GENERAL SUPPORT AND DEPOT MAINTENANCE  
REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1-1. scope.

This manual lists and illustrates repair parts required for the performance of general support and depot maintenance of the Test Set, Radio AN/ARM-22A.

1-2. General.

This Repair Parts and Special Tools list is divided into the following sections:

a. Repair Parts - **Section II. A list of repair parts authorized for the performance of maintenance at the general support and depot level in the same sequence as the Selection Work Sheet, and illustrated by figure number and reference designation.**

b. Special Tools, Test, and Support Equipment - **Section III. Not applicable.**

c. Federal Stock Number and Reference Number Index - **Section IV. A list of Federal Stock Numbers in ascending numerical sequence followed by a list of reference numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and reference designation.**

1-3. Explanation of Columns.

The following provides an explanation of columns in the tabular lists in Sections II and III.

a. Source, Maintenance, and Recoverability (SMR) Codes, Column 1.

(1) Source code. Indicates the section status and source for the listed item. Source codes are:

Code	Explanation
A	<b>Applies to assemblies that are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories</b>
G	<b>Applies to major assemblies that are procured with Procurement of Electronics and Missiles, Army (PEMA) funds for initial issue only to be used as exchange assemblies at Direct Support Unit (DSU) and General Support Unit (GSU) level. These assemblies will not be stocked above DSU and GSU level or returned to depot level</b>
M	<b>Repair parts which are not procured or stocked but are to be manufactured at indicated maintenance levels</b>
P	<b>Applies to major parts which are stocked in or supplied from the General Support Activity/Direct Support Activity (GSA/DSA), or Army supply system, and authorized for use at indicated maintenance categories</b>
X1	<b>Applies to repair parts which are not procured or stocked, the requirement for which will be supplied by the use of next higher assembly or component</b>
X2	<b>Applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain</b>

through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels

(2) Maintenance code. Indicates the lowest category of maintenance authorized to install the listed item. Maintenance codes are:

Code	Explanation
D	Depot Support Maintenance
H	General Support Maintenance
O	Organizational Maintenance

(3) Recoverability code. Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applies to repairparts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis
S	Applies to repairparts and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply <b>on</b> an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final <b>disposition</b>
T	Applies <b>to high dollar value recoverable</b> repair parts which are subject to special handling and are issued on an exchange <b>basis. Such</b> repair parts normally are repaired or overhauled at depot <b>maintenance activities</b>

b. The second **line** of column 1 is a cross-reference to the index number of the repair part as it appears in the Selection Work Sheet (SWS). The index number is explained as follows:

A001	Denotes original line entry in the SWS
A001A	"A" and other subsequent letters denotes additional line items in the SWS

c. Federal Stock Number, Column 2. This column indicates the Federal Stock Number assigned to the item and will be used for requisitioning purposes.

d. Description, Column 3. This column indicates the Federal item name of the item required. A part number or other reference number is followed by the applicable five-digit Federal Supply Code for Manufacturers in parentheses.

e. Unit of Measure (U/M), Column 4. A two-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based; e.g., ea (each).

f. Quantity Incorporated in unit, Column 5. This column indicates the quantity of the item used in any one assembly. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated; e.g., shims, spacers, etc.

g. 30-Day GS/DS Maintenance Allowance, Columns 6 and 7. **Allowance quantities for repair parts are not listed in the RPSTL.** An asterisk is used in these columns **for the appropriate category of maintenance demoting the first time appearance of repair parts possessing maintenance factors. This indicates that the item is authorized for use at that category and will be requisitioned on an**

“As Required” basis. Subsequent appearances of the same item will have “REF” in the allowance columns.

h. 1-Year Allowance Per 100 Equipments Contingency Planning Purposes, Column 8. An asterisk is used in this column to indicate the item is used for distribution and contingency planning purposes and will be requisitioned on an “As Required” basis. Subsequent appearances of the same item will have “REF” in this column.

i. Depot Maintenance Allowance Per 100 Equipments, Column 9. An asterisk is used in this column to indicate the item is authorized for use “As Required”, but not for initial stockage. Subsequent appearances of the same item will have “REF” in the column.

j. Illustration, Column 10. This column is divided as follows:

(1) Figure Number, Column 10a. This column indicates the figure number of the illustration in which the item appears.

(2) Reference Designation, Column 10b. This column indicates the reference designation of each item in the equipment.

#### 1-4. Special Information.

a. **Repair parts mortality has been based on 28 equipments operating 120 hours a month for 1 year.**

b. **Parts which require manufacture of assembly at a category higher than that authorized for installation will indicate in the source column the higher category.**

c. **Illustrations showing reference designations in parentheses () denote 'Make From' items. Reference designations with brackets [ ] denote assemblies. Reference**

designations with asterisk \* denote modification.

d. **The following publications pertain to Test Set, Radio AN/ARW22A and its components.**

TM11-6625-1650-12-- **Operator and Organizational Maintenance Manual for Test Set, Radio AN/ARM-22A**

TM11-6625-1650-20--**Organizational Maintenance Manual for Test Set, Radio AN/ARM-22A**

TM 11-6625-1650-20P -- **Organizational Maintenance Repair Parts and Special Tools List Manual for Test Set, Radio AN/ARM-22A**

TM11-6625-1650-40 -- **General Support and Depot Maintenance Manual for Test Set, Radio AN/ARM-22A**

1-5. How to Locate Repair Parts.

a. **When the Federal stock number or reference number is unknown:**

(1) **First. Determine the assembly within which the repair part belongs.**

(2) **Second. Using the List of Illustrations, find the illustration covering the assembly to which the repair part belongs.**

(3) **Third. Identify the repair part on the illustration and note the figure and reference designation of the repair part.**

(4) **Four. Using the Repair Parts List (Section II), find the assembly to which the repair part belongs and locate the illustration figure and reference designation noted on the illustration.**

(5) **Fifth. Refer to the reference designation in the Repair Parts List (Section II) for the Federal stock number or reference number.**

b. When the Federal stock number or reference number is **known**:

(1) First. Using the index of Federal Stock Numbers (Section IV), find the Federal stock number. This index is in ascending numerical sequence by Federal stock number, cross-referenced to the illustration figure and reference designation.

(2) Second. Using the Reference Number Cross-Reference to Figure and Reference Designation Index (Section IV), find the applicable Reference Designation. This index is in ascending alpha-numeric sequence by reference number, cross-referenced to the figure and reference designation.

(3) Third. Using the Repair Parts List (Section II), find the assembly of the repair part and the illustration figure and reference designation as referenced in the indices of Federal Stock Numbers or Reference Numbers.

c. When the Reference Designation is known:

(1) First. Using the Repair Parts List (Section II), find the Reference Designation of the part listed in Column 10b. The next higher assembly of any component may be determined by following the upward progression of Column 10 to the subassembly, or assembly level. The reference designation is compiled as follows:

1	Al	Al	MP1
Unit Number			
Assembly Letter and Number			
Subassembly Letter and Number			
Component Letter and Number			

1-6. . Abbreviations. Not applicable.

SECTION IV. INDEX-REFERENCE NUMBER TO FIGURE, REFERENCE DESIGNATION, AND SEQUENCE NUMBER

Table with 5 main columns: REFERENCE NUMBER, FIGURE NUMBER, REFERENCE DESIGNATION, REFERENCE NUMBER, FIGURE NUMBER, REFERENCE DESIGNATION. The table lists multiple rows of data points, including alphanumeric identifiers and figure numbers.

SECTION IV. INDEX-REFERENCE NUMBER TO FIGURE, REFERENCE DESIGNATION, AND SEQUENCE NUMBER

SECTION IV. INDEX-REFERENCE NUMBER TO FIGURE, REFERENCE DESIGNATION, AND SEQUENCE NUMBER

Table with 8 columns: REFERENCE NUMBER, FIGURE NUMBER, REFERENCE DESIGNATION, SEQUENCE NUMBER, REFERENCE NUMBER, FIGURE NUMBER, REFERENCE DESIGNATION, SEQUENCE NUMBER. Contains multiple rows of alphanumeric data.

SECTION IV. INDEX-REFERENCE NUMBER TO FIGURE, REFERENCE DESIGNATION,  
AND SEQUENCE NUMBER
