DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE

1. **Scope.** This Repair Parts and Special Tools List (RPSTL) lists and authorizes spare and repair parts required for performance of direct and general support maintenance of the Signal Generator Workstation. It authorizes the requisitioning, issue, and disposition of spares and repair parts as indicated by the Source, Maintenance and Recoverability (SMR) codes.

2. **General.** In addition to this Section I, Introduction, this RPSTL is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. Parts lists are composed of functional groups in ascending numeric sequence. Parts are listed in alphabetical sequence within each group and figure number.

b. Section III. Special Tools List. Not applicable.

c. Section IV. Cross Reference indexes. A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbered (NSN) items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listing. NSN's and part numbers are cross-referenced to each illustration figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-reference NSN, Commercial and Government Entity Code (CAGEC), and part numbers.

3. **Explanation of Columns (Section II)**

a. Figure Number (Column (1a)). This column lists the number of the figure where the item is located in Section II.

b. Item Number (Column (1b)). The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

c. SMR Code (Column (2)). The SMR code is a 5 position code containing supply/requisition information, maintenance category authorization criteria, and disposition instructions as shown in the following breakout.

Source Code	Maintenance Code	Recoverability Code
$\frac{\text{—}}{\text{XX}}$ 1st two positions	$\frac{\text{—}}{\text{XX}}$	X 5th position $\frac{\text{—}}{\text{—}}$
How you get an item action on an unserviceable item	3d position	4th position
Who can install, Who can do complete replace, or use item repair on the item		Who determines disposition

*Complete repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) **Source Code.** The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Source codes are always the first two positions of the SMR code. Explanation of source codes follows:

Code	Explanation
PA-	Stocked items; use the applicable NSN to request/requisition items with this code. These items are authorized to the category indicated by the code entered in the third position of the SMR code.

(2) **Maintenance Code.** Maintenance codes tell you the level(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to the following level of maintenance.

Code	Application/Explanation
F -	Direct support level can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). This position will contain one of the following codes:

Code	Application/Explanation
H -	General support is the lowest level that can do complete repair of the item.
Z -	Nonreparable. No repair is authorized.

(3) **Recoverability Code.** Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

Recoverability Codes	Definition
A-	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). These items should be turned in to your Maintenance Supply Activity (MSA) for forwarding to the Defense Reutilization and Marketing Office (DRMO).
H -	Reparable item. When uneconomically reparable, condemn and dispose of the item at the general support level.
Z -	Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of the SMR code.

d. National Stock Number (Column (3)). This column lists the NSN for the associated part number and manufacturer identified in the CAGEC and part number columns to the right.

e. CAGEC (Column (4)). The CAGEC is a 5-digit numerical code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

f. Part Number (Column (5)). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE: When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered, but go ahead and use or furnish it as the replacement part.

g. Description and Usable on Code (UOC) (Column (6)). This column includes the following information:

- (1) The federal item name and, when required, a minimum description to identify the item.
- (2) The UOC, when applicable (see paragraph 5, Special Information).

h. Quantity (Column (7)). The quantity (quantity per figure column) indicates the quantity of the item used in the parts list which is prepared for a functional group, subfunctional group, or an assembly.

4. Explanation of Columns (Section IV)

a. NSN Index

(1) **Stock Number Column.** This column lists the NSN by NIIN sequence. The NIIN consists of the last nine digits of the NSN.

NSN

(i.e., 5305-01-674-1467). When using this column to locate an item, ignore the first 4 digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

(2) **Figure Column.** Indicates the figure number used to identify each item appearing in the listing. The figures are in numerical order in Section II.

(3) **Item Column.** The item number identifies the item associated with the figure listed in the adjacent figure column. This item is also identified by the NSN listed on the same line.

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequences (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the number 0 through 9 and each following letter or digit in like order).

(1) **Part Number Column.** Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

(2) **Figure Column.** This column lists the number of the figure where the item is located in Section II.

(3) **Item Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

c. Figure and Item Number Index

(1) **Figure Column.** This column lists the number of the figure where the item is identified/located in Section II.

(2) **Item Column.** The item number is that number assigned to the item as it appears in the figure referenced in the adjacent figure number column.

(3) **Stock Number Column.** This column lists the NSN for the item.

(4) **CAGEC Column.** The CAGEC is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

(5) **Part Number Column.** Indicates the primary number used by the manufacturer (individual, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

5. Special Information

a. Repair parts for components of standards sets which can be identified as existing in the supply system will be requisitioned through normal supply channels from the appropriate supply commodity manager.

b. Repair parts for components of standards sets which cannot be identified as to proper supply source will be requisitioned from USAMICOM, using routing identifier B64 and furnishing, as a minimum, the following as exception data:

(1) Component stock number of the individual end item to be repaired.

(2) Component manufacturer's equipment model number and serial number.

(3) The equipment manufacturer's reference number as listed in the appropriate manual for the desired repair part.

(4) The repair part reference designation, circuit reference, circuit symbol schematic designation, or reference number as listed in the manufacturer's manual.

(5) The technical specification of the repair part as contained in the appropriate manufacturer's manual.

(6) The title and date of the manufacturer's manual from which the information in a and b(3), (4), and (5) above was taken.

c. For requisitioning miscellaneous consumable maintenance supplies or expendable supplies, use CTA 50-970.

d. The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as "UOC" in the Description column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models.

e. This RPSTL does not contain illustrations for items listed in Section II, since the manufacturer's manual contains exploded view illustrations which are adequate for repair parts location. Copies of the manufacturer's manual for the Signal Generator Workstation are furnished with the equipment for which this RPSTL is prepared. The figure and item numbers in the listing are for locating the item within this RPSTL.

6. How to Locate Repair Parts

a. When National Stock Number or Part Number Is Not Known.

(1) **First.** Refer to the parts list to locate the item by description. This list is in alphabetical sequence within each group and figure number. Identification of group and figure numbers and the manufacturer's manual locational figure numbers are listed below:

(2) **Second.** After locating the item in the Repair Parts List, refer to the Part Number Index to find the NSN.

b. When National Stock Number or Part Number Is Known.

(1) **First.** Using the Index of National Stock Numbers and Part Numbers, find the pertinent NSN or part number. The NSN index is in NIIN sequence. The part numbers in the Part Number Index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

(2) **Second.** After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

7. Abbreviations. Not applicable.
