This bulletin supersedes TB 43-0002-32, March 1995.

	Para	Page	Fiche	Frame
APPENDIX A. Generator Sets		5	1	A06
APPENDIX B. Transformers, Distribution, and Power Station		10	1	A11
APPENDIX C. Converters, Electrical		11	1	A12
APPENDIX D. Distribution Illustration System, Electrical (DISE)		12	1	A13
APPENDIX E. Equipment Which Has Attained Zero Maintenance Expenditure Limits		13	1	A14
APPENDIX F. Power Units, Power Plants		18	1	B01

## Section I. GENERAL

1. Purpose. This bulletin implements the policies established by AR 750-1. It provides guidance for technical inspection and disposition instructions.

2. Scope. This bulletin applies to all U.S. Army organizations, installations, activities, and the reserve components worldwide that use and/or repair equipment listed in the appendixes of this bulletin. The limitations as cited in this bulletin are also applicable to Army depots with an assigned overhaul mission.

## Section II. ONE-TIME REPAIR EXPENDITURE LIMITS

## 3. Procedures.

a. One-time repair expenditure limits are applicable each time an item becomes unserviceable. The one-time repair expenditure limit is expressed as a percentage of the total repair cost estimate to the total cost of the end item.

b. The procedure for determining the repair expenditure limit for an item is as follows:

(1) Obtain current price of the end item.

(2) The repair cost estimate is the sum total of the estimated cost of labor and parts listed in the technical inspection report as necessary requirements for the restoration of the end item to a serviceable condition.

c. Repair eligibility will be determined by comparing the report cost estimate with the product of the percentage shown on the applicable repair limitations chart times the current price of the unserviceable end item. An end item loses its repair eligibility if the estimated cost of repair exceeds this product (except with waiver in accordance with AR 750-1). The maximum allowable one-time overhaul allowance of 65% as authorized in AR 75-1 is restricted to those years identified in this bulletin.

d. The expenditure limit is the percentage of acquisition cost for components, assemblies, and recoverable repair parts applicable to the end items of equipment that have remaining repair eligibility cited in this bulletin. Replace the components, assemblies, and recoverable repair parts where cost of repairs exceed percentages cited in this bulletin.

e. The above paragraph is applicable to "bulk" components/assemblies/recoverable repair parts to be repaired and return to the pipeline for issue. These bulk items are those items in support of the direct exchange program.

f. Power units and power plants listed in Appendix F which have generators, motor generators, and/or generator sets as components will utilize the repair limitation percentage applicable to that generator/generator set used in computing repair eligibility for the particular power unit/plant as a whole.

## Section III. TECHNICAL INSPECTIONS

4. ~~Procedures. Equipment requiring repair or overhaul will be inspected in~~

b. DA Form 3590 (Request For Disposition or ~~Waiver~~) will be prepared for ~~...~~

## Section IV. COMPUTATION OF REPAIR COST ESTIMATES

**6. Cost Factors.** Computation of repair cost estimates will be made in accordance with instructions contained in AR 750-1.

**7. Procedures.** Technical inspection findings will be converted to repair cost estimates by use of instructions contained in paragraphs 4 and 5 of this bulletin and AR 750-1. Exclusions to the estimate of cost to repair are listed in AR 750-1.

## Section V. DISPOSITION INSTRUCTIONS

**8. Eligibility of Material for Evacuation to Depot Maintenance.** All items covered by this bulletin are eligible for evacuation to depot maintenance when the technical inspection performed indicates that repairs required are not authorized and/or exceed general support maintenance capabilities.

**9. Disposition Instructions.**

a. Items will be reported to the NICP for disposition instruction under the following conditions:

- (1) For excess equipment, repairable equipment, and for transfer or deployment of equipment.
- (2) When the estimated one-time repair cost exceeds the expenditure limits cited in this bulletin.
- (3) The repairs required to restore an item to a serviceable condition are beyond the capabilities of general support maintenance regardless of the estimated repair cost.

b. Report of unserviceable excess items will be accomplished by a completed DA Form 3590 for each major end item.

c. Serviceable equipment which has attained zero maintenance expenditure limits due to age will not be reported for disposition instructions, but will be retained in use (exception - priority of organization's mission warrants a replacement). These overage end items on hand may be maintained, not to exceed 5% of replacement cost to the extent permitted by repair parts and components in the supply system, and such repairs can be accomplished at General Support (GS) level of maintenance. Repair parts may be requisitioned using advice Code 2C (do not back order, fill or kill). Depot maintenance will not be accomplished. When repair parts/components are no longer available in supply system and repair exceeds 5%, request disposition instructions in accordance with Section V, paragraph 9c of this TB.

d. Equipment for which the estimated repair cost exceeds the maintenance expenditure limits in this bulletin will be reported to the NICP for disposition instructions. No action will be taken to repair or dispose of the equipment until directed by the NICP.

## Section VI. APPENDIXES

10. General. Appendixes contain equipment listings and data for determining repair eligibility.

11. Explanation of Columns of Appendix A.

- a. Column 1 lists the equipment and item NSN (National Stock Number) in numerical sequence, and the production year. For DOD Model MEP-Series generator sets the production year is not cited since production year has no bearing on repair limitations.
- b. Column 2 provides brief end item nomenclature, functional capability, make and model.
- c. Column 3 lists the U.S. Army serial numbers when available.

d. Columns 4 through 8 show repair limitations. The limiting years in which the percentages shown at the top of the columns can be applied to the end item current replacement cost as the authorized one-time repair expenditure.

e. Column 8 in addition to showing the year zero maintenance expenditure limits are reached, also indicates the end-of-life expectancy.

f. Column 9 lists the applicable TM series number.

12. References.

APPENDIX F  
POWER UNITS, POWER PLANTS

NOTE

See respective generators, motor generator, generator sets for repair/overhaul expenditure limits. For power units or power plants not listed, check Appendix E to see if the assembly is no longer a repairable item. -Continued

By Order of the Secretary of the Army:

DENNIS J. REIMER  
General, United States Army  
Chief of Staff

Official:

**JOEL B. HUDSON**  
*Acting Administrative Assistant to the  
Secretary of the Army*

DISTRIBUTION: Active Army, Army National Guard, and U.S. Army Reserve: To be distributed in accordance with DA Form 12-34-E, block Number 2406, requirements for TB 43-0002-32. [PIN: 020107-000]
