UNITED STATES PATENT OFFICE.

FRIEDRICH HUNGER, OF CLEVELAND, OHIO, ASSIGNOR OF ONE-HALF TO
SOLOMON SCHMUCK, OF SAME PLACE.

FOOT-REST FOR ROCKING-CHAIRS.

SPECIFICATION forming part of Letters Patent No. 261,718, dated July 25, 1882.

Application filed April 29, 1882. (No model.)

To all whom it may concern:

Be it known that I, FRIEDRICH HUNGER, of Cleveland, in the county of Cuyahoga and State of Ohio, have invented certain new and useful Improvements in Foot-Rests; and I do hereby declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it pertains to make and use the same.

My invention relates to foot-rests for rocking-chairs; and it consists in the combination of parts hereinafter described, and pointed out in the claim.

In the drawings, Figure 1 is an end elevation of my foot-rest, showing it attached to a chair. Fig. 2 is a front elevation of my foot-rest.

A and B are two rockers, which are preferably provided with arms *a* and *b* extending upward near their middle portions.

Pivotally secured between the rockers, preferably between the upper ends of the arms *a* and *b*, is a foot-board, C, which, if desired, may be upholstered.

Secured to and curved upward from the middle portion of one side of the foot-board C is

an arm, D, preferably made in the form of a tube, to which is adjustably secured a rod, E, said rod in turn being provided with a means for attachment to the seat of a rocking-chair. The arm D and rod E act as a connection between the chair and foot-rest, and allow of the same being adjusted nearer together or farther apart, as desired, and also act to communicate to the foot-rest an oscillating motion when the chair is rocked.

The foot-board C being pivoted, as above described, between the rockers A and B, allows of the free movement of the rockers.

What I claim is—

The combination, with the rockers A B and pivoted foot-board C, of the adjustable arm D E, the arm D being secured to the foot-board and the arm being pivotally secured to a rocking-chair, substantially as set forth.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

FRIEDRICH HUNGER.
