CHANGE

No. 1

DEPARTMENTS OF THE ARMY,
THE NAVY, AND THE AIR FORCE
Washington, DC, 16 November 1981

**General Support Maintenance Repair
Parts and Special Tools List
(Including Depot Maintenance Repair Parts and Special Tools)
For
PAPER TAPE PUNCH, LOW SPEED RO-315/G
(NSN 7025-00-997-6209)**

TM 11-7440-222-40P/NAVELEX 0967-LP-324-0480/TO 31W4-2G-84, 7 May 1979, is changed as follows:

1. New or changed material is indicated by a vertical bar.
2. Added or revised illustrations are indicated by a vertical bar before figure number and title.
3. Remove and insert pages as indicated.

<i>Remove</i>	<i>Insert</i>
i and ii	i and ii
1 And 2	1 and 2
109 through 112	109 through 112
263 through 272	263 through 272
277 through 280	277 through 280
283 through 288	283 through 288
291/(292 blank)	291 and 292

4. File this change sheet in front of the publication for reference purposes.

By Order of the Secretaries of the Army, the Navy, and the Air Force:

Official:

ROBERT M. JOYCE
Brigadier General, United States Army
The Adjutant General

E. C. MEYER
General, United States Army-
Chief of Staff

Official:

BRYCE POE II
General, USAF, Commander, Air Force
Logistics Command

H. D. ARNOLD
Rear Admiral, United States Navy
Commander, Naval Electronic
Systems Command

LEW ALLEN, JR., *General USAF*
Chief of Staff

Distribution:

To be distributed in accordance with Special List.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in back of this manual direct to Commander, US Army Communications-Electronics Command, ATTN: DRSEL-ME-MQ, Fort Monmouth, NJ 07703.

For Air Force, submit AFTO Form 22 (Technical Order System Publication Improvement Report and Reply) in accordance with paragraph 6-5, Section VI, T.O. 00-5-1. Forward direct to prime ALC/MST.

For Navy, mail comments to the Commander, Naval Electronics Systems Command, ATIN: ELEX 45053 (O.H.), Washington, DC 20360.

In either case, a reply will be furnished direct to you.

SECTION	III. Special tools list (Not applicable)		
	IV. National stock number and part number index	264	

**SECTION I
INTRODUCTION**

1. Scope

This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of the RO-315/G.

It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence.

b. Section III. Special Tools List. Not applicable.

c. Section IV. National Stock Number and Part Number Index. A list, in National item identification number (NIIN) sequence, of all National stock numbers (NSN) appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns

a. Illustration. This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* The number used to identify item called out in the illustration.

b. Source, Maintenance, and Recoverability (SMR) Codes.

(1) *Source code.* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
-------------	-------------------

PA - Item procured and stocked for anticipated or known usage.
--

XA - Item is not procured or stocked because the
--

<i>Code</i>	<i>Definition</i>
-------------	-------------------

	requirements for the item will result in the replacement of the next higher assembly.
--	---

XD -	A support item that is not stocked. When required, item will be procured through normal supply channels.
------	--

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application/Explanation</i>
-------------	--------------------------------

H -	Support item is removed, replaced, used at the general support level.
-----	---

D -	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.
-----	--

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

<i>Code</i>	<i>Application/Explanation</i>
-------------	--------------------------------

H -	The lowest maintenance level capable of complete repair of the support item is the general support level.
-----	---

D -	The lowest maintenance level capable of complete repair of the support item is the depot level.
-----	---

Z -	Nonreparable. No repair is authorized.
-----	--

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability

<i>Codes</i>	<i>Definition</i>
--------------	-------------------

- Z - Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
- H - Repairable item. When uneconomically repairable, condemn and dispose at the general support level.
- D - Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
- L - Repairable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
 - c. *National Stock Number*-. Indicates the National stock number assigned to the item and ,will be used for requisitioning purposes.
 - d. *Part Number*. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, an inspection requirements to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

- e. *Federal Supply Code for Manufacture (FSCM)*. The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.
- f. *Description*. Indicates the Federal item name and, if required, a minimum description to identify the item.
- g. *Unit of Measure (U/M)*. Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.
- h. *Quality Incorporated in Unit.*. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable, (e.g. shims, spacers, etc).

4. Special Information

- a. The following publication pertains to the RO-315/G and its components:
TM 11-7440-222-15, Paper Tape Punch, Low Speed RO-315iG.
- b. National stock numbers (NSN's) that are missing from P source coded items have been applied for and will be added to this TM by future change/revision when they are entered in the Army Master Data File (AMDF). Until the NSN's are established and published, submit exception requisitions to: Commander, US Army Communications and Electronics Materiel Readiness Command, ATTN: DRSEL-MM, Fort Monmouth, NJ 07703 for the part required to support your equipment.
- c. Action change codes indicated in the left-hand margin of the listing page denote the following:
 - N - Indicates an added item.
 - C - Indicates a change in data.
 - R - Indicates a change in NSN only.

5. How to Locate Repair Parts

- a. When National stock number or part number is unknown.
 - (1) *First*. Using the table of contents, determine the functional group within which the item belongs. This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups.
 - (2) *Second*. Find the illustration covering the functional group to which the item belongs.
 - (3) *Third*. Identify the item on the illustration and note the illustration figure and item number of the item.
 - (4) *Forth*. Using the Repair Parts Listing, find the figure and item number noted on the illustration.
- b. When National stock number or part number is known.
 - (1) *First*. Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NIIN sequence followed by a list of part numbers in alphameric sequence, cross-referenced to the illustration figure number and item number.
 - (2) *Second*. After finding the figure and item number, locate the figure and item number in the repair parts list.
