SUPPLY CONTROL
COMBAT CONSUMPTION RATES
FOR GROUND AND AVIATION
TYPE PETROLEUM PRODUCTS

“Approved for public release; distribution is unlimited.”

SUPPLY BULLETIN

No. 710-2

**HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, D.C., 12 March 1993**

**SUPPLY CONTROL
COMBAT CONSUMPTION RATES FOR GROUND
AND AVIATION-TYPE PETROLEUM PRODUCTS**

**CHAPTER
APPENDIX**

		Paragraph	Page
CHAPTER	1. INTRODUCTION		
	Purpose	1-1	1-1
	Authorization	1-2	1-1
	Use	1-3	1-1
	Application	1-4	1-1
	Recommendations and changes	1-5	1-1
	2. COMBAT CONSUMPTION RATES FOR PACKAGED PETROLEUM PRODUCTS		2-1
	3. COMBAT CONSUMPTION RATES FOR BULK FUELS		3-1
APPENDIX	A. DAILY EQUIPMENT USAGE RATES		A-1
	B. FORMAT FOR COMPUTING BULK FUEL REQUIREMENTS WITH KNOWN END ITEM DENSITY		B-1
	C. JP8 FUEL CONSUMPTION RATE, AVIATION EQUIPMENT		C-1

*This bulletin supersedes SB 710-2, 22 January 1991.

CHAPTER 1 INTRODUCTION

1-1. Purpose.

This bulletin provides a tabulation of consumption rates for all petroleum and associated products (fuels, lubricating oils, greases and products manufactured from either petroleum or synthetic base stocks).

1-2. Authorization.

The consumption rates set forth herein are published as an exception to AR 710-1 and SB 10-496. This bulletin has been compiled per DOD 4140.25-M.

1-3. Use.

- a.* This bulletin will be used as an aid in petroleum logistical planning.
- b.* Consumption rates published herein will also be used for the following purposes:
 - (1) As the basis for overall supply planning, supply control, and budget estimates.
 - (2) Computation of theater war reserve levels authorized by AR 11-11.
 - (3) Computation for contingency plan requirements.
 - (4) Computation of Total Logistics Readiness/Sustainability (TLR/S) requirements.
 - (5) Computation of other reserve requirements.
- c.* Fuel consumption rates in chapter 3 have been developed for ground type end items which consume either motor gasoline (MOGAS) or diesel fuel (DF) plus aircraft equipment using JP4 or aviation gas (AVGAS). These major end items are identified with Line Item Numbers (LINs) as reflected in the SB 700-20. Additionally, consumption rates for equipment utilization of JP8 fuel type are included in this publication. Chapter 3 also provides the formulas for computing bulk fuel requirements based on consumption rates, equipment density data and equipment usage rates (app A).

1-4. Application.

- a.* Consumption rates for petroleum products are applicable to the Continental United States (CONUS) and overseas areas in which the United States (U.S.) may be engaged in major combat operations.
- b.* Rates contained herein are-
 - (1) Based on 1,000 persons per month concept (chap 2). Rates were developed by applying a 2.0 multiple to the current 2 year peace time demands (cutoff date 31 Dec 91) for sustained combat rate and applying 1.5 to sustained combat rate for intense rate.
 - (2) Based on end item consumption and usage data (chap 3). These rates have been developed from actual consumption records and/or engineering tests and/or other engineering data.
- c.* Appendix C has been added to this publication to reflect fuel consumption rates for aircraft utilizing JP8, NSN 9130010315816.
- d.* An average 3 percent increase is to be applied to TROSCOM managed diesel fueled equipment as a JP8 conversion factor.

1-5. Recommendations and changes.

To ensure data contained herein is maintained current and representative of planned petroleum consumption of the Army, recipients of this supply bulletin should review and analyze this publication at least annually recommending any changes, updates, or improvements. These recommendations should be forwarded to the U.S. Army Petroleum Center, ATTN: SATPC-LP, New Cumberland, PA 17070-5008.

*Information for methodology of Trioxane Bar and Fog Oil can be obtained through Commander, US Army Petroleum Center, ATTN: STRGP-IS, New Cumberland PA 17070-5008, DSN 977-7741 or Commercial 717-770-7741.

CHAPTER 3
COMBAT CONSUMPTION RATES FOR BULK FUELS

The following information is provided as an explanation of all column headings used in this chapter:

- 1. LIN - Line item number (LIN in SB 770-20).
- 2. EI NSN - End item national stock number assigned to item.
- 3. EI NOMEN - Nomenclature for the major end item.
- 4. EQUIP TYPE - Equipment type. Applicable codes are-

AB - Amphibious	OV - Other vehicles
AV - Aviation	SG - Stationary Equipment - Misc
CE - Construction	SV - Stationary Equipment - Vehicle Mounted
GN - Generators	TV - Tracked Vehicles - Combat
HG - Heating	WV - Wheeled Vehicles
MH - Material Handling	
- 5. MGR - Commodity Management code identifying Item Managers. Applicable codes are-

B, H - ATCOM	L - MICOM
K- TACOM	M - AMCCOM
- 6. MULTIFUEL - EIs with an "M" in this column are capable of burning either diesel fuel or MOGAS. In these cases, the most representative consumption rate has been provided.
- 7. CONSUMPTION RATES - IDLAV; XCNTY; 2NDRDS - Consumption Rates, Idle/Average; Cross-Country; Secondary Roads. Tracked vehicle fuel consumption rates are expressed by mode of operation during periods of idle time, travel cross-country, and travel on secondary roads. Rates for all other types of equipment have been expressed by an AV-average rate.
- 8. CONSUMP CD (CD) - Consumption Rate Code. Applicable codes are-

H - Gallons Per Hour
K - Kilometers Per Gallon
- 9. Fuel NSN - Identifies the type of fuel consumed by the end item. Applicable fuels are-

Motor Gasoline	9130-00-160-1818
Aviation Gasoline	9130-00-179-1125
Diesel Fuel Marine	9140-00-273-2377
JP4	9130-00-256-8613
DF2	9140-00-286-5294
- 10. FUEL NOMEN - Nomenclature identifying fuel type of applicable NSN.
- 11. FUEL TYPE - Code identifying actual fuel type as described under Fuel NSN.

APPENDIX B

FORMAT FOR COMPUTING BULK FUEL REQUIREMENTS WITH KNOWN END ITEM DENSITY

Concepts Analysis Agency (CAA) rates are utilized in the computation of requirements for various types of equipment when provided to USAGMPA. However, in the event there are no CAA rates supplied for specific line item numbers (LINs), rates reflected in this Supply Bulletin are used in calculating necessary requirements.

B-1. The formula used with CAA rates is $\text{Density} \times \text{Rate}$. Note, CAA rates are classified and available at USAGMPA.

B-2. The formula for computing bulk fuel requirements for types of equipment other than tracked vehicles is as follows:

a. $\text{End item density} \times \text{consumption rate (GPH)} \times \text{area usage rate (hr/day)} = \text{bulk fuel requirement for 1 day}$.

b. A computation for an Airplane, Observation OV-1B, LIN A30221, EI NSN 1510007159379 in CONUS with a theoretical density of 6 would be derived as follows:

(1) Consumption rate for LIN A30221, EI NSN 1510007159379 = 225.00 GPH.

(2) Daily usage rate for CONUS aircraft (AV) = 4 hr/day.

(3) Computation: 6 airplanes \times 225.00 GPH \times 4.0 hr/day = 5400 gallons of JP4 fuel for 1 day.

c. A computation for a Generator Set, MEP-016A, LIN J45699, EI NSN 6115000178237 in Europe with a theoretical density of 32 would be derived as follows:

(1) Consumption rate for LIN J45699, EI NSN 6115000178237 = .84 GPH.

(2) Daily usage rate for European generator (GN) = 12 hr/day.

(3) Computation: 32 generators \times .84 GPH \times 12 hr/day = 322.56 gallons of MOGAS for 1 day.

B-3. The formula for computing bulk fuel requirements for wheeled vehicles (WV) with a KPG consumption code is-

a. $\text{Density} \times \text{usage rate divided by consumption rate} = \text{total}$.

b. A computation for a Truck Cargo M35A2C, LIN X40077, EI NSN 2320009260873 in CONUS with a theoretical density of 57 would be derived as follow:

(1) Consumption rate for LIN X40077, EI NSN 2320009260873 = 8.05 KPG.

(2) Daily usage rate for CONUS wheeled vehicle (WV) = 81 K/day.

(3) Computation: 57 trucks \times 81 K/day divided by 8.05 KPG = 573.54 gallons of diesel for 1 day.

c. A computation for a multifuel Truck Cargo, 2-½ Ton M36A2, LIN X40823, EI NSN 2320000771618 in CONUS with a theoretical density of 16 would be derived as follow:

(1) Consumption rate for LIN X40823, EI NSN 2320000771618 = 10.73 KPG.

(2) Daily usage rate for CONUS wheeled vehicle (WV) = 81 K/day.

(3) Computation: 16 trucks \times 81 K/day divided by 10.73 KPG = 120.78 gallons of fuel for 1 day.

B-4. The formula for computing bulk fuel requirements for tracked vehicles (TV) not having a CAA rate is as follows:

a. $\text{End item density} \times [(\text{idle consumption rate (GPH)} \times \text{area idle usage rate (hr/day)} + \text{cross country consumption rate (GPH)} \times \text{area cross country usage rate (hr/day)} + \text{secondary road consumption rate (GPH)} \times \text{area secondary road usage rate (hr/day)})] \times \text{bulk fuel requirements for 1 day}$.

b. A computation for a Tank Combat, 105MM, M60A3, Tracked Vehicle for LIN V13101, EI NSN 2350-00-148-6548 in CONUS with a theoretical density of 54 would be derived as follows:

(1) Consumption rates for LIN V13101, EI NSN 2350001486548 = idle = 2.00 GPH; cross country = 26.53 GPH; secondary roads = 18.79 GPH.

(2) Daily usage rates for CONUS Tracked Vehicle, LIN V13101= idle = 4.2 hr/day; cross country = 8.5 hr/day; secondary roads = 2.9 hr/day.

SB 710-2

(3) Computation: $54 \text{ tanks} \times 2.00 \text{ GPH} \times 4.2 \text{ hr/day (Idle)} + 54 \text{ tanks} \times 26.53 \text{ GPH} \times 8.5 \text{ hr/day (cross country)} + 54 \text{ tanks} \times 18.79 \text{ GPH} \times 2.9 \text{ hr/day (secondary)} = 15,573.60$ gallons of diesel fuel required for 1 day.

APPENDIX C
JP8 FUEL CONSUMPTION RATE
AVIATION EQUIPMENT

C-1. The following list represents the JP fuel consumption rate for each aircraft identified by LIN. The fuel type for the cited aircraft should be changed to JP8, NSN 9130-01-031-5816, Turbine Fuel, Aviation, Kerosene Type Grade JP8. The consumption rate is reflected for GPH. These changes will be incorporated to chapter 3 in the next SB 710-2 publication.

C-2. The following item has been determined as an item which can utilize JP8 as reflected:

P44627	1730011441897	AV GR POWER UNIT	18.57
--------	---------------	------------------	-------

By Order of the Secretary of the Army:

Official

A handwritten signature in black ink, appearing to read "Milton H. Hamilton". The signature is written in a cursive style with some loops and flourishes.

MILTON H. HAMILTON
*Administrative Assistant to the
Secretary of the Army*

GORDON R. SULLIVAN
*General United States Army
Chief of Staff*

Distribution:

To be distributed in accordance with DA Form 12-34-E Block 0059, requirement for SB 710-2.

PIN: 020259-000
