The Southwest Asia Petroleum Distribution System Operational Project (SWAPDOP) is a highly complex system consisting of a multitude of major and secondary items which must interface together to form a high pressure, multiproduct, petroleum distribution system. This bulletin furnishes information for the JTX training module of SWAPDOP.

b. This bulletin is intended solely as a property accountability document for use by depots, troops and supply organizations.

2. SCOPE

a. The provisions of this bulletin are applicable to any organization in CONUS or overseas which must account for components of the applicable module of the SWAPDOP.

3. EXPLANATION OF TERMS

The following information is a brief description of the layout data provided in Section II

a. NATIONAL STOCK NO. (NSN) An identifying number assigned to items of supply.

b. CONTROL NO. Number assigned for accounting purposes to an item in this bulletin that has no NSN assigned.

c. DESCRIPTION

The descriptions of the major components are listed in alphabetical sequence by item name with additional descriptive information required for identification. The first description shown is for the SWAPDOP module.

d. UNIT OF ISSUE (U/I)

These are established standard quantities in which an item of supply is issued.
