UNITED STATES PATENT OFFICE

EMIL F. W. EISENMANN, OF NEW YORK, N. Y.

IMPROVEMENT IN COMBINED CIGAR-TIP CUTTERS AND WATCH-CHARMS.

Specification forming part of Letters Patent No. **164,984**, dated June 29, 1875; application filed June 5, 1875.

To all whom it may concern:

Be it known that I, EMIL F. W. EISENMANN, of the city, county, and State of New York, have invented a new and Improved Combined Watch-Charm and Cigar-Tip Cutter, of which the following is a specification:

Figure 1 represents a front view, and Fig. 2 a vertical transverse section, of my improved combined watch-charm and cigar-tip cutter.

Similar letters of reference indicate corresponding parts.

My invention relates to an elegant article of jewelry that may be worn attached to the watch-chain, combining, with a very ornamental appearance, the advantage of being conveniently used for cutting off the tips of cigars.

The invention consists of the combination of a watch-charm with a cigar-tip cutting device, applied as hereinafter described.

In the drawing, A represents a charm, locket, or other watch-chain attachment of suitable size, shape, and ornamentation. The charm has an aperture of the size of the tips usually cut off, and conically tapering inwardly-extending rims *b*, that approach nearer to each other at their lower parts, and leave a space between them for the cutter to pass and

cut off the tip of the cigar, which may be inserted from either side, the cut-off tip dropping at the other side. A cutter, B, with the stem *d*, slides in a guide-barrel, *d'*, and is acted on by a spiral or other spring, *e*, to carry the cutting-knife back in upward direction.

The stem end of the cutter is guided in the barrel in such a manner that in pressing on the same, the cutter is carried down between the rims and cuts off the tip.

The actuating mechanism is preferably inclosed so as to be out of view, which makes the appearance of the article neater and more attractive, while the combination forms an article of neat appearance, and considerable utility to smokers.

Having thus described my invention, I claim as new and desire to secure by Letters Patent—

A watch-charm locket, having the cigar-tip cutter applied in the manner substantially as and for the purpose described.

EMIL F. W. EISENMANN.
