## SECTION I. INTRODUCTION

### **1-1. Scope.**

This manual lists repair parts and special tools required for the performance of organizational maintenance of the Test Set, Gyro Stabilized Platform AN/ASM-385.

### **1-2. General.**

This Repair Parts and Special Tools List is divided into the following sections:

**Prescribed Load Allowance (PLA) - Section II.** A composite listing of the repair parts, special tools, test and support equipment having quantitative allowances for initial stockage at the organizational level.

**b. Repair Parts - Section III.** A list of repair parts authorized for the performance of maintenance at the organizational level in index number sequence.

**C. Special Tools, Test and Support Equipment - Section IV.** Not applicable.

**d. Indices - Section V.** Conversion of numbers and indices is explained as follows:

(1) Index - Federal Stock Number to Index Number. A list of Federal Stock numbers, in ascending numerical sequence, cross-referenced to the Repair Parts list index number.

(2) Index - Reference Number to Figure and Item Number. A list of reference numbers (part numbers and manufacturers codes), in ascending alphanumeric sequence, cross-referenced to figure and item number.

(3) Index - Reference Designation to Index Number. A list of Reference Designations (RD), in ascending alphanumeric sequence, cross-referenced to the Repair Parts list index number.

(4) Index - Federal Stock Number to Figure and Item Number. A list of Federal stock numbers, in ascending numerical sequence, cross-referenced to the illustration figure number and item number.

(5) Index — Figure and Item Number to Index Number. A list of figure and item numbers, each in ascending numerical sequence, cross-referenced to the Repair Parts list index numbers.

### **1-3. Explanation of Columns.**

The following provides an explanation of columns in the tabular lists in Sections III and IV.

#### **a. Source, Maintenance, and Recoverability (SMR) Codes, Column 1:**

(i. Source code, indicates the selection status and source for the listed item. Source codes are

Code	Explanation
<b>A</b>	Applies to assemblies which are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories
<b>All</b>	Applies to repair parts requiring assembly at a category higher than that authorized to replace the part
<b>G</b>	Applies to major assemblies that are procured with Procurement of Electronic and Missile, Army (PEMA) funds for initial issue only to be used as exchange assemblies at Direct Support Unit (DSU) and General Support Unit (GSU) level. These assemblies will not be stocked above DSU and GSU level or returned to depot level
<b>P</b>	Applies to repair parts which are stocked in or supplied from General Support Activity/Direct Support Activity (GSA/DSA), or Army supply system, and authorized for use at indicated maintenance categories

(2) Maintenance code, indicates the lowest category of maintenance authorized to install the listed item. The maintenance level is:

Code	Explanation
0	Organizational maintenance

(3) Recoverability code, indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applies to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis
T	Applies to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance

b. The second line of column 1 is a cross-reference to the index number of the repair part it appears in the Selection Work Sheet.

c. Federal Stock Number, Column 2. This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

d. Description, Column 3. This column indicates the Federal item name of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers.

e. Unit of Measure (U/M), Column 4. A two-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based; e.g., EA (each).

f. Quantity Incorporated in Unit, Column 5. This column indicates the quantity of the item used in any one assembly. An "AR" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated; e. g., shims, spacers, etc.

g. 15-Day Organizational Maintenance Allowance, Column 3 of Section II and Column 6 of Section III and IV.

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance columns. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair Parts reflected in the density column applicable to the number of items supported to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the Parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to Commanding Officer, U.S. Army Electronics Command, ATTN: AMSEL-ME-NMP-AS, Fort Monmouth, New Jersey 07703 for exception or revision to the allowance list. Revisions to the range of items authorized will be made by the Commanding Officer, U.S. Army Electronics Command, ATTN: AMSEL-ME-NMP-AS, Fort Monmouth, New Jersey 07703 based upon engineering experience, demand data, or TAERS information.

h. Illustration, Column 7. This column indicates the figure number of the illustration in which the item is shown, and the number used to reference the item in the illustration.

i. Reference Designation, Column 8. This column indicates the reference designation symbol of each item in the equipment.

#### 1-4. Special Information.

- a. Repair parts mortality has been based on 100 equipments operating 65 hours a month for 1 year.
- b. The basis of issue for authorized special tools, test and support equipment is the number of end items of equipment supported and the number of maintenance personnel allocated to perform the required maintenance operations as follows: Two sets of Special Tools and Test Equipment supporting twenty-three AN/ASN-86 Inertial Navigation Sets.

The following publications pertain to Test Set, Gyro Stabilized Platform AN/ASM-385 and its components.

TM 11-6625-2440-12	Operator's and Organizational Maintenance Manual for Test Set, Gyro Stabilized Platform AN/ASM-385
TM 11-6625-2440-45	General Support and Depot Maintenance Manual for Test Set, Gyro Stabilized Platform AN/ASM-385
TM 11-6625-2440-45P	General Support and Depot Maintenance Repair Parts and Special Tools List for Test Set, Gyro Stabilized Platform AN/ASM-385

#### 1-5. How to Locate Repair Parts.

- a. When the Federal stock number or reference number is unknown
  - (1) First. Using the List of Illustrations, determine the assembly within which the repair part belongs.
  - (2) Second. Find the illustration covering the assembly to which the repair part belongs.
  - (3) Third. Identify the repair part on the illustration and note the figure and item number of the repair part.
  - (4) Fourth. Using the Figure and Item Number Index, locate the sequence index number of the repair part.
  - (5) Fifth. Refer to the sequence index number in the Repair Parts list for the Federal stock number or reference number.
- b. When the Federal stock number or reference number is known:
  - (1) First. Using either of the indices of Federal Stock Numbers, find the Federal stock number. These indices are in ascending numerical sequence by Federal stock number, cross-referenced to either the Repair Parts list index number or to the illustration figure and item number.
    - (a) Second. Using the Index of Reference Numbers, find the applicable number. This index is in ascending alphanumeric sequence by reference number, cross-referenced to the Repair Parts list index number.
    - (3) Third. Using the Repair Parts list, find the assembly of the repair part and the illustration figure and item number, or the index number, as referenced in the indices of Federal Stock Numbers or Reference Numbers.
  - c. When the RD is known:
    - (1) First. Using the Reference Designation Index, find the RD. This index is in ascending alphanumeric sequence, cross-referenced to the index number of the Repair Parts list. The next higher assembly of any component may be determined by using the RD Index. Identify the RD of the part in question and, by following the upward progression of this index, the sequence number of the next higher assembly part number may be identified. The RD is compiled as follows:

1 Unit No.	A1 Assembly Letter and No.	A1 Subassembly Letter and No.	MPI Component Letter and No.
---------------	----------------------------------	-------------------------------------	------------------------------------

(2) Second. Using the Repair Parts list, find the assembly of the repair part and the illustration figure and item number.

d. When the Figure and Item Number are known:

(1) First. Identify the repair part on the applicable figure.

(2) Second. Cross-reference to the individual indices for information required.

1-6. Abbreviations. Not applicable.

1-7. Federal Supply Codes for Manufacturers.

Code	Manufacturer
06481	Litton Systems, Inc, Guidance and Control Systems Div. 5500 Canoga Ave. Woodland Hills, Calif. 91364
71744	Chicago Miniature Lamp Works 4433 Ravenswood Ave. Chicago, ILL. 60640
87034	Marco & Oak Industries A Division of Oak Electro/Metics Corp. 207 S. Helena P.O. Box 4011 Anaheim, Calif. 92803
96906	Military Standards Promulgated by Standardization Div. Directorate of Logistics Services, DSA

1-8. Recommendations for Maintenance Publication Improvements.

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to DA Publications) and forwarded direct to Commanding General, U.S. Army Electronics Command, Attn: AMSEL-ME-NMP-AS, Fort Monmouth, New Jersey 07703.
