 MAINTENANCE MANUAL
 FOR
 ELECTRONIC EQUIPMENT TEST FACILITY
 TADS/PNVS AUGMENTATION EQUIPMENT

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, U.S. Army Aviation and Troop Command, ATTN: AMSAT-I-MP, 4300 Goodfellow Blvd, St. Louis, MO 63120-1798. A reply will be furnished to you.

OVERVIEW

This chapter provides wiring data that covers both the electronic station and electro-optical test bench set. This includes interconnection diagrams and wire lists. Cable assemblies are listed in order by reference designator and part number.

This chapter also provides wiring data for the test program sets (TPS). This includes wire lists for the major test adapter UUT cable assemblies, self-test connectors, and test fixtures each covered in part number sequence.

Refer to system interconnection diagram (F0-32), AC power distribution diagram (F0-33), DC power distribution diagram (F0-34), and Laser interlock circuit diagram (F0-35), at the end of this volume for supplementary troubleshooting data for the EETF TADS/PNVS Augmentation Equipment.

Section I. REPAIR PARTS; SPECIAL TOOLS; TEST, MEASUREMENT, AND
DIAGNOSTIC EQUIPMENT (TMDE); AND SUPPORT EQUIPMENT

	Para	Page
Common Tools and Equipment	3-1	3-2
Special Tools, TMDE, and Support	3-2	3-2
Repair Parts	3-3	3-2

3-1. COMMON TOOLS AND EQUIPMENT 3-1

For authorized common tools and equipment, refer to the Modified Table of organization and Equipment (MTOE) applicable to your unit.

3-2. SPECIAL TOOLS, TMDE, AND SUPPORT EQUIPMENT 3-2

For authorized special tools and support equipment pertaining to direct support maintenance, refer to TM 11-6625-3081-23P, Repair Parts and Special Tools List (RPSTL). For some work on the EETF TADS/PNVS Augmentation Equipment, special tools, TMDE, or support equipment are needed. The following is a list of these items.

Item No.	National Stock No. or Part No.	Nomenclature
1	AN/USM-451	Multimeter, digital

3-3. REPAIR PARTS 3-3

Repair parts are listed and illustrated in the RPSTL (TM 11-6625-3081-23P) covering organizational and direct support maintenance for this equipment.

3-4. GENERAL

3-4

a. This section contains cables and self-test connectors that are connected as required by data displayed on video display terminal for the self-test and/or TPS usage. Cable assembly wire lists are presented in cable reference designator sequence. Self-test connectors are in part number order.

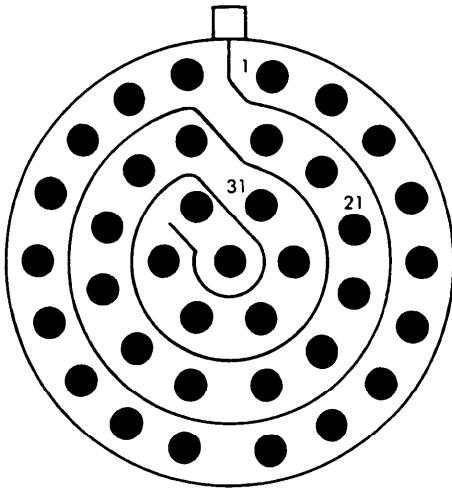

b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.

3-6. GENERAL

3-6

a. This section provides wiring and interconnection data for cable assemblies that connect within the electronic station.

b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.

c. The information is presented in cable reference designator sequence. This section contains an interconnection diagram followed by cable wire list data for all cables as listed above. Simple cables are shown by diagram.

3-7. ELECTRONIC STATION

3-7

INTERCONNECTION DIAGRAM

For the electronic station interconnection diagram, refer to F0-36.

3-8. GENERAL

3-8

a. This section provides wiring and interconnection data for cable assemblies that connect between and within the electronic station and the electro-optical test bench set.

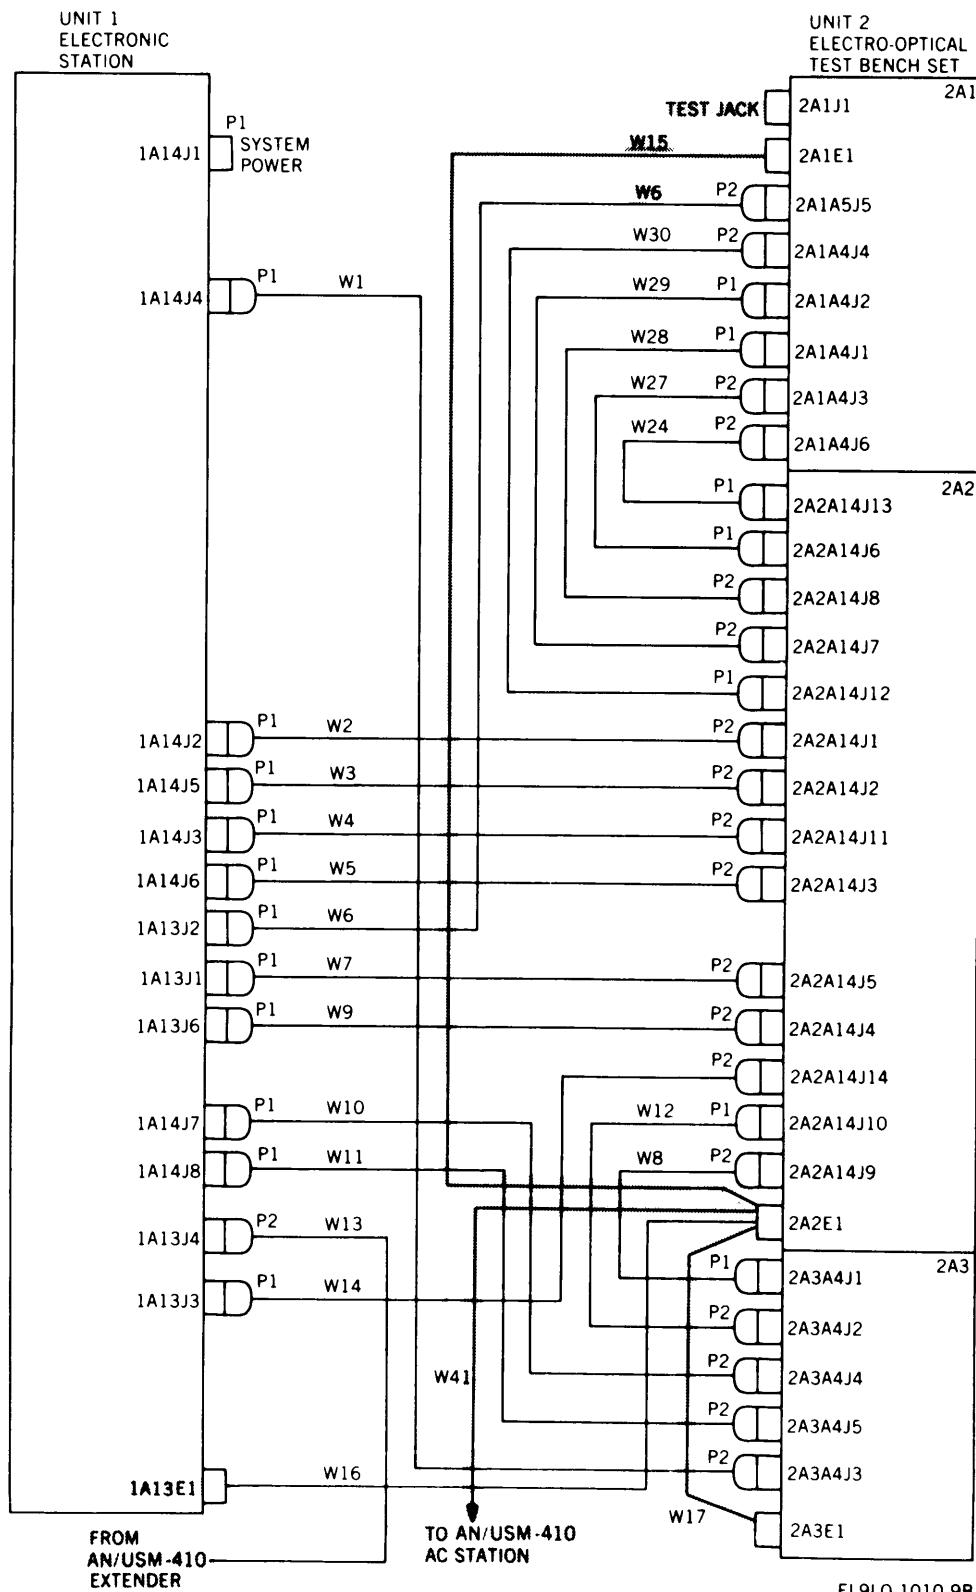

b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.

c. The information is presented in cable reference designer sequence. This section contains an interconnection diagram followed by cable wire list data for all interconnection cables as listed above. Simple cables are shown by diagram.

3-10. GENERAL

3-10

a. This section provides wiring and interconnection data for cable assemblies that connect within the dayside test bench.

b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.

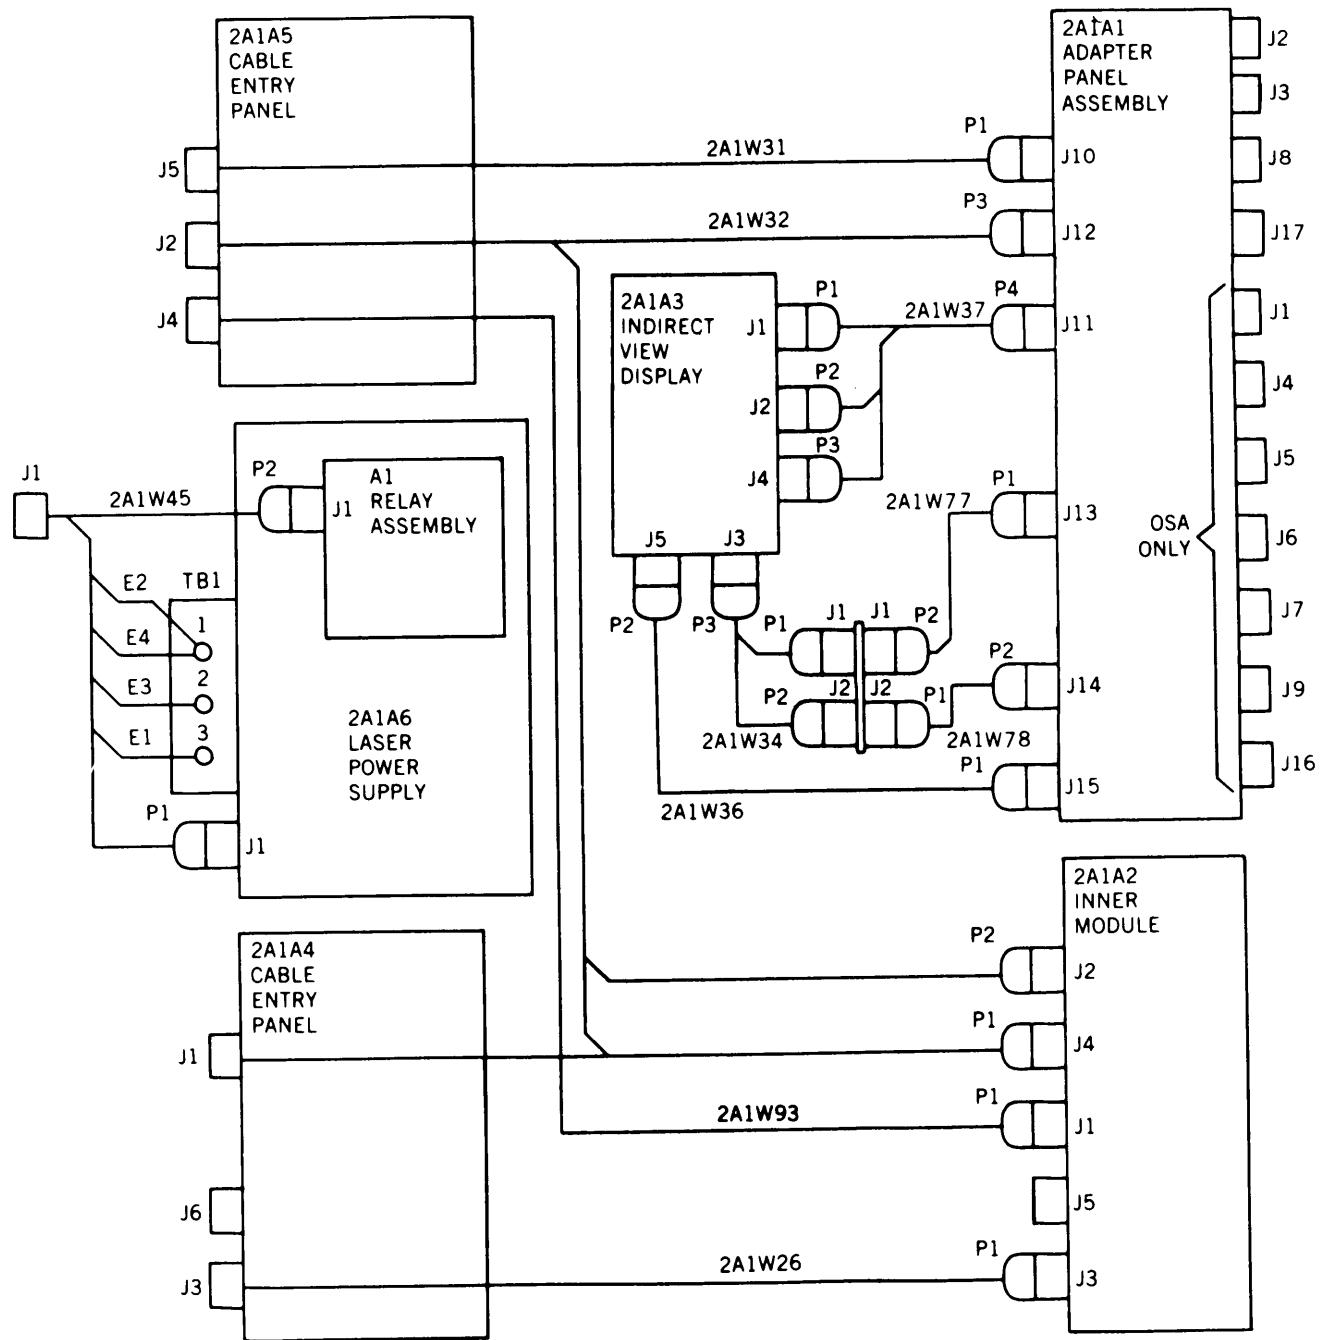

c. The information is presented in cable reference designator sequence. Each paragraph contains an interconnection diagram followed by cable wire list data for all cables of that unit, assembly, or subassembly as listed above. Simple cables are shown by diagram.

d. For the detailed dayside test bench 2A1 interconnection diagram, refer to F0-37.

3-21. GENERAL

- a. This section provides wiring and interconnection data for cables that connect within the test console test bench.
 - b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.
 - c. The information is presented in cable reference designer sequence. Each paragraph contains an interconnection diagram followed by cable wire list data for all cables of that unit, assembly, or subassembly as listed above. Simple cables are shown by diagram.

3-22. TEST CONSOLE TEST BENCH 2A2

INTERCONNECTION DI AGRAM

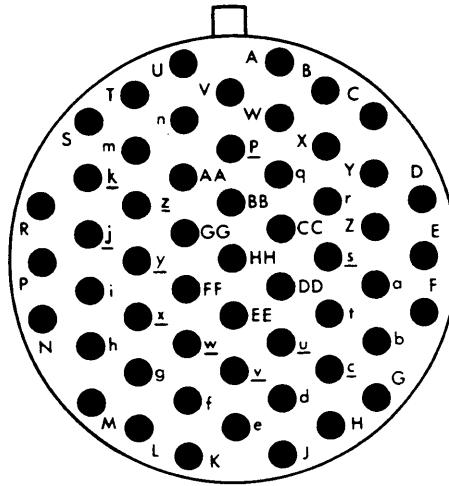

For the test console test bench 2A2 interconnection diagram, refer to F0-39.

3-25. GENERAL 3-25

- a. This section provides wiring and interconnection data for cable assemblies that connect within the nightside test bench.
- b. When troubleshooting or performing cable maintenance, refer to this section for wire size and ID, contact location, from/to information, and signal name or function.
- c. The information is presented in cable reference designer sequence. Each paragraph contains an interconnection diagram followed by cable wire list data for all cables of that unit, assembly, or subassembly as listed above. Simple cables are shown by diagram.
- d. For the detailed nightside test bench 2A3 interconnection diagram, refer to FO-40.

9-19		9-5		"B" Ready Relay K11 is shown with two #9 contacts. That contact which is wired to pin 8 of relay K16 should be changed to contact #10.
21-2	step 1C	21-2		Reads: Multimeter B indicates 600 K ohms to 9000 K ohms. Change to read: Multimeter B indicates 600 K ohms minimum. Reason: Circuit being checked could measure infinity. Multimeter can read above 9000 K ohms and still be correct.
