UNITED STATES PATENT OFFICE.

ALBERT D. JUDD, OF NEW HAVEN, CONNECTICUT.

TASSEL-HOOK.

Specification forming part of Letters Patent No. 52,857, dated February 27, 1866.

To all whom it may concern:

Be it known that I, ALBERT D. JUDD, of New Haven, in the State of Connecticut, have invented, made, and applied to use an Improved Tassel-Hook; and I do hereby declare the following to be a full, clear, and exact description of the said invention, reference being had to the annexed drawings, making part of this specification, wherein—

Figure 1 is an elevation of the said tassel-hook, and Fig. 2 is a vertical section of the same.

Similar marks of reference denote the same parts.

The nature of my said invention consists in an ornamental tassel-hook for upholstery, formed of a brass or other metal arm extending out from a raised plate, at the end of which arm is a porcelain knob, ornamented on its surface by a washer or metallic ornament held in place by the end of the arm itself, which passes through the porcelain knob and washer and is riveted up.

By this mode of construction an ornament can be affixed directly upon the surface of the porcelain, relieving its plain appearance and increasing its beauty, whereas in other characters of tassel-hooks no metal ornament could

be affixed on the porcelain surface, neither was said porcelain knob as securely fastened by the attachment to the back as by the arm going through said knob, as shown.

In the drawings, *a* is the ornamental metallic raised plate, to be secured to the window-casing or other place by screws or tacks, as usual. *b* is the arm attached to the plate *a*, and extending in the curved form to the circular washer *c* and end piece, *d*, that passes through the porcelain knob *e*, and is riveted up after putting over it the ornamental washer *f*. The parts are thus rendered highly ornamental, and at the same time strongly connected together.

What I claim, and desire to secure by Letters Patent, is—

The tassel-hook having the ornamental metallic washer secured to the surface of the porcelain knob by the end of the metallic arm, as a new article of manufacture.

In witness whereof I have hereunto set my signature this 17th day of October, A. D. 1865.

A. D. JUDD.
