## NONEXPENDABLE SPECIAL REUSABLE SHIPPING AND STORAGE CONTAINERS

### Section I. INTRODUCTION

**1-1. Purpose.** This bulletin is applicable to nonexpendable special reusable shipping and storage containers managed by the US Army Troop Support and Aviation Materiel Readiness Command (TSARCOM) and provides:

a. Instructions for the reporting of excess, empty, none expendable special reusable shipping and storage containers for aircraft components.

b. A list of nonexpendable special reusable shipping and storage containers in accordance with AR 725-12.

**1-2. Scope.** a. The provisions of this bulletin are applicable to Army Activities in CONUS, and overseas commands.

**1-3. Explanation of Terms.** a. Nonexpendable special reusable shipping and storage containers are those containers which are:

(1) Designed as shipping and storage containers for specific items.

(2) Designed with one or more special features, such as, mounting, restraining, and shock-absorbing devices, pressurizing and pressure relief valves, and humidity indicators.

(3) Identified in accordance with MIL-STD-130 and accountable by their assigned national stock number (NSN).

b. Stages of Corrosion:

(1) *Stage 1.* Discoloration, staining, no direct visual evidence of pitting, etching, or other surface damage.

(2) *Stage 2.* Loose rust, black or white corrosion accompanied by minor etching and pitting of surface.

(3) *Stage 3.* Rust, black or white corrosion accompanied singly or in combination with etching, pitting, or more extensive surface damage; loose or granular condition.

(4) *Stage 4.* Rust, black or white corrosion progressed to the point where fit, wear, function, or life of the item has been affected; powdered or scaly condition, with pits or irregular areas of material removed from surface of item.

**1-4. General.** Containers must be visually inspected to insure they are empty. The guidelines for inspection to determine classification are contained in TB 55-8100-200-24.

**1-5. Classification.** Empty containers listed in this bulletin will be reported in the appropriate materiel condition code based on the criteria shown in a, b, and c below:

a. *Condition Code A - Serviceable (Issuable Without Qualification).* See quality assurance provisions in the applicable special reusable container specification.

(1) Interior free of rust or foreign matter.

(2) Exterior free of rust and dents; paint smooth and free of blemishes or abrasions.

(3) Markings clear and legible with no evidence of fading or abrasions.

(4) Matching parts free from defects that would affect their strength, assembly, serviceability, and durability.

(5) Present overall appearance and performance including, as applicable, mounting flanges, shock mounts, gaskets, and skids, are those of a new and unused container.

b. *Condition Code B-Serviceable (Issuable With Qualifications).*

(1) Interior free of stage of corrosion shown in 3b (2), (3), or (4).

(2) Container does not leak and has no defective or missing parts; gaskets or seals are free from defects.

(3) Exterior free of stage of corrosion shown in 3b (3), or (4).

(4) Paint in good condition, allowing for normal weathering and mismatched shades due to touchup, and showing only minor abrasions or scratches. Surfaces must be suitable for application of required marking.

(5) Exterior of complex, special-designed, nonexpendable, reusable metal shipping containers are sound and free from large dents (dents not more than 10 dents per section; i.e., top; bottom, end or side).

(6) Threaded components undamaged and capable of being tightened properly.

*c. Condition Code F - Unserviceable (Reparable).* Containers not meeting the criteria of condition code A or B will be classified as condition code F (AR 725-50) if they can be satisfactorily repaired to condition code A or B within the repair limitations as prescribed in the appropriate maintenance manual.

*d. Condition Code G - Unserviceable (Incomplete).* Containers requiring additional parts or components. Otherwise meeting the criteria of a or b above.

*e. Condition Code H - Unserviceable (Condemned).* Materiel which has been determined to be unserviceable and exceeds the repair limitations prescribed in the appropriate maintenance manual. Includes condemned items which are radioactively contaminated.

**1-6. Requisitioning.** Nonexpendable special shipping containers will be requisitioned only as required, by NSN, as an item of supply in accordance with AR 725-50.

**1-7. Accountability.** a. All users of nonexpendable special reusable shipping and storage containers are responsible for maximum reuse of these containers. Returning either serviceable or unserviceable items to the supply system should be accomplished by using disposition instructions provided in AR 725-50.

b. Accountability for empty, nonexpendable special shipping containers will be maintained on stock records for direct support units (DSU) and installation property accounts in accordance with AR 710-2.

c. Empty, nonexpendable special reusable containers for which there is no immediate requirement at the DSU/installation for all commands will be reported to the NICP, TSARCOM, St. Louis, Mo. 63120 (ch. 7, AR 725-50).

**1-8. Disposition.** Nonexpendable special reusable containers will be continued in use until they unmistakably meet the criteria for unserviceable containers, at which time they will be withdrawn from service for repair or overhaul. General

appearance will not form the basis for this action. Containers condemned as uneconomically repairable will be disposed of in accordance with chapter 7, AR 725-50. When a container is being used as the packing case for a component which is being disposed of, the component should be removed from the container will be made in favor of the estimated higher returns to the Government which might be expected if the disposal is made with or without the container.

**1-9. Stockage.** Installation stockage and establishment of requisitioning objectives for nonexpendable special reusable containers are not authorized.

**1-10. Reporting.** All excess, empty, nonexpendable special shipping and storage containers managed by TSARCOM will be reported for disposition regardless of their condition. These containers will be reported to THE NICP, TSARCOM, St. Louis, Mo. 63120, in accordance with chapter 7, AR 725-50.

**1-11. Automatic Returns.** TSARCOM will periodically publish a list of items authorized for automatic return to predesignated collection points. When a container appears on this list, it is exempt from the reporting procedures contained in AR 725-50.

**1-12. Transportation Funds.** A Transportation fund citation will be furnished by the NICP, TSARCOM with the disposition instructions for the movement of excess shipping and storage containers. Transportation funds will be cited in the remarks section of the FTR/FTS reply.

**1-13. Tables.** The tables in section II list the reusable containers and the components (shipped therein) by NSN, part number, component model, and component description.

**1-14. Reporting Errors and Recommending Improvements.** You can help improve this bulletin. If you find any mistakes or know of a way to improve the procedures, please let us know. Mail your DA Form 2028 (Recommended Changes to Publication and Blank Forms) direct to: Commander, US Army Troop Support and Aviation Materiel Readiness Command, ATTN: DRSTS-SLDT (1), St. Louis, MO 63120. A reply will be furnished direct to you.
