**HEADQUARTERS, DEPARTMENT OF THE ARMY  
AUGUST 1972**

CHANGE }  
No. 1 }

HEADQUARTERS  
DEPARTMENT OF THE ARMY  
WASHINGTON, DC 2 August 1974

Direct Support and General Support Maintenance Repair Parts and  
Special Tools List (Including Depot Maintenance Repair  
Parts and Special Tools)

POWER PLANT, UTILITY; GAS TURBINE ENGINE  
DRIVEN (LIBBY WELDING CO. MODEL LPU-71)  
FSN 6115-937-0929 (NON-WINTERIZED)  
FSN 6115-134-0825 (WINTERIZED)

TM 5-6115586, 34P, 29 August 1972, is changed as follows:  
The title is changed as shown above.

Page VII, paragraph 7, lines 6 through 9 are changed to read, Commander, US Army Troop Support Command,  
ATTN: AMSTS-MPP, 4300 Goodfellow Boulevard, St. Louis, MO 63120.

By Order of the Secretary of the Army:

Official:

VERNE L. BOWERS  
Major General, United States Army  
The Adjutant General

CREIGHTON W. ABRAMS  
General, United States Army  
Chief Of Staff

Distribution:

To be distributed in accordance with DA Form 12-25A (qty rqr block No. 639) Direct and General Support  
Maintenance requirements for MUST System.

DIRECT AND GENERJIL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST  
(INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS)  
FOR  
POWER PLANT, UTILITY: GAS TURBINE ENGINE DRIVEN  
(LIBBY WELDING CO. MODEL LPU 71)  
FSN 6115-165-3842

Current as of 29 August 1972

## Section I INTRODUCTION

1. Scope.	Code	Explanation
<p>a. This manual lists repair parts, special tools, test and support equipment required for the performance of direct support, general support, and depot maintenance of the Power Plant.</p>	P	Repair Parts, Special Tools and Test Equipment supplied from GSA/DSA or Army supply system, and authorized for use at indicated maintenance levels.
<p>b. Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 710-2.</p>	P2	Repair Parts, Special Tools and Test Equipment which are procured and stocked for insurance purposes because the combat or military essentially of the end item dictates that a minimum quantity be available in the supply system.
<p>2. General.</p> <p>This Repair Parts and Special Tools List is divided into the following sections:</p>	P9	Assigned to items which are NSA design controlled: unique repair parts, special tools, test, measuring, and diagnostic equipment which are stocked and supplied by the Army COMSEC Logistic System and which are not subject to the provisions of AR 380-41.
<p>a. Repair Parts List-Section II. A list of repair parts authorized at the direct support, general support, and depot levels for the performance of maintenance. The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of assembly groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.</p>	P10	Assigned to items which are NSA design controlled: special tools, test, measuring, and diagnostic equipment for COMSEC support which are accountable under the provisions of AR 380-41 and which are stocked and supplied by the Army COMSEC Logistic System.
<p>b. Special Tools, Test and Support Equipment-Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level.</p>	M	Repair Parts, Special Tools and Test Equipment which are not procured or stocked as such in the supply system but are to be manufactured at indicated maintenance levels.
<p>c. Federal Stock Number and Reference Number Index-Section IV. A list, in ascending numerical sequence, of all Federal stock numbers appearing in the listings, followed by a list, in alpha-numeric sequence, of all reference numbers appearing in the listings. Federal stock number and reference numbers are cross-referenced to each illustration figure and/or item number appearance.</p>	A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance levels.
<p>3. Explanation of Columns.</p> <p>The following provides an explanation of columns found in the tabular lists in Sections II and III:</p>	X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
<p>a. Source, Maintenance, and Recoverability Code (SMR).</p>	X1	Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
<p>(1) Source Code. Indicates the source for the listed items.</p> <p style="margin-left: 40px;">Source Codes are:</p>		

Code	Explanation
X2	Repair Parts, Special Tools and Test Equipment which are not stocked and have no foreseen mortality. The indicated maintenance level requiring such repair, parts will attempt to obtain the parts through cannibalization or salvage. The item may be requisitioned with exception data, from the end item manager for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DS and GS level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.

**NOTE**

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XI and aircraft support items as restricted by AR 700-42.

(2) Maintenance Code. Indicates the lowest level of maintenance authorized to install the repair part and/or use the special tool or test equipment for each application. Capabilities or higher maintenance categories are considered equal or better. Maintenance codes are:

Code	Explanation
O	Organizational maintenance
F	Direct Support maintenance
H	General Support maintenance
D	Depot maintenance

(3) Recoverability Code. Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are nonrecoverable. Recoverability codes are:

Code	Explanation
R	Repair Parts (assemblies and components), special tools and test equipment which are considered economically repairable at direct and general support maintenance levels. When the item is no longer economically repairable, it is normally disposed of at the GS level. When supply consideration dictate, some of the repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair Parts, Special Tools, Test Equipment and assemblies which are economically

Code	Explanation
	reparable at DS and GS activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.

T High dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be repaired or overhauled at depot maintenance activities only. No repair may be accomplished at lower levels.

U Repair Parts, Tools, and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or re-usable casings or castings.

b. Federal Stock Number. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. Description. Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM) in parentheses. The FSCM is used as an element in item identification to designate manufacturer or distributor or Government agency, etc., and is identified in SB 708-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity of each item in the kit or set indicated in front of the item name.

d. Unit of Measure (U/M). Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviations, e.g., ea, in, pr, etc., and is basis used to indicate quantities and allowances in subsequent columns.

e. Quantity Incorporated in Unit. This column indicates the quantity of the item used in the assembly group. An "AR" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shim.s, spacers, etc.).

f. 30-Day DS/GS Maintenance Allowances.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into three subcolumns. The quantitative allowance of special tools for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipment's supported.

g. 1-Year Allowance Per 100 Equipment's/ Contingency Planning Purposes.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools required for distribution and contingency planning purposes.

h. Depot Maintenance Allowance Per 100 Equipment's.

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools authorized for depot maintenance of 100 equipment's.

(i). Illustrated. This column is divided as follows:

(1) Figure Number. Indicates the figure number of the illustration on which the item is shown.

(2) Item Number. Indicates the callout number used to reference the item in the illustration.

4. Special Information.

a. Useable on codes are included in Column 3. (Not applicable.)

b. The basis of issue for authorized special tools, test and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations.

c. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

d. Repair parts kits and gasket sets appear as the last group in the repair parts listing.

e. (Applicable to revision and/or change only). Action change codes indicated in the left-hand margin of the listing page denote the following:

N-Indicates an added item.

C-Indicates a change in data.

R-Indicates a change in FSN only.

f. The following publications pertain to the Power Plant and its components:

TM 5-6115-586-12 Operator and Organizational Maintenance Manual

TM 5-6115-586-34 Direct Support and General Support Maintenance Manual

TM 5-6115-586-20P Organizational Maintenance Repair Parts and Special Tools List.

5. How to Locate Repair Parts.

a. When Federal stock number or reference number is unknown:

(1) First. Using the table of contents determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Second. Find the illustration covering the assembly group to which the repair part belongs.

(3) Third. Identify the repair part on the illustration and note the illustration figure number and item number of the repair part.

(4) Fourth. Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known:

(1) First. Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number and reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) Second. Using the Repair Parts Listing, find the assembly group of the repair part and the illustration figure and item number referenced in the Index of Federal Stock number and Reference Numbers.

6. Abbreviations.

Abbreviation	Explanation
AC	ALTERNATING CURRENT
ADJ	ADJUST
AIR COND	AIR CONDITIONING
ASSY	ASSEMBLY
AUX	AUXILLIARY
CONT	CONTROL

Abbreviation	Explanation
CPRSR	COMPRESSOR
DC	DIRECT-CURRENT
ELEC	ELECTRICAL
ENG	ENGINE
EXH	EXHAUST
EXT	EXTERNAL
HD	HEAD
HEX	HEXAGON
HTR	HEATER
HYDR	HYDRAULIC
ID	INSIDE DIAMETER
IDENT	IDENTIFICATION
IN	INCH(ES)
INSTL	INSTALLATION
LG	LENGTH
LKG	LOCKING
MTG	MOUNTING
OD	OUTSIDE DIAMETER

Abbreviation	Explanation
PRESS	PRESSURE
RECIRC	RECIRCULATING
SST	STAINLESS STEEL
STR	STRAIGHT
TEMP	TEMPERATURE
THD	THREAD
THK	THICK
UNIV	UNIVERSAL
WL	WATER LINE

7. Recommendations for Maintenance Publications Improvements. You can improve this manual by calling attention to errors and by recommending improvements, using DA Form 2028 (Recommended Changes to Publications) or by a letter, and mailing directly to Commanding General, U.S. Army Mobility Equipment Command, ATTN: AMSME-M .P, 4300 Goodfellow Boulevard, St. Louis, Missouri 63120. A reply will be furnished directly to you.
