**EXECUTIVE SUMMARY
UH-60 BLACK HAWK HELICOPTER ACCIDENT
14 APRIL 1994**

1. Introduction:

Following the accidental shoot-down of two US Army UH-60 Black Hawk helicopters on 14 April 1994, an accident investigation board was convened. The accident investigation report provides the facts pertaining to the accident and presents the statement of opinion by the board president. This executive summary provides an overview of the report, a map of the Operation PROVIDE COMFORT area of operations, a short glossary of terms, and a time line.

2. Authority and Purpose:

At the direction of the United States Secretary of Defense and the United States Commander in Chief, Europe (USCINCEUR), the Commander in Chief, United States Air Forces in Europe (CINCUSAFE), appointed an Accident Investigation Board which was composed of the Board President, Maj Gen Andrus, 11 Board Members from the US Army and Air Force, 3 Associate Board Members representing France, Turkey and the United Kingdom, 4 legal advisors, and 13 Technical Advisors. The board convened at Incirlik Air Base, Turkey, on 15 April 1994. The investigation was conducted at the helicopter crash sites in Iraq, at Zakhu, Iraq, and at Incirlik AB. Interviews with witnesses were conducted at Incirlik AB and other locations. Technical assistance was obtained from sources in the United States, the United Kingdom, and Germany. The Board concluded its investigation on 27 May 1994.

This was an investigation into the circumstances surrounding the 14 April 1994 accidental shoot-down of two United States Army Black Hawk helicopters in northern Iraq, by two United States Air Force F-15 fighter aircraft participating in Operation PROVIDE COMFORT (OPC). The accident occurred at approximately 0730Z hours while the aircraft were engaged in missions to protect the Kurdish population in the area of Iraq designated as a security zone (SZ). The purpose of the investigation was to determine the relevant facts and circumstances of the accident and, if possible, to determine the cause or causes. The investigation obtained and preserved evidence for claims, litigation, disciplinary and administrative action, and for all other purposes deemed appropriate by competent authority.

3. Summary of Facts:

In April 1991, the US National Command Authority directed US forces to conduct Operation PROVIDE COMFORT. Under his authority, USCINCEUR directed the creation of a Combined Task Force (CTF) to conduct operations in northern Iraq. For three years, coalition air forces from Turkey, France, the United Kingdom and the United States have conducted air operations in a Tactical Area of Responsibility (TAOR) north of 36 degrees north latitude in Iraq. These air

operations have served as a symbol of coalition resolve and as a deterrent to Iraqi military encroachment into a United Nations-established security zone in northern Iraq. The Operation PROVIDE COMFORT (OPC) Combined Task Force (CTF) currently consists of a command element (US and Turkish co-commanders), a staff, a Combined Forces Air Component (CFAC), a Joint Special Operations Task Force, all based at Incirlik, Turkey, and a Military Coordination Center (MCC), located at Zakhu. The Military Coordination Center monitors Iraqi compliance with the United Nations Security Council Resolution 688 barring all Iraqi military, paramilitary, police, and security forces from the security zone.

The US CTF Commanding General has operational control of assigned US Army and Air Force units. Operational control of other coalition nations' forces is retained by their respective parent commands. The CTF has tactical control of those forces. The Combined Forces Air Component Commander (CFACC) is responsible for coordinating the employment of air forces to accomplish the OPC mission. He is delegated operational control of the US Airborne Warning and Control System (AWACS) aircraft, USAF airlift and fighter forces and has been delegated tactical control of the other OPC forces, including the Black Hawk helicopters.

The CFAC Deputy for Operations is responsible for ensuring all aircrews are informed of all unique aspects of the OPC mission, upon their arrival in theater. This includes the Rules of Engagement (ROE). He is also responsible for publishing the Airspace Control Order (ACO) which provides general guidance to aircrews regarding the conduct of OPC missions. The ACO is directive to all aircrews. The Deputy for Operations is also responsible for publishing the daily Air Tasking Order (ATO) which includes the daily flight schedule for aircraft operations over northern Iraq. All helicopter and fixed-wing aircraft are required to comply with this tasking order.

At the time of the 14 April 1994 accident, the Military Coordination Center exercised a high degree of flexibility in scheduling Black Hawk helicopter operations. Detailed information on Black Hawk helicopter flights within the TAOR was not requested or received by the Combined Forces Air Component, nor included in the daily ATO. The ATO and its accompanying "flow sheet" give individual crew members the information needed for their particular missions, and provide them with awareness of other aircraft scheduled to be in the area at the same time.

The accident occurred while two UH-60 Black Hawk helicopters, an E-3B Airborne Warning and Control System (AWACS) aircraft, two F-15Cs and other coalition aircraft were engaged in Operation PROVIDE COMFORT missions. The UH-60 Black Hawk helicopters were flying a transportation mission in support of the Military Coordination Center. An AWACS aircraft was assigned to provide airborne threat warning and air control for all Operation PROVIDE COMFORT aircraft operating inside the TAOR. Two F-15Cs were conducting a mission to detect, intercept, identify, and take appropriate action regarding any Iraqi military aircraft flying in the area.

At 0436Z (0736 local time in Turkey), an E-3B AWACS aircraft departed Incirlik AB. The AWACS was the lead aircraft in the coalition air forces, and would fly the first of the 52 sorties scheduled for that day's operations. The AWACS proceeded to its assigned air surveillance orbit

located on the northern border of Iraq. The onboard AWACS mission crew included a mission crew commander, who supervises all controllers, and a senior director, who supervises all weapons controllers. These weapons controllers included an enroute controller (responsible for clearing OPC aircraft in and out of the TAOR) and a TAOR controller (who controls OPC aircraft inside the TAOR). Other controllers and technicians are also part of the mission crew. Also on board the AWACS was an airborne command element (ACE), a representative of the Combined Forces Air Component Commander.

At 0522Z, the two UH-60 Black Hawk helicopters, (call signs Eagle 01 and Eagle 02) took off from Diyarbakir, Turkey, enroute to the Military Coordination Center's headquarters at Zakhu. The Black Hawk pilots reported their entry into the no-fly zone of northern Iraq to the AWACS enroute controller, at 0621Z. They landed at Zakhu six minutes later.

The flight of two F-15C fighter aircraft (call signs Tiger 01 and Tiger 02) took off from Incirlik AB at 0635Z. The F-15s were tasked to perform an initial fighter sweep of the no-fly zone to clear the area of any hostile aircraft prior to the entry of coalition forces. Following the fighter sweep, the F-15s were to conduct their defensive counter air mission/combat air patrol in the area.

At Zakhu, the Military Coordination Center co-commanders and their party boarded the two UH-60s in preparation for a flight that was scheduled to take them to the towns of Irbil and Salah ad Din, Iraq, for meetings with United Nations and Kurdish representatives. At 0654Z, the Black Hawk flight contacted the AWACS enroute controller, reported their departure from Zakhu, and informed AWACS of their destination. The enroute controller received the radio call.

Approximately thirty minutes later (0720Z), the F-15 flight lead reported entering northern Iraq to the AWACS TAOR controller, who was responsible for air traffic within the TAOR. The F-15 pilots then began their pre-briefed fighter sweep of the TAOR to ensure it was free of Iraqi aircraft. Since the ATO did not contain any detailed information on the Black Hawk helicopters, and the AWACS controllers did not advise the F-15s of the Black Hawks' presence, the F-15s had no knowledge of the helicopters in the area. At approximately 0722Z, the F-15 flight lead reported a radar contact on a low-flying, slow-moving aircraft approximately 52 miles north of the southern boundary of the no-fly zone, and 40 miles southeast of his position. The TAOR controller acknowledged the lead F-15 pilot's radio transmission with a "Clean there" call, indicating that he had no radar contacts in the area. Attempts by the F-15 pilots to identify the contacts by electronic means were unsuccessful, and they initiated an intercept to investigate. At 20 miles range, the F-15 flight lead again reported the radar contact. The TAOR controller responded, "Hits there" (radar contact at the reported location). At approximately five miles range, the F-15 flight lead visually detected a single helicopter and closed for an identification pass. The second F-15, approximately three miles behind his flight lead, also made an identification pass. The helicopters were at very low altitude, heading southeast in a valley, and were flying in a relatively close, lead-trail formation. The lead F-15 pilot visually misidentified the Black Hawks as Iraqi Hind helicopters. The wingman saw the two helicopters but did not positively identify them as Hinds.

The F-15 pilots repositioned their aircraft five to ten miles behind the helicopters for firing passes and the flight lead notified the AWACS TAOR controller that the fighters were "Engaged." At approximately 0730Z, the lead F-15 pilot fired an AIM-120 AMRAAM missile at the trail helicopter from a range of approximately four nautical miles. The F-15 wingman then fired an AIM-9 Sidewinder missile at the lead helicopter from an approximate range of one and one-half nautical miles. Both Black Hawk helicopters were destroyed. All 26 people on board were killed.

The F-15 pilots each made two visual reconnaissance passes over the crash sites, then continued their assigned mission. When their replacements arrived in the area, the F-15s returned to Incirlik AB and landed at 1000Z. The AWACS remained on station providing air surveillance and control for the ongoing Operation PROVIDE COMFORT mission, until relieved by a second AWACS aircraft at 1520Z. The first AWACS then returned to Incirlik AB and landed at 1615Z.

4. Statement of Opinion

Under 10 U.S.C. 2254 (D) any opinion of accident investigators as to the cause of, or the factors contributing to the accident set forth in the accident investigation report, may not be considered as evidence in any civil or criminal proceeding arising from an aircraft accident, nor may such information be considered an admission of liability by the United States or by any person referred to in those conclusions or statements.

Operation PROVIDE COMFORT has been a successful coalition effort in response to human rights abuses against the Kurdish population in northern Iraq. The operation has effectively deterred Iraq from disrupting peace and order in the UN-established security zone.

The 14 April 1994 shoot-down of two US Black Hawk helicopters by two US F-15C aircraft in northern Iraq was caused by a chain of events which began with the breakdown of clear guidance from the Combined Task Force to its component organizations. This resulted in the lack of a clear understanding among the components of their respective responsibilities. Consequently, CTF component organizations did not fully integrate Military Coordination Center helicopter activities with other OPC air operations in the Tactical Area of Responsibility. Additionally, OPC personnel did not receive consistent, comprehensive training to ensure they had a thorough understanding of the USEUCOM-directed ROE. As a result, some aircrews' understanding of how the approved ROE should be applied, became over-simplified.

MCC personnel were given a high degree of independence in helicopter operations, without an adequate consideration for the threat of engagement from other OPC aircraft. Neither the CTF staff nor the Combined Forces Air Component staff requested or received timely, detailed flight information on planned MCC helicopter activities in the TAOR. Consequently, the OPC daily Air Tasking Order was published with little detailed information regarding US helicopter flight activities over northern Iraq. Specific information on routes of flights and times of MCC

helicopter activity in the TAOR was normally available to the other OPC participants only when AWACS received it from the helicopter crews by radio and relayed the information on.

The AWACS mission crew commander on 14 April 1994, who had flown only one sortie in the previous three months, was not currently qualified in accordance with Air Force regulations. The AWACS weapons controllers, under his supervision, did not have a clear understanding of their individual responsibilities to provide support to MCC helicopters. They shared the common view, along with the CFAC airborne command element officer, that MCC helicopter activities were not an integral part of OPC air operations. There was general misunderstanding throughout OPC organizations regarding the extent to which the provisions of the Airspace Control Order applied to MCC helicopter activities. AWACS personnel did not routinely monitor the Black Hawk helicopter flights or pass information on those flights to other OPC aircraft. The result was that there was no effective coordination of OPC fixed-wing and helicopter operations within the TAOR.

On 14 April 1994, AWACS controllers were aware that the Black Hawk helicopters had departed Zakhu, and were proceeding east into the TAOR. The F-15 pilots were not aware of the Black Hawk helicopters already in the area. The fighters twice informed AWACS that they had unknown radar contacts in the TAOR. The AWACS mission crew commander, senior weapons director, enroute controller and TAOR controller had access to electronic information regarding the presence of friendly aircraft in the vicinity of the F-15s' reported radar contacts. However, there is no evidence that they were aware of, recognized, or responded to this information. They did not advise the F-15 pilots of the presence of friendly aircraft. The helicopters were unable to hear the radio transmissions between the F-15 flight and AWACS because they were on a different radio frequency.

The F-15 pilots attempted to electronically identify the radar contacts by interrogating the ATO-designated IFF Mode I and Mode IV aircraft codes. The helicopter crew members were apparently not aware of the correct Mode I code specified for use within the TAOR and had the Mode I code specified for use outside the TAOR in their IFF transponders. The result was that the F-15s did not receive a Mode I response. When the lead F-15 pilot interrogated the IFF Mode IV code, he received a momentary friendly response. However, on two subsequent attempts, no Mode IV response was received. The F-15 wingman attempted one Mode IV interrogation and received no response.

The reason for the unsuccessful Mode IV interrogation attempts cannot be established, but was probably attributable to one or more of the following factors: both F-15 pilots may have selected the incorrect interrogation mode; both F-15 Air-to-Air Interrogators (AAIs) may have incorrectly processed the Black Hawks' transponder signals; both helicopter IFF transponder codes may have been loaded incorrectly; there may have been "garbling" of the friendly Black Hawks' IFF responses, produced by two helicopters using the same code in close proximity to each other; there may have been intermittent loss of line-of-sight radar contact between the F-15s and the helicopters, due to mountainous terrain and the Black Hawks' low-altitude, which could have precluded a successful Mode IV interrogation.

When the F-15 pilots were unable to get positive/consistent IFF responses they performed an intercept in order to visually identify the "unknown" aircraft. They each made a single identification pass on the Black Hawks. However, the identification passes were accomplished at speeds, altitudes and distances where it was unlikely that the pilots would have been able to detect the Black Hawks' markings. Neither F-15 pilot had received recent, adequate visual recognition training. The pilots did not recognize the differences between the US Black Hawk helicopters with wing-mounted fuel tanks and Hind helicopters with wing-mounted weapons. The F-15 flight lead misidentified the US Black Hawks as Iraqi Hind helicopters. Following his identification pass, he asked his wingman to confirm the identification. The wingman, who was a senior squadron supervisor and instructor pilot, saw two helicopters, but did not positively identify them as Hinds. The wingman did not notify the flight lead that he had been unable to make a positive identification, and allowed the engagement to continue. The flight lead, acting within the specified ROE, fired a single missile and shot down the trail Black Hawk helicopter. At flight lead's direction, the F-15 wingman also fired a single missile and shot down the lead Black Hawk helicopter.

OPERATION PROVIDE COMFORT

Tactical Area of Responsibility

EXECUTIVE SUMMARY

GLOSSARY

AAI - Air-to-Air Interrogation

ACO - Airspace Control Order

ADR - Automatic Data Recorder

AIM - Air Intercept Missile

AMRAAM - Advanced Medium Range Air-to-Air Missile

ATO - Air Tasking Order

BLACK HAWK - A UH-60 Helicopter

BSD - Battle Staff Directive

CAP - Combat Air Patrol

CTF - Combined Task Force

EAGLE - Call sign of UH-60 helicopter formation (Eagle 01, flight lead; Eagle 02, wingman)

EID - Electronic Identification

IFF - Identification Friend or Foe

MCC - Military Coordination Center

NO FLY ZONE - Airspace in Iraq, north of 36 degrees north latitude

OPC - Operation PROVIDE COMFORT

ROE - Rules of Engagement

SPINS - Special Instructions

SZ - Security Zone

TAOR - Tactical Area of Responsibility

TIGER - Call sign of F-15C formation (Tiger 01, flight lead, Tiger 02, wingman)

VID - Visual Identification

TIME LINE

Time (Z)	AWACS ("Cougar")	F-15s ("Tiger")	Black Hawks ("Eagle")
0436	AWACS departs Incirlik AB		
0522			Black Hawks depart Diyarkabir
0545	AWACS declares "On station" Surveillance section begins tracking aircraft		
0616	"H" character programmed to appear on senior director's radar scope whenever Eagle Flight's IFF Mode I, Code 42 is detected		
0621	AWACS answers Black Hawks Track annotated "EE01" for Eagle flight		Black Hawks Call AWACS on the enroute frequency at the "Gate" (entrance to TAOR)
*0624	Black Hawks' radar and IFF returns fade		Black Hawks land at Zakhu
0635		F-15s depart Incirlik AB	
0636	Enroute controller interrogates F-15s' IFF Mode IV		
0654	AWACS receives Black Hawks' radio call Enroute controller reinitiates "EE01" symbology to resume tracking		Black Hawks call AWACS to report enroute from "Whisky" (Zakhu) to "Lima" (Irbil)
0655	"H" begins to be regularly displayed on SD's radar scope (IFF Mode I, Code 42)		
0705		F-15s check in with AWACS on enroute frequency	
0711	"H" ceases to be displayed on SD's radar scope		
0712	Black Hawks' radar and IFF contacts fade; computer symbology continues to move at last known speed and direction		Black Hawks enter mountainous terrain
0713	ASO places arrow on SD scope in vicinity of Black Hawks' last known position		
*0715	ACE replies to F-15s "...negative words"	F-15s check in with the ACE	
0715	AWACS radar adjusted to low-velocity detection settings		

Time (Z)	AWACS ("Cougar")	F-15s ("Tiger")	Black Hawks ("Eagle")
0720		F15s enter TAOR and call AWACS at Gate on TAOR radio frequency	
0721	"EE01" (Black Hawk symbology) dropped by AWACS		
0722	TAOR WD responds "Clean there"	F-15 lead reports radar contact at 40 NMs	
0723	Intermittent IFF response appears in vicinity of F-15's reported radar contact		
0724	"H" symbol reappears on SD's scope		
0725	Black Hawk IFF response becomes more frequent TAOR controller responds to F-15s with "Hits There"	F-15 lead calls "Contact" (radar return approximately 20 NMs)	
0726	Black Hawk IFF response continuous; radar returns intermittent		
0727	Enroute controller initiates an "Unknown, Pending, Unevaluated" symbol in vicinity of Black Hawks' IFF/ radar returns; attempts IFF interrogation		
*0728	Black Hawk IFF and radar responses fade	F-15 lead "visual" with a helicopter at 5 NM	
*0728	AWACS replies "Copy Hinds"	F-15 lead conducts VID pass and calls "...Tally 2 Hinds ..."	
*0728.30		F-15 wingman conducts VID pass; calls "Tally 2"	
*0729		F-15 lead instructs No 2 to "Arm hot" and gives instruction for independent targeting	
*0730		F-15 lead fires AIM 120 at trail helicopter	Trail Black Hawk hit by missile
*0730		F-15 wingman fires AIM 9 at lead helicopter	Lead Black Hawk hit by missile
*0730+		F-15 lead reports "Splash 2 Hinds"	

NOTE: All times preceded by a "*" are estimates based on best available information. Local time at Diyarbakir is 3 hours later than Zulu time; and local time at Zakhu is 4 hours later than Zulu time.
