REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any errors or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms) or DA Form 2028-2 located in the back of this manual directly to: Commander, U.S. Army Aviation and Missile Command, ATTN: AMSAM-MMC-MA-NP, Redstone Arsenal, AL 35898-5000. A reply will be furnished to you. You may also send in your comments electronically to our e-mail address: 2028@redstone.army.mil or FAX us at (256) 842-6546/DSN 788-6546. Instructions for sending an electronic 2028 may be found at the end of this TM immediately preceding the hard copy 2028.

*This manual supersedes TM 1-6625-3081-30P, dated 11 October 1993, including all changes.

AVIATION UNIT AND INTERMEDIATE MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. Scope.

This RPSTL lists and authorizes spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of direct support maintenance of the Electronic Equipment Test Facility TADS/PNVS Augmentation Equipment. It authorizes the requisitioning and issue of spares and repair parts as indicated by the source, maintenance, and recoverability (SMR) codes.

2. General.

In addition to Section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair parts kits are listed separately in their own functional group within Section II. Repair parts for repairable special tools are also listed in this section. Items listed are shown on the associated illustration(s)/figures(s).

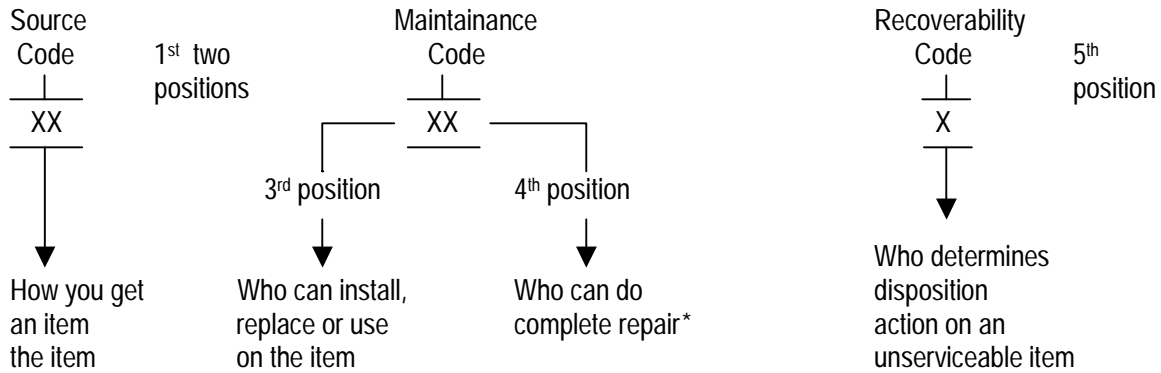

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE column) for the performance of maintenance.

c. Section IV. Cross-Reference Index. A list, in National Item Identification Number (NIIN) sequence, of all national stock numbered items appearing in the listing, followed by a list in alphanumeric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. The pre-baseline part number index lists all fielded parts and NSN of an earlier configuration and cross-references to part number, NSN, figure, and item numbers of current configuration.

3. Explanation of Columns (Section II and III).

a. ITEM NO. (Column (1)). Indicates the number used to identify items called out in the illustration.

b. SMR CODE (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout:

* Complete repair: Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow:

Code	Explanation
------	-------------

PA
PB
PC**
PD
PE
PF
PG
PR***

Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the third position of the SMR code.

NOTE:

- ** Items coded PC are subject to deterioration.
- *** Items coded PR are stocked items which have been replaced and procurement is not authorized (internal command coding). Consume existing stock.

KD
KF
KB

Items with these codes are not to be requested/requisitioned individually. They are part of kit which is authorized to the maintenance category indicated in the third position of the SMR code. The complete kit must be requisitioned and applied.

Code

Explanation

MO - (Made at org/AVUM level)	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by NSN in the DESCRIPTION AND USABLE ON CODE (UOC) column. If the item is authorized to you by the third position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.
MF - (Made at DS/AVIM level)	
MH - (Made at GS level)	
ML - (Made at Specialized Repair Act (SRA))	
MD - (Made at Depot)	
AO - (Assembled by org/AVUM level)	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the third position code of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.
AF - (Assembled by DS/AVIM level)	
AH - (Assembled by GS level)	
AL - (Assembled by SRA)	
AD - (Assembled by Depot)	

XA - Do not requisition an "XA" coded item. Order its next higher assembly. (Also, refer to the NOTE below.)

XB - If an "XB" item is not available from salvage, order it using the CAGEC and part number given.

XC - Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.

XD - Item is not stocked. Order an "XD"-coded item through normal supply channels, using the CAGEC and part number given, if no NSN is available.

NOTE: Cannibalization or controlled exchange, when authorized, may be used as a source of supply or items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 700-42.

(2) Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

Code	Application/Explanation
------	-------------------------

- C - Crew or operator maintenance done within organizational or aviation maintenance.
- O - Organizational or aviation unit level can remove, replace, and use the item.
- F - Direct support or aviation intermediate level can remove, replace, and use the item.
- H - General support level can remove, replace, and use the item.
- L - Specialized repair activity can remove, replace, and use the item.
- D - Depot level can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes:

Code	Application/Explanation
------	-------------------------

- O - Organizational or aviation unit is the lowest level that can do complete repair of the item.
- F - Direct support or aviation intermediate is the lowest level that can do complete repair of the item.
- H - General support is the lowest level that can do complete repair of the item.
- L - Specialized repair activity (designate the specialized repair activity) is the lowest level that can do complete repair of the item.
- D - Depot is the lowest level that can do complete repair of the item.
- Z - Nonreparable. No repair is authorized.
- B - No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However, the item may be reconditioned by adjusting, lubricating, etc., at the user level.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Recoverability
Codes

Application/Explanation

- Z - Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of SMR code.
- O - Reparable item. When uneconomically reparable, condemn and dispose of the item at organizational or aviation unit level.
- F - Reparable item. When uneconomically reparable, condemn and dispose of the item at the direct support or aviation intermediate level.
- H - Reparable item. When uneconomically reparable, condemn and dispose of the item at general support level.
- D - Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
- L - Reparable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
- A - Item requires special handling or condemnation procedures because of specific reasons (e.g., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. CAGEC (Column (3)). The commercial and Government entity code is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency/activity that supplies the item.

d. PART NUMBER (Column (4)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specification standards, and inspection requirements to identify an item or range of items.

NOTE: When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered.

e. DESCRIPTION AND USABLE ON CODE (UOC) (Column (5)). This column includes the following information:

- (1) The federal item name and, when required, a minimum description to identify the item.
- (2) The physical security classification is not applicable.
- (3) Items that are included in kits and sets are listed below the name of the kit or set.
- (4) Spare/repair parts that make an assembled item are listed immediately following the assembled item line entry.
- (5) Part numbers for bulk materials are referenced in the line item entry for the item to be manufactured/fabricated.
- (6) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC).

(7) The USABLE ON CODE, when applicable (see paragraph 5, Special Information).

(8) In the Special Tools List section, the Basis of Issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipment supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

(9) The statement "END OF FIGURE" appears just below the last item description in Column 5 for a given figure in both Section II and Section III.

f. QTY (Column (6)). The QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity, indicates that the quantity is variable and the quantity may vary from application to application.

4. Explanation of Columns (Section IV).

a. NATIONAL STOCK NUMBER (NSN) INDEX.

(1) STOCK NUMBER column. This column lists the NSN by national item identification number (NIIN) sequence. The NIIN consists of the last nine digits of the NSN

NSN

(i.e., 5305-01-674-1467). When using this column to locate an item, ignore the first

NIIN

four digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) FIG. column. This column lists the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) ITEM column. The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. PART NUMBER INDEX. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) CAGEC column. The commercial and Government entity code is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(2) PART NUMBER column. Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) STOCK NUMBER column. This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and columns to the left.

(4) FIG. column. This column lists the number of the figure where the item is identified/located in Section II and III.

(5) ITEM column. The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

c. FIGURE AND ITEM NUMBER INDEX. Not applicable.

5. Special Information.

a. USABLE ON CODE. The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as "UOC:" in the Description Column (justified left) on the first line applicable item description/ nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in the RPSTL are:

<u>CODE</u>	<u>USED ON</u>	<u>CODE</u>	<u>USED ON</u>
EL1	13231056	HU6	13082808-39
EL2	13231053	JFB	13231053

b. SERIAL NUMBER APPLICATION. Part numbers shown in Sections II and III without any serial number restrictions, are applicable to all serial numbered LRU/SRUs of Electronic Equipment Test Facility TADS/PNVS Augmentation Equipment. When part numbers of spare/repair items are not the same for all serial numbered LRU/SRUs, one of the following statements identifying the usable effectivity will be made in the DESCRIPTION AND USABLE ON CODE (UOC) column as follows:

Example: A. Component Assembly, Electronic (U/O 13082765) is Defined as; electronic component assembly is used on next higher assembly part number 13082765.

Example: B. Program Sets, Test, AVIM See Fig 1 Assy Bkdn **§76§** is defined as; AVIM test program sets is restricted by effectivity code **§76§**. (Refer to paragraph 5b(1) for description of effectivity codes.)

(1) EFFECTIVITY CODES. Effectivity codes are grouped in accordance with LRU/SRU system. The following effectivity codes are used to define restricted usage on serial numbered components of Electronic Equipment Test Facility TADS/PNVS Augmentation Equipment.

<u>EFFECTIVITY CODE §--§</u>	<u>COMPONENT SYSTEM</u>	<u>SERIAL NUMBER APPLICATION</u>
26	Electronic Station	Permissible to use 2139A until stock depletion
27	Electronic Station	To be used when ALT item 6 is installed

<u>EFFECTIVITY CODE §--§</u>	<u>COMPONENT SYSTEM</u>	<u>SERIAL NUMBER APPLICATION</u>
51	Test Bench	Supplied as part of multiprogrammer rack assembly P/N 13083067
52	Test Bench	Supplied with A to D converter P/N AND55400
53	Test Bench	1-3, 100-107, 200-205, & 300-311 not inc MWO 1-6625-3081-55-7
54	Test Bench	312 & SUB; 1-3, 100-107, 200-205, & 300-311 inc MWO 1-6625-3081-55-
55	Test Bench	Permissible to use MS3126F20-41P until stock depletion
56	Test Bench	Not inc MWO 1-6625-3081-55-12
57	Test Bench	Inc MWO 1-6625-3081-55-12
76	AVIM Test Program Set	Used with equate test set & DG S-130 computer
77	AVIM Test Program Set	Used with equate test set & DG MV7800 computer
78	AVIM Test Program Set	Installed with the inc of MWO 1-6625-3081-55-11

c. MODIFICATION WORK ORDERS (MWOs). The following MWOs have been incorporated into this RPSTL.

<u>MWO NO.</u>	<u>TITLE</u>	<u>CLASSIFICATION</u>	<u>EFF DATE</u>	<u>COMPLETION DATE</u>
MWO 1-6625-3081-55-3	Modification of night sensor assembly (NSA) test program set (TPS) control number (C/N) 1	Normal	18 Apr 91	17 Apr 95
MWO 1-6625-3081-55-4	Modification of electronic unit assembly (TEU) test program set (TPS) control number (C/N) 49	Normal	18 Apr 91	17 Apr 95
MWO 1-6625-3081-55-6	Modification of night-side test bench optical assembly (inner module) for optical improvement	Normal	18 Apr 91	17 Apr 95

MWO 1-6625-3081-55-6 (cont)	program (OIP) system changes			
MWO 1-6625-3081-55-7	Modification of electrical/optical test bench and night side test bench (NSTB) assembly. (Installation of MINCO probe)	Normal	12 Sep 91	11 Sep 95
MWO 1-6625-3081-55-9	Modification of DCTB optics mounting support assembly to properly mount and test TADS laser receiver unit	Normal	1 Feb 93	1 Feb 97
MWO 1-6625-3081-55-10	Modification of TADS PGSE test program set (TPS) C/N 3 circuit card assembly (CCA) A-40 (NSN 5998-01-333-2976) (EIC TAD) (TPS hardware)	Routine	01 Jul 93	01 Jul 97
MWO 1-6625-3081-55-11	Modification of PNVS night sensor assembly TPS C/N 2 branched-electrical special purpose cable assembly (NSN 5995-01-276-5473) (EIC TAD)	Routine	17 Sep 93	17 Sep 97
MWO 1-6625-3081-55-12	Modification of TADS PGSE optical signal Generator (OSG), input-Output console 2A2 (EIC TAD)	Routine	30 Mar 98	30 Mar 03

d. FABRICATION INSTRUCTIONS. Part numbers for bulk materials are referenced in the description column of the line item entry for the item to be manufactured/ fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in TM 1-6625-3081-23 series.

e. ASSEMBLY INSTRUCTIONS. Detailed assembly instructions for items source coded to be assembled from component spare/repair parts are found in TM 1-6625-3081-23 series. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

f. KITS. Not applicable.

g. INDEX NUMBERS. Not applicable.

h. ASSOCIATED PUBLICATIONS. The publications listed below pertain to the Electronic Equipment Test Facility TADS/PNVS Augmentation Equipment and Test Program Sets and its components.

i. ILLUSTRATIONS - LISTING. Higher - category RPSTL illustrations are not applicable.

j. ELECTROSTATIC DISCHARGE SENSITIVE (ESDS) DEVICES. This technical manual contains parts and assemblies sensitive to damage by ESD. MIL-STD-1285 should be consulted for specific information on how damage can occur to electronic parts, assemblies and equipment by ESD and the control measures to be taken to protect against such damage.

(1) Illustrations contained within this manual which depict ESDS parts are further identified by the use of the following symbol affixed in the lower left-hand corner of each applicable illustration.

(2) Repair parts lists contained within this manual with ESD sensitive parts are identified by the following symbol (**ESDS**). These symbols are placed in the extreme right of the Description and Usable on Code (UOC) column for the item identified as ESDS.

6. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Not Known:

(1) First. Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) Third. Identify the item on the figure and use the Part Number Index to find the NSN.

b. When National Stock Number or Part Number is Known:

(1) First. Using the National Stock Number and Part Number Index, find the pertinent national stock number or part number. The NSN index is in National Item Identification Number (NIIN) sequence (see 4a (1)). The part numbers in the Part Number index are listed in ascending alphanumeric sequence (see 4b). Both indexes cross-reference you to the illustration/figure and item number of the item you are looking for.

(2) Second. Turn to the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

7. Abbreviations.

<u>Abbreviation</u>	<u>Explanation</u>
AVIM	Aviation Intermediate Maintenance
AVUM	Aviation Unit Maintenance
BNC	Bayonet N Connector
BOI	Basis of Issue
C/N	Control Number
CAGEC	Commercial and Government Entity Code
EETF	Electronic Equipment Test Facility
HDD	Heads Down Display
HOD	Heads Out Display
IVD	Indirect View Display
LRU	Line Replaceable Unit
NIIN	National Item Identification Number (consists of the last nine digits of the NSN)
NSN	National Stock Number
OPT	Optical
RPSTL	Repair Parts and Special Tools List

<u>Abbreviation</u>	<u>Explanation</u>
S/N	Serial Number
SMR	Source, Maintenance, and Recoverability
SRA	Specialized Repair Activity
SRU	Shop Repairable Unit
SUB	Subsequent
TMDE	Test Measurement and Diagnostic Equipment
UOC	Usable on Code
V	Variable
