

Now BIC VENTURI puts to rest some of the fables, fairytales, folklore, hearsay and humbug about speakers.

Fable

Extended bass with low distortion requires a big cabinet.

Some conventional designs are relatively efficient, but are large. Others are small, capable of good bass response, but extremely inefficient. The principle of the BIC VENTURI systems (pat. pend.) transforms air motion velocity within

the enclosure to realize amplified magnitudes of bass energy at the BIC VENTURI coupled duct as much as 140 times that normally derived from a woofer

B—Shows output of low frequency driver when driven at a freqof 22 Hz. Sound pressure reading, 90 dB. Note poor waveform. C—Output of venturi coupled duct, (under the same conditions as Fig B.) Sound pressure reading 111.5 dB, [140 times more output than Fig. B.) Note sinusoidal (nondistorted) appearance.

Fairytale

It's okay for midrange speakers to cross over to a tweeter at any frequency. Midrange speakers cover from about

800 Hz to 6000 Hz. However, the ear is most sensitive to midrange frequencies. Distortion created in this range from crossover network action reduces articulation and musical definition.

BIC VENTURI BICONEX horn (pat.pend.) was designed to match the high efficiency of the bass section and operates smoothly all the way up to 15,000 Hz, without interruption. A newly designed super tweeter extends response to 23,000 Hz, preserving the original sonic balance and

originating in the lower frequencies. Folklore

musical timbre of the instruments

Wide dispersion only in one plane is sufficient.

Conventional horns suffer from musical coloration and are limited to wideangle dispersion in one plane.
Since speakers can be positioned horizontally or vertically, you can miss those frequencies so necessary for musical accuracy.
Metallic coloration is eliminated in the BICONEX horn by making it of a special inert substance.
The combination of conical and exponential horn flares with a square diffraction mouth results in measurably wider dispersion, equally in all planes.

Hearsay

A speaker can't achieve high efficiency with high power handling in a small cabinet.

It can't, if its design is governed by such limiting factors as a soft-suspension, limited cone excursion capability, trapped air masses, etc. Freed from these limitations by the unique venturi action, BIC VENTURI speakers use rugged drivers capable of great excursion and equipped with voice coil assemblies that handle high power without "bottoming" or danger of destruction. The combination of increased efficiency and high power handling expands the useful dynamic range of your music system. Loud musical passages are reproduced faithfully, without strain; quieter moments, effortlessly.

Humbug

You can't retain balanced tonal response at all listening levels.

We hear far less of the bass and treble ranges at moderate to low listening levels than at very loud levels. Amplifier "loudness" or "contour" switches are fixed rate devices which in practice are *defeated* by the differences in speaker efficiency. The solution: Dynamic Tonal Compensation.™ This circuit (patents pending) adjusts speaker response as its sound pressure output changes with amplifier volume control settings. You hear aurally "flat" musical reproduction at background, average, or ear-shattering discoteque levels—automatically.

A system for every requirement

FORMULA 2. The most sensitive, highest power handling speaker system of its size (19¾x12x11½)!' Heavy duty 8" woofer, BICONEX mid range, super tweeter. Use with amplifiers rated from 15 watts to as much as 75 watts RMS per channel. Response: 30 Hz to 23,000 Hz. Dispersion: 120°x120°. \$98 each

FORMULA 4. Extends pure bass to 25 Hz. Has 10" woofer, BICONEX midrange, super tweeter. Even greater efficiency and will handle amplifiers rated up to 100 watts. Dispersion: 120°x120°. Size:25x13¼x13". \$136 each.

FORMULA 6. Reaches very limits of bass and treble perception (20 to 23,000 Hz). Six elements: 12" woofer complemented by 5" cone for upper bass/lower midrange; pair of BICONEX horns and pair of super tweeter angularly positioned to increase high frequency dispersion (160° x 160°). Size: 261/4 x 153/4 x 143/4." \$239 each.

Sturdily constructed enclosures. Removable grilles in choice of 6 colors. Optional bases for floor standing placement. Write for brochure HF-1l.

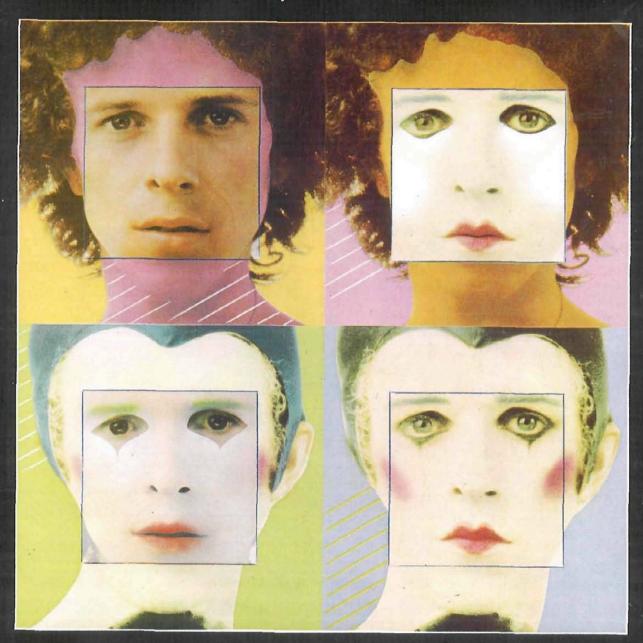

Audition today's most advanced speakers at your BIC VENTURI dealer.

There was a talent hunt in Brighton, England, which ended the moment Leo Sayer walked in to audition for agent-to-be David Courney. He was so impressed that he never did become an agent, but formed a songwriting partnership with the singer instead,

They wrote and they made some demonstration tapes for Adam Faith, once a British music popstar, more recently a popular British television actor. Excited by what he heard, Faith decided to manage and produce the blazing talent of Leo Sayer.

The closest good studio, a few miles along the Sussex coast, belonged to Who vocalist Roger Daltry, who overheard parts of the ensuing sessions and asked Leo Sayer and David Courtney to write all the songs for his solo ablum debut. The result, Daltry, was a critical smash which generated a hit single, "Giving It All Away."

After this fortunate interruption, Leo Sayer returned to work on his own album while anticipation mounted through the British music world. It's finished at last, titled Silverbird, and has just been released by Warner Bros. Records. If you're ready for a change, seek out this album by an artist, Leo Sayer, whose beginnings have so changed the people around him.

SILVERBIRD, LEO SAYER'S ALBUM, INCLUDES "THE SHOW MUST GO ON," ALREADY A NUMBER ONE SINGLE IN ENGLAND.

Instead of racking our brains to find rating systems that would yield the highest specs for Sony components, we rack our consciences.

Take our STR-7065 receiver, for example. We rate it at 60 watts per channel—but under the most rigorous and meaningful conditions: continuous power at all frequencies from 20, to 20,000 Hz., both channels driven into 8 ohms.

Which is why High Fidelity Magazine says: "The Sony...is comparable in its output capabilities to many amplifier sections regularly advertised at, say, 75 watts per channel or more."

That power rating is taken at a meaningful low distortion figure,

too: less than 0.2% harmonic or IM distortion.

High Fidelity comments: "Not only does the amplifier stay below its ratings to the frequency extremes (which the amplifier sections in many receivers do not quite do), but intermodulation stays under this figure to beyond 95 watts at 8 ohms, and beyond 125 watts at 4 ohms.

High power, free of distortion are two of the most important requisites of a high quality music system. The STR-7065 excels in both.

Describing the tuner section, High Fidelity said: "...Both on paper and in the listening room, FM performance of the receiver is excellent." Some of the circuit features that make it so are newly developed Sony FET's in the mixer and RF stages (for 2 µV IHF sensitivity with 90 dB spurious response rejection on strong local signals), and special Sony IC's which give it a 1.0 dB capture ratio and 70 dB selectivity (the easier to pluck stations from a crowded dial). Such power and performance doesn't come cheaply. Yet, when you consider that the specifications you get are better than the specifications you are paying for, the STR-7065 is a remarkable value at \$529.50.

And the same value is offered by other Sony receivers starting at \$229.50. Hear them at your Sony dealer and see which one rates best with you. **SONY**®

How we rate with you depends on how we rate ourselves.

Is it live or is it Memorex?

If anybody knows what Ella Fitzgerald sounds like, it's her old friend Count Basie.

So we set up a test. First, we put Ella in a soundproof booth and recorded her singing on Memorex with MRX₂ Oxide. Then we invited the Count into the studio.

He listened, but didn't look, as we

alternated between Ella singing live and Ella recorded on Memorex with MRX₂ Oxide.

After switching back and forth a number of times, we asked the Count which was Ella live and which was Ella on Memorex.

His answer: "You gotta be kidding, I can't tell."

Now it just stands to reason that if an expert like Count Basie can't tell the difference between "live" and Memorex, you probably can't either.

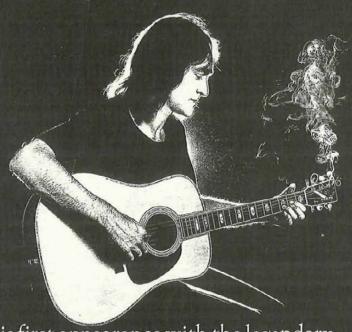

But, why not buy a Memorex MRX₂ Oxide Cassette and listen for yourself?

MEMOREX Recording Tape.

@1974, Memorex Corporation, Santa Clara, California 95052

Incomparable Dave Mason.

From his first appearance with the legendary English group Traffic, adjectives just haven't been able to describe the unique musical ability that Dave carries around in his head and his hands. He's his own man, something of a phenomenon in the fast-burning world of rock music. With some prominent guest artists like Graham Nash, Stevie Wonder, Jim Keltner, and Carl Radle, "It's Like You Never Left" is one of Dave Mason's finest albums. And that's quite something.

"It's Like You Never Left." The Dave Mason album. On Columbia Records and Tapes

Mike Madigan

69 FIFTH AVENUE NEW YORK, NEW YORK 10003

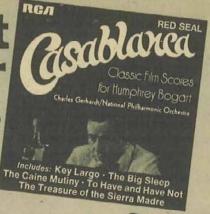

We have learned that in the event that President Nixon is forced by the threat of imminent impeachment, the specter of eventual criminal prosecution, or pressures from within the Republican Party to resign the Presidency, he will take advantage of the opportunity to use his resignation to solve his ever widening tax problems by giving his body to the U.S. government. By making this unique donation prior to his death, he would be able to claim it as a "constructive gift" for the year 1974 and several subsequent years, and the resulting tax deduction should be more than sufficient to wipe out any back taxes he might end up owing if some or all of his other tax write-offs are ultimately disallowed by the I.R.S. or the Congressional committee investigating his financial affairs. A suitable repository for the "Presidential person" could easily be found—the most likely spot is his estate in San Clemente, which he has already announced as a prospective gift to the government. Although he would probably be expected to make himself available to scholars from time to time, his status as a piece of government property would be hardly likely to prove onerous, and should in any case be considerably more pleasant than a possible alternative form of retirement at government expense in a federal penitentiary if he remains in office long enough for a serious criminal case to be established against him. It also seems unlikely that anyone would argue with what many think would be a very conservative valuation of himself of \$1 million, since as one tax expert noted, his current worth to the nation "is in the zilch area," whereas his resignation would be of great value, surely something in eight or nine figures. And, as a key Presidential aide pointed out, "It's an honorable out. I mean, it's not like he's bugging out. Right now the guy's a walking tax loss. All he has to

A recent statement issued by the Soviet government following the publication in Paris of Aleksandr Solzhenitsyn's new book, The Gulag Archipelago, termed the novel "frantic, viscous, distorted reporting" of Russian affairs by "one of a handful of selfappointed commentators on Soviet society" who are "out to get communism" and "cut the legs off the Presidium." The statement went on to complain of the "lack of objectivity" of Soviet history in the work, insisting that it deliberately presented an "unbalanced view" by focusing on the tens of millions of Russians who were tortured, falsely imprisoned, or mur-

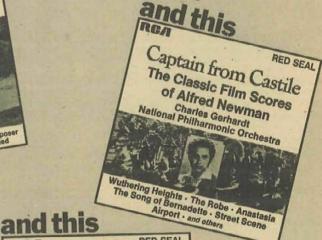

do is deduct himself."

Horseshit Magazine, America's great underground bestseller. Why haven't you seen Horseshit Magazine? Because you live in a censor-ridden country, that's why. Horse-shit is banned from every library and every college campus in America. They want bland, inoffensive, dull magazines. That leaves out Horseshit, The Offensive Review. Horseshit is a mauler, the body puncher among magazines. When it goes after some-one, it comes away with blood on its fists. Horseshit hammers the military, it's rough on religion, cruel to women, it mocks the government, and revels in sex. Adult sex, laughing sex, real man and woman sex. Horseshit is a professional magazine, a big magazine with the most beautiful artwork in the world. Fantastic drawings, too graphic for other publications. Make us prove it! Send \$10 for all

four issues and we'll include a cartoon book, or else send \$5 for two issues, Sent in plain sealed envelopes.

dered instead of telling the story of the many thousands whose lot had improved under communism. Interestingly, in its conclusion, the statement seemed to imply that no action would be taken against the Nobel Prizewinning author. "One can only be angry at those he respects," it said.

Now that Operation Candor has come to a close with the refusal by the President to comply with subpoenas of documents and tapes issued by the Ervin Committee, Administration strategists are reportedly planning subsequent stages of the Nixon defense. According to a highly placed White House source, the next few months will see following phases of calculated reaction to criticism of the President:

Operation No Really, What I'm Going To Tell You Now is the Whole Truth and Nothing But, So Help Me: A large number of memorandums and recordings will be released to the Senate Committee on Presidential Campaign Activities, Watergate Prosecutor Jaworski, and possibly to the public, but with verbs, adverbs, and adjectives deleted. "It's in your verbs that the real compromises of national security usually turn up," explained a legal aide to the President. "As far as the adjectives and adverbs go, well, that's your personal stuff, your color, your earthy language, that kind of thing, and they're obviously protected by the President's inherent right under executive privilege to the confidential conduct of the affairs of his office.'

Operation Hey, Look, All Kidding Aside, This Is It, Straight from the Shoulder, the Pure Unvarnished Truth and/or the Real McCoy: The President will agree to meet with both selected members of the Ervin Committee and Special Prosecutor Jaworski, with Senator Stennis acting as a moderator, but he will respond to questions only through charades. "Direct response to interrogation would constitute a violation of the doctrine of separation of powers," said White House counsel James St. Clair. "Charades are an acceptable compromise to preserve the dignity of the office." As a possible alternative, the President would answer questions directly in an unrecorded session, but would give all his answers through an interpreter who would then translate his remarks into Urdu or some other language totally unfamiliar to the Senators and the Prosecutor. "I think in some ways this would be the ideal arrangement," St. Clair. "The President wouldn't have to hold back at all as far as national security or executive privilege are concerned. He could give

the whole story, and the various individuals involved in the interview would be what you might call in close association or contact, albeit indirect contact, with the truth. At the same time, the President would be properly protected against the damaging leaks that have characterized the whole investigation."

Operation O.K., Honest To God, Here Comes the Genuine Article, So Hold onto Your Hats: The President will submit to a lie detection test on the key questions of Watergate and the related scandals. Naturally, as a member of the President's legal staff put it, "to release the results would represent an unconscionable denial of the President's civil rights, inasmuch as polygraphs are inadmissable in courts of law as evidence, not to mention the fact that any publication of polygraph material would demean the high office he holds." Instead, the President will take a second lie detector test in which he will be asked about the results of the first. "It goes without saying that the penumbra of Presidential authority and individual guarantees against self-incrimination would forbid the release of this data," said the staff member. He admitted that there was a potential "vicious circle-type situation," but insisted that since the President would be acting in good faith, the process would clear the air. "President Nixon would be willing to take any number of lie detector tests under these simple ground rules," he said, "ten, a hundred, a thousand if necessary—how much more can any man do?"

President Nixon's example in flying to San Clemente for the holidays in a commercial airliner instead of Air Force One in order to conserve energy appears to have been highly effective, considering how widely it has been emulated. In the weeks since his dramatic gesture, there has not been a single reported case of an American flying to his vacation home in a private 707.

The proceedings in Maryland to determine whether or not former Vice President Spiro Agnew should be permanently disbarred and thus forbidden ever to practice law again appear somewhat pointless, or moot, as gentlemen of the legal persuasion say. In the light of Mr. Agnew's handling of his own case, it would certainly seem likely that anyone who sought his legal advice would be instantly declared mentally incompetent to stand trial in any court in the land. □

• Shortly before their new headquarters in a modern office building in South Bank, a district of London, were completely finished, London Weekend Television, an English television network, began moving in. Every Friday afternoon for several weeks after the move, the network received a telephoned bomb threat and had to evacuate the premises.

The caller, who was eventually arrested, turned out to be an Irish member of the crew putting the finishing touches on the building and who wanted to get away early for the weekend. The Brighton (England) Argus (via Private Eye)

• The annual boat races in Alice Springs, Australia, will not be held this year because there is water in the Todd River. The highly competitive event traditionally consists of a sort of footrace between two-man crews who stand inside bottomless boats, grip the gunwhales, and dash around a course marked out on the normally dry river bed. Unexpectedly heavy rains have flooded the river with three feet of water, dooming the regatta. Philadelphia Evening Bulletin (D. Lipkin)

Dr. George King, an English inventor, who holds the degree of Doctor of Divinity, has invented what he claims is a prayer battery. He has had some two hundred people directing prayers at the device, which is said to resemble a box camera on a tripod. According to Dr. King, the battery will be turned on soon, after a committee decides what to do with its stored spiritual power.

"We may use it to provide rain and relieve famine in Africa," he explained. King is the head of a sect called the Aetherius Society which he founded after receiving messages from the planet Venus. San Francisco Chronicle (L. Carnahan)

• Police in Charleston, W. Va., received a call from a distraught

housewife who said that she had heard heavy breathing, a thud, and then silence while talking on the telephone to her husband, a night watchman on duty at a local business.

Police officers dispatched to the scene discovered that the night watchman had fallen asleep while talking to his wife. New York Daily News (D. Villadolid)

• A young boy in Stevenage, England, came into a local soda shop and asked the clerk, "How much is a can of Coke?" The clerk told him and obligingly brought out a can and placed it on the counter. The boy then pulled out a gun, let fly with a volley of ping-pong balls, grabbed the can, and sprinted away.

He left his gun and his getaway vehicle—an orange and white tricycle—parked by the curb outside. Providence Journal (L. Brown)

• One week after installing a home fire alarm system in their house in Freeport, Illinois, Mr. and Mrs. Robert Chounard and their two young children were awakened by the high-pitched sound the warning device emits when the smoke concentration in any room climbs above two percent or the temperature exceeds 136 degrees. The blaze which the alarm system detected was caused when the warranty for the system, an instruction manual for its operation, and several other papers provided by the manufacturer caught fire.

The alarm also summoned the fire department, which arrived in time to extinguish the conflagration before any significant damage was done.

Mr. Chounard, who had left the papers on what he thought was an inoperative gas space heater, says he's "sold" on the system. "I'm kind of glad it was in," he said. Freeport Journal Standard (K. Wolber)

 A jeering crowd in Dania, Florida, shouted to a twenty-seven-year-old woman to jump from a 110 foot tower which she had climbed in an apparent suicide attempt. The crowd pelted police with rocks as they tried to talk her down and booed them when they managed to bring her down.

The police had to use dogs to disperse the crowd. Five policemen received minor injuries before the woman was finally led away to safety. Arizona Daily Star (T. Miller)

Address City, State Zip

Name

Have you ever thought how important your National Lampoon is to your stupid way of life? Hard enough, isn't it, facing each dreary day without talent, integrity, or energy, but what if you had to face it without your National Lampoon? Well, you just remember that the opportunity to purchase a National Lampoon at each and every newsstand from coast to coast is a privilege, not a right, and can be revoked at any time. Right now, for instance. Or conditions can be appended to your subscription contract. To take an example, if you have a telltale zip code, one that brands you as a poor credit risk, you may be required, in the near future, to place a month's salary in an escrow account at an established Gotham bank. If your face has recently taken on the contours of an eroded lava bed, you may have to submit to surgery before continuing with your subscription. And, if you score under five hundred on your Stupid Aptitude Tests, you may have to spend six months at the National Lampoon Tutoring School in your city before being re-enrolled on our rigidly supervised subscription lists. Because, let's face it, we don't want a lot of readers with moss growing on their teeth. We want a wideawake group of together dudes and chicks who can really get behind where their heads are at. You see, today's National Lampoon represents a whole new approach to stupidity that lets the reader actually participate in an elaborate and sadistic attempt to reduce American culture to a heap of silt. In this and coming issues, National Lampoon staffers like Brian McConnachie and Vladimir Nabokov will be introducing you to

the world of fine arts, with articles on "Camembert Sculpture" and "Sonnets from the Sinai." Henry Beard will report on new laws being framed right now that will require you to lock yourself up in your own closet for days on end. Science editor P. J. O'Rourke will be writing on "The New Air," an interesting chemical approach to air pollution that will make use of harmful household odors in the fight against respiratory inhalation, now the nation's number one cause of breath. Hard-hitting European editor Tony Hendra will break some ancient taboos (and some middle-aged heads) when he gives the facts about "Six Thousand Four Hundred and Twenty-two Germans Who Have Outlived Churchill." And, inaugurating a new department devoted to the art of living it up, Frenchspeaking editor Sean Kelly will investigate three really appalling brandies you can use in your butane lighter. Articles like this will need a very special sort of readership.

Chances are, after a few adjustments in your budget, you'll be able to continue as a National Lampoon subscriber. But just to show you what can happen to people when we take their National Lampoons away, we'll include here a couple of personal responses from those who have been struck from our list.

NatLamp editor: Well, Mrs. Murch, we took your National Lampoon away one month ago. How have things been going?

Mrs. Murch: Gosh, George, my National Lampoon used to keep my bathroom bowl as fresh as a calla lily. Now that you took it away, my

husband, Mr. Murch, says he'd rather do his business at the office, and Junior's diaper pail has been condemned by the county!

NatLamp editor: And how about you, Mrs. Janakovitch. Do you want your

National Lampoon back?

Mrs. Janakovitch: Sure do, George! You know, my son Barney has a nose the size of a rotisserie and you can imagine what that does to my drapes. Well, ever since you took my National Lampoon away, the delicate underlining closest to Barney's chair comes out looking so grey and dingy I cancelled my bridge club!

NatLamp editor: So you both would like to have your National Lampoon back?

Mrs. Murch & Mrs. Janakovitch (in unison): Sure would!

NatLamp editor: Well, don't count on

Cover: This month's cover is by fabulous Charlie White of the Fluid Drive Studio. That's Fluid Drive Studio. F as in flotsam, l as in low rent, u as in you get the idea. Charlie White is the husband of fabulous Linda White which is how he got his start. Charlie looks like a squeeze toy, sounds like a squeeze toy, paints like fucking Ingres (look it up). Charlie came up with the idea for this cover during a chat with Kenny Kneitel (also of the Fluid Drive Studio) and another young man too modest to mention his name here.

P.S. Thanks and a tip of the Stupid Chapeau to Louise Gikow, who insisted on working night after night on the Stupid Aptitude Test even though many others wanted to pitch in and help! □

More than anything else, the Allman Brothers Band are accompilshed musicians. Their success doesn't depend on sequins or serpents, or make-up, or put-on showmanship. Instead, like Pioneer speakers, they stake their fame on performance.

The Allman Brothers Band prefer Pioneer speakers because of their clarity, overall sound quality and performance. The Allman Brothers sound right to the Allman Brothers. It's that simple.

There are six different musicians in the Allman Brothers Band. There are 12 different speakers in the Pioneer line. Speakers that vary because people vary, hi-fi systems vary, room acoustics vary, budgets vary and tastes vary.

Series R. These contemporary styled speaker systems bring new life to live performance. They have been praised by artists, critics, engineers and musicians for their untouched, uncolored and unusually natural performance.

Project Series. These speakers deliver maximum performance per dollar. Ideal for moderately powered stereo and 4-channel systems, these bookshelf units deliver a surprisingly high sound level while providing exceptionally wide dispersion and highs of unsurpassed quality.

CS Series. Pioneer's hallmark of engineering excellence. Here's powerfully smooth sound reproduction combined with custom-crafted cabinetry that is a reflection of the craftsmanship of an almost bygone

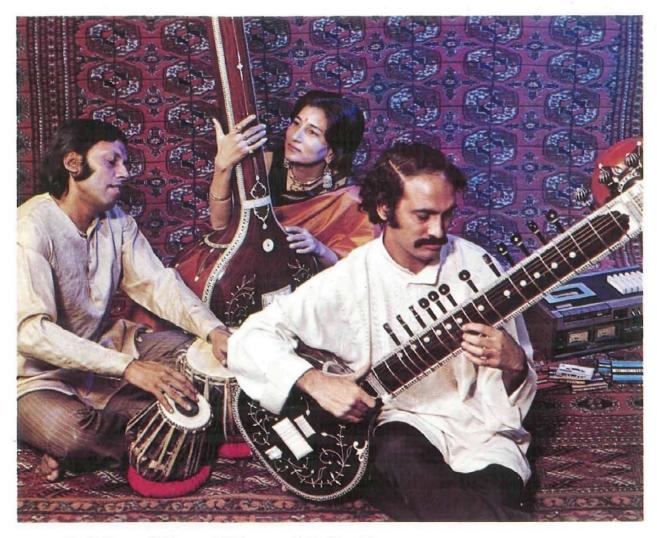

Pioneer speakers are just one element in the Pioneer audio components line — components preferred by the Allman Brothers Band. A fact you might consider when making your own selection.

PIONEER*
when you want something better

get it all...like it is!

Ever hear a sitar? Combined with a tabla (hand drums) and a tamboura (being played by the little lady in the background), it produces music that's weirdly wild and wonderful, loaded with beautiful and exciting harmonics and overtones. It's a real recording challenge to capture all the excitement, unless you're using one of TDK's new total-performance Dynamic-series cassettes.

These are the cassettes that have it all! The highest MOL (maximum output level). The broadest dynamic

range. The greatest sensitivity. The highest signal-to-noise ratio. In fact, the best-balanced performance characteristics of any cassette you can buy today! So you can get it all... like it is... and keep it forever. All the highs and lows, all the emotion and feeling of complex "real-life" sound that gave the original session its richness, fullness and warmth.

Look for the "total performers" at quality sound shops everywhere. TDK Extra Dynamic (ED) offer the discriminating audiophile an entirely new dimension in recording fidelity. Super Dynamic (SD), the tape that turned the cassette into a true high-fidelity medium, still has better-balanced total performance characteristics than any other brand made. And Dynamic (D) is an entirely new hi-fi cassette that provides budget-minded recordists with excellent quality at moderate prices.

For sound you feel as well as hear, discover the dynamic new world of TDK!

TDK's EXTRA DYNAMIC (ED), SUPER DYNAMIC (SD) and DYNAMIC (D) cassettes are available in 45, 60, 90, 120 (SD & D) and even 180-minute (D only) lengths at quality sound shops and other fine stores.

Sirs:

It seems just about everybody and their grandmother is coming to me lately and saying, "Can it be Victorian? I'm thinking Victorian. We want it Victorian." The enormous forest brown chests, the over-sized salad forks, the celery green door knockers, the lemon yellow boot scrapers—they want it all. And why not? The Victorian look in home decorating is definitely coming back. And it needn't be expensive. You can decorate an entire home with the trappings from this memorable age for about as much as an average family would generally spend on food.

The first thing you must do—and this is where the general expense comes in—is cover all your walls with cloth. Bedspreads, towels, washcloths, old but neat clothing, those nice signed sheets by Vera, bath mats, ironing board covers—anything and everything you have. When decorating, always start with your biggest room so there can be no turning back. We must always finish what we begin.

Do you remember that we always save our burnt-out light bulbs? Good. Here's a perfect place for them. Get them out and attach them to a string at two-foot intervals. Attach the string to the ceiling and form concentric circles. This effect is a very "in" and subtle tribute to the good Prince Albert, who was so fond of light bulbs. No true Victorian decor would be complete without it. Next, look for some school pennants. You can usually find them in the children's room. It hardly matters what they say on them but get as many as you can and thumbtack them to the ceiling. The more pennants you have, the better the effect.

It's beginning to get there.

Now, get some metal garbage can lids, flatten the edges and the handle, paint dragons on them, and nail them to the walls through the fabrics. Push all of the furniture into the center of the room and cover it with rugs and carpets. The fit won't be snug; contour the carpets to the furniture as well as you can. But you don't want the fit to be snug. Now the pièce de résistance—you. It's up to you to make the magic of your decorations come alive. You must give it meaning

erfection... n Quest of]

"Ionathan Livingston Seagull" is a story about striving, struggling, soaring in quest of perfection.

In the film adaptation of the best selling book, "Jona-than Livingston Seagull," the spirit of the

quest is captured in a moving original music score composed and performed by Neil Dia-

mond.*

Transforming the celebrated book into an unique motion picture was a monumental task that demanded the finest cinematography and music reproduction modern technology could produce. So Neil Diamond selected BOSE 901 Speakers to reproduce his music for the press premières of "Seagull," commenting: "After auditioning what were reputed to be the best high fidelity speakers on the market today, I chose BOSE 901 Speakers because they offer the ultimate in theatre music reproduction." This is no surprise to thousands of 901 owners around the world who believe they enjoy the ultimate in music reproduction in their homes.

In our evercontinuing quest of audible perfection, we developed the new BOSE 90I SERIES Ⅱ Speakers -- a product of over 15 years of research in musical acoustics.† We invite you to compare the BOSE 901 SER-IES II with any

speaker on the market today. Judge for yourself if you agree with Neil Diamond's selection, and with the critical acclaim the original 901 received from professional music and equipment critics.

For information on the BOSE 901 SERIES II, complimentary copies of the rave reviews on the original 901, and a report on the theatre sound system competition, circle your reader service card or write Dept. L1.

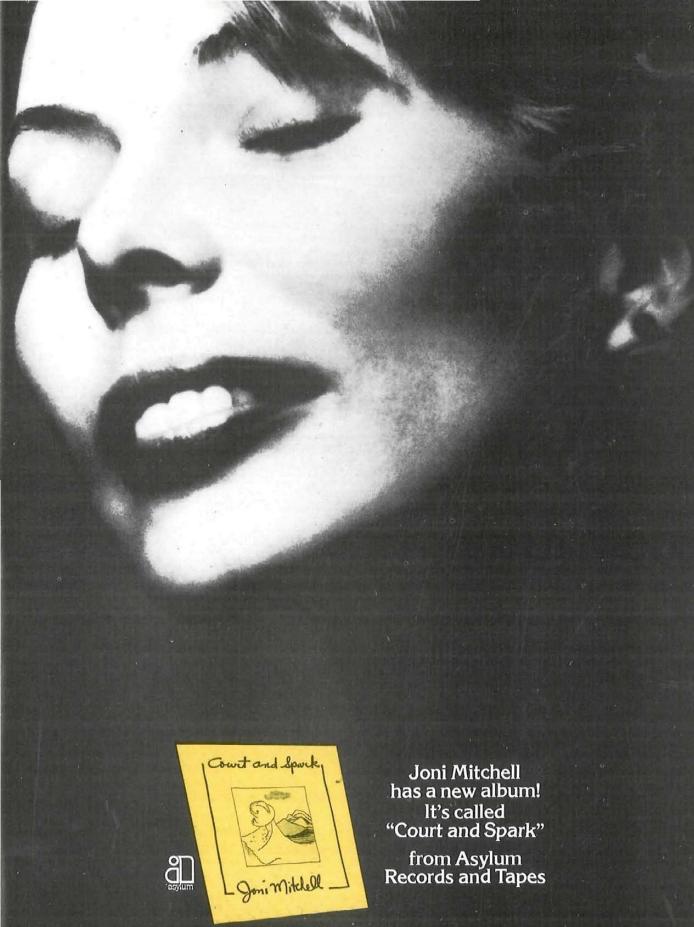

*Original motion picture soundtrack recording available on Columbia records and tapes.

†This research is presented in the article "Sound Recording and Reproduction" published in TECHNOLOGY REVIEW (MIT), Vol.75, No.7, June '73. Reprints are available from BOSE for fifty cents.

continued from page 21

and you must give it unity. Never walk around your new room—strut. Swing your arms from your shoulders and elbows. Hold your head as high as it will go, purse your lips out. Use words like nonny and biscuit and grot, and you must always "be off with yourself." And when you do, do it in a confused flurry, wagging ankles and wrists in every which direction.

If you do all these things, you and your new room will be in symphony and everyone will want to come for kippers and a flagon of tea.

> Abraham Levitt Miami Beach, Fla.

Sirs:

Nipples on my buttocks told a tale on me.

Bette Midler East Mattachine, N.J.

Sirs:

I am Joe's doctor's bill. For a long time now I have been made the object of outrage, complaints, and exaggeration. Without fear of contradiction, I am one of the most misunderstood elements of medical life. But this need not be the case. Simply stated, I am an integral part in the daily life of modern healing.

I have many functions. My jobs keep me very busy. In ideal situations, when I am paid promptly, I act as a purchasing agent. My doctor's supply list at times seems endless. The hours I put in securing these items could occupy all my days. I must buy disposable tongue depressors, urine cups, pay the Mafia for the linen service, subscribe to dozens of magazines for the outer office, pay the painters, keep the Mark IV in running order, and reorder more personal stationery on which I can be written, just to name a few of my duties.

Though for the most part I remain in the background until it's time to do my job, I am the principal cause in all that the doctor does. Without me, the doctor would become filled with worry and confusion—as sometimes happens if I am neglected. A simple intestinal flu will more often than not be diagnosed as cancer of the prostate or ovarian cysts by doctors who are in this state. And the doctor can hardly be held at fault.

Lately, Joe has been forgetting about me, and he should have known better. The vital warning signs came to his mailbox several weeks ago. If they were recognized and arrested then and there, Joe wouldn't have to be prepped for a hernia operation he'll be undergoing an hour from now. Two Tums would've done the trick.

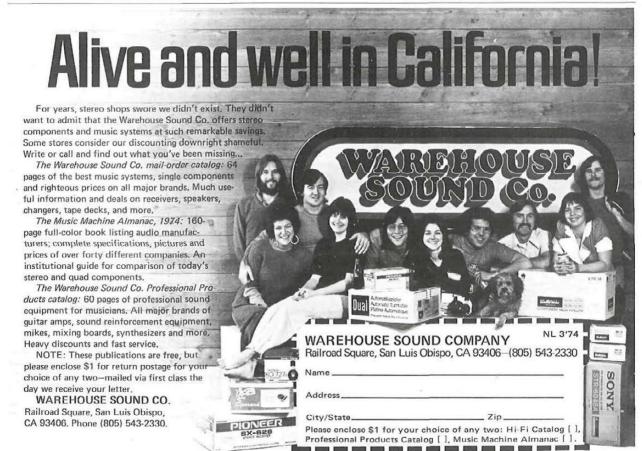

It might be too late for Joe (my doctor has been filled with a lot of anxiety lately), but it isn't too late for a lot of you. There is more to good health than just paying doctor's bills. You don't just pay doctor's bills; you pay them promptly and in full on the same day you receive them. Or better than that, pay them in cash right after your appointment. Don't risk an appendectomy when all you have is a sprained ankle.

Joe's Doctor's Bill c/o The Angelo Sotto & No-Face Seely Collection Agency Detroit, Mich.

Sirs:

Hot crackers!!! It's still there. I was just thumbing through your stupid magazine and I was afraid it wasn't there. Up until now I've been shy about ordering the Where and How To Pick Up Girls books. I keep putting it off but every month I drool over that ad. That's the best offer in the world and I'm always afraid they're going to run out of copies before I get up the nerve to order my copies. No more waiting around for me. I'm as ready as I'll ever be to pick up more girls in a month than most men do in a lifetime. I just can't wait to receive the fifty secret opening lines and learn how to talk dirty to them and find out

continued on page 27

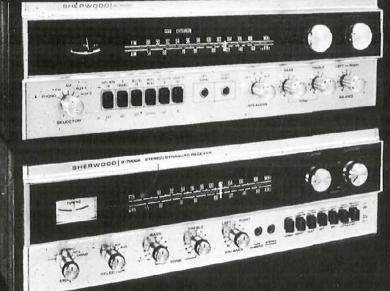

The Best Buy Line

7050. "The winner in our raluation: Music World. (36 watts F; 10 + 10 RMS [8 Ohms @ 1 KHz]; 5 μν FM Sensitivity [IHF]; 40 dB lectivity)

S7100A. "Best Buy," a leading consumer testing magazine. (22 + 22 watts RMS [8 Ohms @ 1 KHz]; 1.9 μν Sensitivity [IHF]; 50 dB selectivity)

7200. "Best Buy," a leading insumer testing magazine. 0 + 40 watts RMS [8 Ohms 1 KHz]: 1.8 μν FM ensitivity [IHF]; 60 dB lectivity)

S7900A (AM/FM) & S8900A (FM only), 'Best Buy," a leading consumer testing publication. (60 + 60 RMS [8 Ohms] 20 - 20,000 Hz; 1.7 μV 65 dB selectivity)

There are certain rewards for producing the best receivers in this business.

One of them is critical acclaim.

And we admit, that when a leading consumers' testing magazine picks three of our receivers as "Best Buys" and

another independent publication rates our S-7050 as the best of the low-priced receivers, to us it's like getting an Oscar.

But nothing is more exciting than being discovered by thousands of new consumers who choose Sherwood over the giants of the industry.

Sherwood

The word is getting around.

4300 N. California

And, this year, as never

before, the word is getting around.

Sherwood Electronic Laboratories

why they get horny . . . chocolate puppies!!! . . . meeting girls who don't wear any underwear, especially the rich, tan, naked ones who sit around their parked yachts talking about their you-know-whats—and all within only five miles of my house. Who would've believed it! Your magazine stinks but that offer is really great. Never lose that account. That's the best account you have.

The ad says that the girls are waiting for me right now, so I have to go

. . . God's cookies!!!

Johnny Manville Chicago, Ill.

Sirs:

If the battle of Waterloo was won on the playing fields at Eton, how come they didn't break any windows? Answer me that, Mr. Fancyeducation-upyourass. You know why? I'll tell you why. They weren't shooting at the buildings, they were shooting at each other. You people don't know doodle.

Alexander Haig, Ret. U.S. Army Wash., D.C.

Dear Sirs:

Did you see *The Exorcist?* You should. Everybody should, I used to think Mick Jagger was the devil, but now I know that Mercedes McCambridge is the devil, and I'm scared shitless.

Phil Berrigan Washington, D.C.

Fellas:

This is what I've turned up so far:

Kinkelstan: Short-lived monarchical dictatorship established in 1938 by schoolteacher Maurice Fanshaw Kinkel (1882-1937) just outside Emporia, Kansas, and comprising twelve acres, three buildings, a dry well, and his sixteen-year-old son, Wallace. A bitter critic of democracy, capitalism, and the American way of life, Kinkel was equally critical of communism and all other forms of government and was, moreover, too poor to flee anywhere. Kinkelstan was his solution. Alas, the King of Kinkelstan was crowned just before his coronation when son Wallace buried a hatchet in his skull to "remove the tyrant and restore freedom to all the Kinkels," as he explained to police, although Wallace was the only other Kinkel, as police explained to him.

I think we can squeeze an issue out of it.

Best, Bruce McCall Kohoutek baby,

Look, hey, we had a deal, right, baby? I mean, William Morris doesn't just take on any old astronomical junk that comes along, am I right? I mean, do we represent asteroids and meteor showers and cheap aurora borealis displays? Or do we stick with the heavies like Saturn and total eclipses? And-correct me if I'm wrong, Koho baby-but didn't that little piece of paper we inked have some language in it about "the biggest sky spectacular of the century," "bright as the full moon," "visible in daylight with the naked eye"? Well, my friend, you were visible through a naked fifty-inch telescope, and you

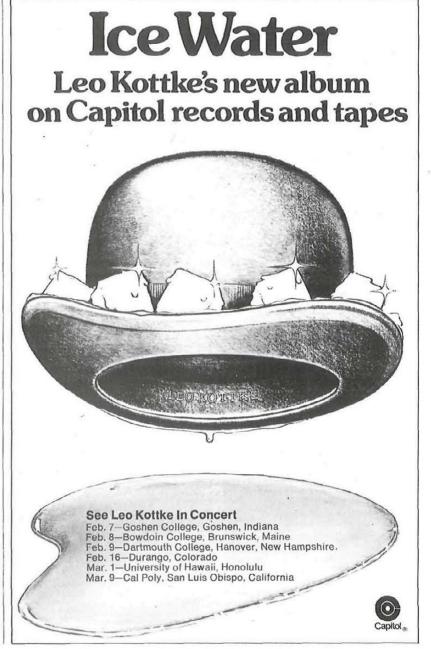

were about as spectacular as a rain cloud. The next time you come around —what was it, 71,974 A.D.?—you can forget Vegas. If you want to do a week in the mountains for food and lodging, give me a ring—otherwise, your career in astro biz is finito, if you catch my drift

Jay Jacobs New York, N.Y.

Sirs.

Oh, beware the beast of the highheeled feet—clickedy, clickedy, clickedy, cleet.

Dean Martin Las Vegas, Nev.

Dear Debby: I am a twenty-six-yearold mother who is about to come to her wit's end. It's because of our two boys, ages four and six. They are almost unbearable to live with. They won't do a thing I tell them and they are, by degrees, wrecking our house. And our nerves along with it. They pour honey on all of the doorknobs; they steal the food from the icebox and bury it in the back yard; they find animals that have been run over and put their bodies in our bed; when they're in crowds, they pull down their clothes and mess. I'm absolutely lost for a solution. I've walloped them until I thought my hand would break. And when their father comes home, he wallops them, but it never does any

Last week, as a final resort, my husband and I sat them down and told them that if they didn't behave, we were going to send them to an orphanage in Rangoon. For a while it seemed to work. They minded what they were told. I was so relieved and that's when I made the mistake and let down my guard. I was taking a shower and my mind was empty of all this turmoil. I thought I heard something but I didn't pay it any attention. Then in one instant, through the shower curtain I saw an enormous silhouette of a man. The curtain was pulled back and a huge carving knife was arched over me. I collapsed shrieking into the corner. It was the two boys. One on the other's shoulders. I took out after them, Debby, and I grabbed a breadboard on the way. I beat them with that breadboard until I dropped from exhaustion.

I just don't know what to do.

Doris Richards Bluefield, W.V.

How very unpleasant.

Dear Debbie: My parents fight all the time and it makes me very unhappy. I love them both so much. They used to just fight when my daddy would come home from work but now my daddy is home all the time because his boss punched him in the eye. My daddy is very sick and has to take a lot of medicine and it makes him act funny. My mommy must have caught what my daddy has because I see her take a lot of daddy's medicine.

Every night when I say my prayers I pray to God to make my mommy and daddy all better so they will stop fighting. I love them both and it is awful when they fight.

> Timmy Nurock Denver, Colorado

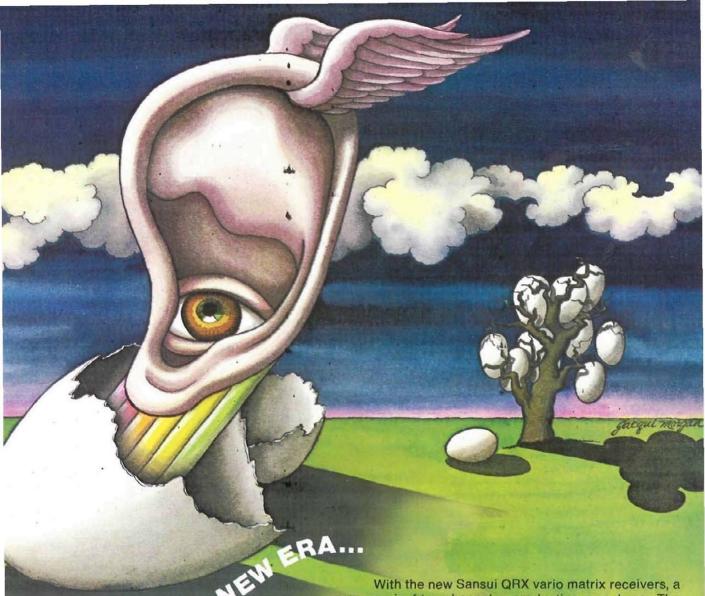

Young man, you spelled my name D-e-b-i-e. My name is spelled D-e-b-

Dear Debby: My married sister, and only relative, was killed in a tragic car accident one month ago. The only thing to be thankful for, it seems, is that she and her husband didn't have any young ones. The funeral was quite an ordeal but my brother-in-law took it bravely, and held up remarkably well. He gave me comfort when I thought it should be the other way around.

continued on page 31

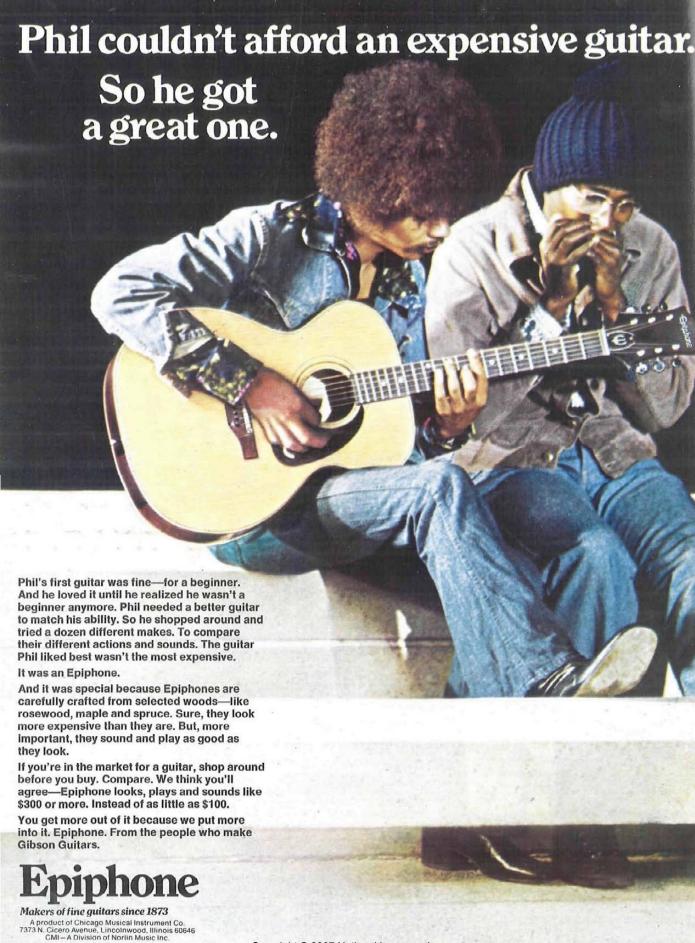

With the new Sansui QRX vario matrix receivers, a new era in four channel reproduction was born. The QRX-5500 allows for total control of the most breathtaking four channel sound ever produced. Only Sansui's QS vario matrix circuitry gives you true QS four channel, synthesized four channel from a two channel source, and SQ with true fidelity. The QRX-5500 also handles discrete sources such as demodulated CD-4 and discrete tape. Hear the new age of sound at your franchised Sansui dealer.

continued from page 28

Two weeks after the funeral, I got the shock of my life. My brother-in-law remarried. It was tasteless enough not bothering to wait a respectable amount of time, but compounded to that, he married a woman who could only be described as a ill-tempered slut. I know it's a strong thing to say about somebody, but it's the only word I can find to aptly define her. She walks around the house all day in her underwear, she's put mirrors on all of the ceilings, she's always eating candy, she uses language that would make a sailor cringe, and she's taken all of my late sister's McMullen blouses and cut them up so they can show all of her cleavage. It's disgraceful. I just can't understand my brother-in-law. It makes me sick.

Alice Poster Southhampton, New York That's quite unfortunate.

Dear Debby: I am a homosexual. I am neither ashamed nor proud. It is simply what I am. I don't foster my preferences on other people and I don't want them to foster theirs on me. I am quite content. I have as many "straight" friends as I do "gay" friends. If you were to meet me, you would see nothing in my speech or manner that would indicate to you that I am a homosexual. And this, I

guess, is where my problem comes in. I have a very good civilian job as an engineer on an Army installation. I enjoy my work and get along well with everyone there. Especially my supervisor. We have become close friends over the past years. He doesn't know that I am a homosexual, and consequently, he and his wife are always trying to "fix" me up with single girls they know. It's not a comfortable situation, I feel obliged, naturally, to follow through by asking the girls out a few times. Then I have to make up some excuse to him about "things not working out." I feel we are good enough friends that I could tell him the truth and that he would understand. But if I do, it might somehow change our relationship.

I have no one I can turn to for advice, so that's why I'm turning to you.

Name Withheld Upon Request Debby does not withhold names upon request. Your name is David Shapiro and you live at 5645 Richmond Court, Baltimore, Maryland.

Confidential to All Washed Up: Dame Fortune certainly isn't smiling on you, is she?

Is something troubling you? Then don't hesitate to "Tell Debby" in care of this magazine. \Box

"In the hustle and bustle of our modern fast-moving world of today, who among us has the leisure for things that take too much time? For example, take reading and thinking, two activities which may have been popular in the olden days of Victorian times, but have no place in the active schedule of the modern person of

So begins the prize-winning entry of seventeen-year-old Debbie Anne Porlock of Brockville, Ontario, in the Canadian Government-sponsored essay contest, "What the Reader's Digest and Time Magazine Mean to Me."

"For people who don't have the opportunity or ability to read, the Digest is a valuable tool for information, facts and humour," Debbie Anne continues. "Also, for those too busy to and the arts, Time magazine is essential as well."

To which we can only add, "Well said, Debbie Anne, and congratulations on winning a weekend in fabulous New York City!"

The essay contest was just one of a series of federal government responses to certain frenzied outbursts of illadvised nationalism (see "Canada's Frenzied Outburst of Ill-advised Nationalism," Reader's Digest, Jan. '74), possibly fomented by sinister foreign elements (see "Commie Canuck-Vodka on Ice?" Time magazine, Jan. 15, '74). A noisy minority of hotheads has suggested repeal of the legally established laws whereby Time and the Digest are treated, for taxation and advertising purposes, as if they were Canadian publications. In return, the two periodicals print several pages on matters Canadian every year.

Now, just because Canada has an unwritten constitution, that's no reason to think freedom of the press (except in the event of a national crisis like the Frenchies in Quebec acting up or something) doesn't apply in the country once so aptly dubbed "The Linchpin of Democracy."

So we can rest assured that the influence of common sense Canadian businessmen, who realize that the form their own opinions about politics U.S. of A. is Canada's leading market for such hard-to-sell products as oil. paper, and wheat, will prevail, and the two above mentioned magazines will retain their rights to tell the Canadian public about their native land from an objective, American point of view.

All we at the National Lampoon are asking for is the same fair shake. Henceforward, this column will be a regular feature of our fun-filled periodical, right up in the front of the book where Time puts its Canadian section. (But ours will appear in the U.S. edition as well.)

So get out your advertising dollar, Monsier Bombardier Ski-Doo! Labatt, we are here! Export A, we're ready and willing to flog your fabulous fags

a mare usque etcetera!

Every issue will now contain a bumper crop of Grade A Canadian humour, transported across the longest indefensible border in the world. For example:

A Russian, a Mexican, and a Canadian go into the bar in Halifax. The Russian orders, "Giff me a wodka!" The Mexican says, of course, "Geeve me a tequila, por favor." And the Canadian says, "Make mine rye and ginger."

"I'm sorry," says the bartender, "but we've exported all our rye." So the Canadian guy says, "Okay, I'll just have a glass of milk."

And, although the purpose of this column will be to entertain, we wouldn't mind if it served to enlighten our readers about a great nation with which many of them have only a superficial familiarity.

The crass ignorance of some tourists is astounding. It is a commonplace source of embarrassment to see Manitobans driving into North Dakota in January with water skis on the roofs of their cars. Hundreds of loudmouth Canucks visit Louisiana every year without the faintest idea that the natives speak French. Thoughtless seasonal visitors from Quebec have wreaked havoc with the natural beauties of resorts like Old Orchard Beach, New Jersey. And the sight and sound of a camera-toting rube in a vivid plaid Viyella shirt asking a clerk in Tiffany's, "What's that worth in real money?" is enough to set one's blood aboil.

So, in the coming months, if we can raise a smile or two, while making the point that, no, Americans are not "just like us Canadians, except they don't have a Queen," and if we can snaffle up our share of the tax deductible Canadian tax dollar, why, we'll be as happy as the editorial writer who thought up the slogan for the Montreal Gazette: "Canada's oldest newspaper, founded by Benjamin Franklin."

Get my drift?

First we show you how to pick up girls. Pick up girls anywhere! On bars, buses, trains, even on the

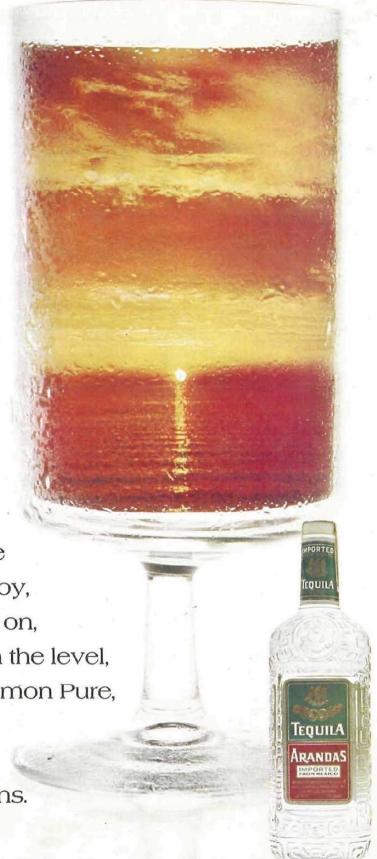

street! It's easier than you ever dreamed.
You will learn more than 100 surefire techniques: How to make shyness work for you
 Why a man doesn't have to be good-looking . Why girls get horny . 50 great opening lines . World's greatest pick up technique . How to get women to pick you up • How to succeed in singles' bars. HOW TO PICK UP GIRLS contains in-depth interviews with 25 beautiful girls. They tell you exactly what it takes to pick them up. Send for How to Pick Up Girls today and pick up any girl you want. Send only \$7.95 plus 75c postage and handling to: The Northern Valley Co., Dept. 88, PO Box 515, Tenafly, NJ 07670

(Both books only \$15.25 + 75c postage and handling.)

Discover great pick up spots within 5 miles of your own home! Maybe you never knew these places existed, but they're jam-packed with good-looking local women. "Great on business trips!" Steve Tuttle Find out hundreds of nurses, models, and stewardesses really hang out in: Atlanta, Baltimore, Berkeley, Boston, Chicago, Cincinnati, Cleveland, Dallas, Denver, Detroit, Houston, Las Vegas, LA, Louisville, Miami, Milwaukee, Minneapolis, NYC, New Orleans, Phila., Phoenix, Portland, St. Louis, San Francisco, Seattle, Washington, DC. "Over 900 Super Action Spots!" Book gives you name. Book gives you name address, and in-depth description of more than 900 SUPER ACTION SPOTS where girls are so liberated you can often sleep with them the same night you meet. Send for AMERICA'S BEST PICK UP SPOTS today. Send only \$7.95 plus 75c postage and handling to: The Northern Valley Co., Dept. IB, PO Box 515, Tenafly, NJ 07670 (Both books only \$15.25 + 75c postage and handling.)

32 NATIONAL LAMPOON

Arandas
Captures a
True Sunrise
for those who are
into the real McCoy,
the legit, the right on,
coming clean, on the level,
straight goods, Simon Pure,
in the groove,
and all kinds
of sweet vibrations.

Taste the Sun! Just pour $1\frac{1}{2}$ ounces Arandas Tequila and 4 ounces orange juice into a tall ice-filled glass. Stir. Add $\frac{3}{4}$ oz. grenadine (more or less) and a squeeze of fresh lime, then drop the lime wedge right in. Now you have a True Sunrise...and nothing can outshine it.

The Long and the Shortage of It

by Gerald Sussman

There will soon be a shortage of almost everything. There may still be enough dry cleaning bags, Velcro, and wood calendars that look like brainteasing parlor games—but most of the stuff you've always taken for granted will all be gone within six months to a year. Many items have already disappeared. You're getting excuses from merchants like "we're temporarily out of stock" or "our order should be in any day now." Weeks go by and no order. P.S.—the order will never arrive.

The oil crisis has been a lifesaver to the thousands of other industries caught in shortages. They've used the oil publicity to muffle their own problems. But the public can't be fooled forever. Those little stories tucked away in the back pages of the Wall Street Journal and the New York Times are getting bigger and coming to the front. Oh, there's an obvious reason for the shortages-the population explosion has caused a thousandfold increase in consumer demands. But we've done our own investigations analyzing all the available data, talking with many sources close to the top. What we've discovered is not going to sit well with the American public. Things are going to get a lot worse before they get better. You might as well hear the bad news now.

To begin, there are practically no styptic pencils left. You will just have to shave without them, becoming a sitting duck for deep razor cuts. Ironically, while we developed sharper and sharper blades, double-edged and triple-edged and God knows what else, we fell completely behind in styptic pencil technology. It will be easier than ever to cut yourself and harder than ever to stop the bleeding.

Why are there no styptic pencils? Simple. There is an acute shortage of styp. Thanks to our overzealous conservationists, styp mining has been banned in every state in the union. For the past five years we've been completely dependent on Syria for our supply. And that honeymoon is over. Not that Syria is blessed with a mother lode either. High-grade styp ore is now almost inaccessible and becoming terribly expensive to mine.

"It comes from the bowels of the earth," said a bitter spokesman for U.S. Styp, the billion dollar styp empire that is now bankrupt.

Old styptic pencils have already become treasured antiques. Shriveled, brittle pencils are now commanding up to \$900 in nostalgia shops. At a Parke-Bernet auction, a rare, jumbosize stippled pencil in an isinglass case, made by the Utica Shaving Supply Company, sold for \$2,500.

Trying to make do without styptic pencils will not be as easy as you think. How about the old patches of toilet paper on the cuts trick, you may say. Fine. Waste gobs of your two-ply toilet paper on your face. It just so happens that supplies of two-ply toilet paper are exhausted. In fact, supplies of two-ply everything are exhausted and one-ply has about six months to go. The only ply paper left will be for the military. You better get used to watching yourself bleed until you clot. Hemophilic jokes will make a strong comeback, we're sure.

You might as well say good-bye to one of the great American traditions—the minstrel show. There is very little blackface left. And without blackface, this beloved native art form will soon be just another link to our glorious past that will be broken.

Everyone is feeling the pinch, from local theater clubs, YMCAs, and church groups trying to raise badly needed funds with minstrel shows, to comedians and singers in Las Vegas who do Al Jolson takeoffs. A woman who lives in Mound City, Kansas, summed it up in a letter which she wrote to Shortage Magazine (which recently suspended publication due to a lack of paper), in which she complained about the sorry state of the last Oddfellows Lodge minstrel show. "They used black shoe polish," she wrote. "It was vulgar . . . a hollow sham . . . a mockery of my childhood memories as a performer. No one has any feeling for tradition anymore."

How did we allow ourselves to get into this mess? We did it by making the biggest blackface deal in history with the Russians, a deal that made the wheat sale look like a bubble gum card trade.

It turns out that about 90 percent of our blackface is controlled by six giant corporations. Acting with full cooperation from government officials who would do anything to beef up our trade balance, these corporations sold almost all of their 1973 output. They also sold all of their reserves, grossly underestimating the growing blackface demand in the U.S. The huge Russian market—with the world's largest Caucasian population-was too big to ignore. A few insiders who speculated in blackface futures got very rich. The rest of us, who need to put on minstrel shows for so many worthwhile causes, must now do without blackface or pay outrageously high prices on "imported" makeup.

The usual outcries and denunciations are now being heard. Pundits of the Left, Right, and Middle are calling for investigations and resignations. The President has finally appointed a distinguished Blackface Commission* to study alternate possibilities—synthetic substitutes, drilling for offshore deposits, even trying moon rock.

Frozen fish sticks, that popular dinner time treat, will no longer be available. The once plentiful stickfish has disappeared, thanks to the Russians again.

The stickfish looks exactly like a fish stick. It has no head, tail, or hones. Its surface is covered with a bread crumb-like material instead of scales, so it goes directly from ocean to factory as it is, to be deep fried and frozen.

It's an extremely meek and passive fish that gets its nickname, "old stickin-the-mud," from its habit of burying itself in the ocean floor. To catch them you have to scoop up a lot of floor.

As far as we can determine, the stickfish were so terrified of the new Russian electronic fish catching equipment that they began a mass exodus deep into the floors of the Atlantic to avoid certain fishocide. The few curious ones who went up to have a look around were, of course, zapped

continued

The President's obvious disdain for the problem is illustrated by the fact that all the members of the Commission are prominent blackface corporation executives. It's a set-up similar to, say, appointing Martin Bormann to head up the Nazi War Crimes Commission.

by the Russian's radar-controlled steam shovels.

A group of concerned fish stick manufacturers, including Mrs. Paul herself, appealed to the Russians. But they treated it as just another fish poaching incident, though they did claim that they tried to talk to the stickfish. "We even offered them caviar," said a Russian spokesman, "But they wouldn't come out."

"We could use some of the new psychological techniques to coax them out," admitted Mrs. Paul. "Then we'd have to give them shock treatments at the factory to erase their traumatic experiences. I'm not sure if it's worth all the extra expense. You see, we can't freeze them in their traumatic state. A frightened stickfish tastes like rice pudding, which is not what the public wants in a fish stick."

Brace yourself for the fact that those beautiful gift boxes that hold pen and pencil sets, watches, and jewelry will soon be gone forever. Gift giving will never be the same. Can you imagine giving someone a Benrus Citation calendar watch in a paper bag? (And while you're at it, forget paper bags. They're not going to be available much longer either.) You'll just have to keep the watch in your pocket and slip it to your loved one

YOU'VE JUST **FOUND** THE SPEAKERS . . . You Thought You'd Never Find! RSL, THE FASTEST GROWING **BRAND AMONG PROFESSIONALS** SOUND BETTER THAN COMPETING BRANDS. They would be very expensive except that you may purchase them directly from the factory, saving about one-half! **GET OUR CATALOG** without hardly lifting a finger! as if it were a hot item you bought from a street corner sharpie.

The thought of no gift boxes for Cross sterling silver or gold matching pen and pencil sets or the Christian Dior watch collection from Bulova is actually quite frightening. It symbolizes so much of what this world is coming to-another civilized touch snatched from us as we march mindlessly on the road to barbarity. We always took it for granted that our good taste in watches and pen and pencil sets would be reflected by a tasteful gift box. It was one of the little amenities—the extra touch that showed we cared. And now it's all

How did it happen? Why are we confronted with a crisis like this with hardly any advance warning? It's the same old problem—the decline of old

world craftsmanship.

If you examine a gift box carefully you'll note that it's made of leatherette, a simulation of leather that is so painstakingly done that you can't tell it from the real thing. The familiar maroon leatherette gift box with gold gilt trim has long been the exclusive work of proud, highly skilled leatheretters from Vienna. Most of these men are dying off or have retired, and of course, their sons are not interested in taking their places. "They don't have the pride to work on something that will someday hold a beautiful watch or a fountain pen," said one of the leather etters, "The little ones don't care about such things. An empty box does not inspire them. They will take the gift, but they throw the box away. They would rather go to Germany and work in a record store."

We were privileged to watch one of these great craftsmen doing one of his last gift box runs, or laufs, as they are called. We discovered that leatherette is just a convenient name for this incredible leather-like material. "Leatherette" is actually made of tomatoes, so artfully processed that you couldn't detect its vegetable ancestry in a million years. Amazing. And amazing, too, is the productivity of this handful of old-world craftsmen. Despite all the care these men lavish on a gift box, they can still turn out over five hun-

dred boxes an hour!

To put the nail in the coffin of the gift box, there is now also a growing shortage of gift box lining material that silky, smooth fabric with the look of fine rayon, but a little stiffer and more crinkly to the touch. This material is a rayon by-product called flog. With the critical rayon shortage, you're obviously not going to get much flog for processing into gift box linings.

The rayon shortage is also responsible for the impending label shortage. If you're buying a pair of Bill Blass lounging pajamas or an Yves St. Laurent ensemble, you'll have to find a way to drop the names casually rather than letting the labels show. A lot of people are going to be more upset about the label shortage than the gift box shortage.

One of the most alarming problems we are going to face is the shortage of nondairy dairy products. We're down to our last reserves, and then there's nothing. Luckily for us, the big Reddi-Wip deal with the Chinese fell through at the last minute, or we would have been without dessert topping months ago. But it won't be long before Reddi-Wip, Cool Whip, Coffee-Mate, Cremora—all the whips and mates and low calory nondairy cheeses-even margarines-will be gone.

The facts are simple. Nondairy dairy products are made from vegetable oils and artificial flavorings (let's skip the chemicals, which needn't concern us here). Contrary to popular belief, we import all of our vegetable oil. And it all comes from the Middle East. Despite frequent warnings from experts that the Arabs might restrict our vegetable oil imports, the President did not act to find substitutes. Call it colossal bungling or monumental arrogance or overconfidence, but the President and his closest advisers thought that vegetable oils would always be available from somewhere. And you can use any kind of oil to make nondairy dairy products.

But the big vegetable oil pipelines were almost dry. Jute, flax, and hemp supplies were no better. India had her own problems with a copra crisis, and Nigeria and the other Third World African nations sided with the Arabs and refused to send us palm or rapeseed oil. And so the Americans were never really alerted to this impending crisis (a crisis that also means the end of salad dressings, shortening for breads and cakes, snack foods, soaps, gravies, and many other products we are not allowed to name for fear of a

law suit).

Sources close to the President say that he will make a television appearance within the next thirty days to discuss the problem. He will not plead for a cutback (you can't cut 15 percent of nothing), but rather outline a broad World War II-style austerity program called "Operation Old-fashioned, Simple American Way of Life." To set the proper example, he will eat a bowl of strawberry Jello without his usual nondairy dairy-style dessert topping.

Meanwhile, back at the labs, we're coming to the conclusion that we'll

"A world where yesterday's aspirations take a leap into tomorrow's greed, right now!"

ake a leap into tomorrow's greed, right now!"

W. Hawley Smoot, Chairman, The Stupid Group.

W. Hawley Smoot, Chairman, The Stupid Group. One of the West Stupid Group.

Who are we?

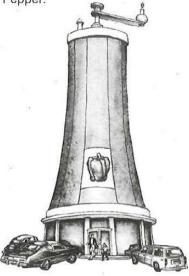

We're the anytime spend-lure! We're Stupidcard-the revolutionary new total credit system that lets you spend money you'll never have-right now! An intriguing cyclical charge feature allows us to charge you over and over againeven if you never made the purchase to begin with! A "limited liability" feature insures that, should your Stupidcard fall into the wrong hands, you'll be charged for every single penny the malefactor runs up! Right now! In advance! And you can use your Stupidcard in so many ways! If, for instance, you are forced into receivership, or if (when we take you to court), you face a stiff fine, just shout, "Charge it!" We'll be happy to bill you right now! Stupidcard stands behind you. And we stand behind Stupidcard.

YOUR STUPID NAME

Who are we? We're a step-out meal-lure! We're Tower of Pepper, the country's fastest-growing slow-food franchise chain. You've seen them —on trashy highways and in blighted urban areas-the tall, distinctive, papier-mâché pepper mills where irresponsible families just like yours queue up for our famous pepper treats. Black, white, or costly cayenne, it makes no difference what you order, because the secret is in the incredibly slow service! You'd think, considering how long it takes, that we'd be serving high-quality, fresh-ground pepper, but the joke's on you! It's low-cost flavored silt!

Tower of Pepper stands behind you.

And we stand behind Tower of Pepper.

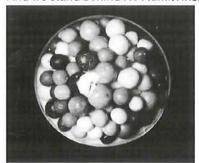

Who are we?

We're a whole new way to keep medicine out of the hands of your children.

We're **No AdmitTins**, the safetytime pill tin. No AdmitTins has developed a sturdy, dependable lucite container without a top so that potentially harmful medicine stays inside, where it belongs, away from precious baby. No AdmitTins comes in five striking colors to match the decor of any layette and costs just as much as accessible medicine.

No AdmitTins stands behind you. And we stand behind No AdmitTins.

Who are we? We're an artificial leg-lure.

We're **P'eggs**, the exciting panty-hose designed for the gal with "problem" legs. How do our P'eggs fit your pegs? Exactly! P'eggs stand behind you. And we stand behind P'eggs.

Who are we? We're a leisure-time fun-lure.

Our Bureaucrackers division makes **Ennuitos**, the nasty little snack treat that bites you back. . . . A unique blend of fibrous fillers woven into crunchy morsels the size of an airmail stamp, Ennuitos have the famous "morning after" aftertaste that makes them the only crackers especially designed for boring cocktail parties. Ennuitos stand behind you. Bureaucrackers stands behind

Ennuitos. And we stand behind Bureaucrackers.

TheStupidGroup

Who are we? We're a treat-time sweet-lure! We're **Dumbwhip**, the loathsome dessert topping you can use to inflate your tires. Dumbwhip takes the "dairy" out of nondairy dessert treats. There is nothing in Dumbwhip that even faintly resembles anything occurring (organically or inorganically) in nature, Isn't that reassuring? And while every harmful nutrient has been scientifically removed from Dumbwhip, it's loaded with the artificial fatteners you crave! And expensive! Dumbwhip costs two or three times as much as cream!

Dumbwhip stands behind you. And we stand behind Dumbwhip.

Who are we? We're a travel-time trip-lure. We're Lug-A-Round bulky luggage, the weighted luggage with the patented "pop-open!" lock (guaranteed to make even the smallest thief giggle with contempt), and the famous "give-way" handle—the handle scientifically patterned after a test-pilot's ejection seat. Lug-A-Round luggage features "non-retentive memory" construction so that when you dent the sides of a piece of Lug-A-Round luggage, it stays dented. And, of course, our famous weight makes Lug-A-Round the luggage that makes you want to stay home. Lug-A-Round weighted luggage stands behind you. And we stand behind Lug-A-Round.

Who are we? We're a party-time dress-up!

We're Jejeuna® and Blandon®, the lemon-flavored fabrics from Saturn that make you glad to be here on Earth! Jejeuna@-with the subtle texture of linoleum, but none of the upkeep-gives your hostess gown all the sparkle of a spanking new bathroom floor! More and more, you'll find Jejeuna® in everything you wear-and everything you wear out, too, because Jejeuna® has the life-span of a mayfly! And don't forget Blandon®, the rubbery substance that's perfect as a housepaint or a raincoat. Blandon® pops up everywhere—from pot roasts to golf mittens—because its uniquely unstable molecular structure keeps on changing its mind!

Jejeuna® and Blandon® stand behind you.

And we stand behind Jejeuna® and Blandon®.

Who are we?

There's so much more!

We're a highway rest-lure! We're Crasscourts, the coast-to-coast chain of appalling motels. . . . We're a death-time tomb-lure. We're Crasscourts Gardens-the cemetery franchise chain with a motel-like atmosphere. . . . We're media-we're Stupid News and World Report, we're Stupid Hairdo Magazine, we're Stupidités (the most beautiful stupid magazine in the world), we're Stupid Homes and Gardens, we're Stupid Stories, Stupid Screen, Stupid Detective. We're Stupidity Today. We're Stupid Digest and Selections del Stupid Digest.

And that's not all. We're *Daft* brand comfort tissue. We're sugar-slathered *Corn-Duds*, the nutritionless

breakfast sensation. We're *Imbecil*, the semi-suppressant cough-remedy-like medicine. And we're the exclusive importers of *Kakka*, the Greek olive liqueur, *Repulznaya*, the fabled vodka of the Polish Corridor, and *Aneurin Bevin Old Backbench* scotch whiskey.

We're new gray *Tepid*, the gritty, sudsless detergent that gives your clothes a once-over wishy-wash in penny-saving lukewarm water. . . . We're *Shop Steward—Labor Union in a Drum* household products—thirty-six separate cleansers in individual containers. A specially formulated cleaning compound for every cleaning chore around your house, from bathroom bowl to messy dog dish. Each one does the clean-up job it's meant for! And nothing else!

For the man of the house, we're the Merv Griffin wardrobe, featuring wash-and-weary Permawrinkle suits made of quintuple-knit Banalon, and *Hackney* slacks. We're also *Twit* brand men's toiletries, and *Old Stilton*, the aftershave with a fresh hint of cheese.

For milady, we're *Plain Janes*, the fabulous collection of custommass-produced clothes designed by Walter Gropius, and Andy Granatelli signature scarves. We're also *Nondescriptique* cosmetics, *Drab Lash* eye makeup, and *Furtiv* feminine hygiene spray, with a fresh hint of cheese.

We're *Cloyettes*, the purse and pocket-sized breath freshener that looks like a poker chip, tastes like a mothball

We're Ashtré sachets, the closet and drawer odorizer with just a whiff of old cigarette smoke. We're Jeez, the industrial strength cheese dip, and R.S.V.P. reusable crackers.

For the kitchen, we're Dip 'n' Flip, the gravy-like caulking mixture that turns roasts into conversation pieces, and the whole host of handy Cook 'n' Eat canned goods. We're Deadpan, the greaseless, silicone-based cooking substance. And we're Atomrange Gammaray ovens—the frankly terrifying stove that cooks foods in just seconds and gives them a festive party glow.

La Garage A totally new concept in stupid living.... What you've always been looking for -- a place to "park" in the city....

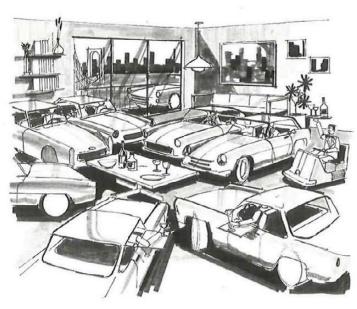

From the moment you drive through the excitingly decorated lobby and into one of the three exclusive, over-sized, vertical conveyances, you know that this is more than just another apartment building—it's a unique domiciliary edifice. Built expressly for those whose motive in seeking a residence is *auto*-motive, La Garage offers a distinguished location for you and your motorcar amid surroundings of unparalleled luxury, charm, and elegance. No longer need the truly discerning city-dweller who desires the considerable advantages of an urban setting sacrifice the comfort, convenience, and security of his private automobile—or undertake the expense of maintaining a second town residence for the convenience. Matical Lampoon Inc.

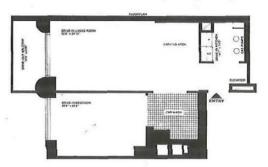

renderings by Ivan Lacher

The Stupid Group

La Garage—the very name, coming as it does from "ga-rand house of the rajahs"—suggests matchless regal quality, and above all, the extraordinary effortlessness of this unusual residential structure. Whether it's a short drive to the refrigerator for a snack, or a late night sojourn to ride the dog around the block, or a longer trip downtown to the cultural and entertainment riches that lie a mere parcel post zone away, the owner of a La Garage Cardominium can join his acquaintances in congratulating himself on his discrimination and sophistication in selecting a mode of living that combines the old world style of a prince's palace with the modern efficiency of a parking lot.

Consider these stupid features. . . .

Elegant all-glass windows through which you can look and manually position in any one of many comfort apertures for the individual climate characteristic of your choice. . . . Flush, soundless doors which you can open or close with a feather-light turn of the special command knob . . lock and unlock with a custom-cut control key made expressly for you. . . . Every apartment is fully equipped with four walls to insure privacy . . .

a sumptuous ceiling for added security . . . a fabulous form-fitted floor for carefree walking, standing, or sitting. . . . Outlets for your own personal long-distance communication device. . . Individualized light control modules which allow you at the flick of a finger to select luxurious light—or romantic darkness. . . Deluxe water temperature and volume regulator dials on all sinks, showers, and baths. . . Cable electricity in every room. . . . For your total breathing pleasure, posh oxygen and charming nitrogen fill every part of your residence. . . . Powerful, handy gravity in each apartment to keep furniture in place. . . . Outside—unique streets along which you will ride towards your exclusive address registered with the United States Post Office—an address you'll share with only a few other individuals whose taste and discrimination matches your own. . . . Inside—a striking, centrally located front door which you can use to enter—and exit—at your slightest whim.

TheStupidGroup

Who are we?

We're **Stupidflair Customchex**—a new way to participate in the total banking experience, an individual expression of your creative drive—as personal as your social security number! Choose from five Stupidflair checks in the "Banking Perspectives" series, then mix and match with a personal customized checkbook in sleek, hurricane-tested Blandon® for a triumphant exaltation of self as satisfying as a handwoven rug!

At a time when so many of our traditional American values have gone down the tubes, aren't you glad we have Stupidflair Customchex?

(D) pronounced: lisp

(E) amusing: limp

STOP!

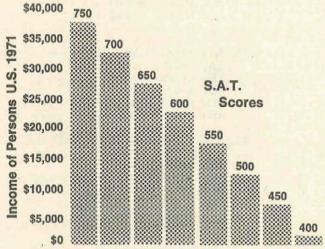

If you finish before time is up, go over your work for this section only. Do not turn to any other section of the test.

SECTION II: MATH ABILITY Time-40 minutes 16 Questions

DIRECTIONS: Solve each problem in this section and then mark your answer sheet under the corresponding letter with the *one* correct answer. You may use any available space on the pages in this section for scratchwork.

You may wish to refer to some of the information given below in solving some of the problems in this test.

1 chain = 66 feet 1 fathom = 6 feet 1 ell = 39.37 inches 1 rod = 16.5 feet 1 hectare = 10,000 square ells 1 hogshead = 63 gallons 1 peck = 8 quarts 1 gill = 4 fluid ounces

Annual Income According to S.A.T. Test Scores

- What was the approximate ratio in 1971 of the income of the highest-scoring group to that of the lowest-scoring group?
 - (A) 2:1
 - (B) 3:1
 - (C) 5:1
 - (D) 10:1
 - (E) 7:1
- 2. If the same salaries remained constant for 10 years, by 1981, how much more money would the highestscoring group have earned than the lowest-scoring group?
 - (A) \$100,000
 - (B) \$240,000
 - (C) \$400,000
 - (D) \$375,000
 - (E) \$520,000
- According to the graph, approximately how much is a single point of S.A.T. test score worth every year?
 - (A) \$45.00
 - (B) \$75.00 (C) \$30.00

- (D) \$135.00
- (E) \$50.00
- 4. The star Epsilon Eridani is 174 light years from Earth. A spaceship leaves Earth and reaches Epsilon Eridani in 98.4 years. What is the speed of the spaceship in furlongs per fortnight?
 - (A) 100,000,000
 - (B) 450,000,000
 - (C) 54,000,000,000
 - (D) 7,800,000,000
 - (E) 66,000,000
- 5. If px = ty and xp + yt = xypt, how does p change in relation to t if the value of x is quintupled in relation to the value of y?
 - (A) p is multiplied by $\sqrt{11}$
 - (B) p becomes equal to v
 - (C) p becomes equal to (a^2-b^v)
 - (D) p does not change
 - (E) p is dropped
- 6. A farmer traded 40 bushels of wheat for a boat, then put his remaining bushels in the boat and took them 14.5 miles downstream. The current in the river was 2.6 mph. When he arrived he sold the boat for \$54.67 and his remaining wheat for \$1.39 a bushel, and he then calculated that he had sold his original 40 bushels for 14¢ more than what he sold the rest of his wheat for, considering the sale price of the boat. Just to amuse himself, the rural Lobachevsky decided to calculate how much per hour he had made while he was in the boat. What was his answer?
 - (A) 45¢
 - (B) 78¢
 - (C) \$1.09
 - (D) 88¢
 - (E) \$3.44
- 7. Alice weighs nearly forty pounds more than Henry. If Henry eats twenty pounds of lard a day, he can gain three pounds a week. If Alice gives her portion of lard to Henry and eats safflower oil instead, she will lose one pound a week. In assessing the relative weight of Henry and Alice, what exactly did we mean by the phrase "nearly forty pounds"?
 - (A) 41 pounds
 - (B) 39 pounds
 - (C) 3 stone
 - (D) 38 pounds, 11 ounces
 - (E) 619 ounces
- 8. Every time Bill scratches his fingernails down a blackboard, he takes off 1/128" of fingernail. Bill's fingernails grow at the rate of 1/40" per week. Remembering that Bill is only in the school where the blackboard he scratches his fingernails down is located 5 days out of the week, what is the maximum number of times each day Bill can scratch his fingernails down a blackboard without reducing the total length of his nails in any given week?
 - (A) 7
 - (B) 5
 - (C) 2 (D) 9
 - (E) 11
 - (11)

9. Which of the following statements is (are) true for all real values of x and y?

I. x: "x + y" = y : "x?"II. $x: "x! \bullet X!" = y: "x \dots b?"$ III. $x: "@\% \# @+ \phi * * !" = y: "69!"$

- (A) I only (B) II only
- (C) I and II only
- (D) I. II, and III (E) III only

The problems in this section are followed by four alternative answers labeled A through D. In each of the questions, you are asked to compare two quantities—the one in Column A with the one in Column B. Through observation or computation, you are to determine the relationship between the two quantities and choose

- (A) if the quantity in Column A is greater than that in Column B
- (B) if the quantity in Column B is greater than that in Column A
- (C) if the quantities in the two columns are equal
- (D) if the comparison cannot be determined from the information given

Column A Column B 10. $p^2 \mathcal{N}(p-t) \mathcal{Z}/rsqv$ $pv \triangle (p^3+3pq+q^4)$ f abcdef

12. Length of arc AB

Length of segment FG

Each of the questions in this section has two statements, labeled (1) and (2), in which specific data are given. DO NOT compute an answer; instead, determine if the given data are sufficient to find a solution. Fill in space

- (A) if statement (1) ALONE is sufficient, but statement (2) ALONE is not sufficient to answer the question
- (B) if statement (2) ALONE is sufficient, but statement (1) ALONE is not sufficient to answer the question
- (C) if BOTH statements (1) and (2) TO-GETHER are sufficient to answer the question, but NEITHER statement ALONE is sufficient
- (D) if EACH statement ALONE is sufficient to answer the question
- (E) if statements (1) and (2) TOGETHER are NOT sufficient to answer the question
- Three men walk from Cowtown to Mootown. (Note funny names; as testers, we are stern, but wry.) Man A walks at 3 mph, man B at 4 mph, and man C at 6 mph.
 - (1) Man A arrives 13 minutes before man C
 - (2) Mootown is a dump
- 14. How many students in Ruth's class received over 80 on the math test?
 - (1) The sum of the marks of all those taking the test was 4500
 - (2) Ten children who have been classified as legally stupid spent the day filling in potholes on the state highway instead of taking the test
- 15. George, Doug, and Henry wrote 4,000 words together. How much did Doug write?
 - (1) George and Henry together wrote 100 times as much as Doug
 - (2) The sum of what George and Henry wrote minus what Doug wrote is less than half of what George wrote
- 16. A certain number; k, is a member of the set [4, 9, 16, 25, 36]. If the set were complete, it would be worth \$1,000 in any antique shop in town, but k is broken, and the set is now worth only \$250. What is k?
 - (1) A good 16 in mint condition would bring around \$75
 - (2) The 25 has a hairline crack and a little chip on the top of the 2

If you finish before time is up, go over your work for this section only. Do not turn to any other section of the test. Copyright © 2007 National Lampoon Inc.

SECTION III: VERBAL ABILITY Time—40 minutes 27 Questions

Part C-Sentence Completion

DIRECTIONS: In each of the following sentences, one or two words have been omitted. You are to choose the word or words that *best* fit the meaning of the sentence as a whole. *Banzai*.

1	EXAMPLE: An example of a proverb is the saying, "Never change horses in"
	(A) mid-stream
	(B) Germany (C) bed
	D) rainstorms
	(E) France
	B C D E
1	
1.	Hitler's acts eventually inflamed the
	of almost everyone in the civilized
	world.
	(A) first critics
	(B) circus curiosity
	(C) sexualorgans
	(D) magic oo's and ah's
	(D) whimsicalfunny bone
2.	Although it is morallyto commit sui-
4.	cide, still one can sympathize with the poor wretch
	who through his own has suffered a
	dismal failure too bitter to live with,
	(A) incorrect foolishness
	(B) stupidstupidity
	(C) weak puniness
	(D) pathetic clumsiness
	(E) wrongidiocy
0	Ti
3.	Few politicans have the to be ,
	preferring instead to make the popular gesture. (A) wardrobetransvestites
	(B) intelligencepimps
	(C) horsepowerdump trucks
	(D) carapacescrustaceans
	(E) titsstarlets
4.	Not only does the poor studentthe
	deep shame of his lack of accomplishment, but he
	also must the agony of his friends' con-
	tempt and derision.
	(A) suffer die
	(B) undergo humiliate
	(C) torture subject
	(D) accept destroy
	(E) horrifyloathe
5.	Upon incarceration in the state penitentiary, the
0.	young conscientious objector spent much of his time
	Journ of the control
	(A) foolishly
	(B) snooping

(C) prostrated
(D) all in one place

(E) dead

6.	Just as a man who is not color-blind cannot con-
	ceive of a world without, so too
	the able individual cannot imagine the mental
	in which the slow-witted are doomed
	to eke out their joyless days.
•	(A) beautywasteland
	(B) colorswamp (C) funquagmire
	(D) lifemorass
	(E) lightdesert
7.	Despite the collapse of the Empire and an inter-
	minable period marked by continual, a
	fewmiraculously escaped destruction.
	(A) hailstorms film clips
	(B) sniffles hankies (C) bickering dishes
	(D) bummerslids
	(E) self-abuse rotarians
8.	It is not quite correct to a person of
	little academic skill an invalid, for he can move his
	arms and legs, but on the other hand, is not his
	brain a? (A) stigmatizecripple
	(B) identifybasket case
	(C) termsack
	(D) brand sewer
	(E) label casualty
9.	The old man operated hisongrounds, which brought him a great
	deal of notoriety.
	(A) campaign . moral
	(B) dodgefair
	(C) flivvercoffee
	(D) sex bomb proving
	(E) peep showplay
10.	Thanks to the rapid development of electronic edu-
	cational aids, and the commitment of substantial
	government funds to our new state schools, the
	student of today finds many choices before him.
	True, he may still wish to attend a "prestige"
	Eastern school, but he may just as well choose a
	choose to or a or he may even his degree in his own living
	room!
	(A) factory job nervous breakdown yearn for
	(B) unemployment line early marriage dream
	of
	(C) untreated illness cold beer think wistfully
	about
	(D) early gravelife worse than deathcry bitter tears over
	(E) unfurnished apartment painless form of sui-
	cide utterly useless prayers for
44	(Discotti) moderning many of testand materials
11.	The still-smoldering mass of twisted metal bore mute testimony that the had been
	made testimony that the mad been
	(A) brakeman Polish
	(B) final cataclysmsomething of a disappoint-
	ment
	(C) pilot tripping
	(D) vibrabed defective
	(E) dodge 'em suicidal

____individual complains about tests for the same reason that the dishonest merchant an accurate yardstick or a properly functioning set of scales. (A) insecure . . abhors (B) inferior . . resents (C) useless . . detests (D) unpromising . . vilifies (E) substandard . . hates 13. Since ability, talent, and ambition can be found on all social levels, it is necessary for the privileged classes to_ their hold on educational institutions so that society as a whole can prosper. (A) maintain with an iron will (B) defend to the death (C) guard fiercely (D) tighten (E) preserve with every ounce of energy 14. If your farm's resources are limited, it will not pay to raise_ ____that require(s) (A) vegetables . . psychotherapy (B) funds . . accounting (C) slaves . . meals (D) hackles . . soothing (E) cain . . prostitutes 15. Only a very_ person believes in (A) stupid . . Catholicism 16. Since the race is not always to the "swift," even superior students find it necessary totheir teachers in order to achieve the success they want. (A) suck up to (B) suck up to (C) suck up to (D) suck up to (E) suck up to 17. Upon being harnessed to the cart, the was usually_ _to trot. (A) thoroughbred . . eager (B) nun..hot (C) collaborator . . persuaded (D) paraplegic . . unable (E) messiah.. too spaced out 18. _ men often fail to recognize in their precisely those qualities which distinguish great men from_ (A) inferior . . betters . . the herd (B) loathsome . . sleep . . England (C) telephone..booths..the home office (D) dirty . . wardrobe . . mediocrities (E) impotent . . dorks . . cows Age wore on, millions of hap-19. As the_ less_ —were driven before its relentless march. (A) Ice . . surfers (B) Jazz..organ grinders

(C) Iron..wrinkles(D) Bronze..sunburns(E) Stone..alcoholics

DIRECTIONS: Each passage is followed by questions based on its content. After reading the passage, choose the *best* answer, whether stated, implied, or negated. Go.

One of the most exciting innovations in the field of education is the New English. As significant as the New Math, which revolutionized the teaching of geometry and mathematics in the early '60s, the New English promises to simplify greatly the task of teaching students a simple but workable version of the language. The New English can be used to improve reading scores and spelling ability, and may well provide future generations with a more efficient method of communication than the cumbersome, old-fashioned "chatter" we are now used to.

New English works in much the same way as New Math. The individual elements of a sentence—the verbal "formula" which conveys information to the listener or reader—are organized into "sets" and spoken or written in a way which clearly illustrates the "geometry" of what we are trying to say. For example, instead of saying, "I am very happy with my new car. It is green, which is my favorite color, and it is very fast. And I got a good deal on it," in the New English, we would say, "I (de-

gree of liking = high) my car (new + green favorite color + fast + degree of reasonableness of price = good)." Because the concepts are sensibly organized, and the mode of transmission is chosen for the maximum input of discrete informational sub-elements, the recipient of the communication "bundle" can derive an instant increment of knowledge.

The potential uses for New English are limited only by human ingenuity. To cite just a single instance, poetry, which is so often too vague or wordy to achieve a measurable emotional response quotient, can be "cleaned up" and "ordered." Thus, "Shall I compare thee to a summer's day? Thou art more lovely and more temperate" becomes "Thee are to a given day (summer's) in interrogatory comparison more (lovely + temperate)."

We can expect some resistance from stick-in-the-mud academic individuals, but the day isn't far off when everyone English (new + good + useful) $\frac{\text{speak}}{\text{future}}$!

- 20. According to the author, who is most likely to oppose the introduction of New English?
 - (A) homosexuals
 - (B) leftists
 - (C) fools
 - (D) academic individuals
 - (E) homosexual leftist fools
- 21. Why is poetry better when written in the New English?
 - (A) less confusing rhymes
 - (B) fewer frills
 - (C) appeals less to homosexuals
 - (D) more orderly
 - (E) more manly

- 22. A good title for this paragraph would be:
 - (A) The Dawning of a New Age
 - (B) Talking Sense
 - (C) Words for the Wise(D) Speaking of Progress
 - (E) The Language of Tomorrow

Now that growing numbers of high school seniors are competing for a decreasing number of college openings, "aptitude testing" has proved a useful tool for weeding out unqualified applicants to our colleges and universities. So reliable are modern testing methods that high scores on Stupid Aptitude Tests (SAT) now virtually spell the difference between a prestige Ivy League "sheepskin" and a tacky certificate from a pathetic, fourth-rate "diploma mill."

Yet, the proper techniques of test taking—as a study compiled by eminent social scientists at Beloit College confirms—are surprisingly simple and can assure success.

The first, and most important element in successful test-taking, the Beloit group found, was speed. Many doomed seniors, for example, are mistakenly wasting precious time reading this pointless, uninformative sentence word for word. Afraid to "skim" paragraphs, Billy wallows in useless verbiage, hopelessly bogged down by unilluminating redundancies, repetitions, tautologies, pleonasms, and duplicate words expressing the same stupid thought over and over again in superfluous variety. Helplessly, poor Billy slogs through "extraneous material" written by cynical pedants who sadistically "pad out" paragraphs with bland "filler" designed only to "use up" priceless seconds, possibly going so far as to, slow, down: "reading" with, useless (& annoying) ... punctuation! Whenever possible, the study revealed, Billy should skip over material like this. (Go ahead, Billy, do it right now...go into the next paragraph before it's too late.) The first or "topic" sentence usually contains the "meat" of an essay. The remaining verbiage is unlikely to contain "hard" information. One will rarely find, deep in a paragraph, reference to the fact that the diet-linked appearance of lipid plates in the blood vessels of forage-deprived elephants is usually indicative of arteriosclerosis, or to the fact that Opokopuk Islanders practice ritual warfare based on mumblety-peg and have developed a rigid caste system based on the warrior's remaining fingers and toes. Moreover, who could be expected to know that coral reefs are composed largely of calcium carbonate and magnesium carbonate? Harvard class of '78, that's who.

If he approaches the test correctly, Billy is sure to "rack up" big point totals on the SAT scoreboard of verbal ability/life, never forgetting that all reading tests must be quickly read, digested and carefully that so will not be "trapped" Billy by unclear reading fuzzy poor low score literally life or "living death."

- 23. The best title for this selection is:
 - (A) Beloit College: Harvard of America's Dairyland
 - (B) Stupid Aptitude Tests: Gateway to Self-Respect
 - (C) Presidente Muñoz Marin: George Washington of the Philippines
 - (D) Stupid Aptitude Tests: Middle Class Meal Ticket
 - (E) Eeny, Meeny, Miny, Matriculate!
- 24. In the selection above, the phrase "living death" refers to:
 - (A) arteriosclerosis
 - (B) the Aetna Insurance Building
 - (C) Beloit, Wisconsin
 - (D) eminent social scientists
 - (E) your parents
- 25. The capital of Luxembourg is:
 - (A) Luxor
 - (B) Tureen
 - (C) Arlon
 - (D) Orlon
 - (E) Dover
- 26. Each of the following is "worth big points on the scoreboard of life" except:
 - (A) calcium carbonate
 - (B) an annual income of \$25,000+
 - (C) proper drug abuse
 - (D) correct nubble hygiene
 - (E) twenty fingers and toes
- 27. The author's attitude in this selection may be best described as:
 - (A) brain damaged
 - (B) smug
 - (C) cruel
 - (D) realistic
 - (E) Harvard '68

STOP!

photos by David Kaestle, title by Michael Doret, graphics by Alan Rose, tinting by Dolores Deluxe

have to devise nondairy dairy products without oils. Somehow we're going to have to go directly to flavored solids. At the moment, our most promising solid is iron. In its crude form, iron can be artificially flavored and bleached quite easily, and has no spoilage problems. The only stumbling blocks are its weight, its lack of chewiness, and its tendency to rust. Imagine selling it as a low calory cream cheese substitute!

This is just the beginning. In every area of your life, things will get scarce and then disappear. Economists and politicians and TV anchormen can give you reasons for their disappearance, but sometimes the answers defy logic, or have a topsy-turvy logic of their own. For instance, how can you explain the growing shortage of garnishes? It won't be long before parsley and watercress, our two most popular garnishes, will be just a happy mem-

ory. Every time you had a hamburger, a grilled cheese and bacon sandwich, or Lobster Thermidor, when it came with "garni," it was a little more festive. And was it your imagination, or did that sandwich or lobster taste just a little better?

Flourides for your toothpaste will be missing by the end of the year. Flouride is a by-product of bleached flour, and the wheat shortage has caused the supply to dwindle alarm-

Stupidyorld by Ed Subitzky

The sun, which should have set hours ago, was just getting down to the horizon. As usual, I took the wrong route home and, when I finally put the right key in the lock, I realized the door had gotten too big for the frame again. I smashed against it with my shoulder and finally it gave; I tumbled into the foyer and wet flakes fell off my jacket and dotted the carpet.

"Damn summer snow," I muttered.
"Is that you?" Alice shouted from

the kitchen. "What?"

"Never mind. I forgot what I was going to say."

I wanted to sit down on my favorite chair, but I couldn't remember which one it was.

Alice came in, stirring an empty bowl, and almost kissed me on the cheek.

"I remember now," she said.
"Okay," I said. "What is it?"
"What's what?" she said.

After we ate, I lit a cigarette and took a long, lingering look at my wife. Like me, she was beginning to show the wear and tear of middle age, and her lipstick was in the wrong place as usual.

"TV?" I asked. "What what?"

"Never mind." I got up and turned on the set. It was showing three programs at once, and I was trying to figure out how to turn it off when the phone rang.

I picked up the receiver and my blood jumped.

"Damn it!" I whispered. "Didn't I tell you never to call me here?"

"Did you?" As always, I found it hard to be angry at Joanne; her soft, sexy voice seemed to make everything all right.

"I think I did," I said.

"Well," she said, "you might have."
"What are you calling for?"

"What am I what?"

"What . . ." We were disconnected. "Who was that?" my wife asked.

"Harry," I said.

"We don't know any Harrys."

"Are you sure?"
"No. I'm not sure."

Praying that Alice wouldn't notice the tremor in my hands, I sat down again. I hoped the worry wasn't showing on my face. Sooner or later, I knew, Joanne was bound to remember my number again.

Every once in a while, I could remember the day Joanne and I had met at the office. Our effect on each other had been electric: I took one look into her large brown (small blue?) eyes (eye?), she took one look into mine, and that was it, I think.

Alice, of course, never suspected a thing. With everyone always leaving work at the wrong hours and the trains always getting lost, it wasn't easy for a woman to keep tabs on her husband's time.

Sometimes, I could even remember the night Joanne and I had first made love. It was a charming, old-fashioned hotel that was usually near my office. The desk clerk had given us the onceover, then winked and handed me a mounted butterfly.

mounted butterfly.
"The key," I said. "You're supposed to hand me the key."

"Sorry."

"Think nothing of it."
"Do what of what?"

Room 902! A fourteen-dollar heaven on earth for lovers!

Joanne and I couldn't figure out how to open the drapes, but we knew that, just beyond them, the whole city would be spread out before us a magnificent smorgasbord of lights blinking on and off like stars as the people at the electric company kept pressing the wrong switches.

"A penny for your thoughts," Joanne said.

As usual, I wasn't having any, so I said, "No deal." Then we fell into each other's arms.

"Wait a minute," Joanne said.
"We're supposed to take our clothes off first."

"Are you sure?"

"I think so."

I began to tug at my shirt, "Here," Joanne said, "I think it has something to do with these small little round things stuck in these tiny little holes up and down the front. Maybe if we tried to push the round things out of the holes..."

"What about you?"

"I think it has something to do with this long silver thing down my back."

Finally, we managed to get most of our clothes off and Joanne's hot, heaving body was pressed firmly beneath mine.

"No," Joanne said, "not there."

"Where?"

"Here."

"You sure?"
"I think so."

"What is it we're trying to do?"

"Let me think a minute."

"What?"

"I forgot what I was going to say."

That had been the beginning. And tonight, I was sure, was going to be the end. The only question in my mind was: how horrible is it going to be?

"Mommy?"

My train of thought—and it was one of the longest trains of thought I'd had in months—was interrupted.

"I'm your daddy, sweetheart." Grinning, I swung Amanda around and sat her on my lap. "Isn't it past your bedtime, young lady?" I was becoming obsessed now; I couldn't get my eyes off that phone.

"I don't know. All the clocks read

different."

I felt my knees beginning to sag. Amanda was only six years old, but already she weighed 124 pounds and had the full-busted, curvaceous body of a woman.

"Honey?"

"Yes?" Alice was in the kitchen, ironing the dishes.

"How many children do we have?" "Seven, I think. Does that sound

right?"
Seven children, I thought. Seven children and a nice house in the suburbs and a good job. And, thanks to
me, every last little bit of it has been
plunked into Joanne's pretty little
hands.

I stared at the phone, as if somehow the power of my gaze could stop it from ringing.

Clink, Clink, Buzz. Gong, Clink. Buzz.

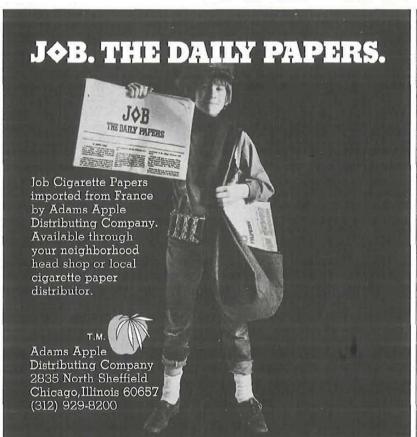

No good.

Like a puppet, I jumped.

Contraceptives for the ensuous Man

Times have changed. Today a man just doesn't have to tolerate a sensation-deadening condom when he wants protection. Because now there are gossamer-thin, supremely sensitive condoms that

have been designed for sexual pleasure, while still providing the most reliable protection of any non-prescription birth control method.

And now you can buy these sensuous condoms without embarrassment...by ordering them through the privacy of the mail from Population Planning Associates.

Our illustrated brochure describes the wide selection of condoms we offer... such as the popular Trojan...the extra-thin Jadethe pre-shaped Conture... the super-sensitive Naturalamb, made of natural animal membrane. And many more. All of them are electronically tested and meet strict government standards.

MONEY-BACK GUARANTEE Discover our remarkable condoms for yourself... by ordering one of our sampler packs today. We'll also include our brochure free with your order. Or send 25¢ for the brochure alone. All orders are shipped the same day received, and sent in a plain package to insure your privacy. Satisfaction is guaranteed, or simply return the unused portion of your order for a full refund.

"Joanne, didn't I tell you-"

"I'm sorry, darling. It's an emergency."

"A what?"

"What's a what?"

"What are you calling for?"

"I'm calling because I'm . . ." We were disconnected again.

I figured it would take Joanne at least half an hour to remember the number again. I thought, This could be the last half hour of my marriage.

I noticed that ice was forming on the sofa. I went to the closet and put on my heaviest coat.

Alice came back into the living room. "What's wrong?"

"Damn air-conditioning again."

"Silly," Alice said. "You always get it wrong. It's clothes on, colder. clothes off, warmer. Or is it the other way around?"

I began to fumble with my shirt. "How does this damn thing work?"

"I think it has something to do with these little tiny holes and these little pieces of round plastic on the front.'

Alice and I put the kids to sleep. Then we just sat together in the living room and didn't say very much. It was funny, but sitting there next to Alice and looking at her, I began to feel guilty as hell.

Alice was trying to knit something, and I watched as the absurd, knotted shape extruded from her knitting needles. Every few seconds, she jabbed herself and winced.

I began to wonder whether I'd done the right thing with Joanne.

"Know what, honey?" Alice said.

"What?" "I'm glad I married you."

"Are you?"

"Very glad." She went across the room and kissed the mirror.

"I'm over here," I said.

"Oh," she said. "Well, anyway, I love you."

I glanced at the phone.

"Honey?"	Alice	said.
****** . O.**		

"I forgot what I was going to say."

"Did you just say something?"

"No. I don't think so. Why?" "Why what?"

"I can't remember."

I felt comfortable talking to Alice. It was like the old days, before Joanne. This could be one of the last real conversations I ever have with my wife, I thought with remorse.

I got up and tried to put on a record, but the hole was in the wrong place. so instead I sat down with the newspaper. The headline read, VGHGH-GSTYIUJH KJHSVTEYRHNSH SHSLAKAIAUSTGH.

continued from page 59

ingly. Be assured that the Crest, Gleem, and Colgate people are working day and night to develop a flouride substitute, perhaps from millet or kasha—but it's years away. It won't be long before the youngsters rush in to tell mom and dad that they "only have fourteen cavities."

Safari lovers will have to do without pith helmets. Pompons that normally grace the top of wool caps may no longer be with us. Nineteen seventy-four will be the last year you will see lapels. There's an acute shortage of skilled lapel workers. Everything will be cardigan-style and you'll have to learn how to grab sleeves and shoulders instead.

Fake beauty marks are almost gone (if you're a girl with acne, you won't miss them). Also mourning veils, arch supports, self-sealing envelopes, pensize flashlights, sharpened pencils, and tickets. Because of the paper shortage, ticket printers have very little material left. We're going to have to figure out another way of admitting people to the movies, theater, concerts, sporting events—to trains, planes, and steamships. Hat and coat checking in restaurants won't be the speedy, efficient operation it once was.

The fine, crinkly, colored cellophane strips that decorated the toothpicks that went into your triple-decker sandwiches is hardly seen anymore. Slim Jim pepperoni sticks will soon disappear from your grocer's shelves. Say good-bye to blazer crests, to snail holders and those tiny forks you need to dig them out. Strangely enough, we have a world bumper crop of snails this year-and no holders. Snails will probably replace beans and rice as the staple food for the lower classes. Yes, bean and rice supplies are dwindling. We don't know much about preparing snails, but we imagine that you throw them in a big pot and cook them in water, the same as beans and rice.

Postcards from restaurants are gone, along with those giant pepper mills you used to love. Fringes for scarves are missing. The lucky charm rabbit's foot is no longer with us. Also Ovaltine, mohair suits, the sweep second hand on watches (it's a special material, not the same stuff as the hour and minute hand). The CO2 wine opener is scarce, as well as braid for military uniforms and pull tabs (the little "pull to open" tabs—you'll have to rip open cereal packages in a crude, haphazard manner).

We hate to say it, but battery operated socks, swizzle sticks, pomade, unsnuffable birthday candles, individual take-out packets of jelly and marmalade, and house keys will be very hard to get. And by 1975 there will be a dangerous shortage of Japanese. Air pollution is rapidly destroy-

ing our most productive, hardestworking people. It's still hush-hush as far as most of the world is concerned, but the true, unpublished mortality rates of this country are shocking. Of course, the Japanese are staying mum, for fear of causing a world panic. But our impeccable sources have assured us the problem is real and cannot be solved.

Fortunately, there is some hope that we can divert the raw materials we still produce in abundance and adapt them to meet our shortages. We mentioned snails. We also have a tremendous surplus of asparagus this year. A good part of it is now being converted to imitation chocolate (we ran out of real chocolate years ago). We have a large supply of see-through meat packages, a product that has a multitude of uses in home and industry. We overproduced on fishing lures to the tune of ten million dollars. Most of the metal and plastic, especially the hooks, can be melted and converted to badly needed items such as metallized baby shoes.

But our most important resource, perhaps our savior, will be silt. We are blessed in this country with the largest silt deposits in the world, enough to fill the Pacific Ocean one thousand times over and still have enough for the Atlantic and Indian! And that's not counting all the silt that's buried underneath our great historical landmark houses and museums (don't worry—we'll probably never have to use it).

Many large corporations are already replacing their original raw materials with silt. Italian ices are now composed largely of silt. Many of our precision-engineered jet plane parts are made of silt. Artificially flavored silt may be the answer to our food shortages. At this point it makes up a good portion of our hamburger, bread, pastry, and other starches and proteins. But it's very possible that silt can be converted into highly desirable fruits and vegetables to combat the growing shortages in this area. The Department of Agriculture is experimenting with turnips and rutabaga made of silt and silt by-products. The Sunkist people claim to have grown a tangerine from silt.

We do not want to put all our eggs in the silt basket. It's not a panacea. But we feel that our future may depend a good deal on how quickly and efficiently we can harness its great powers. We've done it before. We've transformed countless substances into a host of useful products. And, as long as we never run out of good old American know-how, we can do it again. Next month: Good Old American Know-how—Where Did It Go?

Kancer Kare Calling

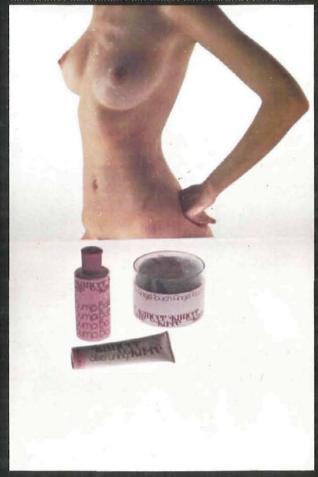

Your Kancer Kare consultant is eager to show you the complete line of Institute-approved Kancer Kare Cosmetics in the privacy and comfort of your own home, ward, or semi-private room! Thousands of smart cancer-conscious moderns avoid the expense and bother of so-called "medical treatments" by using these up-to-the-minute cover-ups. Devised by a cancer-conscious psychologist for her own parents, the Kancer Kare Cosmetic plan avoids embarrassing biopsies and nerve-frazzling medical "gimmicks." Most important, every Kancer Kare product is certified benign by the American Institute of Similarity and the New York State Council on Similarity. According to a recent statement in the American Journal of Similarity. Kancer Kare Cosmetics were found to be a "proven means of implausible relief in metaphoric cases where similarity is a factor." We couldn't say it if it weren't true.

Dr. George W.S. Trow Dr. Anthony C. Hendra

Kancer Kare Classics—for the cancer conscious woman who wants to put a good face on it. Eye, Ear, Nose, and Throat Shadow, for the cancer conscious eye, ear, nose, or throat, Terminée—a slightly stronger scent than usual. Kiss Kiss Breath Freshener. Fight back at cancer of the breath with Kiss Kiss Apocalips—put your money where your mouth was with this trend-setting oral beautification plan. Choose from literally dozens of dreamy creamy pastels.

Plus—Unexplained Bump Base— the ultimate in foundation makeup. Feather it into the surrounding area, if there is a surrounding area. Angel Touch for bumps that have been explained. In the few moments you have remaining to you, live life to the fullest with this enchanting preparation. Angel Touch will help you think of those little strangers on your body as alluring new curves—and will win you plenty of comments from him. Silver Lining—a revolutionary brush-on overlay program that makes those annoying little places that won't "come to heal" disappear in seconds. Available in three flesh tones: Mon Scab. Mon Scar. and Mon Clot.

For That Final Touch — Eau de Colon. The perfect solution to those tricky problems of the tummy and below. Worry no more about embarrassing "accidents" at specially tender moments — Eau de Colon's unique blend of industrial deodorant and Lourdes water provides the ultimate in alluring cover-up for the nether you. Original Skin Moisturizer — creates a metaphoric dermis-like effect for hours.

Introducing

Cobalt 70—Kancer Kare quality for the Man in Your Life. Cobalt 70—we took the smell of the Maine woods and added a dollop of conjugated cobalt, a cobalt simile certified by the American Institute of Similarity.

Cobalt 70 Cologne, Cobalt 70 Skin Eraser, Cobalt 70 Underarm Supplement, Cobalt 70 Soap on a Roap.

The Cobalt 70 Lung Sauna.

Kancer Kancer

Kancer Kare Bonus

Free with lifetime purchase — complete Cosmetician applicator remover set in semi-silver plate. Guaranteed stainless and dishwashable.

Minimum six months.

continued from page 62

The doorbell rang.

"I'll get it," Alice said, trying to stand up, and tangling her head in the knitting wool.

"Sit tight," I said, "I'll get it." "Think there's anyone there?" "I doubt it. But it's worth a

chance."

"What's worth a chance?"

"Try turning the knob in the other direction." I thought I recognized the voice on the other side of the door. I hoped I was wrong.

The door swung open and a whoosh of rain poured into the foyer, even though the sky was perfectly clear.

Joanne shook herself off. "I can't remember when I've seen a worse-"

I grabbed her by the shoulders and tried to push her back. "Are you crazy?" I whispered. "My wife is in-

"Who is it, dear?" Alice shouted. "What?" I shouted back.

"Never mind."

"Never what?"

"I forgot what I was going to say." "Listen," I pleaded to Joanne, "whatever it is, you can't do this to me. My whole life-'

Then I realized that Alice wasn't inside any longer. She was standing

right beside us.

"Hello," she said to Joanne, her voice muffled by the colored threads wrapped tightly around her throat. "Who are you?"

"She's my long-lost cousin," I said.

"Your what-what what?"

"Forget it." I looked at Joanne with a final pleading desperation in my eyes.

"Shall we all go inside?" Alice

suggested sweetly.

Joanne and I followed her. On the way, we bumped into a floating ashtray and vase; gravity levels had been cut by 15 percent again.

As soon as we reached the living room, the phone rang.

I picked it up. At first, it was bringing in a radio station; but then I heard a woman's voice.

"Who is this?" I asked.

"It's Joanne."

"You can't be Joanne."

"Why not?"

"Joanne is over here."

"Over where?"

"In my living room."

"That's impossible."

"It's not impossible."

"What's not what?" We were disconnected.

"Who was that?" my wife asked.

"No one," I said. "Are you sure?" Joanne asked.

"No," I said.

Suddenly, the floor beneath us be-

gan to tremble; we found ourselves smashing violently against the walls. then lying together in a heap. "Earthquake!" I shouted. Finally, the furniture stopped rattling. Through the window, I could see that the sun was three times its normal size. We'd gone out of orbit again.

Part of the roof caved in Somehow, we all managed to roll away in time; only Joanne was hurt, with an ugly gash on her arm. Alice found a Band Aid, but she couldn't figure out how to get the paper off.

"Try the little red string," I sug-

gested.

"It works!" Jubilantly, Alice removed the Band Aid and taped it tightly on Joanne's arm in the wrong

"I'd better check on the kids," she said.

Alice went to the foot of the stairway, then paused.

"Where am I going?"

"To check on the kids." "To what on the what?"

"What?"

"I forgot what I was going to say."

With Alice upstairs, Joanne and I were alone—perhaps the last precious moment we would ever have together. Quickly, fiercely, I tried to kiss her, but I missed.

"Joanne, whatever made you come here like this?"

Now there was a deep, coarse desperation in Joanne's voice. "It's an emergency. A real emergency."

"It's a what? A what what?"

Before she could answer, the phone rang again.

I picked it up. "Who is this?" I demanded.

"It's Joanne."

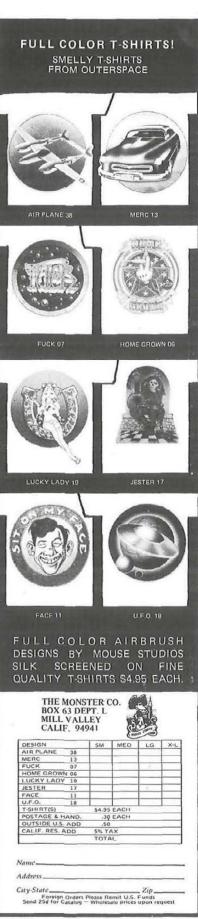

The phone felt strangely warm in my hand and I realized the room was beginning to melt. "You know I told you never to call me here!" Through the window, I could see the sun looming even larger, bloated and fierce and yellow. Halley's Comet was beside it, even though it wasn't due for another century.

"Listen to me," the voice on the phone pleaded. "It's the operation. It wasn't a success. My organs were all in the wrong parts of my body and I'm going to have to have the baby anyway!

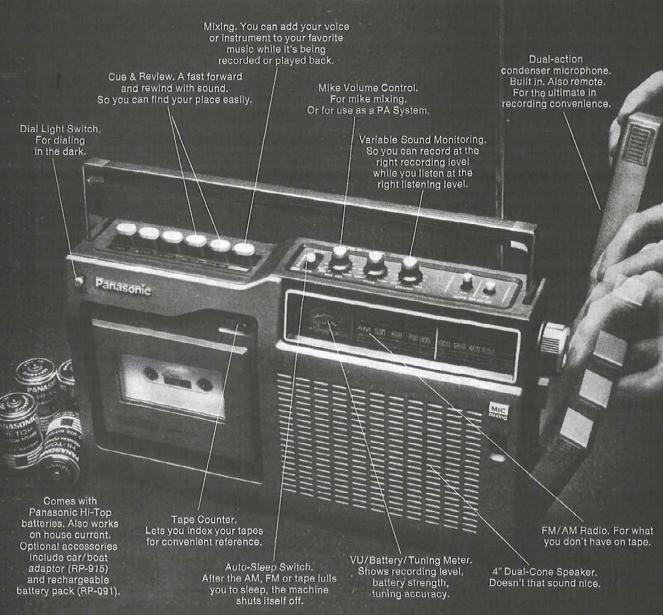

"Baby? What baby?" Then, all at once, the horrible, awful truth came crashing back to me. I did a balletstep aside, as the television and hi-fi melted past me down the carpet. Tiny beads of sweat peppered my forehead, mixing and getting big enough to drip. "I wish I knew how to get this damn shirt off," I muttered.

"I think it has something to do with those little plastic circles and those

STUPIDITY IN CRISIS

A MEMO TO OUR READERS

Welcome aboard! Good to see you again this week. It's been a busy one for business—and as I always say, you can't spell business without busy, just drop the i and don't ask y! So let's cut the small talk and get down to cases.

Here it is in a nutshell. Dollar up. Sales level. Investment solid. President holding firm. Precipitation—above normal. The big money is going into felt. Question of the week—why the heavy bidding on talc futures?

O.K. How we see it: hopes high. Chins up. Lips sealed. Time for some hard charging. American ends with "I C-A-N." It's all here in black and white. No color, no fancy features, no damn book reviews or fuzzy-thinking leftist smart-aleck prose. Read it and weep. Shape up or ship out. There's no room in this magazine for nervous Nellies, and this means you. See you next week if you've got what it takes.

[Items appearing on this page are being talked about by someone in Washington or some other place at fancy dinner parties we couldn't get into with a crowbar]

Whatever Happened to Zinc?... Goldwater to Nixon: "You've Been Putting on Some Weight Lately"... The Great Lakes: Are They Still "Great"?

According to Senator Roman Hruska, chairman of the Senate Committee on Mediocrity and Banal Affairs, 75 million Americans are below the intellectual poverty line, and 1 out of every 6 people in the U.S. is classified as legally bland. Says Hruska: "This should lay to rest fears that we're turning into a nation of double-domed flag and/or bra burning egg and/or pot heads cruising the streets in bookmobiles looking for handouts and knocking over the neat little pyramids of cannonballs in our town squares. Why, Christ, where I come from we have to weld them together."

* * *

Action is expected in the House later this month to make Velveeta the national cheese of the U.S. A last-ditch effort to substitute Wispride by six Wisconsin rep-

resentatives was defeated in committee last week. The President is said to be eager to sign the bill into law as America is the only major industrial nation without a symbolic cheese, causing embarrassment to the U.S. overseas where communist countries have been reaping a propaganda harvest with phony World Peace Through Cheese movements.

* * *

Alarmed Senators on the Armed Services Committee are "looking closely" at a plan to drastically expand the U.S.'s tiny and antiquated canal system. The reason: the Russians, who have patiently built nearly 10,000 miles of canals, inland waterways, and other navigable water transport systems right under America's nose, now have the capability of launching an attack-proof fleet of missile fire barges,

flatboats, and scows to take advantage of a big loophole in the SALT Arms Limitation agreement which sets a limit on land and sea based ICBMs, but says nothing about rivers, ponds, etc.

* * *

U.S. economists are optimistic that South Vietnam will be able to "go it alone" economically within two years, ending massive American development aid. Although South Vietnam's two major resources, craters and shrapnel, have little immediate value in the international marketplace, economic analysts are predicting a big jump in the sale of Saigon's plentiful supply of charred remains, ashy residue, and unrecognizable rubble as cheap substitutes for the many industrially important bulking agents that used to be made from petroleum.

Stupidgrams

U.N.-sponsored International Experiment in Stupid Living may be a big step towards international stupid understanding. This year, 51 participating nations are sending Exchange Stupids to their neighbors overseas. India is shipping herd of sacred cattle to wander in the streets of Los Angeles. Israel has sent its complete Bar-Lev line to tiny Antigua. British navy is visiting Bolivia. Brazil's renowned Mardi Gras on its way to Yemen. Vatican City's famous Swiss Guard, headed for Switzerland, and U.S. exchange choice, entire Hartford Insurance Group, is presently in transit to the Malagasy Republic.

Stupid life in outer space? Evidence seems to be growing.
Soviet Russian scientists at radio telescope installation in
Kamchatka Peninsula have detected ultra-high-frequency signal pulsations from Ursa Major. They say binomial transmission patterns bear striking resemblance to computerized shipping invoices from axle factories in Omsk.

Stupid East Asian Treaty Organization (SEATO) members are boycotting International Conference of Unintelligent Nations. Holdouts Brunei, Portuguese Timor, Papua, Bhutan, and the Andaman Islands are refusing to issue statements and conference delegates, assembled in Atakpame, Togo, have not replied.

Many people in the business community now feel that President Nixon right now is a liability. Most voice optimism that he can turn the corner by the first quarter of '74, but agree that if he doesn't, he should be dissolved and sold at cost. Analysts predict brisk bidding for his collection of incriminating documents and tapes, but no takers for baggy suits, office furniture, and American flag lapel pins.

On the whole, the outlook is still bright. The rich are getting richer, the poor are getting poorer. The Bible says the meek will inherit the earth, but if they do, the will is going to be in probate for about one million years. Too, many theologists agree that the famous saying--it's easier for a camel to pass through the eye of a needle than for a rich man to enter into heaven--was mistranslated. The verdict: it should read thread, not camel. If you've ever tried to thread a needle, or seen the maid doing it, you know it's difficult, but not impossible.

Japanese businessmen have been racking up impressive successes in markets formerly dominated by U.S. There's nothing wrong with a little competition, but if they're smart, they won't push us too far. The last time the little yellow you-know-whats gave us some backchat, we turned a couple of their wood-and-paper burgs into radioactive Rice Krispies. A word to the wise, Johnny Nip: lay off. You're cruising for a bruising.

Desperate U.S. goatmen are <u>buying back U.S. goats from Russians</u> at <u>prices</u> four to five times <u>higher than those</u> paid them by <u>Reds in last summer's \$2 billion goat-deal. Reason: <u>Russian grip on world goat market lets</u> them force goat prices sky-high, will contribute to massive shortages of cheese, <u>kid gloves</u>, angora, chamois.</u>

STUPIDITY IN CRISIS

From Penobscot to Pasadena, the country faces the worst stupidity shortfall in its history. Is it real? What can be done? How? Why? When? Who to? "SN&WR" examines some carefully selected facts.

 A large Midwest discount chain is forced to limit sales of antique finish to 10 cans a customer.

 A running gun-battle erupts over a Miami store's last remaining beer cooler.

 Lack of raw menthol shuts down a Montgomery, Ala., dog food plant.

 A group of Boise, Idaho, housewives club together to form a blender pool.

• An enraged Flint, Mich., snowmobiler, unable to trade in his '73 machine for one of the sold-out '74s, runs amok and sets fire to his dealer.

What does it all add up to? Shortage. Chronic shortage. For the first time since the stupidity boom began in the '50s, supply has fallen behind demand. Demand has outstripped supply. Supply is swamped by demand. Demand continues to soar. Stupid retail outlets have empty shelves, can't get deliveries. Stupid manufacturers vie furiously for dwindling raw materials, jack still further the skyward march of prices. Where is it headed? No one knows. Everywhere stupid consumers clamor for answers. Are there answers? Good question.

The grim story. Background: since skyward uptrend in stupidity began under Eisenhower, overall demand has burgeoned at more than 60 percent increase annually, breaking down into a whopping 57 percent average increase for useless products and even higher 64 percent for pointless products.

Chief reason: any given stupid item needs at least two more to fuel it, neutral-

ize it, repair it, or scrap it.

More background: early in boom, corporations made heavy capital investment in basic stupidities but later channeled capital towards higher short-term-profit stupid-intensive software such as flavorings, additives.

Justification: stupid products have short lead-time, but require above-average initial outlays, e.g., political campaign contributions, cash-on-the-line to fight restrictive

legislation, standards.

Still more background: emergence in late '60s of sensible action groups blew minor side-effects of stupid industry way out of proportion, cut still deeper into vital capital outlay. While easily throttling pint-size sensible industry at birth, corporations were hog-tied by barrage of new "public-interest" laws drummed up by sensible loudmouths and allies in Congress, media.

General agreement: '70-'72 recession caught manufacturers with their pants down. Faced with no slackening of demand, desperately short of basics, they were unable to finance new sources of crassware. What else?

Runaway inflation and uncertainty over clean up climate climate in D.C. meshed to force higher and higher prices for vanishing inventories.

Big question: is there a real shortage or are stupid conglomerates hoarding to hike prices sky-high? Answer: no one knows.

Not so gloomy tune. Stupidity-watchers see brighter days in the months ahead—

- Continued stupid shortfalls plus longawaited removal of controls will allow retailers to take up slack in sizable price jumps.
- Huge new foreign markets with more money than sense will siphon off a large percentage of stupid output, reflected for domestic consumers in large across-thecounter price increases.

Wage demands will escalate in all sectors to bring earnings into line with increased stupid revenue, pushing prices to

new peaks.

 Profit margins crushed between rising costs and empty warehouses will have to be maintained through massive price hikes.

- Skyrocketing recessionary interest rates will be passed along to consumers in the form of spectacularly huge price boosts.
- Corporate losses from inflation, strikes, foreign competition, pollution

STUPIDITY'S HISTORIC UPTREND— FLASHBACK

After centuries of downgrade lowprofile, the payoff a skyward upswing.

-WHAT'S GOING ON HERE?

controls, R&D, pilferage, fire, sabotage, shoplifting, bad investment, bad weather, bad management, shoddy workmanship, recalls, malingering, bribes, damage suits, acts of God, and bad luck, will be absorbed by squeezing the consumer for every dime he can beg, steal, or borrow.

Upshot: higher prices.

Will it work? Wild card is the stupid consumer. Will he go for fewer and fewer lower and lower quality products at higher and higher prices? Yes, he will. Historically—e.g., in the late '20s—sociologically—e.g., in the ghetto—indications are that tightening of stupidity belt poses no threat to stupid way of life. Everything is sacrificed before stupid essentials.

Possible stumbling block: lag before new stupid expansion programs can again fill retail outlets with worthless junk. Overlong interval could present dangers:

(a) Information. Leakage from sensible opponents could chip away at purchase motivation (e.g., his children go to bed in flash paper, his mouthwash doubles as a defoliant).

(b) Habit. Buy-use-discard cycle of stupid consumption can be broken affecting pur-

chase potential (e.g., he can eat off reusable plates, brush his teeth manually).

Needed: speed, rechanneling of funds from low-priority sensible programs, more speed.

Anything in the woodpile? Bad news: pockets of sensible resistance reemerging in business sector. Early in battle for an inflatable economy, problem elements—craftsmen, independents, self-sufficient farmers, people with "enough"—were forced out. Ironically, at time when nation is directed towards easing critical stupid shortages, many parasitic elements now reappear, providing consumer at community level with sensible alternatives. Stupid industries may face short-term opposition in marketplace.

Good news: vast inequities in law, control of employment, links to legislature give stupid industry firm advantage over puny opponents. Ownership of production facilities, distribution, retailing, media, law enforcement give corporations clout to

CHILE SCORES COUP D'ETAT IN ANNUAL AWARDS

Tyrants relaxing at annual confab agree: 1973, a banner year for quick coups, brought the world closer to permanent oppression.

Sunny Sahara resort town Waw Al Jaghbub, birthplace of Lybian kingpin Col. Muammar el-Qaddafi, was this year's site for the annual Judging of Unusual National Transfers of Authority—better known as the JUNTA Awards. Representatives from military dictatorships, ideological autocracies, tyrannic oligarchies, oppressive aristocracies, despotic monarchies, and totalitarian puppet regimes all over the world gathered to vote on 1973's outstanding alterations in government "not involving legal, traditional, constitutional, democratic, or internationally mandated means of change, perpetuation, or reform."

As always, it was a festive occasion, with dinners, dances, and daily exhibitions by delegations performing the folk oppressions of their native lands. Ukranian Pogroms, Soviet Purges, Ugandian Thief Clubbings, Burundian Genocide, and a fabulous display of Fear from Haiti highlighted the entertainment.

But, international as the flavor was, when the awards were dished out, the entrée was Chile. A fast-paced overthrow of President Salvador Allende Gossens by General Augusto Pinochet Ugarte, General Gustavo Leigh Guzmán, Admiral José Toribio Merino Castro, and National Police Chief César Mendoza Frank, topped off by a brilliantly staged Executive Sui-

Juan D. Peron
"The emotional high point."

cide, won this narrow Latin American nation five of the coveted plastique Draco of Athens statuettes—the best showing since Communist China's 1947 seven JUNTA sweep. The Chilean military won Putsch of the Year, beating the Greek's Papadopoulos oust and a royal heave-ho in Afghanistan by Mohammad Daud Kahn. Best Violent Revolution also went to the Chilean team, who racked up an easy victory over Thai student uprising and random slayings by Philippine honcho Ferdinand E. Marcos. Other Chilean laurels included Best Siege of Presidential Palace (won in competition against the Thai collegiate assault on strongman Thanom Kittikachorn), and special awards given to the U.S.-owned domestic copper industry for Best Subversion by Foreign Power and to the country's entire middle class for Best Supporting Reactionaries.

Only other nation to win multiple JUNTAs was Greece, with two. In a tough battle, the birthplace of demagoguery won Best Bloodless Coup, with the low-key work of Brig. General Dimitrios Ioannidis and new premier Adamantios Androutsopoulos narrowly squeezing past the legislative pyrotechnics of Presidents-for-Life Marcos in the Philippines and Park Chung Hee of South Korea. (Running far behind was the abolition of electorial government by Uruguay's Juan María Bordaberry.) The other Greek JUNTA was no snap either, but the feisty Colonels, against fiery competition, managed to snare Best Suppression of International News Coverage by jailing 105 major foreign correspondents, including 20 from Eastern Block nations, 71 from the Free World, and a full 14 from fellow military dictatorships.

But the emotional high point of the awards ceremony was reserved for the presentation of Best Dictator award to Juan D. Peron for his spectacular comeback in rigged Argentinian elections. There was hardly a dry eye in the heavily guarded fortifications when Spain's Francisco Franco, accepting for the ailing Peron, said, "Juan has made an enduring contribution to the whole idea of dictatorship."

In other awards, India got Best Action of Overt Colonialism for its takeover in Sikkim, China made its perennial claim (seventh win since 1965) on Best Continuing Revolution in a Dramatic Series; and a surprise dark horse, Acting Governor Ian Kinnear, was given Best Suspension of a Constitutional Government for his declaration of a state of emergency in British Bermuda.

All in all it was the most amiable and noncontroversial JUNTA Awards ceremony in recent memory. Only incident to mar the proceedings was a short-lived protest by several members of the Organization for African Unity, who charged racial bias in JUNTA voting. Spokesman Col. Ignatius Kutu Acheampong of Ghana claimed that in 1973, Black Africa was witness to 15 military takeovers, 12 violent revolutions, 31 bloodless coups, and countless insurrections and incidents of major unrest-more than the rest of the world combined-and yet had not one single JUNTA award. Acheampong's own delegation then walked out, but were joined by only Dahomey and Malawi. Most African states seemed to agree with common sentiment that 1973 had been an off year for African discord.

Generals César Mendoza and Augusto Pinochet
"The entrée was Chile."

STUPID NEWS AND WORLD REPORT, March 31, 1974

STUPIDITY IN CRISIS

[Continued from 79]

leave consumer with no option but stupid products. If pushed to wall by sensible groups and/or consumer resistance, they can fall back on essentials, force consumption of stupid food, stupid housing, stupid transportation, by drying up all other sources.

Better news: most sensible groups have been discredited by current crisis, left with labels such as "nit pickers," "cranks."

Best news yet: right now average stupid consumer's concern is not with bread-and-butter issues of quality/value/survival, but where his next stupid item is coming from.

Readout: sensible competition, no problem. For foreseeable future, sales are safe.

Rosy future? Stupid consensus sees five major steps imperative to ease crisis.

(1) Credit. The Fed fires billions into economy putting non-existent money at crippling rates of interest into consumer's pocket, providing stupid industry with cheap capital to produce something to spend it on.

(2) Subsidies. Public money umbrella for crucial capital investment, underwrites all stages of stupid production from exploration of new resources to post-purchase revenue drains (damage suits, class actions).

- enue drains (damage suits, class actions).

 (3) Anti-sensible legislation. Stupid lobbies begin all-out assault on sensible legislation steamrollered by sensible fringe and clean-up bandwagon, by ramming legal disputes through to sympathetic High Court and pressuring irresponsible legislators to reverse sensible measures or strengthen existing stupid ones. Specific legislation authorizes stupid industry to regulate itself, establish employee-exchange programs with federal agencies, set its own health, safety, quality, environmental standards.
- (4) Foreign resources. All efforts are made to regularize foreign supplies, including, but not limited to, counterinsurgence, blackmail, assassination, genocide, coups d'etat, military aid, and conventional or tactical nuclear warfare. Consolidation with powerful stupid interests abroad moves towards goal of making world prices standard, not competitive.

(5) Priorities. Massive media campaign, funded by appropriate stupid foundations, stresses critical importance of maintaining stupid priorities at home. Global priorities other than major stupid ones (ubiquitous entertainment, poisoned food, fast, lethal transportation), are dumped.

Overview: sheer muscle of stupidity can avert long-range threats. Short-term moves include massive expansion of pointless production, massive R&D into useless new technologies, massive exploitation of consumer to acclimatize him to revised cost of worthless products.

All in all? Prospect good.

[END]

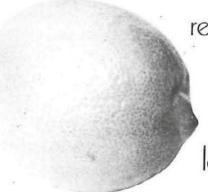

DUMB DOS AND DON'TS

WHAT YOU AS A BUSINESSMAN CAN AND CANNOT DO

as a result of recent stupid court and administrative decisions

- YOU CANNOT shoot workers who go out on strike or hire thugs to beat up union organizers. Both National Labor Relation Board orders and federal law prohibit murder, arson, assault, or physical harassment directed against your workers. Employers who have violated these statutes in the past have often incurred sizable legal expenses and, in some cases, even been forced to pay damages and fines.
- YOU CAN hire illegal immigrants for agricultural labor and certain categories of domestic jobs provided you comply with the minimum financial requirements of local immigration officials and health inspectors. Contact the officials in your area before you accept a consignment of aliens; agreements worked out in advance give you better bargaining power and prevent your being pressured to accept exorbitant demands.
- YOU CAN market harmful or injurious substances and products that are inflammable, poisonous, or easily transformed into dangerous objects, regardless of whether they are for internal use, human consumption, or infants, as long as you print on the package or container a vague, misleading, and easily misunderstood warning in type large enough to be read without effort under a 10x microscope.
- YOU CAN, as an officer of a corporation in substantial violation of pollution regulations, sit on the Air and Water Quality Control Boards in most states: have your lawyer look into the laws in your state for loopholes. Direct cash payments to individual board members are generally prohibited, but you can finance studies by the board of water pollution conditions in Hawaii, air quality in Paris, etc.

Nazaran Pinazaran Pinazaran

The new Nazareth album on A&M Records

EARLD. PORKER + SOCIAL WORKER.

There are some things you'll appreciate about a Dual right away.

Others will take years.

You can appreciate some things about a Dual turntable right in your dealer's showroom: its clean functional appearance, the precision of its tonearm adjustments and its smooth, quiet operation.

The exceptional engineering and manufacturing care that go into every Dual turntable may take years to appreciate. Only then will you actually experience, play after play, Dual's precision and reliability. And how year after year, Dual protects your precious records; probably your biggest investment in musical enjoyment.

It takes more than features.

If you know someone who has owned a Dual for several years, you've probably heard all this from him. But you may also wish to know what makes a Dual so different from other automatic turntables which seem to offer many of the same features. For example, such Dual innovations as: gimbal tonearm suspensions, separate

Dual 1218, \$189.95

anti-skating scales for conical and elliptical styli, and rotating single play spindles. It's one thing to copy a Dual feature; it's quite another thing to match the precision with which Duals are built.

The gimbal, for example.

A case in point is the tonearm suspension. Dual was the first manufacturer of automatics to offer a true twin-ring gimbal suspension. More importantly, every Dual gimbal is hand assembled and individually tested with precision instruments especially developed by Dual. The vertical bearing friction of this gimbal is specified at 0.007 gram, and quality control procedures assure that every unit will meet this specification. Only by maintaining this kind of tolerance can tonearm calibrations for stylus pressure and anti-skating be set with perfect accuracy.

Other Dual features are built with similar precision. The rotor of every Dual motor is dynamically balanced in all planes of motion. Additionally, each motor pulley and drive wheel is individually examined

with special instruments to

Dual 1216, \$154.95

assure perfect concentricity.

The Dual guarantee.

Despite all this precision and refinement, Dual turntables are ruggedly built, and need not be babied. Which accounts for Dual's unparalleled record of reliability, an achievement no other manufacturer can copy. Your Dual includes a full year parts and labor guarantee; up to four times the guarantee that other automatic turntables offer.

If you'd like to read what several independent testing laboratories have said about Dual turntables, we'll be pleased to send you reprints of their impartial reports. To appreciate Dual performance first hand, we suggest you visit your franchised United Audio dealer.

But your full appreciation of Dual precision won't really begin until'a Dual is in your system and you hear the difference it will make on your own records. Play after play. Year after year.

Dual

funny little holes," the Joanne next to me said.

"I think it has something to do with those little plastic circles and those funny little holes," the Joanne on the phone said.

"Are you absolutely *certain* you're Joanne?" I asked into the phone.

"No." By now, the whole room was an ocean of molten wet. "Sometimes I think I might be her best friend, Millie."

I turned to the Joanne next to me. "Do you have a best friend, Millie?"
"I think so."

"Did you tell her about us?"

She struggled to keep her head above the bubbling lava. "I don't know. Maybe."

I checked the window again. Now the sun was getting further away. I could see Mars, then Venus, then Jupiter roll by. Quickly, the melt began to solidify around us. The sky flickered rapidly from day to night; the Earth was spinning too fast, and I ducked as the centrifugal force sent frozen objects flying around the room.

My wife fell down the stairs. "Turn the thermostat up!" I shouted. Icicles were forming on my nose.

"What the what what?"

"Never mind."

"Never what?"

"How are the kids?"

"I couldn't find them."

Alice came over and stood directly between Joanne and myself. "You needn't pretend any longer," she said. "I've known all about you two for years."

I could feel my lips beginning to chunk. "How did you find out?"

"Find out what?"

Suddenly, another thought flashed through my mind. In a panic, I tried to look at my watch. At first, I looked at the wrong hand, but then I found it.

"Damn," I whistled, "I'm going to be late for work!"

I picked up what was left of my attaché case.

"Wait a minute," Alice said, grabbing the case and almost pulling it out of my hands. "These initials!"

"These what?"

"Are these your initials?"

"Are they my what?"

"You're not Oscar!"
"You mean I've come to the wrong

house again?"

"How long has it been since you've come to the right house?" Joanne asked.

"I don't know," I said. "Years, I

guess."
"Do I know you?" Joanne asked.

"I'm not sure."

"Do you work for McAddams-Landsbury?"

"That doesn't seem familiar."

"Then you're not the man I was having an affair with?"

"I guess not."

"I'm wrong again!"

"How many times have you been wrong?" I asked.

"I don't know," she said. She stepped back away from me.

The woman who thought she had been my wife was heading for the door. "Damn," she muttered. "I should have known I don't live here. I live a few blocks down!"

The room was beginning to warm up again.

Joanne followed her. "Want to share a cab?" she asked.

"Okay, until it breaks down."

The phone began to ring again, but I couldn't take time to answer it. The only thought in my mind was, Mustn't get fired. Got to keep supporting whoever it is I'm married to—if I'm married.

I stepped outside. I was glad to see that it was morning and that this particular morning was autumn. Oak leaves were falling from maple trees, but they still looked nice, all brown and crinkly and crisp. As I felt them rustle beneath my feet, a strangely peaceful feeling came over me, and I tried to collect what I could of my thoughts. First things first, I told myself, and I tried to remember where I worked. I took the wrong route downtown and, after a few false tries, I found a building that looked vaguely familiar. Inside, I found an empty desk that seemed to ring a bell, and I sat down and began to press the wrong keys on the typewriter.

The floor rattled a bit. I looked out the window and saw that the sky was dark and full of unfamiliar constellations

"Hey! We eat on that table!"

Where stupidity gets down to business.

The Party's Over

That's right. We told you at the time that if you acted up you'd have to go home. But you didn't pay any attention so now everybody has to suffer. You were greedy, weren't you? You acted like a little piggy, didn't you? Are you ashamed of yourself? I certainly hope so.

Chairman, The Stupid Group

Copyright © 2007 National Lampoon Inc.

Luckily for us, useless Sequoias like the above are rich in lint and silt, crucial ingredients in the "new generation" of stupid products. Dedicated chemists working for The Stupid Group are now at work developing technology which will allow us to extract "hard to reach" silt and lint in such places as Lower Manhattan and Big Sur.

Hello. I'm W. Hawley Smoot, Chairman of The Stupid Group of companies, and I'm taking this valuable time out of my busy day to tell you as much as I think you should know about the stupidity crisis. Hold up that flow chart. No, not the profit chart. Get that profit chart out of here. There. Now, where was I. Oh yes. The flow chart. This colorful-flow chart I have here shows how dramatically the demand for stupid products has risen over the last thirty years. As you can see (or as you could see if I invited you to my office which I might do but don't count on it), in 1940 there was a negligible demand for stupid products. A few nylon snoods, the odd bumper ornament, but nothing much. You know what got stupidity off the ground? I'll tell you what got stupidity off the ground. But first I'm going to have a drink. I have a drink any time I want to. Right here in my office. Scotch and soda. Imported scotch, imported soda. Crystal decanter. I know how to live. There. Now, where was I. Oh yes, off the ground. The big C. Chlorophyll. That's what got stupidity off the ground.

I mean, try to understand the majesty of it. Some guy, some half-assed defrocked chemist, is sitting around the old laboratory wondering where his next Schlitz is coming from and he gets this brilliant fucking idea that is so totally stupid that

it curls your collar. This guy decides to take this green stuff that's been around for about a billion years and no one has made a buck on it yet, and he decides to put it in toothpaste. Green toothpaste. This has got to be the stupidest idea in the history of the world. I mean the guy's got to be a genius. Green toothpaste. Green mouthwash, green everything! And is green or is green not the stupidest color in the rainbow? I ask you. Hey, I take my hat off to this guy, he opened the door for the rest of us. So now he's starving somewhere, because, I mean, who uses the stuff, but man, the whole lemon-scented thing, the whole cheese thing—man, this is

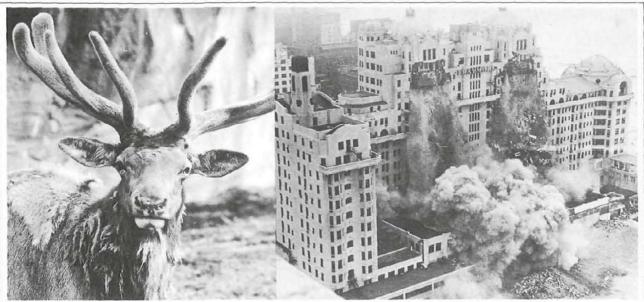

Every day, the average man, woman, and child (pictured above) uses twenty pounds of luggage, feminine hygiene spray, customs checks, pantyhose, etc. In addition, he consumes, indirectly, twenty lemons, four bunches of mints, and three wheels of cheese. He has come to take it for granted that his nasal spray will be lemon-freshened and his dog food cheese-flavored, without stopping to think that his consumption of these essential ingredients is forty times the world average.

Copyright © 2007 National Lampoon Inc.

this great unknown hero of our industry. Hey, what da ya say we freshen up the drinkee a little, huh? So through the genius of chlorophyll, a whole new era is opened. I mean right away you get lanolin, and then like you get this fabulous acceptance—you know what I mean-for putting funny stuff in products. Like plastics. But more important, margarine. Will you get that goddamn profit chart out of here! So margarine gets accepted, man, and the whole goddamn thing explodes. I mean butter is left at the station, man. I mean butter can't get arrested. So what does that lead to? I'll tell you what. It leads you to nondairy dessert topping, nondairy creamer, nondairy everything. I mean by the sixties, stupid stuff is so big a cow can't get arrested. So then, man, when you've got the basic acceptance, you go at it with the packaging. And fuck around. I mean I'm letting you in on some shit here. Let's just have a little refill. O.K. So like I say. Screw around with the stuff. If it's solid make it a liquid. If it's liquid make it a spray. If it's a spray make it a foam, and no matter what it is, man, add something. Lemon-freshen it, man. Mentholate it. Give it the old hint of mint. I mean I'm telling you the real stuff, man. If it's big make it portable. If it's small make it family size, if it's family size make it jumbo, if it's jumbo make it individual portions. I mean fuck with it!

all a derivation from the genius of

But I want to be serious for a

The caribou and not the dog may prove to be our "best friend" in the long run. Powdered caribou horn is an important source of silt.

Two birds with one wrecking ball. Tired old "landmark" buildings, whose presence in our urban areas has long been a source of concern to planners, can be recycled into useful silt.

minute. Dead serious. Because there's a fly in the ointment here. You see, people started to take all these fabulous stupid things for granted. That's right. They lost all sense of gratitude. They forgot that all these stupid things were the result of patient hard work on the part of the stupid industry. They began to think they were entitled. They forgot that there are limits. Now, one thing is clear. Here, give me that Alka-Selzer. We are not running out of potential sources of stupidity. Stupid ideas and stupid resources occur abundantly in nature: they are all around us. But demand for stupid things has increased at such a rate that we will face shortages in many areas for some time to come. The United States is now the largest stupidconsuming country in the world by far. Production simply cannot keep pace with demand. Even Middle East supplies of extractable stupidity are not limitless, so we must be prepared to alter our way of thinking. I want to make five points.

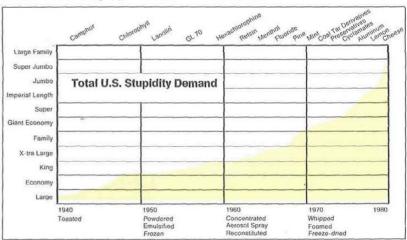

- 1. First of all. Let's get it straight. Things have changed. From now on, lemon-freshening will be *very expensive*.
- 2. We Americans will have to evolve imaginative alternatives to the stupid things we use. Silt, for instance, is one alternative additive The Stupid Group is working on now. We have large quantities of silt in

this country ready to go to work for us. Products with "a hint of lint" can take up a lot of the slack. But developing these alternatives is laborious, expensive work. Private industry can't be expected to bear the cost alone! As a minimum first step, the government must enact legislation immediately creating a silt depreciation allowance.

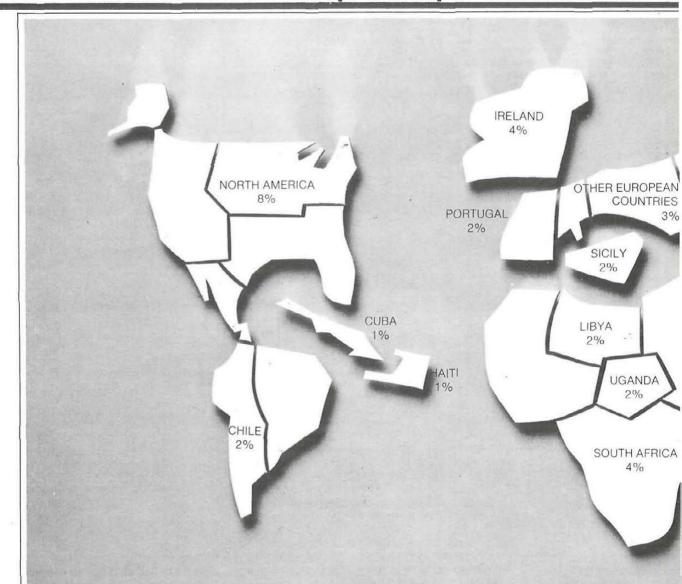

3. The present unfair balance between so-called "ecological" considerations and the legitimate aspirations of the stupid industry must be adjusted. If we are to hold our own, we must not be squeemishin extracting our vital resources where we find them. The best silt, for instance, comes from ground up landmark buildings, pulverized

statuary, and atomized caribou antlers: the so-called "common silt"
from undredged harbors is nearly
useless. Likewise, the best lint
comes from shredded oil paintings,
books, and old lace. We are especially lucky in the United States to
have many fine stands of Sequoia
trees, which are, as it happens,
excellent, efficient sources of both
silt and lint when reduced to
powder form.

- 4. Get that profit chart out of here!
- 5. Even if we completely reorder our priorities and make good use of our silt and lint, rationing of many stupid products will be necessary. The stupid industry regrets the inconvenience, but after all, it's your own fault.

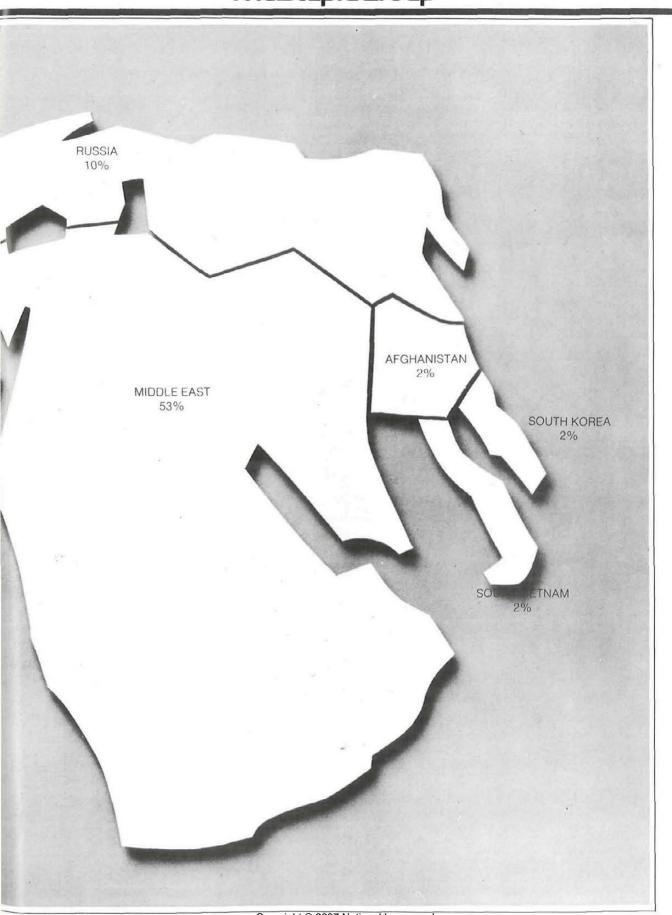

Demand for stupid products with increasingly stupid additives in increasingly stupid sizes has been growing steadily. At present rates demand will double in the next fifteen years.

The world of known stupidity reserves.

Percentages are shares of the world's known, extractable stupidity reserves in each area.

Now available. **Stupidflair Customchits**, the chits that won't stand for backchat! Stupidflair Customchits are one part of our whole new approach to scarcity. Our whole new thing. We call it "irrationing." Here's how it works. Take a piece of paper and a pencil. Now, on one side of the page, write your family's income. If the figure you have written is a *four digit number*, rip up the sheet and go back to watching television. If the figure is a *healthy* five figure number, write *just under it* the names of any prominent political figures you know personally. Now you're ready to compute your "need to buy" quotient. *Divide* total family income by distance (measured in air miles) you live from Hobe Sound, Florida. Now *add* number of buttons on your cardigan plus number of buttons (not counting "hold") on your phone. Add fifty If every pair of pants you own has a gripping mechanism that *precludes the use of a belt*. Take your bottom line figure, write a brief essay on "cream rinse", and go to your Stupid Bank, where you will be issued Stupidflair Customchits for the stupid things you need!

ALL JUST OUT, AND IN YOUR STORE.

first came the word...

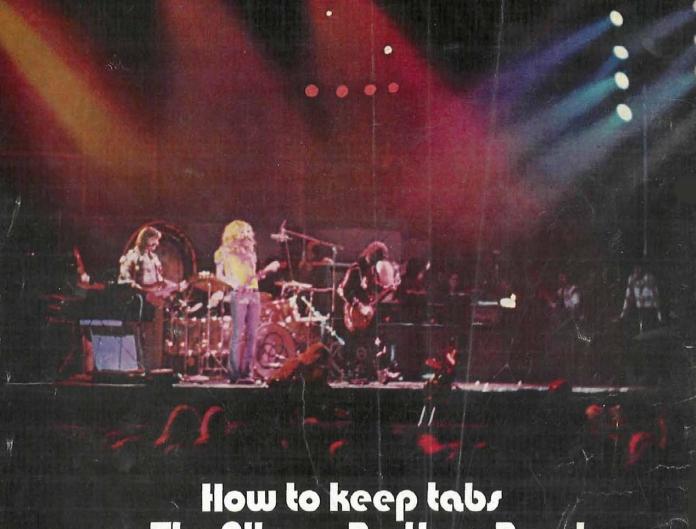

And then there was music. And then came Sony tape recorders to capture the words and music with perfect fidelity. Right from the start, Sony has always been first with the best, the newest and the broadest

selection of tape recording equipment in the world. Sony tape recorders, Sony accessories, Sony microphones, Sony recording tape. We could go on and on and on. We are. **SONY** Ask anyone.

Brought to you by SUPERSCOPE.

How to keep tabs on The Allman Brothers Band, Bob Dylan, The Who, etc.

Hearing them is great. Seeing them is fantastic.

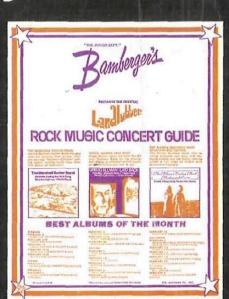

Problem is most times you don't know where or when they'll be in concert till it's too late to get tickets.

Till now.

Now there's your free copy of the Offical Landlubber Rock Music Concert Guide.

It gives dates and places where every major rock group will be playing. Weeks in advance. So you can plan for it.

The Landlubber Rock Music Concert Guide is more than just a calendar of events. It spotlights the best albums of the month. And even capsule reviews of upcoming tours.

Your free copy is available at participating stores that carry Landlubber Jeans, Shirts, Jackets, Western-wear and other beautiful clothes that fit.

Go pick up your free copy of the Concert Guide and while you're in the store, try us on for size.
