SECTION I  
INTRODUCTION

1-1. Scope

This manual lists repair parts required for the performance of organizational, direct support, general support, and depot maintenance of the AN/APM-66.

NOTE

No special tools, test, or support equipment are required.

1-2. General

This Repair Parts List is divided into the following sections:

*a. Repair Parts for Organizational Maintenance-Section II.* A list of repair parts authorized for the performance of maintenance at the organizational level.

*b. Repair Parts for Direct Support, General Support, and Depot Maintenance-Section XII.* A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

*c. Index-Federal Stock Number and Reference Number Cross-Reference to -Figure and Item Number or Reference Designation-Section N.* A list of Federal stock numbers in ascending numerical sequence, followed by a list of reference numbers in ascending alphanumeric sequence. cross-referenced to the illustration figure number and reference designation.

*d. Index-Reference Designation Cross-Reference to Page Number--Section V.* A list of reference designations cross-referenced to page numbers.

**1-3. Explanation of Columns**

The following provides an explanation of columns in the tabular lists:

*a. Source, Maintenance, and Recoverability Codes (SMR).*

(1) Source code indicates the selection status and source for the listed item. Source codes are:

*Code*

*Explanation*

- P-Repair parts which are stocked in or supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.
- P2-Repair parts which are procured and stocked for insurance purpose because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
- PC-Assigned to items which are NSA design controlled: unique repair parts, special tools, test, measuring and diagnostic equipment, which are stocked and supplied by the Army COMSEC logistic system, and which are not subject to the provisions of AR 380-41.
- P10-Assigned to items which are NSA design controlled: special tools, test, measuring and diagnostic equipment for COMSEC support, which are accountable under the provisions of AR 380-41, and which are stocked and supplied by the Army COMSEC logistic system.
- M-Repair parts which are not procured or stocked, but are to be manufactured at indicated maintenance levers.
- A-Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance categories.
- X-Parts and assemblies which are not procured or stocked and the mortality of which normally is below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
- X1-Repair parts which are not procured or

| <i>Code</i> | <i>Explanation</i>   |
|-------------|--|
|             | stocked. The requirement for such items will be filled by use of the next higher assembly or component.  |
| X2-         | Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain same through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisitioned, with accompanying justification, through normal supply channels. |
| G-          | Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.   |
|             | (2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance level codes are:  |

| <i>Code</i> | <i>Explanation</i>          |
|-------------|-----------------------------|
| c -----     | Operator/Crew               |
| O -----     | Organizational maintenance  |
| F -----     | Direct support maintenance  |
| H -----     | General support maintenance |
| D -----     | Depot maintenance           |

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

| <i>Code</i> | <i>Explanation</i>  |
|-------------|---|
| R-          | Repair parts and assemblies that are economically repairable at DSU and GSU activities and are normally furnished by supply on an exchange basis.   |
| S-          | Repair parts and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply <i>on an</i> exchange basis. When items are determined by GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition. |
| T-          | High dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.  |

| <i>CO&amp;</i> | <i>Explanation</i>   |
|----------------|--|
| U-             | Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, or high dollar value reusable castings or castings. |

*b. Federal Stock Number.* Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

*c. Description.* Indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parentheses.

*d. Unit of Measure (U/M).* A two-character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based; e.g., ft, ea, pr, etc.

*e. Quantity Incorporated in Unit.* Indicates the quantity of the item used in the assembly group. Subsequent appearances of the same item in the same assembly are indicated by the letters "REF."

*f. Allowances (15-Day Organizational Maintenance, 30-Day DS/GS Maintenance, 1 Year Per Equipment (Contingency), and Depot Maintenance.* Items authorized for requisition as required are identified by an asterisk in the allowance column.

*g. Illustrations.*

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number or reference designation.* Indicates the reference designation used to identify the item in the illustration.

1-4. Special Information

*a.* The following publications pertain to the AN/APM-66 and its components:

- TM 11-6625-298-24 ---- Organizational, DS, GS, and Maintenance Manual: Test Set, Radar AN/APM-66.
- TM 11-6625-398-50 ---- Depot Maintenance Manual: Test Set, Radar AN/APM-66.

*b.* Parts which required manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category (e.g., MF, AH, etc.).

1-5. Location of Repair Parts

a. This manual contains two cross reference indexes (sec IV and V) to be used to locate a repair part when either the Federal stock number, reference number (manufacturer's part number), or reference designation is known. The first column in each index is prepared in numerical or alphanumeric sequence in ascending order. When a Federal stock number is not listed or not known refer to the reference number (manufacturer's part number) immediately following the last listed Federal stock number.

b. When the Federal stock number or reference number is known, follow the procedures given in (1) and (2) below.

(1) Refer to the index of Federal stock numbers and reference numbers (sec IV) and locate the Federal stock number or reference number. The Federal stock number and reference numbers are cross-referenced to the applicable figure and reference designation.

(2) When the reference designation is determined, refer to the reference designation index (sec V). The reference designations are listed in ascending order and are cross-referenced to the page number on which they appear in the repair parts lists (sec II and III). Refer to the page number noted in the index and locate the reference designation in the repair parts list.

c. When the reference designation is known, follow the procedures given in **b** (2) above.

d. When neither the FSN, reference number, nor reference designation is known, identify the part in the illustration and follow directions given in c above; or scrutinize column 3 of the repair parts lists (sec II and III).

1-6. Federal Supply Code for Manufacturers

| Code  | Manufacturer                                       |
|-------|--|
| 00502 | Adel Division of De Laval Turbine, California Inc. |

| Code  | Manufacturer  |
|-------|---|
| 00656 | Aerovox Corp.   |
| 01686 | RCL Electronics Inc.  |
| 14370 | Continental Rubber Works                                      |
| 14608 | Corbin Cabinet Lock Division of Emhart Corp                   |

| 95238 | Continental Connector Corp.                                   |
| 95542 | United Aircraft Corp., Norden Div.                            |
| 96906 | Military Standards  |

1-7. Reporting of Maintenance Publication Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications and Blank Forms) and forwarded direct to Commander, US Army Electronic Command, ATTN: AMSEL-MA-AN, Fort Monmouth, NJ 07703.
