NAVY TRAINING SYSTEM PLAN

FOR THE

C-20D/G AIRCRAFT

N78-NTSP-A-50-9306A/P

NOVEMBER 2002

C-20D/G AIRCRAFT

EXECUTIVE SUMMARY

This C-20D/G Aircraft Navy Training System Plan provides an overview of the C-20D/G Aircraft program and its concepts for operation, support, manpower, and training. The C-20D Gulfstream III and C-20G Gulfstream IV Aircraft is a derivative of the off-the-shelf, Federal Aviation Administration certified aircraft. The C-20D/G Aircraft program is the Operations and Support phase of the Defense Acquisition System. The latest C-20D/G Aircraft modifications include: Traffic Alert and Collision Avoidance System, Enhanced Ground Proximity Warning System, Dual Flight Management System, Dual 12-Channel Global Positioning System, and Improved Automatic Flight Control System.

The C-20D Aircraft provides air transportation for high priority executive personnel and baggage. The C-20D Aircraft inventory consists of two aircraft; both aircraft are assigned to Fleet Logistics Support Squadron One (VR-1), Naval Air Facility (NAF) Washington.

The C-20G Aircraft is a logistic support aircraft designed for the transportation of passengers and cargo in support of Navy Unique Fleet Essential Airlift mission requirements. The C-20G Aircraft inventory currently consists of five aircraft. Two C-20G Aircraft are assigned to VR-48, NAF Washington, two aircraft are assigned to VR-51, and one aircraft is assigned to Marine Corps Air Facility (MCAF) Kaneohe Bay.

Training and Administration of Reserves (TAR) Naval Pilots operate the C-20D Aircraft located at VR-1. Both TAR and Selected Reserve (SELRES) Naval Pilots operate the C-20G Aircraft located at VR-48 and VR-51. Active Duty Navy personnel at VR-1 perform organizational level maintenance and limited intermediate level maintenance, while TAR and SELRES personnel perform organizational level maintenance and limited intermediate level maintenance at VR-48. Full depot level maintenance is provided by a Contractor Logistic Support (CLS) contract at VR-1 and VR-48. VR-51 uses CLS for full organizational, intermediate, and depot level maintenance.

All C-20D/G Pilot and maintenance training is provided by Flight Safety International located in Savannah, Georgia, and Long Beach, California. Commander Fleet Wing Support Joint Reserve Base Fort Worth provides C-20G Fixed Wing Loadmaster (R-553-3000) training.

C-20D/G AIRCRAFT

TABLE OF CONTENTS

C-20D/G AIRCRAFT

LIST OF ACRONYMS

ACDU	Active Duty
AD	Aviation Machinist's Mate
ADF	Automatic Direction Finder
AE	Aviation Electrician's Mate
AFCS	Automatic Flight Control System
AM	Aviation Structural Mechanic
AME	Aviation Structural Mechanic (Safety Equipment)
AMTCS	Aviation Maintenance Training Continuum System
AOB	Average Onboard
AT	Aviation Electronics Technician
ATIR	Annual Training Input Requirement
CANTRAC	Catalog of Navy Training Courses
CIN	Course Identification Number
COMLANTFLT	Commander U.S. Atlantic Fleet
COMPACFLT	Commander U.S. Pacific Fleet
CLS	Contractor Logistic Support
CMC	Commandant of the Marine Corps
CMP	Computerized Maintenance Program
CNO	Chief of Naval Operations
COMBS	Contractor Operated and Maintained Base Supply
COMNAVAIRESFOR	Commander Naval Air Reserve Force
COMNAVAIRPAC	Commander Naval Air Forces Pacific
COMSEC	Communication Security Equipment
DAFCS	Digital Automatic Flight Control System
DME	Distance Measuring Equipment
EDS	Electronic Display System
EFIS	Electronic Flight Instrument System
EGPWS	Enhanced Ground Proximity Warning System
FAA	Federal Aviation Administration
FMS	Flight Management System
FSI	Flight Safety International
FY	Fiscal Year
GAC	Gulfstream Aerospace Company

C-20D/G AIRCRAFT

LIST OF ACRONYMS

GFE	Government Furnished Equipment
GIII	Gulfstream III Aircraft
GIV	Gulfstream IV Aircraft
GNSSU	Global Navigation Satellite System Unit
GPS	Global Positioning System
HF	High Frequency
IFF	Identification Friend or Foe
ILSP	Integrated Logistics Support Plan
JRB	Joint Reserve Base
MASD	Marine Aircraft Support Detachment
MATMEP	Maintenance Training Management and Evaluation Program
MCAF	Marine Corps Air Facility
MCCDC	Marine Corps Combat Development Command
MOS	Military Occupational Specialty
MPT	Manpower, Personnel, and Training
MTIP	Maintenance Training Improvement Program
NA	Not Applicable
NAF	Naval Air Facility
NAMP	Naval Aviation Maintenance Program
NATOPS	Navy Air Training and Operating Procedures Standardization
NAVAIR	Naval Air Systems Command
NAVMAC	Naval Manpower Analysis Center
NAVPERSCOM	Naval Personnel Command
NETC	Naval Education and Training Command
NEC	Navy Enlisted Classification
NTSP	Navy Training System Plan
OLSP	Operational Logistics Support Plan
OPNAV	Office of the Chief of Naval Operations
OPNAVINST	Office of the Chief of Naval Operations Instruction
OPO	OPNAV Principal Official
PDA	Principal Development Agency

C-20D/G AIRCRAFT

LIST OF ACRONYMS

PMA	Program Manager, Air
PQS	Personnel Qualification Standards
PR	Aircrew Survival Equipmentman
PSE	Peculiar Support Equipment
RFT	Ready For Training
SELRES	Selected Reserve
SRA	Shop Replaceable Assembly
TAR	Training and Administration of Reserves
TCAS	Traffic Alert and Collision Avoidance System
TD	Training Device
TEE	Training Effectiveness Evaluation
TFMMS	Total Force Manpower Management System
TO	Table of Organization
TSA	Training Support Agency
TTE	Technical Training Equipment
USMC	United States Marine Corps
VHF	Very High Frequency
VN	Vertical Navigation
VR	Fleet Logistics Support Squadron
WRA	Weapon Replaceable Assembly

C-20D/G AIRCRAFT

PREFACE

This Proposed Navy Training System Plan (NTSP) has been developed to update the C-20D/G Logistics Aircraft Draft NTSP, A-50-9306A/D, dated March 2002. This document has been updated to comply with guidelines set forth in the Navy Training Requirements Documentation Manual, Office of the Chief of Naval Operations (OPNAV) Publication P-751-1-9-97.

This NTSP provides the latest information about the C-20D/G Aircraft, including training, manpower, aircraft modifications, schedules, and points of contact. This NTSP also incorporates comments received from the review of the March 2002 Draft NTSP, A-50-9306A/D. Comments were received from:

- Chief of Naval Operations, Aviation Technical Training Section (N789H)
- Naval Education and Training Command (N00T)
- Commander, Naval Air Reserve Force
- Logistics Support Wing Commander, Fleet
- Commander, Naval Air Force U.S. Pacific Fleet
- Commanding Officer VR-51

Comments received recommended changes including: updated courses and courses identification numbers, manpower, publications, points of contact, and comments of a general nature.

PART I - TECHNICAL PROGRAM DATA

A. NOMENCLATURE-TITLE-PROGRAM

1. Nomenclature-Title-Acronym. C-20D/G Aircraft

2. Program Element. 0505196N

B. SECURITY CLASSIFICATION

1. System Characteristics .... Unclassified
2. Capabilities .... Unclassified
3. Functions .... Unclassified

C. MANPOWER, PERSONNEL, AND TRAINING PRINCIPALS

OPNAV Principal Official (OPO) Program Sponsor .... CNO (N780G1)

OPO Resource Sponsor .... CNO (N780G1)

Marine Corps Program Sponsor .... CMC (APW-61)

Developing Agency .... NAVAIR (PMA207)

Training Agency .... COMNAVRESFOR

Training Policy Manager .... CNO (N789H3)

Training Support Agency .... NAVAIR (PMA205)
COMNAVAIRESFOR

Manpower and Personnel Mission Sponsor .... CNO (N12)
NAVPERSCOM (PERS-4, PERS-404)

Director of Naval Training .... CNO (N00T)

Head, Aviation Manpower and Training .... CNO (N789)

Commander, Reserve Program Manager .... COMNAVAIRESFOR (N36)

Marine Corps Force Structure .... MCCDC (ASM-42)

D. SYSTEM DESCRIPTION

1. Operational Uses

a. C-20D. The mission of the C-20D Aircraft is to provide air transportation for high priority executive personnel or distinguished visitors and baggage.

b. C-20G. The C-20G Aircraft is a logistic support aircraft designed for the transportation of passengers and cargo in support of Navy Unique Fleet Essential Airlift mission requirements. The C-20G Aircraft transports personnel and cargo utilizing various passenger and cargo configurations.

2. Foreign Military Sales. Not Applicable (NA)

E. DEVELOPMENTAL TEST AND OPERATIONAL TEST

1. C-20D. NA

2. C-20G. A Technical Evaluation of all systems and flying capabilities, as well as emergency egress and cargo loading, was successfully performed in Fiscal Year (FY) 94 by NAVAIR at Patuxent River, Maryland. An Operational Evaluation was not required.

F. AIRCRAFT AND/OR EQUIPMENT/SYSTEM/SUBSYSTEM REPLACED. NA

G. DESCRIPTION OF NEW DEVELOPMENT

1. Functional Description. The C-20D Gulfstream III (GIII) and the C-20G Gulfstream IV (GIV) Aircraft are manufactured by Gulfstream Aerospace Company (GAC). Both aircraft were procured as a commercial-derivative aircraft certified under a Federal Aviation Administration (FAA) Type certificate. The C-20D/G Aircraft is capable of all weather, long-range, high-speed, non-stop flights up to an altitude of 45,000 feet between nominally suited airports. Both aircraft contain a walk-in baggage area of 157 cubic feet, fully pressurized, and accessible from the cabin.

a. C-20D. The C-20D is a dual engine, swept-wing, high altitude aircraft used as a special mission aircraft. The C-20D employs a retractable tricycle landing gear with a hydraulic powered nose wheel steering system and is powered by two Spey Mark 511-8 Rolls-Royce turbofan engines equipped with thrust reversers. The aircraft has an executive compartment with accommodations for five passengers and a staff compartment with accommodations for eight passengers.

b. C-20G. The C-20G is a dual engine, low-wing, twin turbofan, pressurized monoplane, specifically designed for all-weather operation at high altitudes. The aircraft uses a fully retractable landing gear and is powered by two aft-mounted Limited Tay MK611-8 Rolls-

Royce turbofan engines equipped with thrust reversers. The aircraft may be configured for cargo operations, passenger operations, or combinations of the two. With passenger seats removed, the aircraft may be modified to the following configurations: three pallets and no passengers; two pallets and eight passengers; or one pallet and up to 20 passengers. With a full complement of seats installed, the aircraft is capable of accommodating up to 26 passengers and a crew of four. Without any seats installed, the C-20G can carry a total of 4758 pounds of cargo. A hydraulically operated cargo door is installed on the starboard side of the aircraft to facilitate loading and unloading of cargo. A ball roller cargo floor is capable of accommodating palletized cargo.

c. C-20D/G Avionics Equipment. C-20D and C-20G Aircraft avionics equipment are depicted in the following table:

EQUIPMENT TITLE	C-20D GIII	C-20G GIV
Very High Frequency (VHF) Communication Transceiver	VHF Communication Transceiver-21B	VHF Communication Transceiver-422B
Intercommunications System	Baker M1045	Baker M1045
High Frequency (HF) Radio Set	AN/ARC-190(V)	AN/ARC-9000
Ultra HF Radio	AN/ARC-164(V)	AN/ARC-164(V)
Identification Friend or Foe (IFF) Transponder Set	AN/APX-100(V)	AN/APX-100(V)
Air Traffic Control Transponder	TDR-94	TDR-94
IFF Receiver Transmitter	RT-1296	RT-1157
Distance Measuring Equipment (DME)	DME-42	DME-442
Tactical Air Communication and Navigation	AN/ARN-136A(V)	AN/ARN-153(V)
VHF Navigation Receiver	VIR-32	VIR-432
Automatic Direction Finder (ADF)	ADF-60A	ADF-462
Automatic Flight Control System	SPZ-800	SPZ-8000
Flight Data Recorder	PV-1584	F1000
Cockpit Voice Recorder	A-100	A-100A

EQUIPMENT TITLE	C-20D GIII	C-20G GIV
Emergency Locator Beacon	DM-ELT 8.1	DM-ELT 14
Enhanced Ground Proximity Warning System (EGPWS)	Mark III	Mark V
Wind Shear	Included in EGPWS (Mode 7)	Included in EGPWS (Mode 7)
Traffic Alert and Collision Avoidance System (TCAS)	TCAS-2000	TCAS-2000
Electronic Flight Instrument System (EFIS)	EFIS-10	EDZ-884
Flight Management System	FMZ-2000	FMZ-2000
Transponder, Mode	TDR-90	TDR-90
Weather Color Radar	RDS-86	PRIMUS-870
Computer Flight Director/Guidance	FZ-500	FZ-820
Digital Air Data Computer	AZ-800	AZ-810
Inertial Reference System	YG-1761 (II)	LASEREF II
Radio Altimeter	ALT-55B	AA-300
Radio Receiver-Transmitter	NA	RT-300
Attitude Heading Reference System	VG-311	HG-1076AA01
Control Display Vertical Navigation (VN)	VN-801	NA
Compass System Automatic	C-11B	FXU-803A

    2. Physical Description. C-20D and C-20G Aircraft physical description and parameters are depicted below.

PARAMETER	C-20D GIII	C-20G GIV
Maximum Ramp Gross Weight (pounds)	70,200	73,600

Maximum Takeoff Gross Weight (pounds)	69,700	73,200
Maximum Landing Gross Weight (pounds)	58,500	58,500
Maximum Zero Fuel Gross Weight (pounds)	44,000	46,500
Wing Span (feet)	77.83	77.10
Length (feet)	83.20	88.40
Tail Height (feet)	24.37	24.51
Horizontal Stabilizer, Width (feet)	27.00	32.00
Main Landing Gear Span (feet)	13.80	13.80
Range in Nautical Miles (nautical miles)	4,100	3,200
Cruise Speed, Maximum (knots)	576	490

3. New Development Introduction

a. C-20D. In 1984, the United States Air Force competed and awarded a contract to GAC for lease with the option to buy C-20 aircraft. In 1986, the Navy was authorized to procure two C-20 Aircraft to replace the aging TA-3B Aircraft. This requirement was to be satisfied through participation in the Air Force C-20 program. In 1987, two C-20D Aircraft were purchased and delivered to Fleet Logistics Support Squadron (VR-1) Naval Air Facility (NAF) Washington, D.C.

b. C-20G. The C-20G Aircraft was a new manufacture, commercial transport type airplane manufactured by GAC. Initiation of the C-20G Aircraft procurement process began with the submission of the initial procurement request in May 1991, followed by a contract being awarded in March 1992. Five C-20G Aircraft were delivered in 1995.

4. Significant Interfaces. The existing Contractor Operated and Maintained Base Supply (COMBS) at NAF Washington is operated as a joint United States Air Force-Navy-Army facility. The COMBS facility is augmented as required to include Navy support requirements. The contractor established and maintains a maintenance data collection system. This system, the GAC Computerized Maintenance Program (CMP), includes on-site Electronic Data Transmittal capability. The government has access capability for review and extraction of the CMP data. The COMBS system also ensures the availability of all support equipment required for aircraft maintenance for the C-20D/G. Full-service C-20G COMBS and CMP capabilities are also available at Marine Corps Air Facility (MCAF) Kaneohe Bay, Hawaii.

5. New Features, Configurations, or Material. The C-20D and C-20G Aircraft have recently incorporated modifications that include the following:

a. Traffic Alert and Collision Avoidance System. The TCAS warns the pilot of traffic conflicts and gives guidance to avoid collision. The TCAS is a requirement for

European airspace operations. The system features enhanced sensitivity and detection range, increased processor speed, and lower weight, while enabling future TCAS upgrades. The TCAS is an instrument integrated into other C-20D/G systems in the aircraft cockpit. It consists of hardware and software that together provide a set of electronic eyes so that the Pilot can see the traffic situation in the vicinity of the aircraft. Part of the TCAS capability is a display showing the Pilot the relative positions and velocities of aircraft up to 40 miles away. The instrument sounds an alarm when it determines that another aircraft will pass too closely to the subject aircraft. TCAS provides a backup to the Air Traffic Control system's regular separation processes. The system determines the course of each approaching aircraft, climbing, descending, or flying straight and level. TCAS then issues a resolution advisory advising the Pilot to execute an evasive maneuver necessary to avoid the other aircraft, such as climb or descend. TCAS 2000 was installed in all C-20D/G Aircraft in FY99.

b. Enhanced Ground Proximity Warning System. The EGPWS is a terrain awareness and warning system that incorporates terrain alerting and display functions. These functions use aircraft geographic position, aircraft altitude, and the terrain database to predict potential conflicts between the aircraft's flight path and the terrain, and to provide graphic displays of the conflicting terrain. The C-20D utilizes the EGPWS Mark III configuration while the C-20G Aircraft uses the Mark V version. EGPWS was installed in all C-20D/G Aircraft in FY99.

c. Global Positioning System. The Global Positioning System (GPS) modification included the installation of a 12-channel receiver. The Global Navigation Satellite System Unit (GNSSU) offers precise position and guidance information and enhanced approach capability using the GPS. The 12-channel receiver tracks all satellites in view, which could be as many as 12, to provide precise position determination. Advanced multiple positions correlator signal processing gives the GNSSU fast satellite acquisition and enhanced satellite tracking capabilities.

d. Flight Management System. Both the C-20D and C-20G Aircraft incorporate the FMZ-2000 Flight Management System (FMS), but utilize different configurations. The FMS provides lateral and vertical navigation guidance for display and coupling to the AFCS. The system provides high accuracy, long-range navigation and the navigation computer connects to the inertial reference system. The C-20D/G FMS was installed in FY99.

(1) C-20D Unique Modifications. The installation of the FMS was interfaced with the existing EFIS. The EFIS-10 is an electronic instrument system that displays digital information from avionics subsystems. It allows the flight crew to easily view navigation, weather radar, landing, and other vital flight information via two display units, one symbol generator, and an EFIS control panel. The display units, like computer monitors, provide visual information to the flight crew from the symbol generator. Crews select the particular subsystem to display using the EFIS control panel.

(2) C-20G Unique Modifications. The installation of the FMS was interfaced with the existing Electronic Display System (EDS). The EDS-884 provides the flight

crew with complete flight path, navigation, engine, and systems information. Specifically, the EDS displays heading, course, radio bearing, pitch and roll attitude, barometric altitude, calibrated airspeed, selected alert altitude, vertical speed, angle of attack, radio altitude, lateral and vertical deviation, engine parameters, weather advisories, and caution and advisory indications. EDS consists of the EFIS, Engine Instrument, and Crew Alerting System.

(3) SPZ-8000 Digital Automatic Flight Control System. The C-20G incorporates the SPZ-8000 Digital Automatic Flight Control System (DAFCS). The SPZ-8000 provides "fail-operational" execution of flight director guidance, autopilot, yaw damper, and trim functions. "Fail-operational" is defined as a fault or failure of a system component that causes an automatic switch to an identical backup component without any interruption in the system operation. Automatic path mode commands are generated by a flight guidance DAFCS computer that integrates the attitude and heading reference, air data, weather radar, radio altimeter, EDS, and FMS into a complete aircraft control system. The system provides the stabilization and control needed to ensure optimum performance throughout the aircraft flight regime.

H. CONCEPTS

1. Operational Concept

a. C-20D. The C-20D Aircraft is operated by two Pilots and a Crew Chief. Naval Aircrewmen and/or Flight Stewards (special assignment) are added as required.

b. C-20G. The C-20G Aircraft is operated by two Pilots and a Crew Chief. A Loadmaster is added as required.

2. Maintenance Concept. The maintenance concept for the C-20D/G Aircraft is based on three levels of maintenance as stated in the Naval Aviation Maintenance Program (NAMP), Office of the Chief of Naval Operations Instruction (OPNAVINST) 4790.2 (series). For the C-20D/G Aircraft program, OPNAVINST 4790.2 series is utilized for general policies and reporting procedures only. Organizational maintenance is provided by contractor personnel at Marine Aircraft Support Detachment (MASD), NAF Washington, and at VR-51 located at MCAF Kaneohe Bay. Overhaul and repair of contractor furnished equipment is handled via FAA approved sources and meets serviceability, inspection criteria, and functional test requirements of the FAA and component manufacturer. When applicable, repaired items will show evidence of FAA certification. The contractor is required to support the operational readiness goals of 85% Full Mission Capable (FMC) rate, including 75 flight hours per month per aircraft for the C-20D and 125 flight hours per month per aircraft for the C-20G. The C-20D/G aircraft maintenance concept is performed in accordance with the requirements and procedures prescribed by GAC, utilizing the CMP. The only Government Furnished Equipment (GFE) is the Communication Security Equipment (COMSEC). If GFE COMSEC is removed for repair, the contractor will record removal and installation data, and return unserviceable items to the operating squadron or detachment for repair.

a. Organizational. Navy personnel at VR-1 and VR-48, NAF Washington perform C-20D/G limited organizational maintenance. Limited organizational level maintenance consists of battery check and servicing, and survival equipment servicing. Organizational level maintenance is performed by Contractor Logistic Support (CLS) contract at MASD, NAF Washington, and VR-51 MCAF Kaneohe Bay. Aviation maintenance ratings with NEC 8314 perform organizational level maintenance on the C-20G (Gulfstream IV) aircraft, and NEC 8392 perform organizational level maintenance on the C-20D (Gulfstream III) aircraft.

(1) Preventive Maintenance. C-20D/G preventive maintenance consists of standard pre-flight and post-flight inspections, and regular calendar and flight hour corrosion and material inspections in accordance with the Maintenance Requirements Cards (MRC).

(2) Corrective Maintenance. C-20D/G corrective maintenance consists of fault isolation to a defective Weapon Replaceable Assembly (WRA) or Shop Replaceable Assembly (SRA), removal and replacement of defective WRAs or SRAs, and verification of the repair using built-in test equipment, the appropriate test sets, or common support equipment. WRAs and SRAs requiring repair beyond the capability of the organizational level are forwarded to the appropriate COMBS for replacement and/or repair.

b. Intermediate. C-20D/G intermediate maintenance is performed in accordance with the requirements and procedures prescribed by GAC utilizing the CMP and as directed by the Navy Program Office Program Manager Air (PMA) 207. The contractor provides full C-20D/G intermediate level maintenance for all MCAF Kaneohe Bay aircraft. Intermediate level maintenance consists of all off-equipment maintenance, calibration, and overhaul, including GFE on an as-required basis that does not require the in-depth depot level maintenance.

c. Depot. The contractor performs all depot level maintenance at a facility licensed by the FAA. Currently, Midcoast Aviation, a wholly owned subsidiary of Sabreliner Corporation, provides depot maintenance, repair, and painting services at St. Louis Downtown Parks Airport, Cahokia, Illinois. All depot level maintenance modifications, inspections, and rework are accomplished at this facility.

d. Interim Maintenance. GAC contractor field service personnel maintaining the C-20G Aircraft at MCAF Kaneohe Bay provide technical support and field team assistance. Field team assistance is defined as those occasions when contractor personnel are dispatched at the government's request to a location other than the contractor's facility for the purpose of accomplishing aircraft maintenance. Until October 2000, VR-1, NAF Washington, had a permanent C-20D GAC Technical Representative assigned to them, but the contract was not renewed upon expiration. A C-20D Technical Representative for VR-1 is no longer considered economical. Maintenance is also available for requirements beyond the capability of the organizational level. Emergency repair maintenance normally consists of modernization, modification, conversion, in-service repair, or other major maintenance actions that are performed at the contractor's facility.

e. Life Cycle Maintenance Plan. The Standard Depot Level Maintenance (SDLM) based maintenance philosophy was replaced with the Integrated Maintenance Concept (IMC) in October 2000. GAC performs scheduled depot level maintenance at 72-month intervals and at the completion of 5,000 landings and every 2,000 landings thereafter, in accordance with GAC GIII and GIV maintenance manuals. Heavy engine maintenance is provided by Rolls-Royce of Canada. The C-20D/G engine mid-life inspection is performed at 4000 flight hours, and engine overhaul is performed at 8000 flight hours. The C-20D/G Aircraft has an expected life of 20,000 flight hours and 20,000 ground-air-ground cycles flown to corporate aircraft usage spectra, except for those life-limited components identified in the C-20D/G maintenance manual that identify FAA approved retirement times.

3. Manning Concept. The C-20D/G Aircraft manpower requirements for Pilots and Aircrew are driven by the Required Operating Capability and Projected Operational Environment (ROC/POE). The C-20D/G manpower requirements are as follows:

POSITION	DESIGNATOR/ RATING	NEC	MOS	CREW RATIO USN	CREW RATIO USMC	SEAT FACTOR
Pilot - Copilot	1311, 1312	NA	7553	6.0	4.0	2
Crew Chief	° Aviation Machinist's Mate (AD) ° Aviation Electrician's Mate (AE) ° Aviation Structural Mechanic (Safety Equipment) (AME) ° Aviation Structural Mechanic (AM) ° Avionics Technician (AT)	8245	6246	6.0	4.0	1
Loadmaster	Any Aviation Specialty	8278	NA	6.0	4.0	1
Aircrewman (Special Assignment)	Determined by CHNAVPERS	8289	NA	6.0	NA	1

a. Estimated Maintenance Man-Hours per Flight Hour. NA

b. Proposed Utilization

C-20D/G AIRCRAFT PLANNED UTILIZATION

ACTIVITY	VR-1	VR-48	VR-51	MCAF Kaneohe Bay
Aircraft Per Activity	2	2	2	1
Average Monthly Utilization Rate Per Aircraft (Hours)	75	125	125	100
Average Sortie Length (Hours)	4.0	6.0	6.0	6.0

c. Recommended Qualitative and Quantitative Manpower Requirements. Manpower requirements shown in Part II for C-20D/G squadrons were extracted from the Total Force Manpower Management System (TFMMS) and Marine Corps Table of Organization (T/O) dated 16 October 2002. The Marine Corps personnel that will operate the C-20G Aircraft at MCAF Kaneohe Bay will have various MOSs, but Pilots will require secondary MOS 7553 (C-20 Pilot).

ACTIVITY	BILLET TYPES	AIRCREW DESIG/NEC/MOS	MAINTENANCE NEC
MCAF Kaneohe Bay, T/O 8323 (C-20G)	USMC ACDU	9967/9969/6246*	NA - CLS
VR-48, UIC 52893 (C-20G)	USN TAR and SELRES	1311/8245/ 8278/8314	8314
VR-51, UIC 39501 (C-20D)	USN TAR and SELRES	1311/8245/ 8278/8392	NA - CLS
VR-1, UIC 42884 (C-20G)	Officer - USN TAR Enlisted - USN ACDU	1311/8245/ 8289/8314	8392

Note: * MOS 6246 is not included in the current T/O 8323. This change will be included in this NTSP when the information becomes available.

4. Training Concept. All C-20D/G Aircraft initial and recurrent Pilot, Crew Chief, and maintenance training is currently provided via contract with Flight Safety International (FSI), located in Savannah, Georgia, and Long Beach, California. C-20D/G Aircraft organizational maintenance training is only available through FSI's Savannah training center. Commander

Naval Air Reserve Force (COMNAVAIRESFOR) has established the following C-20D/G organizational maintenance technician pipelines:

- *R-102-2017, C-20D (G-III) Avionics/Electrical Initial*
- *R-601-2017, C-20D (G-III) Power Plants/Airframes Initial*
- *R-102-2010, C-20G (G-IV) Avionics/Electrical Initial*
- *R-601-2009, C-20G (G-IV) Maintenance Initial*

The only course not provided by contract is C-20G Loadmaster training. C-20G Loadmasters attend *R-553-3000, Fixed Wing Loadmaster Course*, at Joint Reserve Base (JRB) Fort Worth, Texas. Loadmasters also attend an American Airline Emergency Egress Procedures three-day training course located in Dallas, Texas.

C-20D/G Crew Chiefs do not have their own training pipeline. Both C-20D and C-20G Crew Chiefs attend separate GIII and GIV Maintenance initial training. After 12 to 18 months in their respective commands, Crew Chiefs then attend Pilot Refresher Training conducted by FSI.

Maintenance training courses for personnel in the C-20D/G community are now mandatory as per NAVPERS 18068F (refer to CNARF MSG 051200Z APR 01).

a. Initial Training. Initial training for Pilots and Aircrew are available and are listed following this paragraph (called "Initial Training"). All maintenance courses now have established CINs and have been moved into the "Follow-On Training" paragraph.

Title	**Gulfstream III Pilot Initial Training**
Description	This course provides training to the first tour C-20D Pilot, including:

° Flight Training Systems
° Avionics and Electrical Systems
° Power Plant and Related Systems
° Hydraulic and Pneumatic Systems
° Communications and Navigation Systems
° FMS
° TCAS
° EGPWS
° Egress and Ditching Procedures
° Crew Tactics and Safety
° Navy Air Training and Operating Procedures Standardization (NATOPS)

Upon completion, the student will be able to perform as a C-20D Pilot in a squadron environment.

Locations	° FSI, Savannah
	° FSI, Long Beach

Length .... 22 days

RFT date .... Currently available

Skill identifier ...... NOBC 1311 and 1312

TTE/TD .... Gulfstream III Flight Simulator

Prerequisites .... ° B-322-0041, Refresher Physiology, Tactical Jet Training
° B-9E-1224, Naval Aviation Water Survival Program R-4
° Security Clearance - Secret

Title .... **Gulfstream III Pilot Recurrent Training**

Description .... This course provides training to the recurrent C-20D replacement Pilot or Aircrewman, including:

° Aircraft System Normal Operations and Procedures
° Emergency and Abnormal Aircraft System Procedures
° Weight and Balance
° Flight Planning
° Egress and Ditching Procedures
° Crew Tactics and Safety
° NATOPS

Upon completion, the student will be able to perform as a C-20D Pilot or Aircrewman in a squadron environment.

Locations .... ° FSI, Savannah
° FSI, Long Beach

Length .... 5 days

RFT date .... Currently available

Skill identifier ...... ° NOBCs 1311 and 1312
° NEC 8245
° NEC 8289

TTE/TD .... Gulfstream III Flight Simulator

Prerequisites .... ° B-322-0041, Refresher Physiology, Tactical Jet Training
° B-9E-1224, Naval Aviation Water Survival Program R-4
° Security Clearance - Secret

Note: C-20D Naval Aircrewman NEC 8245 and 8289 attend Gulfstream III Pilot Recurrent training as refresher training.

Title .... **Gulfstream IV Pilot Initial Training**

Description .... This course provides training to the first tour C-20G Pilot, including:

- ° Flight Training Systems
- ° Avionics and Electrical Systems
- ° Power Plant and Related Systems
- ° Hydraulic and Pneumatic Systems
- ° Communications and Navigation Systems
- ° FMS
- ° TCAS
- ° EGPWS
- ° Egress and Ditching Procedures
- ° Crew Tactics and Safety
- ° NATOPS

Upon completion, the student will be able to perform as a C-20G Pilot in a squadron environment.

Locations .... ° FSI, Savannah
° FSI, Long Beach

Length .... 21 days

RFT date .... Currently available

Skill identifier ...... ° NOBC 1311
° MOS 7553 (secondary)

TTE/TD .... Gulfstream IV Flight Simulator

Prerequisites .... ° B-9E-1224, Naval Aviation Water Survival Program R-4
° Security Clearance - Secret
° ACT Course

Title	**Gulfstream IV Pilot Recurrent Training**
Description	This course provides training to the recurrent C-20G Pilot or Aircrewman, including:

      ° Aircraft System Normal Operations and Procedures
      ° Emergency and Abnormal Aircraft System Procedures
      ° Weight and Balance
      ° Flight Planning
      ° Egress and Ditching Procedures
      ° Crew Tactics and Safety
      ° NATOPS

Upon completion, the student will be able to perform as a C-20G Pilot or Aircrewman in a squadron environment.

I. ONBOARD (IN-SERVICE) TRAINING

1. Proficiency or Other Training Organic to the New Development

a. Maintenance Training Improvement Program. Current planning is to adopt the Aviation Maintenance Training Continuum System (AMTCS) concepts to replace Maintenance Training Improvement Program (MTIP). AMTCS is scheduled to begin full implementation for fleet deployment in Fiscal Year (FY) 03.

b. Aviation Maintenance Training Continuum System. Aviation Maintenance Training Continuum System (AMTCS) will provide career path training to the Sailor or Marine from their initial service entry to the end of their military career. AMTCS is planned to be an integrated system that will satisfy the training and administrative requirements of both the individual and the organization. The benefits will be manifested in the increased effectiveness of the technicians and the increased efficiencies of the management of the training business process. By capitalizing on technological advances and integrating systems and processes where appropriate, the right amount of training can be provided at the right time, thus meeting the Chief of Naval Operations (CNO) mandated "just-in-time" training approach.

Technology investments enable the development of several state-of-the-art training and administrative tools: Interactive Multimedia Instruction for the technicians in the Fleet in the

form of Interactive Courseware with Computer Managed Instruction and Computer Aided Instruction for the schoolhouse.

Included in the AMTCS development effort is the Aviation Maintenance Training Continuum System - Software Module (ASM) which provides testing [Test and Evaluation (TEV)], recording, and a Feedback system. The core functionality of these AMTCS tools are based and designed around the actual maintenance-related tasks the technicians perform, and the tasks are stored and maintained in a Master Task List data bank. These tools are procured and fielded with appropriate Commercial Off The Shelf hardware and software, i.e., Fleet Training Devices - Laptops, Personal Computers, Electronic Classrooms, Learning Resource Centers, operating software, and network software and hardware.

Upon receipt of direction from OPNAV (N789H), AMTCS is to be implemented and the new tools integrated into the daily training environment of all participating aviation activities and supporting elements. AMTCS will serve as the standard training system for aviation maintenance training within the Navy and Marine Corps, and is planned to supersede the existing Maintenance Training Improvement Program (MTIP) and Maintenance Training Management and Evaluation Program (MATMEP) programs.

2. Reserve Job Qualification Requirements. Aircrew Reserve Job Qualification Requirements (RJQR) are used to ensure C-20D/G Aircraft proficiency. For Flight Crew personnel, the RJQR program is managed by COMFLELOGSUPPWING, Fort Worth, Texas.

3. Other Onboard or In-Service Training Packages. Marine Corps onboard training is based on the current series of Marine Corps Order P4790.12, Individual Training Standards System and MATMEP. This program is designed to meet Marine Corps, as well as Navy OPNAVINST 4790.2 series, maintenance training requirements. It is a performance-based, standardized, level-progressive, documentable, training management and evaluation program. It identifies and prioritizes task inventories by MOS through a front-end analysis process that identifies task, skill, and knowledge requirements of each MOS. MTIP questions coupled to MATMEP tasks will help identify training deficiencies that can be enhanced with refresher training. (MATMEP is planned to be replaced by AMTCS.)

J. LOGISTICS SUPPORT

1. Manufacturer and Contract Numbers

CONTRACT NUMBER	MANUFACTURER	ADDRESS
N00019-91-C-0255	Gulfstream Aerospace Corporation	P.O. Box 2206 Savannah, GA 31402-2206

CONTRACT NUMBER	MANUFACTURER	ADDRESS
S-F34601-95-C-0538	Sabreliner Corporation	Pierre LaClede Center 7733 Forsythia Blvd Suite 1500 St. Louis, MO 63105-1821
N61339-89-D-004	Flight Safety International	P.O. Box 2307 Savannah, GA 31402

2. Program Documentation. The Operational Logistics Support Plan (OLSP), number AC250, was updated in January 1995. The C-20G (only) Integrated Logistics Support Plan (ILSP), number AC-ILSP-336, was updated in December 1993.

3. Technical Data Plan. Maintenance manuals used for the C-20D/G Aircraft fleet are commercial specifications. These publications were obtained when the aircraft were purchased and are available at all sites. Manual updates for the C-20D/G Aircraft are purchased as part of the aircraft purchase. All technical drawings on the C-20D/G Aircraft fleet are maintained in a central library at GAC. For an extensive list of GAC commercial technical publications and required government maintenance publications, refer to OLSP AC250.

4. Test Sets, Tools, and Test Equipment. All tools, test sets, and support equipment peculiar to the C-20D/G aircraft have been purchased from GAC and are maintained and stored as directed by the C-20 Maintenance/Supply Contract.

5. Repair Parts. The contractor provides supply support for the C-20D/G Aircraft fleet. The contractor is responsible for receiving, acceptance inspection, stocking, issuing, warranty, repair, and shipment of aircraft parts and components. Repairs to all aircraft components are accomplished at a licensed FAA repair facility.

6. Human Systems Integration. NA

K. SCHEDULES

1. Installation and Delivery Schedules. A total of seven C-20D/G Aircraft were procured. Two C-20D Aircraft are assigned to VR-1. Two C-20G Aircraft each are assigned to VR-48 and VR-51, and one C-20G Aircraft is assigned to MCAF Kaneohe Bay. At this time, there are no plans to purchase additional C-20D/G Aircraft.

2. Ready For Operational Use Schedule. NA.

3. Time Required to Install at Operational Sites. NA

    4. Foreign Military Sales and Other Source Delivery Schedule. NA

    5. Training Device and Technical Training Equipment Delivery Schedule. C-20D/G Training Devices (TD) and Technical Training Equipment (TTE) are owned, maintained, and updated by FSI.

L. GOVERNMENT-FURNISHED EQUIPMENT AND CONTRACTOR-FURNISHED EQUIPMENT TRAINING REQUIREMENTS. NA

PART IV - TRAINING LOGISTICS SUPPORT REQUIREMENTS

The following elements are not affected by the C20D/G Aircraft and, therefore, are not included in Part IV of this NTSP:

IV.A.   Training Hardware

IV.A.1.   TTE / GPTE / SPTE / ST / GPETE / SPETE

IV.A.2.   Training Devices

IV.C.   Facility Requirements

IV.C.1.   Facility Requirements Summary (Space/Support) by Activity

IV.C.2.   Facility Requirements Detailed by Activity and Course

IV.C.3.   Facility Project Summary by Program

Note 1: Training hardware and courseware materials are provided by Flight Safety International. The contractor is responsible for each course, and all training is accomplished at the contractor's facility. For information regarding Training Devices, contact Flight Safety International Learning Center located in Savannah.

Note 2: Flight simulators are certified annually by the Flight Standards District Office. This certification is done with the criteria set forth in Advisory Circular (AC) 120-45A, Airplane Flight Training Device Qualification.

PART IV - TRAINING LOGISTICS SUPPORT REQUIREMENTS

IV.B. COURSEWARE REQUIREMENTS

IV.B.1. TRAINING SERVICES

COURSE / TYPE OF TRAINING	SCHOOL LOCATION, UIC	NO. OF PERSONNEL	MAN WEEKS REQUIRED	DATE BEGIN

**COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN**

ACTIVITY NAME: Chief of Naval Operations, Aviation Technical Training Section (N789H)

COMMENT: Cover page, etc.

Modify C-20D/G Aircraft NTSP number to reflect N**7**8-NTSP-A-50-9306A/D vice N**8**8-NTSP-A-50-9306A/D. Affect global change throughout C-20D/G NTSP.

INCORPORATED: YES

REMARKS: None

COMMENT: Page iii, List of Acronyms

Delete "AMS" and "AMH" Ratings. Replace with the newly merged "AM" Rating [refer to NAVADMIN 153/00 (211908ZJUN00)]. Affect global change throughout NTSP.

INCORPORATED: YES

REMARKS: None

COMMENT: Page iii, List of Acronyms

Add ASM = (AMTCS) Software Modules.

Add ECQR = Electronic Certification Qualification Record

INCORPORATED: NO

REMARKS: Not used in NTSP

COMMENT: Page I-1

Add "Training Policy Manager........CNO (N789H3)" after OPO Resource Sponsor CNO (N780G1).

Add "Head, Aviation Manpower and Training....CNO (N789)" after Director of Naval Training CNO (N795).

INCORPORATED: YES

REMARKS: None

COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN

COMMENT: Page I-8, paragraph a. Organizational)

Add (to paragraph (a.) Organizational), "Aviation maintenance ratings with NEC 8314 will perform organizational level maintenance on the C-20G (Gulfstream IV) aircraft. Upon approval, aviation maintenance ratings with NEC 83XX will perform organizational level maintenance on the C-20D (Gulfstream III) aircraft."

INCORPORATED: YES

REMARKS: None

COMMENT: Page I-8, paragraph a. Organizational

Add "Upon approval, Marine Corps personnel assigned to VR-1 with MOS 60XX will perform organizational level maintenance on the C-20D (Gulfstream III)."

(Contact MGYSGT Baker concerning MOS approval status. His DSN is 224-1133/2237)

INCORPORATED: NO

REMARKS: Referenced in the Preface. The Marine Corps has approved the skill designator Military Occupational Specialty (MOS) 6246 (Fixed Wing Transport Aircraft Specialist C-20) as a secondary MOS listed in the MCO P1200.7W dated 15 April 2001. When the Table of Organizations are updated the information will be included.

COMMENT: Page I-10, Table

For VR-1 (under the maintenance column) indicate an asterisk next to 83XX. Insert a note below the table indicating that a maintenance NEC 83XX for organizational level maintenance on the C-20D (Gulfstream III) aircraft has been submitted to NAVMAC for consideration.

INCORPORATED: YES

REMARKS: NEC 8392 has been approved and incorporated.

COMMENT: Page I-11, paragraph immediately below course listing

Delete the following, "Additional information on the approved pipelines, CINs, and stand-alone C-20D/G organizational maintenance courses will be included in future updates to this C-20D/G Aircraft NTSP."

INCORPORATED: YES

REMARKS: None

**COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN**

COMMENT: Page I-11, paragraph beginning with "Maintenance personnel...."

Add (to paragraph located above paragraph (a). Initial Training), "C-20D (NEC 83XX) and C-20G (NEC 8314) are now course mandatory. Changes to NAVPERS 18068F have been submitted (refer to CNARF MSG 051200Z APR 01)."

Delete (formerly utilized by the C-20A Aircraft). This comment concerning the "C-20A" was an administrative error affected by NAVMAC while updating the NAVPERS 18068F.

INCORPORATED: YES

REMARKS: None

COMMENT: Pages I-16 through I-30

CNARF N7211 (ATC Jenkins) will submit updated list of all C-20D/G training pipelines and stand-alone courses.

INCORPORATED: YES

REMARKS: None

COMMENT: Page I-30 and I-31, paragraph I. ONBOARD (IN-SERVICE) TRAINING

Modify the following paragraphs as follows:

I. ONBOARD (IN-SERVICE) TRAINING

1. Proficiency or Other Training Organic to the New Development

a. Maintenance Training Improvement Program. Current planning is to adopt the Aviation Maintenance Training Continuum System (AMTCS) concepts to replace Maintenance Training Improvement Program (MTIP) and is scheduled to begin full implementation for fleet deployment in Fiscal Year (FY) 01.

b. Aviation Maintenance Training Continuum System. AMTCS will provide career path training to the Sailor or Marine from their initial service entry to the end of their military career. AMTCS concepts will provide ~~is planned to be~~ an integrated system that will satisfy the training and administrative requirements of both the individual and the organization. The benefits will be manifested in the increased effectiveness of the technicians and the increased efficiencies of the management of the training business process. Where appropriate, capitalizing on technological advances and integrating systems and processes can provide the right amount of training at the right time, thus meeting the CNO's mandated "just-in-time" training approach.

Technology investments enable the development of several state-of-the-art training and administrative tools: Interactive Multimedia Instruction (IMI) for the technicians in the Fleet in the form of Interactive Courseware (ICW) with Computer Managed Instruction (CMI) and Computer Aided Instruction (CAI) for the schoolhouse.

Included in the AMTCS development effort is the Aviation Maintenance Training Continuum System - Software Module, which provides testing [Test and Evaluation], recording [Electronic Certification Qualification Records] ~~[Electronic Training Jacket (ETJ)]~~, and a Feedback system. The core functionality of these AMTCS tools are based and designed around the actual maintenance-related tasks the technicians perform, and the tasks are stored and maintained in a Master Task List data bank. These tools are procured and fielded with appropriate Commercial-Off-The-Shelf (COTS) hardware and software, i.e., Fleet Training Devices - Laptops, PCs, Electronic Classrooms, Learning Resource Centers (LRC), operating software, and network software and hardware.

Upon receipt of direction from OPNAV (N789H), AMTCS concepts are ~~is~~ to be implemented and the new tools integrated into the daily training environment of all participating aviation activities and supporting elements. AMTCS will serve as the standard training system for aviation maintenance training within the Navy and Marine Corps, and is planned to supersede the existing MTIP and Maintenance Training Management and Evaluation Program (MATMEP) programs. ~~AMTCS implementation will begin with the F-14, E-2C, and all models F/A-18 Aircraft. For more information on AMTCS, refer to PMA 2053D3.~~

Recommend the previous paragraphs serve as the standard policy statement concerning ONBOARD (IN-SERVICE) TRAINING. Please affect global change for all NTSPs (drafts, revisions, proposed, etc).

INCORPORATED: YES

REMARKS: None

COMMENT: Page II-3

Change as follows: Maintenance Officer/MMCO billet should reflect an AMDO designator vice an LDO maintenance designator. Replace 6330 with 1520. Affect Global change throughout NTSP.

INCORPORATED: NO

REMARKS: Activity Manpower Document (AMD) reflects designator 6330.

COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN

ACTIVITY NAME: Director of Naval Training and Education (N79)

COMMENT: Page iii, List of Acronyms

Add Computer Managed Instruction (CMI) and Interactive Multimedia Instruction (IMI).
Use IMI in place of because IMI encompasses CBT. Should also add Web-based
Training (WBT) since you mention technological advances and WBT will surely be used
to deliver unclassified training for the aircraft in the future.

INCORPORATED: NO

REMARKS: Computer Managed Instruction (CMI) and Interactive Multimedia Instruction
(IMI) is not used in the NTSP.

COMMENT: Page I-11, paragraph H.4 Training Concept

During review of all topics covered in the courses for both pilots and aircrew there are
many topics covered in other courses either for initial or recurrent. Recommend analysis
to determine if IMI/WBT (intranet/internet may be an option to deliver specific core
topics within the course(s) of instruction. If class time for those topics is reduced by at
least 30%, which is typical, the courses could be reduced in length or more time could be
spent on simulators.

INCORPORATED: YES

REMARKS: Part VI action item for CNARF. Change contractual language in next
competition for the CACT solicitation by NAWCTSD to include WBT as part of the contractor
courseware.

COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN

COMMENT: Page I-33, I.1.b, AMTCS

States in part, "By capitalizing on technological advances and integrating systems and processes where appropriate, the right amount of training can be provided at the right time, thus meeting the CNO's mandated "just-in-time" training approach.

Technology investments enable the development of several state-of-the-art training and administrative tools: Interactive Multimedia Instruction for the technicians in the Fleet in the form of Interactive Courseware with Computer Managed Instruction and Computer Aided Instruction for the schoolhouse.

This comment amplifies the need for additional understanding of the capability of IMI and WBT (intranet and internet). User data needs to be collected for initial, recurrent, OJT, and refresher training. Certification requirements could be met anytime, anyplace, if training is delivered with the availability of assessment tools.

INCORPORATED: NO

REMARKS: Not applicable to this NTSP at this time. Refer to N789H and AMTCS NTSP comments.

COMMENTS / RECOMMENDATIONS ON THE

**COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN**

COMMENT: Insert the following courses:

Title	**C-20G Avionics and Electrical Initial (R-102-2015)**
Description...........	This course provides training to the first tour C-20G AT, AE, and enlisted Aircrew personnel including:

° System Component Operation, Location, and
   Characteristics
° Normal Operation
° Routine Servicing Requirements
° Maintenance Practices and Troubleshooting
° Gulfstream IV Manuals
° Safety

Upon completion, the student will be able to perform as an entry-level C-20G organizational maintenance technician or Crew Chief in a squadron environment under direct supervision.

Location	FSI, Savannah
Length..................	26 days
RFT date	Currently available
Skill identifier	AT/AE
TTE/TD................	GIV Flight Simulator
Prerequisite	Applicable Core and Strand "A" schools (See paragraph 4.c. Student Profiles)

Title	**C-20G Avionics Update (R-102-2012)**
Description...........	This course provides training to C-20G AT, AE and enlisted Aircrew personnel including:

° Updated information concerning recent aircraft
   modifications
° Systems review
° Troubleshooting scenarios
° Maintenance and Servicing of aircraft

Upon completion, the student will be able to analyze and troubleshoot system malfunctions with minimum supervision .

Location...............	FSI, Savannah
Length..................	5 days
RFT date	Currently available
Skill identifier......	AT 8314
	AE 8314
TTE/TD................	GIV Flight Simulator
Prerequisite..........	R-102-2015, C-20G Avionics and Electrical Initial

Title	**C-20D Advanced Troubleshooting (R-600-2019)**
Description...........	This course provides advanced training to C-20D AT and AE personnel including:
	° In-depth System Testing and Troubleshooting Utilizing Gulfstream III Maintenance Manuals and Aircraft Wiring Diagrams
	° Identifying Symptoms and Malfunctions
	Upon completion, the student will be able to perform C-20D advanced system troubleshooting in a squadron environment without supervision.
Location...............	FSI, Savannah
Length..................	5 days
RFT date	Currently available
Skill identifier......	AT 83XX
	AE 83XX
TTE/TD................	GIII Flight Simulator
Prerequisite..........	R-102-2017, C-20D Avionics and Electrical Initial
	2 years C-20D experience

COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN

Title .... **C-20D Maintenance Manager Course (R-600-2007)**

Description........... This course provides training to the C-20D Maintenance Department Manager or Maintenance Department supervisory personnel including:

° Familiarization with Aircraft Operation, Functions, and Maintenance Practices
° Introduction to Gulfstream III Maintenance Publications, Computerized Maintenance, Gulfstream Field Support, Aviation Integrated Management Software Program, and Technical Operations Support
° Rolls-Royce Tay Engine Operation
° Support Equipment
° Safety

Upon completion, the student will be able to perform C-20D manage maintenance procedures in a squadron environment without supervision.

Location .... FSI, Savannah

Length.................. 5 days

RFT date .... Currently available

Skill identifier ...... Any Aviation Rating

TTE/TD .... NA

Prerequisite .... Paygrade E-7 through E-9

Title .... **C-20G Cockpit Fault Analysis Course (R-102-2007)**

Description........... This course is designed to enhance AT/AE personnel abilities of analyzing actual aircraft problems from the cockpit utilizing cockpit indications and/or configurations.

Upon completion, the student will be able to analyze C-20G problems from the cockpit.

COMMENT: Pages II-4 and II-5

VR-48

One DK2 that is ACDU

Under TAR: Six pilots but they should be 1317 not 1311, and one 1520 should be a 1527. Their TAR manning under this document calls for six 1327 and one 1527 and 57 enlisted billets with seven having the 8245 NEC and six having the 8278 NEC.

Under SELRES: The 18 1311 should be 1315, and the two 1520 should be 1525.

VR-51

Under ACDU: This document says we get nine enlisted active duty billets. We only have an IT and DK off this list.

Under TAR: We should have seven 1317 and one 1527. The enlisted manning is correct but it has only six 8245 and five 8278. We should have one more of each like VR-48.

INCORPORATED: Yes

REMARKS: Designators used as listed in the Activity Manpower Document (AMD) per UIC. Current AMD has no ACDU for VR-51. All Activity Manpower Documents were reviewed and implemented into this document as of October 2002.

COMMENTS / RECOMMENDATIONS ON THE
C-20D/G AIRCRAFT
DRAFT NAVY TRAINING SYSTEM PLAN

COMMENT: Pages II-7 through II-10

All these numbers are a summary of the pages II-2 through II-6, which need to be corrected to reflect the changes above. Also if you look over in the columns it has manning for FY02-05 at zero across the board. That does not seem to be correct.

The designators at the top for the pilots need to be changed to 1310 for active duty pilot 1315 for SELRES and 1317 for TAR.

REMARKS: None

COMMENT: Pages II-11 through II-16

Shows no plus up for the remaining years. I don't think we need to get too much into this as of now. I think the main problem is to get the manning levels as accurate as we can for now.

INCORPORATED: No

REMARKS: Plus up for remaining years would be increases either in actual manning or in squadron implementation. No supporting documentation exists to show increase in required manpower.
