**ORGANIZATIONAL MAINTENANCE REPAIR PARTS AND
SPECIAL TOOLS LIST**

**POWER PLANT, UTILITY; GAS TURBINE ENGINE
DRIVEN (LIBBY WELDING CO. MODEL LPU-71)
FSN 6115-937-0929 (NON-WINTERIZED)
FSN 6115-134-0825 (WINTERIZED)**

This copy is a reprint which includes current pages from Change 1. The title page was changed by Change 1.

CHANGE

No. 1

HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, DC 2 August 1974

**Organizational Maintenance Repair Parts and
Special Tools List
POWER PLANT, UTILITY; GAS TURBINE ENGINE
DRIVEN (LIBBY WELDING CO. MODEL LPU-71)
FSN 6115-937-0929 (NON-WINTERIZED)
FSN 6115-134-0825 (WINTERIZED)**

TM 5-6115-586-20P, 25 September 1972, is changed as follows:

The title is changed as shown above.

Page V, paragraph 7, lines 5 through 9 are changed to: Commander, US Army Troop Support Command, ATTN: AMSTS-MPP, 4300 Goodfellow Boulevard, St. Louis, MO 63120.

By Order of the Secretary of the Army:

Official:

VERNE L. BOWERS

*Major General, United States Army
The Adjutant General*

CREIGHTON W. ABRAMS
*General, United States Army
Chief of Staff*

Distribution:

To be distributed in accordance with DA Form 12-25A (qty rqr block No. 638) Organizational Maintenance requirements for MUST System.

**ORGANIZATIONAL MAINTENANCE REPAIR PARTS
AND SPECIAL TOOLS LIST
POWER PLANT, UTILITY: GAS TURBINE ENGINE DRIVEN
(LIBBY WELDING CO. MODEL LPU-71)
FSN 6115-165-3842**

Current as of 29 August 1972

Section III.	FEDERAL, STOCK NUMBER AND REFERENCE NUMBER	
	INDEX 223	

**SECTION I.
INTRODUCTION**

1. Scope

a. This manual lists repair parts, special tools, test and support equipment required for the performance of organizational maintenance of the power plant.

b. Repair parts listed represent those authorized for use at the organizational level and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. *Repair Parts List Section II.* A list of repair parts authorized at the organizational level for the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of assembly groups in ascending numerical sequence, with the parts in each group listed in figure and item number sequence.

b. *Federal Stock Number and Reference Number Index Section III.* A list, in ascending numerical sequence, of all Federal stock numbers appearing in the listings, followed by a list, in alpha-numeric sequence, of all reference numbers appearing in the listings. Federal stock number and reference numbers are cross-referenced to each illustration figure and/or item number.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular lists in section II.

a. *Source, Maintenance, and Recoverability Codes (SMR):*

(1) *Source code.* Indicates the source for the listed items. Source codes are:

Code	Explanation
P	Repair Parts, Special Tools and Test Equipment supplied from GSA/DSA, or Army supply system, and authorized for use at indicated maintenance levels.
P2	Repair Parts, Special Tools and Test

P9	Equipment which are procured and stocked for insurance purposes because combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
P10	Assigned to items which are NSA design controlled unique repair parts, special tools, test, measuring, and diagnostic equipment which are stocked and supplied by the Army COMSEC Logistic System and which are not subject to the provisions of AR 380-41.
M	Assigned to items which are NSA design controlled special tools, test, measuring, and diagnostic equipment for COMSEC support which are accountable under the provisions of AR 380-41 and which are stocked and supplied by the Army COMSEC Logistic System.
A	Repair Parts, Special Tools and Test equipment which are not procured or stocked as such in the supply system but are to be manufactured at indicated maintenance levels.
X	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance levels.
X1	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X2	Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
G	Repair Parts, Special Tools and Test equipment which are not stocked and have no foreseen mortality. The indicated maintenance level requiring such repair parts will attempt to obtain the parts through cannibalization or salvage. The item may be requisitioned with exception data, from the end item manager for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DS and GS level. Those assemblies will not be stocked above the DS and GS level or returned to depot supply level.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X1 and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Indicates the lowest level of maintenance authorized to install the repair part. Capabilities of higher maintenance levels are considered equal or better. Maintenance codes are:

Code	Explanation
O	Organizational maintenance

(3) *Recoverability code.* Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are non-recoverable. Recoverability codes are:

Code	Explanation
R	Repair parts (assemblies and components), special tools and test equipment which are considered economically repairable at direct and general support maintenance levels. When the item is no longer economically repairable, it is normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair Parts, Special Tools, and Test Equipment and assemblies which are economically repairable at DS and GS activities and which normally are furnished by supply on an exchange basis. When items are determined by a GS to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
T	High dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be repaired or overhauled at depot maintenance activities only. No repair may be accomplished at lower levels.
U	Repair Parts, Special Tools and Test Equipment specifically selected for salvage by reclamation units because of their precious metal content, critical materials, high dollar value or reusable casings or castings.

b. Federal Stock Number. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. Description. Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM) in parentheses. The FSCM is used as an element in item identification to designate manufacturer or distributor or Government agency, etc., and is identified in SB 708-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity of each item in the kit or set indicated in front of the item name.

d. *Unit of Measure (U/M).* Indicates the standard of basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation, e.g., ea, in, pr, etc., and is the basis used to indicate quantities and allowances in subsequent columns.

e. *Quantity Incorporated in Unit.* Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for an assembly group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, e.g., shims, spacers, etc.

f. *Fifteen-Day Organizational Maintenance Allowances*

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into four subcolumns. Indicated in each subcolumn is the total quantity of special tools authorized for the number of equipments supported (Not applicable).

g. *Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item on the illustration.

4. Special Information

a. Usable On codes are included in Column 3 (Not applicable).

b. The basis of issue for authorized special tools, test and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations.

c. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

d. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for the group or assembly to which they apply.

e. The following publication pertains to the power plant and its components.

TM 5-6115-586-12	Operator and Organizational Maintenance Manual
------------------	--

f. The illustrations in this manual are identical to the applicable illustrations published in the -34P, Direct and General Support Maintenance Repair Parts and Special Tools List manual (Including depot maintenance repair parts and special tools), and the figure numbers are the same as appear in that manual. The -34P illustrations are given for a better understanding of the parts relationship, however, only those parts assigned maintenance code "0" are listed in the tabular list. Only illustrations containing organizational authorized items appear in this manual.

5. How to Locate Repair Parts

a. When Federal Stock Number or Reference Number is unknown:

(1) *First.* Using the table of contents determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known

(1) *First.* Using the Index of Federal Stock Number and Reference Numbers find the pertinent Federal Stock Number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Parts Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in

the index of Federal Stock Numbers and Reference Numbers.

6. Abbreviations

ac	alternating current
adj	adjust
air cond	air conditioning
assy	assembly
aux	auxiliary
cont	control
cprsr	compressor
dc	direct-current
elec	electrical
eng	engine
exh	exhaust
ext	external
hd	head
hex	hexagon
htr	heater
hydr	hydraulic
id	inside diameter
ident	identification
in	inch(es)
instl.....	installation
lg	length
lkg	locking
mtg.....	mounting
od	outside diameter
press.....	pressure
recirc	recirculating
sst.....	stainless steel
str	straight
temp	temperature
thd	thread
thk	thick
univ	universal
wl.....	water line

7. Recommendations for Maintenance Publications Improvements

You can improve this manual by calling attention to errors and by recommending improvements, using DA Form 2028 (Recommended Changes to Publications) or by letter, and mailing directly to Commanding General, U S Army Mobility Equipment Command, ATTN AMSME-MPP, 4300 Goodfellow Boulevard, St. Louis, Mo 63120 A reply will be furnished directly to you
