# UNITED STATES PATENT OFFICE.

ROBERT L. WEED, OF NEW YORK, N. Y.

## IMPROVEMENT IN CIGAR-PIPES.

Specification forming part of Letters Patent No. **169,501**, dated November 2, 1875; application filed November 7, 1874.

*To all whom it may concern:*

Be it known that I, ROBERT L. WEED, of the city, county, and State of New York, have invented a new and useful Improvement in Cigar-Pipe, of which the following is a specification:

This invention relates to a device to be used in smoking tobacco in places where pipes are objectionable; and consists in a hollow sectional tube, resembling a cigar, made of wood or other suitable material, constructed substantially as hereinafter described.

In the accompanying drawing, Figure 1 is a side view of the cigar-pipe. Fig. 2 is a longitudinal section of Fig. 1, taken on the line *x x*.

Similar letters of reference indicate corresponding parts.

A represents the cigar-pipe, made of wood, composition, or of any material suited for the purpose. This cigar-pipe is made in two parts, B and C, which are connected together by means of screw-threads. E is the aperture in which the tobacco is placed for smoking. F is a small orifice, extending from the mouth end G into the orifice E, the two parts form

a tube, through which the smoke is drawn into the mouth, the tobacco being ignited the same as a cigar. The cigar-pipe has every appearance of a cigar when in use.

Having the middle joint and cavity decreasing in both directions therefrom, the tobacco may be readily compressed by the finger into both sections, so as to form a filling corresponding to that of a cigar, while the smoker can always secure and know the kind and quality of tobacco which he is about to use.

I am aware that a tube in one or two parts has been heretofore used for the same purpose; but said tube is of a different shape from mine, and not so well adapted in construction to the same purpose.

What I claim is—

A two-part tobacco-pipe having a middle joint and a cavity decreasing therefrom gradually toward each end, as and for the purpose specified.

ROBERT L. WEED.
