UNITED STATES PATENT OFFICE.

JOHN W. CAMPBELL, OF TORONTO, ONTARIO, CANADA.

HEAD-REST.

SPECIFICATION forming part of Letters Patent No. 382,949, dated May 15, 1888.

Application filed October 28, 1887. Serial No. 253,655. (No model.)

To all whom it may concern:

Be it known that I, JOHN WORTH CAMPBELL, of the city of Toronto, in the county of York, in the Province of Ontario, Canada, commercial traveler, have invented a certain new and Improved Head-Rest, of which the following is a specification.

The object of the invention is to design suitable means for supporting a head-rest in position on the body of the party using it; and it consists, essentially, in providing shoulder, arm, and body straps in connection with the head-rest, substantially in the manner hereinafter explained.

Figure 1 is a perspective view showing my improved head-rest in use. Fig. 2 is an enlarged detail of the head-rest and straps for holding the head-rest in position.

A is the head-rest, made any suitable shape.

B is an upright attached to the head-rest, and shaped to follow the contour of the neck and back of the wearer.

C are shoulder-straps, one end of each strap being connected to the head-rest A and the other end to the upright B. Each of these straps is provided with a suitable buckle, D, by which the length of the said straps may be adjusted for the purpose of fitting the party about to use the head-rest.

E are arm-straps connected to the upper portion of the upright B or to the head-rest, or to both, as the manufacturer may desire.

Loops F are formed on the ends of these straps, through which the arms of the wearer may be inserted in the manner indicated in Fig. 1. 35

G is a body strap or belt attached to the upright B and buckled around the body of the wearer, as indicated.

Should it be desired to secure the head-rest to or around the back of a seat, a suitable strap, H, may be connected to the upright in the manner indicated. 40

The head-rest may be covered with plush or other suitable material, and the straps may be made of cotton, leather, or any other material. I do not wish to confine myself to the material or to any particular dimensions. 45

What I claim as my invention is—

The head-rest described, consisting of the head-rest A, the upright B, attached thereto, the shoulder-straps C, attached to the head-rest and passed behind said upright, the arm-straps E, secured to the upper part of the upright and formed at their free ends with loops, the body-strap G, attached to the upright, and the securing-strap H, attached to said upright, all substantially as and for the purpose specified. 50 55

Toronto, October 15, 1887.

JNO. W. CAMPBELL.
