UNITED STATES PATENT OFFICE.

WILLIAM GRINSTED AND JOHN A. DARLING, OF WASHINGTON, D. C.

IMPROVEMENT IN FILE-WRAPPERS.

Specification forming part of Letters Patent No. 161,506, dated March 30, 1875; application filed March 2, 1875.

To all whom it may concern:

Be it known that we, WILLIAM GRINSTED and JOHN A. DARLING, of Washington city, District of Columbia, have invented an Improved File-Wrapper; and we hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawings making a part of this specification, in which—

Figure 1 represents a perspective of the filing-jacket closed. Fig. 2 shows the inside of the jacket open. Fig. 3 shows the outside of same.

The object of our invention is to provide a cheap and convenient adjustable filing-jacket for holding and preserving papers, files, records, &c.; and it consists in a piece of cloth, linen-lined paper, or any other suitable flexible fabric, cut in such a manner as to form a filing-jacket, and provided with strings, tapes, or straps, passing through slits or eyelets made in and near its ends and sides, allowing them to pass to the outer side for the purpose of securing its contents.

In order that those skilled in the art may make and use our invention, we will proceed to describe the exact manner in which we have carried it out.

In the said drawings, A is the inner side of the jacket, and B B the slits or eyelets through which the tapes or straps pass from the inner to the outer side. *c c* are the tapes or straps passing lengthwise and crosswise through the slits or eyelets B B.

Fig. 3 shows the outside of a jacket with the tapes or straps *c c* passed through the slits or eyelets B B at its ends and sides, leaving the face of the filing-jacket free, for printed or written notes or memoranda.

Fig. 1 represents the outside of the filing-jacket with its folds or flaps overlapping each other, in a closed condition, with the tapes or straps *c c* tied.

Having thus described our invention, what we claim as new, and desire to secure by Letters Patent, is—

As a new article of manufacture, a file-wrapper, A, provided with the tapes *c c*, and openings B B and B' B', substantially as and for the purpose described.

WILLIAM GRINSTED.
JOHN A. DARLING.
