07536A index is in ascending NSN sequence followed by a list of reference numbers in alphanumeric sequence, crossreferenced to the illustration figure number and item number

(2) Second Using the Repair Part Listing, find the insert as applicable (functional group, functional subgroup or assembly group) of the repair part and the illustration figure number and item number referenced in the Index of National Stock Numbers and Reference Numbers.

6. USE OF THE REFERENCE DESIGNATOR INDEX SECTION.

This Section (Section V) is used when the reference designator is known or identified by other technical manuals supporting this equipment. The reference number is given in this Section. If description on location is desired, note the figure and item number. Turn to Section II to the noted figure and item number. The location of the part and description is given in this listing.

7. ABBREVIATIONS.

Abbreviations used in preparation of this technical manual are in accordance with MIL-STD-12.

8 FEDERAL SUPPLY CODES FOR MANUFACTURERS

For listing see H4-1 or H4-2.

9. RECOMMENDATIONS FOR MAINTENANCE PUBLICATION IMPROVEMENTS

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted as follows:

a. Air Force AFTO Form 22 in accordance with T.O. 00-5-1, direct to:

Commander
Sacramento Air Logistics Center
Attn: MMEDT

A McClellan AFB, California 95652

b. Army DA Form 2028, direct to:

Commander
U. S. Army Troop Support Command
Attn: MPP

St. Louis, Missouri 63120

c. Marine Corps NAVMAC 10772, direct to:

Commanding General
Marine Corps Logistics Support Base, Atlantic
Attn: Code P844

Albany, Ga 31704

d. Navy Letter, direct to:

Commanding Officer
U S. Navy Ship Parts Control Center
Attn: Code 551

Mechanicsburg, Pa. 17055
