# UNITED STATES PATENT OFFICE.

EMILE R. WESTON, OF BANGOR, MAINE, ASSIGNOR TO JOSEPH PARKER  
BASS, OF SAME PLACE.

## IMPROVEMENT IN BURNISHERS FOR PHOTOGRAPHS.

Specification forming part of Letters Patent No. **165,140**, dated June 29, 1875; application filed  
April 8, 1874.

### CASE B.

*To all whom it may concern:*

Be it known that I, EMILE R. WESTON, of Bangor, in the county of Penobscot and State of Maine, have invented certain new and useful Improvements in Burnishers for Photographs, &c.; and I do hereby declare that the following is a full, clear, and exact description thereof, that will enable others skilled in the art to which it appertains to make and use the same, reference being had to the accompanying drawings, and to the letters of reference marked thereon, which form a part of this specification, in which is shown a perspective view of my invention.

My improvement is intended to apply to that class of burnishers for photographs in which the card or other article is fed over the surface of a burnishing-tool heated by the flame of a lamp, gas-jet, or like device, and is designed to protect the card or other article from injury by the smoke or flame.

My device will be understood by reference to the drawing.

A shows the plate common to these machines, supporting the burnisher *b*, under

which plate the lamp or gas-jet for supplying the heat is placed. At *c* is a downwardly-projecting flange extending across the front of the plate *A*, under, or nearly under, the tool *b*. This serves to retain the smoke and flame from the heating apparatus, preventing its escape along the front of the plate, and protecting the article to be burnished as it passes over the tool. If sufficiently stout this flange also serves to stiffen the plate and burnisher.

What I claim as my invention, and desire to secure by Letters Patent, is—

In a burnishing-machine, the flange *C*, projecting downward from the burnisher-supporting plate *A*, substantially as described and shown.

In testimony that I claim the foregoing I have hereunto set my hand this 6th day of April, 1874.

E. R. WESTON.
