United States Patent Office.

THOMAS GARRICK, OF PROVIDENCE, RHODE ISLAND.

Letters Patent No. 114,665, dated May 9, 1871.

IMPROVEMENT IN HOUSEHOLD IMPLEMENTS.

The Schedule referred to in these Letters Patent and making part of the same.

I, THOMAS GARRICK, of the city and county of Providence and State of Rhode Island, have invented certain Improvements in a "Household Implement," of which the following is a specification, reference being had to the accompanying drawing making part of the same, in which is shown a perspective view of said improved implement.

My said invention relates to the combination and arrangement of a number of useful tools in one implement, in convenient form for general purposes in the household, &c., and is an improvement of the household implement heretofore patented by me under date of June 29, 1869, and of the same general construction. As shown in the drawing, however, it contains some important changes from the construction set forth in the original patent, and may be described as follows:

The implement, as heretofore, is of the general form of a pair of pinchers, one handle of which is put through and works in the slot or eye in the other handle, and is adjusted to different positions therein by means of

a tooth or projection in the slot, which engages with one of the series of teeth on the other handle.

In the construction shown in the drawing are combined the following tools, viz.: a hammer, 1, a nail-puller, 2, a cover-lifter, 3, a scraper, 4, a pair of pinchers, 5 and 6, which also form an adjustable wrench, gas-burner tongs, 7, a nut-cracker and cork-presser, 8 and 9, a six-inch rule, 10, a screw-driver, 11, a box-opener, 12, and a carpet-stretcher, 13, all in form for use.

Claim.

I claim—

The improved implement, containing the several tools enumerated in combination, as shown and described, as a new article of manufacture.

THOMAS GARRICK.
